# ABOUT AKRAPOVIČ

Akrapovič is the manufacturer of premium exhaust systems for motorcycles and performance cars. It is a pioneer in the innovative use of titanium and super-alloys, and is at the forefront of carbon-fibre components. Akrapovič exhaust systems are renowned for increasing performance, unmistakable sound, innovative design, lightweight construction, quality workmanship, and durability.

Founded in Slovenia over 33 years-ago by former motorcycle racer Igor Akrapovič, the brand has grown to international prominence. Through racing, which has led to winning more than 175 world championship titles and setting the highest design standards – leading to Akrapovič products winning Red Dot awards – Akrapovič is consistently at the forefront of exhaust technology.

The technical ability and support Akrapovič provides to MotoGP, WorldSBK and MXGP teams to give them the competitive edge follows the same heritage and knowhow that is transferred into road and off-road systems. Increased performance, improved throttle response, more power, and greater durability are all directly related to the research, development, and testing that every Akrapovič exhaust is subjected to in the racing arena, giving it a pedigree that few others can match.

The company operates from state-of-the-art factories in Slovenia, where facilities include an on-site titanium foundry, metallurgical laboratory, and hi-tech production machinery. Akrapovič employs over 1.800 staff and distributes its products in more than 86 countries.

## REASONS WHY

### INCREASED PERFORMANCE

Akrapovič exhaust systems for motorcycles and scooters are designed to perform. Developers and engineers have created unique exhaust systems for all types of motorcycle racing and it is from this knowledge that Akrapovič produces the same high-quality product for all types of bikes. By using high-grade materials, reducing weight, and adding more horsepower, Akrapovič strives to get the most out of every motorcycle. All systems are designed to significantly improve the bike's throttle response for better overall performance. When riding a road bike with an Akrapovič race-inspired exhaust, you will feel the difference immediately.

### ADVANCED TECHNOLOGY

Developed with and using the latest production techniques to deliver benefits to the rider. Whether it is a world championship-winning machine or the latest road-going Superbike, Akrapovič creates a perfectly designed and balanced exhaust system, with optimum flow and heat resistance. By carefully selecting and testing the best materials to ensure optimum strength, lighter weight, and unique design, we make sure that every system is a progression to greater performance. Akrapovič is a pioneer in exhaust development and manufacturing. With an in-house titanium foundry – making it possible to cast the most complex shapes – high-tech machinery, precision welding specialists, and a highly trained and dedicated workforce, Akrapovič provides the best possible solutions for each exhaust system.

### QUALITY WORKMANSHIP

All products are produced with passion and knowhow, meeting the highest quality standards. Over 95% of the range is produced in-house by highly experienced and skilled employees, in combination with the latest production technology. When developing and producing products, Akrapovič pays attention to every individual aspect: from carefully selected designs, the best materials, special reinforcements, in-depth testing, and final coatings to the packaging. Every single detail matters, to make sure an Akrapovič exhaust is the best available.

### THE AKRAPOVIČ SOUND

Akrapovič exhaust systems sound like no other! No wonder, because having mastered the art of sound engineering over the years the company has found a perfect harmony in the unique Akrapovič sound. You do not need to see it to know that it is an Akrapovič – just the right notes at the right time give you that unmistakable sound. The pure sound of racing!

### DESIGN

Akrapovič exhausts are designed with the ideal balance of perfection and performance because this is how the company sees its products. Akrapovič is the leader in exhaust technology and is constantly setting new standards and trends in the exhaust system industry. All of its systems are individually designed to fit in with the lines of every machine and enhance the overall appearance of any bike while delivering the best design for optimal performance. Akrapovič is continually striving to find the best solutions with the latest high-tech components, and it is this dedication that makes the company certain that an Akrapovič exhaust is the most stylish accessory for your bike and that there is no better-looking exhaust system!

### DURABILITY

Using race-proven materials from our involvement in the world of high-class motorsports, all Akrapovič exhausts only use the best. Our highly skilled engineers extensively test the materials – and the final product – to ensure that each system meets the highest standards. The products we manufacture are extremely durable and race-proven, having been pushed to their limits on the track, so that riders enjoy the benefits on their machines.

# Street

Akrapovič designs and produces road bike exhaust systems with the passion and experience that it has garnered from many years of success working at the highest level of motorcycle racing. Every system developed for a road bike is created with the same exceptional attention to detail that we give to the world's best racers, including MotoGP and World Superbikes.

All exhausts developed by Akrapovič technicians for race bikes are totally unique, and it's this knowledge that they transfer to road bikes. The goal is to deliver increased performance throughout the entire rev range, reduce weight, improve throttle response, and extract additional power from the engine. As such, an Akrapovič exhaust represents an important element in the motorcycle's evolution towards ever greater performance, be it for the racetrack or the road.

All Akrapovič exhaust system measurements are made on our computer-controlled chassis dynamometers. With Akrapovič products, you can experience the same performance, adventure, and thrill as the best riders in the world.

All of these outstanding features – including the unique Akrapovič sound – are found in our range of Slip-On, Racing, and Evolution Line exhaust systems for world-renowned road brands: Aprilia, BMW, Ducati, Honda, Kawasaki, Suzuki, Triumph, Yamaha, and many more.

# EVOLUTION LINE

Akrapovič titanium Evolution Line systems are designed for riders that demand maximum performance from their motorcycle.

- Made of titanium
- Significantly lighter compared to the stock exhaust system
- Feature exceptional production quality and high-tech materials
- Used and tested by top factory teams in motorcycle racing
- Increased engine performance combined with pure racing sound output
- Perfect welds and a combination of racing materials like carbon fiber and titanium muffler outer sleeve make these systems stand out from the crowd and leave no doubt of their racing heritage

The Racing Line is a complete high-quality stainless steel exhaust system made with close attention to detail. Its unique design enables it to obtain the maximum output for each specific model of motorcycle while significantly reducing overall weight for top performance in everyday riding or even in the most challenging races. It is identical to the Evolution Line exhaust system apart from the material.

- Made of stainless steel
- Designed for riders that demand maximum performance from their motorcycle
- Lighter compared to the stock exhaust system
- Feature exceptional production quality and increased engine performance combined with pure racing sound output
- Combination of racing materials like carbon fiber and titanium muffler outer sleeve and the end cap gives these exhaust systems a pure racing touch

# SLIP-ON LINE

**Slip-Ons represent the first step in the exhaust system tuning process, and they offer a great balance between price and performance.**

- Change the nature of your bike by adding more power, improved performance, and the unique Akrapovič sound
- Everything's packed in stylishly designed Slip-On exhaust systems
- Beautifully crafted exhaust system with a carbon fiber and titanium/stainless steel muffler outer sleeve
- The durability of all materials is track tested for optimum road performance

## CATALYTIC CONVERTERS

Akrapovič uses performance-oriented catalytic converters that give you all the sound and performance upgrades you're used to with Akrapovič exhaust systems.

- Honeycomb metal structure that incorporates precious metals (palladium, rhodium, and platinum) into its surface
- These metals convert the poisonous carbon monoxide and unburned hydrocarbons found in exhaust gases into non-toxic carbon dioxide and water vapor

# PROTECTION BARS

## LOWER PROTECTION BAR SET

- This is the first product of its kind in the Akrapovič range. It is constructed from sandblasted, lightweight titanium, fully utilizing the company's expertise in the field of titanium technology. It is designed from scratch and offers an approximately 40% weight savings over comparable steel versions, high strength, and corrosion resistance
- These bars are precision TIG welded, equipped with laser-cut and finely machined 8 mm flanges to provide a perfect fit and strength
- They fit perfectly with the bike's existing components and offer the possibility of attaching extra bags and fog lights or spotlights to the bar
- They weigh just 3,88 kg and have no restriction on the lean angle. Fully evaluated through numerous tests and deformation analyses, the highly stable construction is partly fixed to the chassis to distribute any impact through the bars. The product is finished with an engraved logo labelled Titanium to emphasize this product's important characteristic
- The Lower Protection Bar Set fits also on BMW R 1250 GS Adventure model

FITS MODEL	TYPE	PART #

## UPPER PROTECTION BAR SET

- Constructed from sandblasted, lightweight titanium, this is the first product of its kind in the Akrapovič range, and it fully uses the company's expertise in titanium technology. It is designed from scratch and offers an approximately 40% weight savings over comparable steel versions, high strength, and corrosion resistance
- These bars are precision TIG welded, equipped with laser-cut and finely machined 8 mm flanges to provide a perfect fit and strength
- They fit perfectly with the bike's existing components and offer the possibility of attaching extra bags and fog lights or spotlights to the bar
- The product weighs just 2,38 kg. Fully evaluated through numerous tests and deformation analyses, the highly stable construction is partly fixed to the chassis to distribute any impact through the bars. The bars are finished with an engraved logo prominently labelled Titanium to emphasize this product's important characteristic
- Fitment notice: The Upper Protection Bar Set do not fit on BMW R 1250 GS Adventure model

# SCOOTER

Akrapovič is at the forefront of design and innovation for premium exhaust systems for motorcycles and performance cars, and it's this knowledge and expertise that make the Akrapovič exhaust range the best you can buy for your scooter — with high-quality components and materials, increased performance, significant weight reduction, innovative designs, durability, perfect fit, and the unmistakable Akrapovič sound.

All of these outstanding features are found in our range of EC/ECE type-approved Slip-On and Racing Line exhaust systems for world-renowned scooter brands: Aprilia, BMW, Derbi, Gilera, Honda, Kymco, Peugeot, Piaggio, Sym, Vespa, and Yamaha.

# RACING LINE

Using the finest carbon fiber, quality stainless steel, and all the other benefits of Slip-On Line systems, the Racing Line further improves performance by replacing the stock exhaust's front section of link pipes and manifold.

- Give maximum engine performance
- Reduce overall weight
- Offer sound and design exclusivity
- Attention to detail can be seen in each section of the Racing Line exhaust systems
- The finest exhaust systems available for scooters
- Some models available in black

# CATALYTIC CONVERTERS

Akrapovič uses performance-oriented catalytic converters that give you all the sound and performance upgrades you're used to with Akrapovič exhaust systems

- Honeycomb metal structure that incorporates precious metals (palladium, rhodium, and platinum) into its surface
- These metals convert the poisonous carbon monoxide and unburned hydrocarbons found in exhaust gases into non-toxic carbon dioxide and water vapor

# OFFROAD

Akrapovič offers a wide range of premium performance exhaust systems for the world's top offroad motorcycles.  
Akrapovič has cooperated with and supported racing teams since it was founded

The exhaust systems are developed by the same team of engineers who work with championship-winning partner racing teams in World Motocross, Enduro, Supercross and other categories.

All products are tested in the company's labs using their own dynamometers.  
You can experience the same adrenaline, joy and power as the best riders in the world.

# EVOLUTION LINE AND RACING LINE

**AKRAPOVIĆ**

## EVOLUTION LINE

- The flagship of the Akrapovič exhaust system range
- Used and tested by top factory teams in motorcycle racing
- Each model is unique and dedicated to maximizing the engine's performance, while reducing overall weight for optimized overall handling of the motorcycle
- Made entirely of titanium
- Exhaust systems meet FIM noise limits, feature a more durable welded bracket and titanium end cap
- Performance exhaust systems also feature a new coating for the silencer outer sleeve giving better scratch resistance and easier cleaning

## RACING LINE

- High-quality exhaust system made from stainless steel tubes and a titanium muffler outer sleeve with precision handcrafting and attention to detail
- Its unique design yields the maximum output for each specific motorcycle model while significantly reducing overall weight for top performance
- Identical to top-range Evolution Line exhaust system. The only difference is in the material used
- Exhaust systems meet FIM noise limits, feature a more durable welded bracket and titanium end cap
- Performance exhaust systems also feature a new coating for the silencer outer sleeve giving better scratch resistance and easier cleaning
