ARMEGA

The ARMEGA offers unparalleled dominance for the modern racer: bringing ULTRA HD lens clarity to motocross. Experience definition and subtlety never before viewed through the lens of a goggle. Add to that our proprietary HiPER contrast-enhancing lens technology and you'll feel the depth of terrain as you're commanding past it.

This premium technology is injection-molded into a shatterproof lens that boasts an enhanced field of vision and impact protection. The 6-point locking-tab integration secures the lens and works in unison with a quick-change system enabling you to switch between lenses with a couple of simple clicks.

A bonded, dual-injected frame incorporates a next generation sweat management system that collects sweat as your ride intensifies and forces it away from the lens and out of the goggle through an integrated channel in the frame. Force air intakes in the frame promote increased airflow to ensure fog-free vision, despite heated efforts overcoming sub-par competition.

Want a goggle designed to give it 100% deep in the battlegrounds of motocross? Look no further than the ARMEGA

ULTRA HD

Our signature 100% ULTRA HD lenses are the result of decades of passion, design, craftsmanship and research. Through extensive development and testing, we've engineered category defining technology bringing unmatched optical clarity to motocross.

As the lens of choice for the worlds best racers, ULTRA HD integrates with a shatterproof and impact resistant polycarbonate material molded specifically for zero optical distortion. The result is a lens that's engineered to maximize protection while maintaining the clearest, most accurate vision on the track.

ULTRA HD. The next revolution in motocross vision technology.

HiPER

It's simple. Humans see three primary colors - Red, Green and Blue. Human vision begins to distort where these three colors overlap.

100% HiPER Lenses proprietary filter out these crossovers, resulting in greater contrast and even more vibrant colors.

By ramping up contrast, riders experience depth-defining vision with unmatched perception to feel every detail of terrain before commanding past it.

REPLACEMENT LENSES - BARSTOW

The Barstow replacement lens is a scratch-resistant, anti-fog Lexan lens that increases visibility while maintaining the durability to take on moto after moto or long desert rides. Fitted with integrated lens pins for seamless tear off application.

DALLOZ LENSES

Our Barstow Dalloz replacement lenses are crafted exclusively at the state of the art Dalloz Sunoptics facility located in Saint-Claude, France. For more than 50 years, Dalloz Sunoptics has been driven by the philosophy of transforming new ideas into aesthetically pleasing, high-performance technical lenses. The cylindrical shape of the Dalloz lens shifts visual distortions to the periphery, where the lens is edged, creating flawless clarity and excellent peripheral vision without any blurred zones. The durable lens works in union with the minimal frame design of the Barstow to offer superior visibility in any conditions.
