SUPERTECH M10 ALLOY HELMET

HELMETS

- Lightweight outer shell is constructed from technologically advanced carbon in four sizes for best fitting.
- ECE 22.05 Certification.
- Multiple density inner liner.
- Fitted with E-2, latest generation of MIPS, integrated low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head.
- Visor attached to helmet shell with patented system that will allow easy release in case of crash.
- Adjustable top pad height (Alpinestar's patented A-Head system).
- Maximized ventilation with 19 intakes and 5 exhaust ports.
- Side shell shape coupled with soft EPP foam prevents damage to collarbone in event of crash.
- Emergency release and removable cheek pads, 3D contoured foam.
- Removable comfort liner, anti-moisture and anti-bacterial fabrics.
- Hydration prepared.
- E-Ject prepared.

S - M5 COMPASS HELMET

HELMETS

- Lightweight outer shell is constructed from a technologically advanced impact resistant thermoplastic in two sizes.
- The inner and outer surfaces are engineered to minimize the effects of oblique impacts.
- Multiple density inner liner to ensure the correct density in the correct area for enhanced impact absorption
- Patented visor release system ensures the visor is released with the correct pre-determined amount of force, irrespective of the angle of impact.
- Maximized ventilation and high levels of heat transfer exchange thanks to multi-air inlets and exhaust ports.
- The visor has been designed to direct air into the ports for enhanced airflow.
- Side shell couple with soft EPS foam prevents damage to collarbone in the event of a crash.
- Emergency release system and removable cheek pads permit the safe and easy removal of the cheek pads while the helmet is still on, while the 3D contoured foam ensures rider comfort.
- Removable comfort liner with SILVERPLUS® treated anti-bacterial fabrics for excellent moisture wicking, effectively drawing perspiration away from the skin.
- Anti-microbial liner is removable and washable.
- Hydration tube channels are integrated into the helmet's cheek pads for convenience and performance.
- Soft textile chin strap is 26 mm and is wider than certification requirements for optimal safety and rider comfort.
- Stainless steel D-rings to ensure a tight and secure fit.
- A size Medium weighs 1260 g (ECE).
- ECE 22.05 Certification.

SUPERTECH FOSTER JERSEY

MOTOCROSS / OFF-ROAD

- Ultra-lightweight advanced, premium knitted stretch fabric main construction for moisture-wicking and performance fit. Jersey features a more fitted, lightweight design.
- Chassis consists of stretch mesh chassis with open mesh inserts on arms and side torso for high levels of cooling airflow.
- Innovative, fully floating arm construction offers excellent freedom of movement.
- Neck and sleeves feature fully tape-welded hems for reduced weight and improved levels of comfort.
- Pre-curved sleeves for maximum comfort and performance fit.
- Extended rear design helps maintain a perfect riding fit.
- Sublimated fade-resistant graphics.

SUPERTECH FOSTER PANTS

MOTOCROSS / OFF-ROAD

- Meticulously designed to a new pattern keeping the pant perfectly positioned while riding aggressively and offering unrivalled levels of movement, flexibility and comfort.
- Main shell extensively constructed (80%) from advanced stretch rip-stop fabric for freedom of movement. Textile fiber composition specifically developed by Alpinestars to offer high levels of mechanical properties, such as strength, elasticity and durability.
- 600 Denier reinforcements on seat area provide seam strength, durability and critical coverage.
- Dual-layer 600 Denier knee panel for durability and freedom of movement.
- Pre-curved panels for an optimal fit.
- Strategically positioned stretch mesh inserts offer cooling comfort and freedom of movement.
- Front and back mesh panels for enhanced airflow.
- Innovative internal goat leather leg reinforcements with 3D shape surrounded a high resistance stretch Kevlar panel to provide heat resistance, grip, comfort and durability.
- Innovative double waist Velcro closure system with two straps and a high resistance ratchet system ensures a precise, personalized and secure fit.
- Leg cuff features stretch mesh insert for easy on and off.
- Silicon print on inner waist to keep the pants in position.

TECHSTAR FACTORY JERSEY

MOTOCROSS / OFF-ROAD

- New design to offer improved fit and reduced material construction.
- High resistance main 215 g knitted fabric chassis features a new pattern for enhanced rider comfort and freedom of movement.
- Lightweight, vented poly-fabric main chassis construction for moisture-wicking and physical performance enhancement.
- Perforated mesh inserts around collar for excellent breathability, especially when using Alpinestars BNS neck support.
- Extensive breathable on side torso and inner arms for excellent airflow and breathability.
- Pre-curved sleeves for maximum comfort and performance, with a non-stitched armpit construction for additional rider comfort.
- Extended rear for compatibility with Alpinestars' MX pants.
- Comfort neck collar and raglan construction for easy entry and exit.
- Seamless collar and cuffs for weight-saving and durability.
- Wrist cuffs feature stretch inserts for excellent fit and convenient in and out.
- Sublimated fade-resistant graphics in exciting new colorways.

TECHSTAR PHANTOM PANTS

MOTOCROSS / OFF-ROAD

- Multi-panel, poly-fabric construction with PU coating for excellent strength and durability.
- New pattern and waist construction to keep the pant perfectly positioned during all riding movements.
- Innovative, strategically positioned four-way stretch panels for freedom of movement and riding fit.
- Localized perforation zones allows for cooling airflow and comfort.
- 'Babel' knee design features a pre-bent, reinforced and padded 3D knee construction with hidden stretch spandex expansion gusset for excellent fit in the riding position and unrivalled freedom of movement.
- Pre-curved panels for an optimal riding fit.
- Flat seam construction for enhanced rider comfort.
- Poly-fabric reinforcement on the seat area provides high levels of abrasion resistance.
- 3D injection molded rubber logos and details for additional durability.
- Silicon grip on inner waist helps keep garment in position.
- Inner hip pocket for safe key/coin storage.
- Innovative internal goat leather leg reinforcements for additional durability.
- Innovative double waist Velcro closure system with two straps and a high resistance ratchet system ensures a precise, personalized and secure fit.
- Leg cuff features stretch mesh insert for easy on and off.
- Liner free construction for reduced material volume, lightness and practicality.

VENTURE R JACKET

MOTOCROSS / OFF-ROAD

- A technical off-road and Enduro riding jacket that has been developed and tested in the most grueling conditions such as the Dakar, the Venture Jacket is highly robust and durable with reinforced stitching, a rip-stop poly-fabric main shell and plenty of convenient storage options. Optimized for use with Alpinestars Bionic Neck Support, this jacket can be adapted to suit every environment thanks to effective ventilation, generous storage provisions and removable sleeves.
- 600D Rip-stop nylon and polyester fabric main chassis construction for excellent resistance against cuts, tears and abrasion.
- Zippered air intake and exhaust vents are strategically positioned for optimized airflow that can be controlled according to the rider's needs.
- Main shell textile incorporated water resistant treatment for improved weather performance.
- Two fastening front hand cargo pockets, one zippered waterproof chest pocket, plus a large back utility pocket offers secure and convenient storage of essential belongings.
- Cuff adjustment closure system for snug fit.
- Features elbow and shoulder PU reinforcement for additional abrasion resistance.
- Stretch panel on forearms to increase flexibility and movement.
- Reflective insert.
- Slim collar construction with stretch main fabric and microfiber comfort inner lining.
- BNS loops fastening to seamlessly incorporate neck supports.
- Pre-curved sleeve construction reduces riding fatigue.
- Detachable sleeves mean the jacket can be worn as a vest.
- Inner water hydration compartment.
- Inner pocket compartments for convenient storage.
- Waterproof chest pocket for real-world practicality.
- Microfiber comfort edge on collar and cuffs.

VENTURE R JERSEY

MOTOCROSS / OFF-ROAD

- A lightweight jersey optimized for airflow and comfort on long or short rides, the Venture Jersey incorporates rip-stop reinforcements and strategically positioned mesh inserts.
- Multi-material poly-fabric construction with robust rip-stop fabric on exposed areas for increased durability.
- Vented mesh strategically positioned to maximize breathability.
- Mesh back panel for high levels of breathability and an enhanced fit.
- Elbow and shoulder PU film reinforcement for additional strength in key areas.
- Pre-curved sleeve construction reduces riding fatigue.

VENTURE R v2 GLOVE

MOTOCROSS / OFF-ROAD

- A durable, multi-material short cuff off-road glove with excellent comfort features, the Venture R Glove incorporates a stretch textile and mesh chassis and synthetic suede palm reinforcements for high levels of durability and improved feeling with the bike's controls.
- Stretch textile top hand main construction plus synthetic suede palm for optimized levels of comfort, fit and durability.
- Suede palm features reduced material design for improved grip.
- Suede side of hand and palm reinforcement zones for durability.
- Strategic mesh inserts and localized perforation zones on palm and finger for improved breathability.
- Padded side-palm reinforcement for wrist-bone coverage, plus 2 mm padding on fingers for additional comfort.
- Alpinestars ergonomic stretch insert between palm and thumb for movement.
- Embossed logo, padded suede knuckle for effective protection against impacts.
- PU laser laminated zones on backhand for improved abrasion resistance.
- PU laser laminated grip areas on palm and fingers for improved lever control.
- Finger bridge on third and fourth finger to prevent finger separation in the event of an off.
- Slim closure system for a safe, secure and optimized fit.

SMX-E GLOVE

MOTOCROSS / OFF-ROAD

- Ergonomic, lightweight and with a stretch chassis, the CE-certified SMX-E Glove incorporates a synthetic suede palm for durability and a covered knuckle with sturdy finger protectors for superior protection.
- Off-road glove with a synthetic suede palm for durability.
- Embossed and padded side reinforcement patch for additional durability.
- TPR protection on fingers for enhanced levels of protection.
- GRIP laser lamination on flap for enhanced levels of grip.
- Short stretch cuff for a streamlined design.
- Extended ergonomic stretch insert on palm for enhanced flexibility.
- Thumb and palm reinforcement patches for durability.
- Rolling palm on index finger.
- Viscoelastic protective knuckle for protection against impacts.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - EN 13594 2015, Level 1 KP.

THERMO SHIELDER GLOVE

MOTOCROSS / OFF-ROAD

- A Motocross/Off-road glove designed to be comfortable, protective and lightweight. It's warm too, thanks to the full Neoprene construction.
- Off-road insulated full Neoprene glove for high levels of warmth in cold conditions.
- Synthetic suede palm for enhanced durability.
- Perforated thumb and side palm reinforcement patches for additional durability.
- PU laser lamination on backhand for superior protection.
- Silicon print on palm and fingers, flap and puller for ease of use.
- Short cuff for less bulk.
- Extended palm puller for easy on and off.
- Stretch Fourchette for flexibility.
- Rolling palm on backhand and index.

DUNE GLOVE

MOTOCROSS / OFF-ROAD

- With a convenient neoprene slip-on cuff, stretch textile chassis, localized perforation zones and suede reinforcements, the short cuff Dune Glove is purpose-built for motocross, offering high levels of grip, durability and comfort.
- Convenient slip-on design for easy in and out and excellent levels of comfort and fit.
- Lightweight stretch fabric main chassis for optimized fit and breathability.
- Single layer suede palm and offers excellent sensitivity on bike's controls.
- Localized perforation for strategic ventilation and focused airflow.
- Suede reinforcements on palm and thumb for durability and comfort.
- Silicone patterning on first two fingers and palm for grip and riding control.
- Stretch textile finger sidewalls for freedom of movement.
- Stretch insert in adductor (palm and thumb) for improved hand movement and lever control.
- Pre-curved finger construction reduces fatigue.
- Slim Airpene stretch slip-on cuff construction for a safe, comfortable and customized fit.

NEO GLOVE

MOTOCROSS / OFF-ROAD

- With strategic synthetic suede reinforcements, a stretch soft shell chassis, localized perforation zones and stretch finger sidewalls, the Neo Glove offers high levels of grip, durability, comfort and freedom of movement.
- Suede synthetic leather palm construction for grip and comfort with rubberized finger tips.
- Anatomical palm side-seam for precise fit and sensitivity.
- Neoprene covers the back of the hand for great insulation in cold and damp conditions.
- Elastic and hook and loop grip wrist closure for a comfortable and secure fit.
- Sonic protection and logos to prevent thread puncture holes.

YOUTH RADAR GLOVE

MOTOCROSS / OFF-ROAD

- Lightweight and with excellent comfort features, the Alpinestars Radar Glove incorporates a single-piece spandex upper and synthetic suede palm reinforcements for high levels of comfort and improved feeling on the bike's controls.
- Ergonomic chassis and reduced material design result in a supremely lightweight, comfortable glove.
- Lightweight, single-piece stretch upper construction gives excellent flexibility.
- Perforated, single layer suede palm is breathable and offers excellent sensitivity on bike's controls.
- Reinforced thumb construction increases durability and gusset for improved flexibility.
- Innovative stretch insert in palm and thumb area for improved hand movement and lever control.
- Suede reinforcements on third and fourth fingers for added abrasion resistance.
- Convenient slip-on design for secure, customized fit.
- Silicone grip patterning on fingers for improved riding control.
- Cuff construction with built-in Velcro strap closure system for a safe, comfortable and customized fit.
- Pre-curved finger construction reduces fatigue and improves comfort.

AMMO PANTS

MOTOCROSS / OFF-ROAD

- Back yoke is made of solid poly-fabric to guarantee freedom of movement.
- Advanced four-way stretch main construction for freedom of movement with a race-derived fit.
- Soft stretch back panel from the upper thigh to the bottom of the leg provides increased comfort and flexibility.
- Internal comfort liner made of an extensive lightweight mesh with stretch panel inserts for improved feel and function.
- Pre-curved, ergonomic leg construction for improved performance in the riding position.
- Heavy poly-fabric reinforcement on the seat area and inner leg panels provide superior abrasion resistance.
- Leather reinforced inner-leg panels for heat resistance, grip and comfort.
- Innovative 3D knee construction and expansion panel designed to accommodate knee protectors.
- 3D injection molded rubber logos for durability.
- Ratchet closure with dual waist adjustment pull-tabs for safe, personalized fit.
- Convenient interior hip pocket for key/coin storage.

BNS TECH-2 NECK SUPPORT
PROTECTION

- The BNS Tech-2 is constructed from an advanced, high-performance fibre polymer compound to offer:
- Complete design facelift & technical upgrading including lightweight rear and chest padding and updated chinplate design.
- Structural integrity and frame strength against heavy impact energies during a crash.
- Ultra-lightweight performance and comfort while riding.
- Less weight than its predecessors.
- Resilience to low temperatures, below 0 °C.
- The BNS Tech-2 is designed to provide a customizable, secure and personalized fit with the SAS (Size Adapter System) for a versatile fitment in size ranges XS-M and L-XL.
- The Lycra®-laminated foam padding kits are adaptable and the interchangeable EVA foam pads allow compatibility with body protection systems.
- The lightweight Strap System can be worn over or under the jersey.
- The BNS Tech-2 incorporates a bio-organic engineering design for superb ergonomics:
- Rear stabilizer promotes PFR (Progressive Force Relief) and dissipates energy loads by transmitting them across the back and shoulders and away from spine (thoracic vertebrae), and is connected to the frames via pivot key.
- Frame construction promotes improved contact with helmet during impact – including rear support edge that fits closer to the body, extra width to account for different helmet sizes and raised chest to reduce hyper-flexion.
- Innovative quick-release locking system for rapid and efficient fitting/removal offers secure and convenient closure.
- Compressed EVA foam compound padding to distribute the impact force over the widest area, yet remain lightweight.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
- Category 2 under the PPE Directive EU 2016/425.

SEQUENCE LS PROTECTION JACKET

PROTECTION

- The back protector is constructed from a high performance polymeric material blend for optimized flexibility and excellent weight saving properties.
- The chest, back, shoulder and elbow protectors are highly perforated for maximum breathability and ventilation.
- Ergonomic protectors contour to the natural curve of the back ensuring optimum fit while riding.
- Silicon BNS pull tabs for an easy and safe engagement of the BNS.
- Adjustable and removable elastic belt.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Back protector - EN 1621-2:2014 Level 1.
 - Chest protector - EN 1621-3:2018 Level 1.
 - Shoulder and elbow protectors - EN 1621-1:2012 Level 1.

BIONIC PLUS JACKET

PROTECTION

- Perforated back protectors feature triple-layer EVA compound padding for good shock absorption.
- Shoulder and elbow protectors feature softer formulation PU foams for excellent ventilation and flexibility.
- Silicon BNS pull tabs for an easy and safe engagement of the BNS.
- Technical, elastane stretch mesh main construction is highly breathable and retains shape.
- Reduced material construction on underarms and arms for ventilation and weight saving.
- Slim lined elbow protectors provide excellent impact protection and are asymmetric to offer optimized left/right fit.
- Removable upper chest and back puck accommodate fitment of Alpinestars BNS.
- Thermoformed chest and kidney protector padding.
- Premium, auto-locking YKK zips on main frontal closure and on detachable sleeves.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Elbow and shoulder protectors - EN 1621-1:2012 / Level 1.
 - Back protector - EN 1621-2:2014 / Level 1.

BIONIC ACTION JACKET

PROTECTION

- Back protector developed in three waist to shoulder dimension in order to cover all the body size.
- All protectors are constructed from a high performance polymeric material blend for optimized flexibility and excellent weight-saving properties.
- All protectors are highly perforated for maximum breathability and air ventilation.
- Single injected compound shells constructed with a back integrated grid structure which absorbs and dissipates impact forces.
- Shells are vented and channelled to improve airflow and prevent heat build-up.
- Protectors are ergonomically contoured to the natural curve of the back ensuring optimum fit while riding. Back protector segments lock to lessen overextension of the back.
- Removable upper back puck for BNS compatibility.
- Silicon BNS pull tabs for convenient and safe engagement of the BNS.
- Shoulder and elbow straps for a customized fit.
- Kidney belt to tighten the back protector to the back.
- New technical elastane main construction is highly breathable and retains shape.
- Premium auto-locking YKK zips on main frontal closure.
- Comfort thermoformed padding on the shoulder.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Elbow and shoulder protectors - EN 1621-1:2012 / Level 1.
 - Back protector - EN 1621-2:2014 / Level 1.
 - Chest protector - EN 1621-3:2018 / Level 2.

STELLA BIONIC ACTION JACKET

PROTECTION

- Back protector features grid technology which provides enhanced weight saving and ventilation.
- Special ergonomic design for the female form.
- Shoulder and elbow PU foam protectors feature a soft formulation for superior ventilation and flexibility.
- Silicon BNS pull tabs for an easy and safe engagement with the BNS.
- Elastic kidney belt system for an optimum fit.
- Removable back puck accommodates fitment of Alpinestars BNS.
- Premium, auto-locking YKK zips on main frontal closure and detachable sleeves to ensure secure fitting.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Stone shield - EN 14021:2003.

A-10 FULL CHEST PROTECTOR

- Back and chest protectors feature embedded grid technology under the shells which absorbs and dissipates impacts forces.
- Grid technology cell system enables greater flexibility and air ventilation while allowing for significantly reduced weight.
- Plastic shells are constructed from a high performance polymeric material blend for optimized flexibility and excellent weight saving properties.
- Plastic shells feature perforation zones and air channelling for excellent breathability and ventilation.
- Modular design to allow for addition of BNS neck support.
- Removable back puck for BNS compatibility.
- Removable upper front panel for BNS compatibility.
- Silicon BNS pull tabs for convenient and safe engagement of the BNS.
- Modular design means the protector can be worn in various configurations allowing rider to use it in different riding situations and environments.
- Removable EVA padding on biceps with a locking system on the shoulder pad keeps the shoulder protector in the correct position.
- Thermoformed padded chassis for maximum comfort and personalised, close-to-the-body fit.
- Side adjustable kidney belt allows for various fit sizes and ensures protection remains close the body at all times.
- Features Alpinestars quick release attachment system for convenient in and out.
- Comes in international sizes XS/S – M/L – XL/2XL.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Back protector - EN 1621-2:2014 Level 2.
 - Chest protector - EN 1621-3:2018 Level 2 (Full chest).
 - Shoulder protectors - EN 1621-1:2012 Level 2.

A-4 MAX CHEST PROTECTOR

- Triple layer chest protector features a highly perforated impact absorption insert for high levels of ventilation and protection.
- Features a Cell Technology back protector.
- Removable shoulder pads for high levels of customization.
- Extended padding to offer more protection against tire roost without obstructing arm movement.
- The protector plastic shells are perforated for maximum breathability and cooling ventilation.
- Adjustable elastic straps incorporate thermoformed perforated rib protection panels for additional protection without compromising movement.
- Quick and easy-to-use buckles that fit a broad range of rider body sizes.
- Thermoformed padded chassis for optimized levels of comfort and close-to-body fit.
- Adjustable shoulder straps for optimal fit.
- Bionic Neck Support compatibility.
- Silicon BNS pull tabs for easy and safe engagement of the BNS.
- Additional thermoformed EVA tail extension for extended coverage to the lower spine.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Back protector - EN 1621-2:2014 Level 1.
 - Chest - EN 1621-3:2018.

SEQUENCE KNEE PROTECTOR

PROTECTION

- Designed to provide maximum protection on high impacts and to cover a high protection area. The plastic shell construction provides high force dispersion while the integrated grid pattern is designed to absorb high energies.
- All components are engineered to offer a highly reduced material construction to create a protector that is extremely lightweight, slim and highly ventilated.
- Technical elastane stretch mesh main construction is highly breathable and retains shape and structure, while keeping the protector close to the body for highly effective protection performance.
- Plastic shell design incorporates innovative integrated grid structure which, during an impact, absorbs and dissipates the energy forces across its cellular structure.
- Constructed from an injected polymer performance blend for optimized flexibility and excellent weight saving properties. This protector incorporates a strategically positioned viscoelastic cup insert to protect joint extremity and help promote improved fit.
- Ergonomically contoured to follow the natural curvature of the body and feature air channeling to improve airflow and prevent heat build-up.
- All plastic shells are mounted on padded perforated panels which offer an enhanced fit and skin-touch comfort.
- Dual strap hook and loop grip closure system offers secure fitment of protection while allowing for unrestricted freedom of movement. Straps include silicone pull tabs for convenient closing while wearing gloves.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Knee protector - EN 1621-1:2012 Level 1.

SEQUENCE ELBOW PROTECTOR

PROTECTION

- Designed to provide maximum protection on high impacts and to cover a high protection area. The plastic shell construction provides high force dispersion while the integrated grid pattern is designed to absorb high energies.
- All components are engineered to offer a highly reduced material construction to create a protector that is extremely lightweight, slim and ghly ventilated.
- Technical elastane stretch mesh main construction is highly breathable and retains shape and structure, while keeping the protector close to the body for highly effective protection performance.
- Plastic shell design incorporates innovative integrated grid structure which, during an impact, absorbs and dissipates the energy forces across its cellular structure.
- Constructed from an injected polymer performance blend for optimized flexibility and excellent weight saving properties. This protector incorporates a strategically positioned viscoelastic cup insert to protect joint extremity and help promote improved fit.
- Ergonomically contoured to follow the natural curvature of the body and feature air channeling to improve airflow and prevent heat build-up.
- Elbow protector shell features an additional soft TPR section for extra coverage and to help keep the protector in position.
- All plastic shells are mounted on padded perforated panels which offer an enhanced fit and skin-touch comfort.
- Dual strap hook and loop grip closure system offers secure fitment of protection while allowing for unrestricted freedom of movement. Straps include silicone pull tabs for convenient closing while wearing gloves.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Elbow protector - EN 1621-1:2012 Level 1.

BIONIC FLEX KNEE PROTECTOR

- With ergonomically profiled Nucleon Flex Technology protection held securely in position via an elasticated top strap and silicon hems, the Bionic Flex Knee Protector incorporates comfort padding with a soft-touch stretch mesh which prevents heat build-up. The asymmetric and lightweight design ensures this knee protector provides optimal levels of comfort and freedom of movement.
- Extremely lightweight, durable and flexible protector constructed from a breathable stretch mesh for a comfortable, close fit.
- Elasticated top strap for a customizable fit.
- Highly convenient and time-saving slip-on design with elasticated hems and silicon printing to prevent slippage and to help keep the protector securely positioned.
- New design Nucleon Flex Technology protectors are highly perforated and secured on the outside of the sleeve for excellent breathability and ventilation.
- Additional side foam padding for additional coverage.
- Abrasion resistant fabric front panel for increased durability.
- According to European statutory law the CE mark is a conformity requirement for the marketing of the product.
- The following standard applies: Level 1 EN 1621-1:2012

BIONIC FLEX ELBOW PROTECTOR

- Elbow Protector – EN 1621-1:2012 Level 1.
- With ergonomically profiled Nucleon Flex Technology protection held securely in position via elasticated silicon hems, the Bionic Flex Elbow Protector incorporates comfort padding with a soft-touch stretch mesh which prevents heat build-up. The asymmetric and lightweight design ensures this knee protector provides optimal levels of comfort and freedom of movement.
- Extremely lightweight, durable and flexible protector constructed from a breathable stretch mesh for a comfortable, close fit.

BIONIC ACTION CHEST PROTECTOR

PROTECTION

- An ultra-lightweight protective system offering excellent upper body protection against impacts, this protector features front and rear hard shell plates backed with bio-foam padding for a secure and comfortable snug fit. Quick and extremely easy to put on, it provides extended padding to protect against tire roost without obstructing arm movement.
- All-new Cell Technology chest protector features a highly perforated shell for high levels of ventilation and protection.
- The flexible construction of the sides adapts to the contours of the body for enhanced fit and comfort.
- Features a new Cell Technology back protector with a flexion channel for enhanced mobility.
- Removable shoulder pads for high levels of customization.
- Extended padding to offer more protection against tire roost without obstructing arm movement.
- The protectors are perforated for maximum breathability and cooling ventilation.
- Elastic closure system features newly designed, quick and easy-to-use buckles that fit a broad range of rider body sizes.
- Thermoformed padded chassis for optimized levels of comfort and a close-to-body fit.
- Adjustable shoulder straps for an optimal fit.
- Bionic Neck Support compatibility with the BNS A-Strap, available as an optional extra.
- According to European statutory law the CE mark is a conformity requirement for the marketing of the product.
- The following standard applies: Level 1 EN 1621-3:2018 (Chest) and Level 1 EN 1621-2:2014 (Back)

BIONIC-10 CARBON KNEE BRACE
PROTECTION

- Structural hybrid frames are constructed from a composite over-injected with a high performance fiber reinforced polymer which provides optimal structural integrity and support while being ultra-lightweight.
- The Bionic-10 Carbon Knee Brace comes in 4 different sizes: S, M, L and XL/2XL for perfect fitment.
- The asymmetric frame design ensures a wide range of unique leg shape compatibility and a perfect fit.
- Slim ergonomic design offers a high level of riding comfort during dynamic movement.
- The open structure and perforated areas promote maximum ventilation.
- Extremely stable slim-design 4-point hinge system perfectly follows the articulation of the knee.
- Hinge system incorporates easily exchangeable extension stops (0, 5, 10, 15, 20, 25 and 30 degrees) which reduces the risk of sustaining injuries to:
 - The medial and lateral collateral ligament
 - The anterior and posterior cruciate ligament
 - The lateral and medial meniscus
- Lightweight and highly ventilated double-wall knee-cup system offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.
- The ergonomically sculptured triple segment knee cup is designed for flexibility and adaptivity and constructed from a double density polymer solution for high impact force dispersion on rigid external shell and energy absorption on semi-rigid internal shell structure.
- The knee cup is accurately secured in place by an innovative integrative mechanical guiding system that keeps the knee cup in correct position while providing controlled freedom of movement.
- Calf Frame strap system holds braces perfectly in position and avoids slipping down when rider is in action and extreme movement.
- The two calf straps are linked with a semi-rigid C-shaped connector that dynamically shapes towards the dimension change of the calf muscle.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Knee protector - EN 1621-1:2012 Level 1.

SX-1 v2 KNEE PROTECTOR

- The SX-1 Knee Protector helps reduce the risk and severity of a knee injury by preventing hypertension of the knee in the event of an accident. This lightweight yet strong protector features a poly-centric hinge system allows natural articulation of the knee. The ergonomic sculptured knee protector is constructed from a semi-rigid high performance polymer for optimum levels of protection and flexibility, while the highly ventilated padding and mesh zones allow for superb airflow cooling. Correct positioning of the knee protector improves comfort, avoiding pressure points on the patella, and the Dual Strap System promotes secure fitment of the protector in all riding positions and includes a combined buckle and Velcro® closure for rapid and easy mounting.
- Extremely lightweight knee protection with large protective area for riders looking for the most breathable and lightweight solutions for all riding styles.
- Upper and lower frames are constructed from a high performance polymeric material blend for optimized levels of flexibility and strength as well as excellent weight saving properties.
- Polymer protector plates are strategically perforated for maximum breathability and air ventilation.
- The upper and lower frame integrated dual pivot hinge gear system follows the natural movement of the knee and keeps the protector well positioned during all movements.
- Upper extended frame for increased thigh protection without compromising mobility.
- Perforated knee protector offers high levels of ventilation.
- Knee protector is backed by soft padding for an adaptive fit with breathable air mesh for ventilation and comfort.
- Foam backing for excellent comfort against the skin.
- Frames are asymmetrical and feature a slim, ergonomic design for comfort and a performance fit.
- Hook and loop dual strap closure system with silicon pull tabs for easy in and out and a personalized, secure fit.
- According to European statutory law the CE mark is a conformity requirement for the marketing of the product.

YOUTH ACTION BIONIC JACKET

PROTECTION

- Lightweight protection jacket with high adjustability and maximum breathability.
- All components are engineered to offer a highly reduced material construction for a garment that is extremely lightweight, slim and highly ventilated.
- Technical elastane stretch mesh main construction is highly breathable and retains shape and structure, while keeping plates close to the body.
- Versatile and customizable fit with removable upper back and front panel for compatibility with Youth Neck Support (YNS).
- Soft touch YNS puller for convenient and secure engagement of the YNS.
- Plate design incorporates innovative integrated grid structure which, during an impact, absorbs and dissipates the energy forces across its cellular structure.
- All panel shells (back, chest, elbows and shoulder) are constructed from an injected polymer performance blend for optimized flexibility and excellent weight saving properties.
- Plates are ergonomically contoured to follow the natural curvature of the body and feature air channeling to improve airflow and prevent heat build-up.
- Back protector feature three articulated plates to allow for greater flexibility and adaptive back fit in all riding positions. Plates 'interlock' in the event of a crash to help reduce risk of injury to the spine area. Back protector is developed in two waist-to-shoulder dimensions in order to cover all the KIDS/ YOUTH body sizes from 6–10 and from 10–14 years.
- Thermoformed foam collar and shoulder for comfort and structure.
- All plates are mounted on PE padded panels which are highly perforated to offer fit and skin-touch comfort.
- Elastic kidney with TPR belt system for improved ergonomics and a customized, secure fit.
- Premium auto-locking YKK zips for main front closure, plus zip garage for improved comfort.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Elbow and shoulder protectors - EN 1621-1:2012 / Level 1.
 - Back protector - EN 1621-2:2014 / Level 1.

YOUTH NECK SUPPORT

PROTECTION

- Designed and developed for a fit that is specific to a youth rider's anatomy.
- Frame constructed from injected polymer compound that has been extensively impact tested at performance on a range of off-road surface and varying temperatures.
- Frame has been ergonomically engineered to promote contact with the helmet during impact – including rear support edge that fits closer to the body and raised chest to avoid hyper-flexion injuries - thus providing a solid surface which instantly channels damaging, compressive impact energy away from the neck and on to the support.
- Frame's anatomical profile promotes positive helmet contact in event of a crash while allowing rider freedom of movement.
- Rear stabilizer system helps keeps support in position and is also designed to channel extreme energy loads away from the spine by transmitting it across the shoulder and helping to avoid serious spinal injury.
- Ultra-lightweight EVA foam on the support's underside for comfort and positioning and to distribute the impact force over the widest possible area.
- Closure system for convenient engagement of support and to facilitate quick removal in case of emergency.
- The support is supplied with the easy-to-use strap system which allows use over or under the jersey to secure the device on the rider.
- The Youth Neck Support can be easily integrated with the A-5S Youth Body Armour to ramp up a young rider's overall protective coverage.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
 - Category 2 under the PPE Directive EU 2016/425.

SEQUENCE YOUTH NECK ROLL

PROTECTION

- Hybrid children's neck protection with extended tail for position stability.
- Ergonomic design and engineered shape to fit kids from 6-10 yrs and from 10-14 yrs.
- Double density core is made from a soft PU foam base embedding a hard layer EVA for energy dissipation.
- Bottom and internal soft section (neck side) provides comfort for the shoulders and neck, a hard section on the upper part to give stability and provides force distribution when the helmet impacts.
- Easy to use soft strap closure on the front part.
- Highly compatible with all other Alpinestars protectors and jackets.
- External cover can be removed for washing by hook and loop grip opening on the rear.

TECH 10 SUPERVENTED BOOT

FOOTWEAR

- CE certified to EN 13634:2017.
- Construction uses a highly breathable, perforated microfiber.
- TPU features is combined with ventilation zones and a new air flow system sole for breathability and superior ventilation.
- Evolutionary new shin plate design with ventilation windows strategically positioned to allow more ventilation without compromising the impact protection.
- Air vents on the TPU lateral calf plus breathable mesh insert improve comfort and reduce fatigue on short and long rides.
- New performance double pivot motion control system features:
 - Medial and lateral double pivot system for improved levels of flexibility and precision control.
 - Engineered bi-density front flexion control is strategically positioned over the mesh area, combined with a dual front blade system and shock absorber insert to offer mechanical progressive force release to dampen and absorb impact energies.
 - Re-designed dual density TPU rear blade system is engineered to prevent hyper-extension while offering improved flex control and impact resistance.
- Built into the Tech 10's unique and lightweight single-piDOT / ECE co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded polyfoam to absorb high impact energies during a crash.
- DHCP features a directional impact protection system which significantly reduces the effect of excessive, potentially injury-causing energy being transferred to the ankle and lower leg.
- DHCP has been developed and tested in the demanding circuits of professional Supercross and Motocross.
- Co-injected for strength and structure, the exclusive TPU and rubber compound panels provide superb levels of grip contact, durability and heat resistance.
- The contoured calf protector ergonomically wraps around the rear leg and is constructed from a dual density compound rear blade system to offer progressive dampening of excessive torsional forces.
- Shin plate features a new anatomic design for reduced surface area and weight-saving.
- Completely re-designed sole with proprietary grip sculpturing to improve foot-peg performance, grip and mud and water run-off.
- Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support. The sole offers superior durability, grip and feel while riding, and improved performance on the shifter.
- The central sole insert features a micro grip and side hooking grip design. It is easily replaceable and Alpinestars offers a full sole replacement and boot repair service.
- Anatomically optimized for weight-saving and ergonomics, the new mechanical buckle closure system features a nylon and fiberglass compound for improved durability and strength.
- The new slim-line buckle closure system includes high-impact bridge closures which are cold forged for precision and strength.
- The buckle closure system features a memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.
- Innovative, lightweight upper combines advanced lightweight microfiber with an impact and abrasion resistant TPU shell.
- The foot shell features five different compounds in a single lightweight piDOT / ECE to offer strength while maintaining flexibility and structural integrity.
- The foot shell incorporates heel and toe protection and is highly resistant against abrasion and impact while adding to the boot's overall durability.
- The foot shell also includes an integrated shank for support and structural integrity.
- Frontal protection features a dual closure system with an internal microfiber flap, plus hook and loop fasteners for a precise fit closure attached securely with a micro-adjustable, easy to operate, lightweight buckle.
- The shin incorporates a unique TPU blade system engineered to prevent frontal hyper-extension and offer greater flex control.
- Soft microfiber gaiter helps seal out excessive water and dirt entry, while the 3D mesh lining ensures improved air circulation and comfort.
- 3D mesh lining incorporates anti-sliding suede on heel area to keep the foot located inside the boot.
- Highly ventilated perforated padding for optimized ventilation and airflow.

REDESIGNED BIO-MECHANICAL INNER ANKLE BRACE FEATURES:

- Lighter, anatomically redesigned medial and lateral torsion bars for ankle and leg rotation and progressive damping of torsional forces during an accident, while still allowing natural freedom of movement.
- Low-profile, pull-on design for reduced material build, less weight and to facilitate easier and quicker wearing.
- Innovative flexion inserts work seamlessly with Tech 10's flex support system for ultimate in performance.
- TPU protection and shock absorbing padding on the heel and ankles and an ultra-thin and flexible forefoot area for increased sensitivity and control.
- Dual compound removable anatomic footbed includes EVA for comfort and support and aids even weight distribution.

TECH 10 BOOT

FOOTWEAR

- Performance double pivot motion control system features:
- Medial and lateral double pivot system for improved levels of flexibility and precision control.
- Engineered front flexion control offered by a dual front blade system plus shock absorber insert to offer mechanical progressive force release which dampens and absorbs impact energies.
- Redesigned dual density TPU rear blade system engineered to prevent hyperextension while offering improved flex control and impact resistance.
- Built into the Tech 10's unique and lightweight single-piece co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded poly-foam to absorb high impact energies during a crash. DHCP features a directional impact protection system which significantly reduces the effect of excessive, potentially injury-causing energy being transferred to the ankle and lower leg. DHCP has been developed and tested in the demanding circuits of professional Supercross and Motocross.
- Co-injected for strength and structure exclusive TPU and rubber compound panels provide superb levels of grip contact, durability and heat resistance. Innovative material construction ensures panels are lighter, anatomically profiled and reduced in thickness.
- The contoured calf protector ergonomically wraps around rear leg and is constructed from a dual density compound rear blade system to offer progressive dampening of excessive torsional forces.
- Shin plate features an anatomic design for reduced surface area and weight-saving.
- Completely redesigned sole with proprietary grip sculpturing to improve foot-peg performance, grip and mud and water run-off. Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support. The sole offers superior durability, grip and feel while riding and improved performance on shifter. The central sole insert features micro grip and side hooking grip design. It is easily replaceable and Alpinestars offers a full sole replacement and boot repair service.
- Anatomically optimized redesigned for weight-saving and ergonomics mechanical buckle closure system feature a nylon and fiberglass compound for improved durability and strength. Slim-line buckle closure system includes high-impact bridge closures which are cold forged for precision and strength. The buckle closure system features a memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.
- Innovative, lightweight upper combines advanced lightweight microfiber and impact and abrasion resistant TPU shell.
- Footshell features five different compounds in a single lightweight piece to offer strength while maintaining flexibility and structural integrity. Foot shell incorporates heel and toe protection is highly resistant to abrasion and impact, and adds to the boot's overall durability. Foot shell also includes integrated shank for support and structural integrity.
- Frontal protection features a dual closure system with an internal microfiber flap, plus hook and loop fasteners for a precise fit closure attached securely with a micro-adjustable, easy to operate, lightweight buckle. Shin incorporates a unique TPU blade system engineered to prevent frontal hyperextension and offer greater flex control.
- Soft microfiber gaiter helps seal out excessive water and dirt entry.
- Poly-fabric lining with 3D open cell foam incorporates anti-sliding suede on heel area to keep foot located inside the boot.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2017.

INNER ANKLE BRACE

TECH 7 BOOT

FOOTWEAR

- Lightweight upper combines suede leather with lightweight microfiber for impact and abrasion resistant TPU shell.
- Innovative, evolutionary TPU shin-plate construction for greater range of fitment features a reinforced hook and loop closure for comfortable, highly customized closure.
- Soft microfiber gaiter helps seal out excessive water and dirt entry.
- Evolutionary design for lateral flex zone provides front and rear flexion support and helps prevents torsion.
- Medial-facing panel constructed from TPU with rubber insert for maximum grip contact with bike and improved heat and abrasion resistance.
- Contoured TPU calf protector plate offers impact resistance.
- Extensive TPU protection on toes, foot, heel, ankle, calf and shin with extra hard compounds on the toe-box, heel and achilles tendon.
- Closure system includes polymer buckles plus aluminium frame with innovative self-aligning, quick release closures for customized secure fitment.
- All the buckles are replaceable.
- TPU lower shell is reinforced with metal shank and includes toe reinforcement for impact and abrasion resistance.
- Poly fabric lining with 3D open cell foam incorporates anti-sliding suede reinforcement on heel area.
- Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support; the sole superior durability and grip.
- Main flexion of the boot is supported around medial and lateral ankle by low profile pivot system which dissipates friction when bending the boot.
- Shock absorbing padding on the heel and ankles plus an ultra thin and flexible forefoot area for increased sensitivity and control.
- Removable anatomic footbed in lycra on top.
- Replaceable footpeg insert on sole is constructed from hard compound vulcanized rubber for durability and protection.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2017.

TECH 5 BOOT
FOOTWEAR

- Upper constructed from innovative and light microfiber material with action leather on toe box.
- Redesigned instep and Achilles accordion flex zones.
- Contoured TPU calf protector plate, TPU higher medial protector and TPU outer lateral ankle.
- Injected TPU shin plate connected with the TPU medial protector panel; hook and loop upper closure, plus TPR flap for broad ranging calf fit adjustment and support. The TPU higher medial protector designed with technical texture for improved grip.
- Bio-mechanical pivot.
- Ergonomic TPU triple buckle straps.
- Innovative one-piece TPU injected dual compound foot shell, reinforced by a metal shank inside and co-injected toe reinforcement.
- TPU heel patch connected with shell and lateral/medial TPU sections.
- Extended PU synthetic gaiter helps seal out excessive water and dirt entry.
- Soft poly foam surrounds the ankles and collar.
- Entire textile lining.
- Closure system includes 4 polymer buckles with an innovative closure system. This closure includes a ratchet with memory and a quick release/locking system with self-aligning design for precise closure; the all buckles are replaceable. Replaceable anatomic EVA footbed with textile lining on top.
- Exclusive high grip rubbercompound outsole.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

TECH 7S BOOT
FOOTWEAR

- Tech 7S is specifically designed and sized for junior and/or smaller framed riders.
- PU-reinforced microfiber upper for flexibility, abrasion resistance, water-resistance and weight-saving. Material ensures consistent fit and is easy to maintain and clean.
- Contoured shin plate is injected with high modulus TPU for excellent levels of impact and abrasion resistance.
- Medial facing side incorporates TPU panel with specially designed sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.
- One-piDOT / ECE injected dual compound foot shell with co-injected hard toe protector and integrated steel shank. The shell is highly resistant to abrasion and impact, and adds to the boot's overall durability and improves boot's streamlining.
- Excellent flexion provided by low profile medial and lateral pivot system to offer movement and support.
- Instep and Achilles accordion flex zones constructed for superior control and support.
- Extended microfiber gaiter helps seal out excessive water and dirt entry.
- Soft poly foam reinforcement on ankles and collar for long lasting comfort and shock absorption.
- 3D mesh textile with open cell foam for improved air circulation and comfort.
- Buckle closure system incorporates polymer and fiberglass buckle arms and high-impact aluminum bridge closures for durability and weight-saving. Buckle system features memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.
- Compound sole is seamlessly integrated into the base structure for superior durability, high performing rubber grip patterning, and feel. The sole is replaceable.
- Removable anatomic footbed for comfort and support ensures even weight distribution.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

TECH 3S YOUTH BOOT
FOOTWEAR

- Designed specifically for junior riders.
- Upper construction is made from innovative and light microfiber material that is flexible and abrasion resistant.
- Light microfiber on front and rear bellow gives more comfort on the flexible area.
- Toe box is made of synthetic material for high abrasion.
- Extended PU synthetic gaiter helps seal out excessive water and dirt entry.
- Contoured TPU calf protector plate, TPU higher medial protector, TPU outer lateral ankle and TPU heel counter offer support and resistance to impacts.
- Rear TPR gaiter patch applied on top of the TPU calf protector gives protection and comfort on rear flex.
- Injected TPU shin plate connected with the TPU medial protector panel; Hook and Loop closure upper closure, plus TPR flap for broad ranging calf fit adjustment and support.
- The TPU higher medial protector is designed with technical texture for improved grip.
- Bio-mechanical medial blade system allows a good front rear flex giving support and protection to the ankle.
- The ergonomic TPU triple buckle straps wrap the front flex from the medial protector to the lateral side without compromising the flex.
- Closure system includes 3 polymer buckles with an innovative closure system.
- This closure includes a ratchet with memory and a quick release/locking system with self-aligning design for easy, precise closure.
- All the buckles are replaceable.
- Innovative one-piece TPU injected dual compound foot shell, reinforced by a metal shank inside a co-injected toe reinforcement.
- Soft foams surrounds the ankles and collar offer comfort and shock absorbing performance.
- Entire textile lining for more comfort.
- Replaceable anatomical EVA footbed.
- Additional specially modified smaller footbed to accommodate growth and extended longevity of product (only available in boots size: 2-3-4).
- Exclusive high grip rubber compound outsole.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

TECH 7 ENDURO DRYSTAR® BOOT

FOOTWEAR

- CE certified to EN 13634:2017.
- Upper constructed from light, innovative microfiber that is flexible and abrasion resistant.
- Innovative, evolutionary TPU shin-plate construction for greater range of fitment features a reinforced hook and loop closure for a comfortable, highly customized closure.
- Specifically designed sole provides Enduro riders with superior durability, grip, feel and a high level of structural rigidity.
- Wide entry aperture for convenience with hook and loop upper closure TPR flap to allow a broad range of calf fit adjustment and support.
- Medial-facing area constructed from one-piece TPU panel with honeycomb sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.
- Top rear flexion of the boot is supported around the calf by an innovative TPU sliding blade system which dissipates friction.
- Ergonomic buckle system offers a secure and highly personalized closure.
- Innovative TPU lateral ankle protection provides a bio-mechanical link between the middle lateral and the bottom lateral of the boot. The instep and Achilles accordion flex zones are constructed for superior control and support.
- TPU lower shell is reinforced with a metal shank and includes toe reinforcement for impact and abrasion resistance.
- Extended microfiber gaiter helps seal out excessive water and dirt entry.
- New closure system includes polymer buckles plus an aluminum frame with innovative self-aligning, quick release closures for a customized secure fitment.
- All buckles are easily replaceable.
- Drystar® membrane subtly incorporated into chassis for 100% performance against wet penetration.
- Soft polyfoam surrounds the ankles and collar to offer comfort and shock absorbing performance.
- Removable anatomic footbed.
- Exclusive high grip rubber double density compound outer sole.
- Sole and footpeg are replaceable.

STELLA TECH 3 BOOT
FOOTWEAR

- Specially designed for an optimized women's fit.
- PU-reinforced microfiber upper for flexibility, abrasion resistance and weight-saving. Main material ensures consistent fit and ease of maintenance.
- Contoured shin plate is injected with high modulus TPU for high levels of impact and abrasion resistance.
- Medial boot side incorporates TPU panel with specially designed sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.
- One-piece injected dual compound foot shell with co-injected hard toe protector and integrated steel shank. The shell is highly resistant to abrasion and impact, adds to the boot's streamlining.
- Excellent flexion provided by low profile medial and lateral pivot system to offer movement and support.
- Instep and Achilles accordion flex zones constructed for superior control and support.
- Extended microfiber gaiter helps seal out excessive water and dirt entry.
- Soft poly-foam padding surrounds ankles and collar for long lasting comfort, fit and additional shock absorption.
- Internal mesh textile lining for improved air circulation and comfort.
- Ergonomic buckle system offers secure and highly personalized closure. All buckles are easily replaceable.
- Buckle closure system incorporates polymer and fiberglass buckle arms and high-impact aluminum bridge closures for durability and weight-saving.
- Removable anatomic footbed for comfort and support ensures even weight distribution.
- Specific rubber compound sole is seamlessly integrated into the base structure for superior durability, high performing rubber grip patterning and feel. The sole is replaceable.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

TECH T BOOT
FOOTWEAR

- Upper constructed from a combination of full grain leather and innovative microfiber for durability and abrasion resistance.
- Extended front and rear accordion stretch zones for improved flex, control and support.
- Double density TPU ankle protector disks are layered under the upper and backed by poly-foam padding.
- Ergonomically contoured shinplate is injected with high modulus TPU for a high level impact and abrasion resistance.
- Wide entry aperture for convenience with hook and loop upper closure TPR flap to allow broad ranging calf fit adjustment and support.
- 3D mesh textile with open cell foam for improved air circulation and comfort.
- Extended PU synthetic gaiter helps seal out excessive water and dirt entry.
- Soft poly-foam reinforcement on ankles and collar for long lasting comfort and shock absorption.
- Three buckles closure system with memory, featuring an integrated quick release/locking system closure. Buckles are injected with high impact resistant techno polymer.
- Internal toe box and heel counter protection is layered under the upper for durability.
- Leather shift pad for abrasion resistance and structural protection.
- Polymer insole with integrated steel shank reinforcement for structure and support to the arch area.
- Exclusive compound rubber sole with high grip, rough terrain design. The outsole is replaceable.
- Replaceable anatomic footbed for comfort and support ensures even weight distribution.
- According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

KOMODO TRAVEL BAG

ACCESSORIES

- Dimensions: 94 cm x 45 cm x 40 cm, capacity 150 L.
- Lid opening to access to the main compartment.
- Flat top pocket to access documents while traveling
- Removable change mat made from waterproof tarpaulin.
- Strong Plastic YKK Zipper chain size 10 mm.
- Lockable Zippers – Accepts TSA Approved Locks.
- Big screen print.
- 2 ventilation on sides.
- 2 big webbing handle on top to and side to be able to move and carry the bag.
- 2 strap handle to lift up the bag and put it on the shoulder.
- Boots compartment with waterproof removable bag, easier to wash.
- Reflective details.
- Smooth outdoor rolling wheels.
- Bottom and side panels made with waterproof tarpaulin, this way the bag stay always dry when it stands on muddy terrain.
- Durable hard bumpers on base corners.
- Hard internal base with external slide rails.
- Constructed from durable tarpaulin and tough Polyester reinforcement panels.
- Sized to carry all protective gear.
- Compartment walls can be removed with a zipper to allow the bag to be reconfigured with one extra large internal compartment.
- Inner flat zippered mesh pocket on flap.
- 2 Mesh pockets on internal sides of the bag.
- Telescopic double post handle, multiple heavy duty haul handles and a top carry strap.
- Webbing reinforcement to give a better structure to the bag.

GOANNA TRAVEL BAG

ACCESSORIES

- Dimensions: 82 cm x 39 cm x 45 cm, capacity 125 L
- 1 flat front pocket to store document and keys
- 2 strap handle to lift up the bag and put it on the shoulder.
- Lid opening to access to the main compartment
- Inner flat zippered mesh pocket on flap.
- Boots compartment with waterproof removable bag, easier to wash.
- 2 sides handle to move the bag easily.
- Big screen print.
- Hi-Visibility Alpinestars lining.
- Strong Plastic YKK Zipper chain size 10 mm.
- Bottom and side panels made with waterproof tarpaulin, this way the bag stay always dry when it stands on muddy terrain.
- Webbing reinforcement to give a better structure to the bag.
- Compartment walls can be removed to allow the bag to be reconfigured with one extra large internal compartment.

BOOT BAG

ACCESSORIES

- 43 cm Height x 37 cm Length x 26 cm Width.
- Durable 600 Denier Polyester main body material.
- Tough Tarpaulin material at base and lower sides is easy to clean.
- Sized to fit Alpinestars Motocross boots up to size 14 (US).
- Piped seam construction for durability and additional wear resistance.
- Large #10 YKK Coil zipper with double sliders and easy-to-grip Alpinestars molded pulls.
- Webbing Haul handle at top, sewn in with heavy duty bar tacks.
- Adjustable webbing should strap with D-Ring connections for either left or right side carry.
- Large Mesh Vents for maximum airflow.
- Lined with 210 Denier Polyester.
- Internal Binding construction.
- Internal Open Mesh Pocket with elastic top edge.
- Branded with large Alpinestars Printed Logos.

ROVER MULTI BACK PACK

ACCESSORIES

- Adjustable harness system for fit, comfort and load stability.
- Large and tall roll top main compartment for quick and easy access, with a removable waterproof liner.
- Compression lid for security and easier packing.
- Hydration pocket for rider comfort.
- Expandable side pods with zippers for extra capacity.
- Equipped with multiple external pockets for quick access in town.
- Front large zipper pocket, side entry front panel pocket and small items pocket on the lid for storage of essential items.
- Clever compression design means that if the front compartment is empty, it will flatten with the compression straps to lay flat against the main compartment.
- All straps are finished with easy pull ends for ease of use, with tie down loops for added security.

ROVER OVERLAND BACK PACK

ACCESSORIES

- Adjustable harness system for fit, comfort and load stability.
- Large and tall roll top 25-litre main compartment for quick and easy access, with a removable waterproof liner.
- The clever design means the roll top can be closed / connected at the sides of bag or at top for extra internal volume.
- Comes complete with an inner hydration pocket, plus additional hydration carrying capacity in the front mesh pocket thanks to exit for the hose of an extra hydration bladder.
- Large, compressible front compartment allows the bag to be used without having to access the main roll top compartment.
- Clever compression design means that if the front compartment is empty, it will flatten with the compression straps to lay flat against the main compartment.
- Compact profile when empty, which expands to very large capacity when the main compartment and 14-litre front compartment are both filled.
- Comes with a laptop pocket and organizer inside the front compartment for added practicality.
- All straps are finished with easy pull ends for ease of use, with tie down loops for added security.

CITY HUNTER BACK PACK

ACCESSORIES

- Multi-material Outershell : Light-weight 420D Nylon / 420D Ripstop Nylon to reinforce the bottom part
- 25 L capacity (approximately)
- 2 external waterproof pockets on front
- Computer compartment with full length zip featuring 15" laptop protective fleece sleeve
- Large main compartment with internal organizer featuring a smartphone protective fleece sleeve
- Built in helmet carrier
- Rain cover stored in its pocket in the main compartment
- Ergonomic 15 mm back padding preventing spine pressure with ventilation channels for an optimized air flow
- Ergonomic shoulder belts with perforated foam padding and mesh panels for an optimized airflow, adjustable and removable sternum strap and the Alpinestars quick release system for a fast and secure adjustment, preventing the extra webbing flapping
- Removable waist strap featuring the Alpinestars quick release system for a fast and secure adjustment, preventing the extra webbing flapping
- YKK semi auto-locking zippers for a secure closure
- Reflective details on the front and shoulder belts to improve rider's visibility in varying light conditions

IGUANA HYDRATION BACK PACK

ACCESSORIES

- 6 L capacity hydration bag (approx.)
- Ripstop nylon + poly 450 D as main fabric
- 2 compartments with zipper chain 5#
- Hands free full face helmet attachment system
- 2 straps that close with plastic buckles
- Webbing handle on top
- Printed logo + graphics
- 2 plastic slider to adjust the high of the small chest strap
- 1 plastic stopper for the tube of the water bladder
- Ergonomic 15 mm back mesh padding preventing spine pressure with ventilation channels for an optimized air flow
- Perforated foam straps for better breathability (covered with mesh)
- Elastic loops to channel the water bladder tube on the strap of your choice
- 1,5 L water bladder included
- Main compartment:
 - 1 WP pocket + zipper
 - 1 micro fleece google pocket
 - 2 small mesh pockets
 - 1big mesh pocket for the water bladder or back protector
- Front compartment :
 - 1big pocket

BIONIC HYDRATION PACK

ACCESSORIES

- Compact, lightweight mesh construction with an opening which acts as a reservoir for any hydration pack up to 2.0-Liter.
- Five adjustable straps (two at top, two at side and one at bottom) to get the fit just so.
- Compatible with the Bionic Tech and Bionic Pro jackets.

TECH TOOL PACK

ACCESSORIES

- Tool bag designed specifically for Enduro use.
- Made from durable 600 Denier polyfabric for wear resistance.
- Main compartment with elastic loop tool organizer.
- Two side compartments and a waterproof front pocket for storing a mobile phone and other valuables.
- Flap design for easy access.
- Compression straps allow riders to reduce the volume of the pack when required.
- Zipped mesh pocket in the flap is ideal for storing passport, documents etc.
- Ergonomic design for comfort on the bike.
- Belt adjuster with air mesh back pad for ventilation and anti-slip material on the sides to keep the pack securely in position.
- Reflective branding.
- 3.7-Liter capacity.
