CARBURETOR REPAIR KITS

- Kits include all of the necessary components to repair a carburetor
- Kits include all O-rings, gaskets, jets, needle, mixture screw, float bowl screws, float valve needle and seat (needle jet and other pressed in jets are not included in kit)
- OEM jet sizes are included in the kit (KTM kits do not include jets or slide needle standard jetting sizes are not provided by the factory)
- NBR rubber material is used on all O-rings and rubber gaskets; NBR has excellent resistance to the ethanol used in today's fuels
- Applications that use paper float bowl gaskets are upgraded to High Performance Interface Gasket material
- Components included in the kits are based off of U.S. models and discretion must be used when attempting to install the kit on a non-U.S. model

JET KITS

FOR UTILITY AND SPORT ATVS

STAGE 1 KITS

- Designed for ATVs with stock engines using the stock airbox, air filter and stock or aftermarket exhaust
- Fully adjustable to allow for the use of well-designed aftermarket exhausts and stock replacement air filters
- Improves throttle response and drivability
- Power increases of approximately 5% throughout the entire power range

STAGE 2 KITS

- Designed for ATVs with stock or mildly modified engines using well-designed stock or aftermarket exhausts with a modified airbox and a stock or replacement air filter
- For applications where individual air filters cannot be installed and where airbox modifications improve overall engine performance
- A power increase of 8% can be achieved in most cases

STAGE 3 KITS

- Designed for ATVs with stock or mildly modified engines using individual air filters and a stock or aftermarket exhaust
- In most cases, power increases of 10-15%; drivability may be compromised in short-stroke high-rpm motors
- On some modern engine and airbox designs, individual filters and proper jetting offer no performance improvement and compromise drivability; Stage 3 kits are not available in such cases

PPO (PRECISION PRE-OILED) AIR FILTERS

- High-technology machine pre-oils filters to perfection while leaving no excess
- With the precision pre-oiled air filter, there is no excess oil to rob horsepower, and no dry spots endangering your engine
- Oiled with high tack and bio-friendly FLAME RESISTANT Moose Racing Super Seal Filter Oil
- Includes resealable filter bag

TRIPLE-LAYER AIR FILTERS

- Unique triple-stage foam filter designed for the most extreme conditions
- Eliminates the need for power-robbing dust covers and outerwear covers
- Increases protection against silt, water and sand
- Allows for extended filter service intervals
- Can be cleaned, reoiled and reused like a two-stage filter
- Available in standard and pre-oiled
- Used by factory off-road teams around the world

AIR FILTERS

- Unsurpassed in airflow, stopping dirt and overall performance
- Two-stage air filters come apart for maximum airflow and ultimate cleaning
- Most filters feature the Ultra Seal grease groove on the sealing surface
- Each fits in stock airbox exactly like OEM filter
- Cleans easily with grease-cutting dishwashing detergent; just clean, oil and reuse indefinitely

AIRBOX COVERS

- Remove the air filter and pressure wash the inside of the airbox by covering the carb inlet with a watertight cap
- Made of PVC with a rubber sealing ring
- Top screw included

1011-1945

STANDARD AND BACKFIRE FILTERS

- Twin Air dual-stage filters are the choice of top factory teams and riders worldwide
- Dual-bonded foam design filters out even the smallest dirt particles, while allowing more airflow than two separate layer filters (flow bench proven)
- Flat foam sealing ring provides a secure seat against the airbox, even in the worst riding conditions
- Twin Air filters are slightly smaller than stock, making them easier to change while increasing dead air space around the filter for better performance
- Backfire filters include a laminated layer of backfire-retardant foam

1011-2340

FACTORY PRE-OILED AIR FILTERS

- The same factory treatment that race teams and OEMs receive is now available for all Twin Air users
- Filters are pre-oiled with Twin Air Bio-Foam Filter Oil using our state-of-the-art filter oiling machines to provide the ultimate consistency in pore coverage
- Same industry-leading Twin Air Filter you are used to, now pre-oiled for your convenience
- Comes in a new, resealable bag for added convenience
- Available in standard Twin Air replacement filters and PowerFlow Twin Air replacement filters
- PowerFlow replacement filters include Backfire Filter

POWERFLOW KITS

- Don't let your stock setup rob you of power and engine reliability
- Eliminates leaks and provides more air for power, but the filter can still be removed in a snap for cleaning
- The new generation PowerFlow kit converts the filter mounting system from a clamp-on filter to a filter cage and wing bolt mounting system
- This new flange system allows for the use of a Twin Air Airbox Cover for washing the airbox

1011-2337

STOCK REPLACEMENT KITS

- Replacement filters that require other parts like a reducer, cage, spring or something else
- Kits contain all necessary parts needed for each application

1011-2342

GRAND PRIX FILTER COVERS

- Nylon filter cover helps prevent dust, sand and mud from clogging your filter

AIR FILTER DUST COVERS

- Coarse foam pre-filter will act as an additional layer of protection and extend service time between filter cleanings

EXTREME CONDITION AIR FILTERS

- For use in riding conditions that are so extremely dusty or sandy that added protection is needed
- Made of flame-laminated dual-layer foam bonded with the highest-quality glue to stand up to the roughest and toughest of riding styles and terrains
- Slight reduction in airflow possible; however, dirt-stopping capabilities greatly increased
- Heavy-duty glue and soft seams
- Wide sealing ring
- Use with No Toil filter treatment for superior protection and ease of cleaning

UNIVERSAL CLAMP-ON AIR FILTERS

- K&N universal air filters come in four styles — round straight, round tapered, oval straight and oval tapered
- All round straight types, oval straight types and oval tapered types have rubber end caps (unless noted differently)
- All round tapered types have chrome end caps (unless noted differently)
- All clamp directly to the carburetor throat, replacing the stock airbox and filter element
- Pleated design increases surface area airflow
- Match the outer diameter (OD) of your carb throat with the inner diameter (ID) of the filter (given in inches and millimeters)

F = Inside Diameter	L = Filter Length	FA = Flange Angle	MA = Filter Oval Length
D = Filter Diameter	FL = Flange Length	SA = Filter Oval Width

CLAMP-ON AIR FILTER

FOR YAMAHA YFZ350 87-05

- Clamps directly to the carburetor intake
- Increases airflow to engine to help boost performance
- Round filter style and centered flange position
- Requires removal of the stock airbox and stock air filter element
- Two required for installation

DESCRIPTION	PART #
Clamp-on air filter	**RU-0210**

CLAMP-ON POD AIR FILTERS

- Quality high-flow paper elements with chrome end caps
- Use included stainless steel clamp for secure attachment
- Determine size or part number needed by below size chart
- PART #1011-3159 has built-on chrome shell protecting 180 degrees of filter element without reducing airflow
- Check carb inlet OD needed before ordering
- Width is the largest diameter of filter media
- Sold each

DRYCHARGER

FOR POLARIS RANGER RZR XP 1000 14-19/RZR4 1000 14/RZR XP TURBO 16-19

- This specially designed filter wrap is made to extend the service interval of K&N Filtercharger when used in dusty conditions
- Contains uniform micron openings like the K&N Precharger, so air can get in but dirt and other contaminants cannot
- Silicone treatment deflects water splashed on the air filter
- Uses sewn-in elastic opening to securely fasten to air filter
- Custom fit to application

FITS MODEL	PART #
Drycharger	**1011-3513**

DRYCHARGER

- Fits and functions exactly the same as the K&N Precharger® except for being pre-treated with a proprietary hydrophobic process
- Manufactured from a durable polyester micro-weave material
- Stops small dirt particles; yet adds little restriction to the airflow of the filter
- Water-repellent
- Blue

DESCRIPTION	PART #
Fits PART #RU-175	**1011-3222**

UNIVERSAL PRECHARGERS

- Extend service period by prefiltering tiny contaminants in dusty conditions
- Highly durable polyester material wraps around K&N filters
- Designed to be run dry and cleaned with K&N filter cleaner
- Universal sizes in black only

- 21st century carbon fiber technology incorporating Boyesen's dual-stage reed design
- Pairs a carbon fiber top reed with a durable fiberglass/epoxy bottom reed
- Provide the quickest acceleration any reed can offer; maximize horsepower and torque
- Deliver instant and accurate response to piston speed changes for smooth, dependable throttle performance
- More durable than typical carbon fiber reeds
- Custom-made for the latest 2-stroke technologies

- Boyesen's hot RAD valves provide plenty of off-road torque
- Custom reed cage holds Boyesen's carbon fiber reeds
- Sustains flow velocity through the valve and redirects intake charge for balanced distribution to intake ports
- Quickens throttle response and ramps up horsepower throughout rpm range
- Solid one-piece aluminum casting; bolts in easily

VFORCE4 REED VALVES

- Advanced reed petal resin system, carbon fiber and lay-up
- Pre-curved reed petal ensures better seal at the tip
- Wider reed cage for maximum airflow
- Combined reed tip area is increased by 10,5% for better airflow
- Airfoil shape added to cage tip to increase velocity from the outer ports
- Long reed stops added to progressively slow reed petal tip velocity for increased petal durability

VFORCE3 REED VALVES AND REPLACEMENT REED PETALS

- The advancement of reed technology
- Snap-together cage uses symmetrical reed petals, eliminating the need for different "inner" and "outer" replacement petals
- Reed tip shape accelerates air mixture, ensuring increased airflow for increased horsepower
- Innovative design completely eliminates need for screws
- When ordering replacement reeds, order one set per reed cage

POWER-FLO DIRT VALVES

- Provide maximum fuel for combustion – test results have proven as much as twice the fuel flow over stock petcocks
- Won't restrict fuel flow to the carb
- Eliminate the stumble in long whooped-out sections
- Keep the carburetor full of fuel at all times
- Ensure consistent fuel mixture under all conditions
- Machined from lightweight billet aluminum; not a cast piece like the OEM petcock
- Lighter than the stock petcock
- Use stock mounting holes and hardware

IN-LINE VACUUM FUEL VALVE

- Shuts off the flow of fuel to the carburetor whenever the engine shuts off
- Ensures a minimum of fuel spillage out of the float bowl vent if the motorcycle is dropped on its side, helping keep fuel off a hot motor
- Perfect fit for riders who need every drop of fuel available
- Installs easily into the existing fuel line and includes an auxiliary vacuum hose barb to install wherever there is a vacuum source on the engine
- CNC-machined from billet aluminum with a matte gray finish; 7,9 mm hose barbs ($^5/_{16}$")

FUEL LINE QUICK-DISCONNECT COUPLINGS

- Single or dual shut-off valves
- When connected fuel will flow and when disconnected fuel will not flow
- Use dual shut-off for fuel tanks equipped with a crossover line
- For fuel supply (fuel tank to carburetor), use the original quick-disconnect couplings with the single shut-off valve
- Available for 6,4 mm and 7,9 mm ID fuel line (1/4" and 5/16")
- Capable of withstanding temperatures of -40 °C to 82 °C (-40 °F to 180 °F)
- These quick-disconnect fittings utilize Nitrile (Buna-N) O-rings and may not be compatible with some race fuels

ELECTRICAL

LITHIUM LIFEPO4 BATTERIES

- Innovative lithium-ion motorcycle and powersport batteries
- Designed for the most demanding riders looking for higher performance, safer performance, faster acceleration, reduced weight and a much longer battery life
- Very low self-discharge provide the possibility to start an engine after a very long period of storage; even in very cold temperature conditions
- Robust brass terminals for enhanced electrical performance
- Super fast charging capabilities
- Multi-position mounting (up to 180°)
- Very safe and environmentally friendly
- Up to 70% lighter than lead acid batteries
- Waterproof design
- Heat temperature resistance up to 230 °C
- Ready to use; no need for preparation, just plug and play

HEAVY-DUTY BATTERY KITS

- Parts Europe Heavy-Duty batteries are built to the same exacting specifications and quality-control standards as OEM
- Rugged and provide more cranking power over standard batteries
- Lead calcium alloy reduces water loss and service by 66% compared to standard batteries
- Include anti-sulfation chemical formulated to reduce sulfate crystal buildup on the battery plates
- Reduce self-discharge for longer time between charges
- Fiberglass separators improve acid flow
- Battery kit includes battery, pre-measured acid pack, red filler tube, hardware kit and clear vent tube

NOTE: See pages 1035-1042 for battery application chart.

YUASA BATTERY

YTZ10S

YTZ FACTORY-ACTIVATED AGM MAINTENANCE-FREE BATTERIES

- Packs more power, discharges less in storage and has a longer life than conventional batteries
- Spill-proof design and construction have passed vibration and pressure differential spill-proof tests

NOTE: Factory-Activated batteries should be charged once a month when not in service.

NOTE: See pages 1035-1042 for battery application chart.

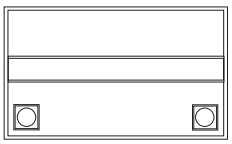
YB14-A2

YUMICRON 12V BATTERIES



- The most powerful lead-acid battery of its size
- Appears as original equipment on more and more big bikes
- Shipped dry

YUMICRON CX 12V BATTERY

- Lead/calcium battery has 5% to 8% more cranking power than the high-output Yumicron
- Requires minimal servicing
- Shipped dry

NOTE: See pages 1035-1042 for battery application chart.

SLA MAX FACTORY-ACTIVATED AGM MAINTENANCE-FREE BATTERIES

- Designed to offer maximum performance to big engine bikes equipped with lots of electronic accessories
- Superior capacity
- AGM construction (Absorbed Glass Material)
- VRLA battery (Valve Regulated Lead Acid)
- Sealed and Factory-Activated
- Spill-proof design
- Multi-positional fitment
- Ready and easy to use
- Increased power and extended life
- Extreme vibration resistance

NOTE: See pages 1035-1042 for battery application chart.

IGNITION PARTS

IRIDIUM IX SPARK PLUGS

- The ultimate in the evolution of spark plug technology and performance from the industry leader
- The iridium electrode is 25% smaller than a platinum electrode, and it's just 1/4 the size of a conventional nickel electrode
- Ultra-small diameter center electrode reduces voltage requirement and extends ignition system life
- Metal shell plating has enhanced anti-corrosion qualities

SPARK PLUGS

- Superior construction for serious power
- NGK makes plugs for almost every application and riding style
- Versatile plugs with wide operating heat ranges prevent fouling from running too cool and preignition from running too hot
- Feature high alumina ceramics for improved heat dissipation and electrical insulation, deep-seated copper core for a wider heat range and a nickel alloy tip for longer life

IRIDIUM SPARK PLUGS

BETTER METALS MEAN BETTER SPARK PLUG DESIGNS

- Six times harder than platinum, iridium doesn't melt in temperatures up to 2204 °C (4000 °F)
- Because the iridium electrodes of these plugs can be shrunk to only 0,4 mm, voltage requirements decrease while firing performance improves
- 360° laser welding of electrode provides a seal that resists wear, even in the worst conditions
- Ground electrode features a tapered cut and U-groove that form a large volume area for the flame's center
- Use NGK reference chart to order and stock these plugs

POWERMADD

E3 SPARK PLUGS

- Unique electrode shape maximizes the power created by the spark plug – Diamond Fire technology
- Electrode is a combination of performance and technology that results in an improved flame kernel shape
- This flame front ignites the bulk air/fuel mixture faster, moves heat into the combustion chamber faster and creates a more localized pressure front for faster pressure rise during the cylinder power stroke
- The result is more complete combustion and improved engine performance
- A truly premium performance plug
- Sold each

IGNITION PARTS

RACING WIRES AND ACCESSORIES

- Outer insulator of rugged, high-performance silicone and inner core of solid copper wire strands
- Connected with NGK resistor covers in either straight or 90° configurations
- Fit most applications for motorcycles, snowmobiles, watercraft and carts
- Resistor cover comes equipped with a 5k ohm ceramic resistance to defend against radio frequency interference that can disrupt electronic ignitions
- Wire/cover sets are available for plugs with removable terminals and for solid terminals in 49,5 cm (19½") and 99 cm (39") lengths
- Wire connector makes attaching new wires to CDI unit easy – just insert the lead from the CDI unit in one end, the new wire in the other and screw the two pieces together for a watertight seal
- Wire connector made of high-impact plastic
- Sold each

SPARK PLUG CAP/WIRE

- This is an exact replacement spark plug cap and wire by the original manufacturer, it is not a reproduction.
- It will fit either cylinder, just twist the rubber seal to fit left or right cylinder
- The 63,5 cm (25") plug wire will simply twist into the CDI box for an easy replacement.
- PART #s 2104-0351 and 2104-0352 sold in pairs, all others sold each

COILS

- Lighting, pulser/source and trigger coils are high-quality replacements
- Hot shot ignition coils produce an enhanced spark for a cleaner, more complete burn, resulting in the potential for more power
- All coils feature high-quality components for superior performance and long life

[1] Fits up to serial #00-29083.
[2] Fits up to serial #00-01960.
[3] Fits serial #02-02358 and up.
[4] Fits up to serial #00-04730.
[5] Fits serial #02-022574 and up.
[6] Fits serial #02-00894 and up.
[7] Replaces OEM #3089959 and 3089906.
[8] Sportsman 600/700 04 uses three different stators. This is the "Kokusan"-style, 18-pole stator with 108 mm OD and 18 mm thickness. For Sportsman 700 05 (non-EFI) there are two stators. Replaces OEM #4010901.
[9] Sportsman 600/700 04 uses three different stators. This is the 18-pole stator with 108 mm OD and 26 mm thickness. It also has an odd 6-gang connector (white molded plastic w/ clips sides and uses standard 250 female spade terminals). Replaces OEM #4010911.
[10] There are two different stators listed for Sportsman 400/500 04 (depending on the model). The way to tell the difference is by the number of poles; this is an 18-pole stator. Replaces OEM #3089546 and 3089249.
[11] Sportsman 600/700 04 uses three different stators. This is the 12-pole stator (others are 18-pole) with a source coil. Has a 390 ohm trigger. Replaces OEM #2202602 and 4010709.
[12] Must reuse eight-place connector.
[14] High-output stator.
[18] Does not include the connector.
[19] Does not include factory 16-gang connector.

OEM Output cap

RICKS MOTORSPORT ELECTRICS

STARTERS

- Affordable starters are constructed with longer-life bearings than OEM
- Many OEM starter motors have an unprotected output needle bearing on the outside of the output shaft's seal; moisture can and does enter the output cap of the electric motor and follows the armature shaft to the unprotected output needle bearing, which corrodes the bearing
- Rick's takes the extra step of installing a double-sealed ball bearing, with the output shaft seal on the outside of the bearing in their new aftermarket unit
- This simple application of common-sense engineering does two things: first, the outside bearing is now protected from damaging water entry, and second, the sealed ball bearing is replaceable

RELAYS

- Direct replacement relays by the original manufacturers, not reproduction units
- Each relay is the exact same voltage and amperage for a worry-free installation
- These relays are used to control functions like the fuel pump, power steering, cooling fan, EFI, etc.
- Most machines use multiple relays and are located in the fuse box

KILL SWITCH HOW TO ORDER

NOTICE TO CUSTOMERS: There are two types of stop switches: (1) Normally Open (NO) or (2) Normally Closed (NC). Switches in this catalog are typically of the Normally Open (NO) type. They work by GROUNDING the primary ignition lead when activated. Note that they will not work on electrical systems requiring a Normally Closed (NC) switch, which works by OPENING the circuit when activated. NC switches are typically used on battery type ignitions, which may have an ignition key as an identifier. NC switches are generally found on newer machines. If in doubt, check your machine's wiring schematic.

- Tether kill switch is easy to install; plugs into most electrical systems
- Narrow design; installs on slightly curved portion of the bars
- Weatherproof housing; matching lanyard included
- Normally Open switch is the open type; works by grounding the primary ignition lead when activated
- Normally Closed switch works the opposite of Normally Open and is designed for use on newer, more complex electrical systems
- Replacement lanyards available separately and fit both switches

For electric-start models, opens circuit when pulled	**0616-0343**

KILL SWITCH HOW TO ORDER

NOTICE TO CUSTOMERS: There are two types of stop switches: (1) Normally Open (NO) or (2) Normally Closed (NC). Switches in this catalog are typically of the Normally Open (NO) type. They work by GROUNDING the primary ignition lead when activated. Note that they will not work on electrical systems requiring a Normally Closed (NC) switch, which works by OPENING the circuit when activated. NC switches are typically used on battery type ignitions, which may have an ignition key as an identifier. NC switches are generally found on newer machines. If in doubt, check your machine's wiring schematic.

IGNITION KEYSWITCH PIGTAIL HARNESS

- Connectors to the Polaris ATV ignition switches are prone to corroding and preventing the switch from working
- Simply cut off the old harness and use the included butt connectors or solder the connections to the new pigtail
- Our pigtail fits perfectly to the ignition switch and has a nice wire sheathing protecting the wires going into the plug
- The wires are 15 cm L (6") so it can be fixed inside the headlight pod
- Sold each; includes butt connectors and zip ties

HIGH-PERFORMANCE HALOGEN BULBS

PIAA bulbs are engineered with XTRA Technology for greater performance per watt than any other bulb on the road. XTRA is a term coined by PIAA to designate a high-efficiency bulb that is designed to produce greater light output than its rated power consumption (i.e. 55W = 85W of light output). Greatly enhances your ability to see and be seen. A metal bond holds the heat-resistant glass tube securely to prevent cracks and leaks. A welded focus ring and one-piece filament support assure proper positioning.

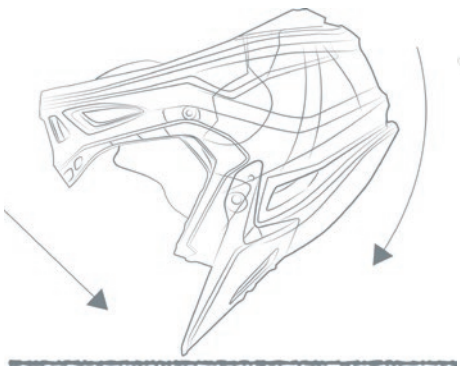
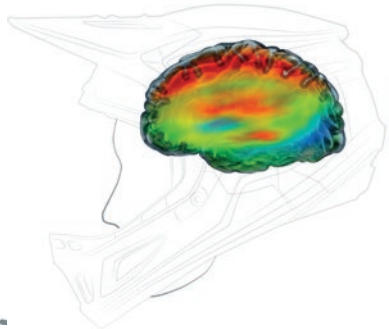
RIDER ACCESSORIES



SAFETY WARNING: Riding a motorcycle, ATV or UTV is a dangerous activity. When riding, always wear a helmet, eye protection and protective clothing. There is no assurance that serious injury or death can be avoided even if you wear the product shown in this catalog and take all precautions to avoid every risk. Please ensure that your products fit properly. Improperly fitting products can impair your ability to control your motorcycle, ATV or UTV.

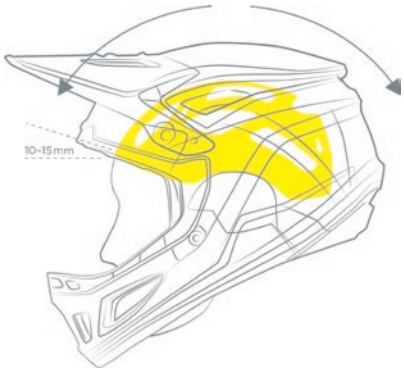
MIPS IS A BRAIN PROTECTION SYSTEM

THIS IS HOW MIPS WORKS



1

When you hit your head in a fall, it often creates a rotational motion in your brain.

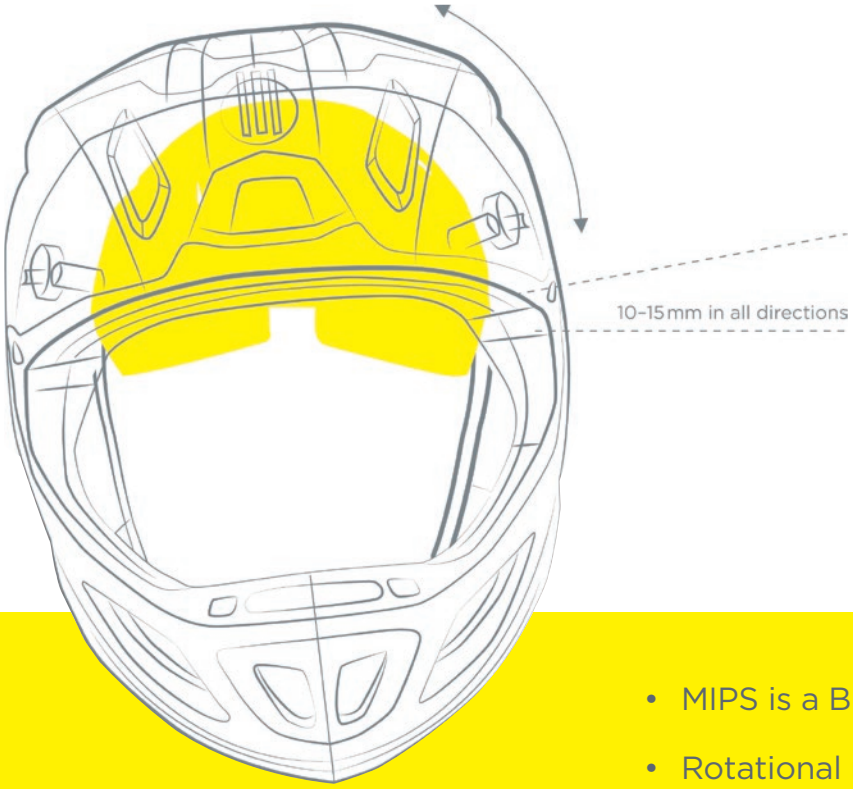


2

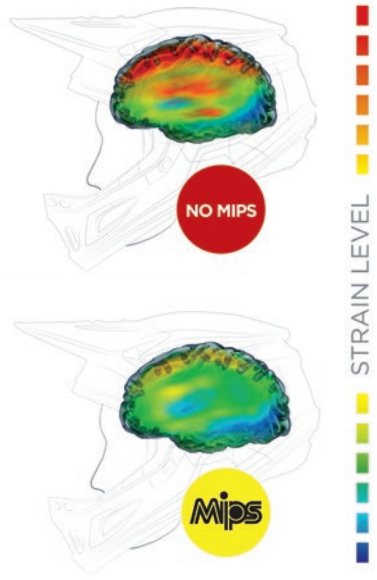
The rotational movement can cause brain injuries.

3

MIPS low friction layer allows the head to move 10–15 mm, in all directions, inside the helmet which reduces the rotational motion to the brain.



For more information, please visit: **mipsprotection.com**



HOW MIPS PROTECTS YOUR BRAIN

1. The MIPS low friction layer adds protection for certain types of impacts.

2. A low friction layer allows a sliding motion of 10–15 mm, in all directions, reducing rotational motion to the brain.

3. The MIPS brain protection system is designed to reduce strain to the brain.

MIPS — IN FOUR SENTENCES

- MIPS is a Brain Protection System.
- Rotational motion can cause brain injuries.
- The low friction layer allows a sliding movement of 10–15 mm, in all directions, reducing rotational motion to the brain during impact.
- **MIPS adds protection.**

- Constructed from a special lightweight and impact resistant thermo-injected polymer results in a significantly lighter helmet with increased structural strength and outer shell uniformity in two outer shell sizes
- Inner shell includes multi-density advanced EPS construction for optimal impact absorption performance in three sizes
- Features two concepts for impact energy management including a resin-coated inner shell surface that noticeably improves impact resistance and reduces linear acceleration values and an elastic joint to connect the helmet's inner shell and comfort liner to move independently in a crash scenario with an oblique impact, thereby spreading the energy forces from an impact, reducing rotational acceleration
- Uses Alpinestars Emergency Release System (ERS) consisting of removable cheek pads for safe, quick, easy and safe removal of the helmet by trained medical professionals/ emergency responders in the event of a crash
- The ERS features easy to locate pull-tabs for rapid release of the cheek pads, thus minimizing risk of additional injury
- Includes a multi-angle, quick-release visor system that is flush over the helmet's shell to diminish the visor protrusion from the helmet thereby enhancing safety, doesn't use screws used in the visor for increased levels of safety and convenience to be easily adjusted and allows for ease of detachment from and reconnection to the helmet in order to facilitate helmet cleaning and maintenance
- Designed to offer exceptional ventilation to prevent overheating on warm track/trail days, with the inner air network channeling combining with the outer-shell's multi-air inlets and exhaust ports for effective ventilation and high levels of heat transfer exchange
- Hydration tube compatible channels are intelligently integrated into the helmet's cheek pads for convenience and performance
- Available in sizes listed; see Alpinestars helmet size chart on page 1176 before ordering
- ECE 22.05 certified

LAYERING SYSTEM

A proper Layering System is the key to staying warm and dry while riding. Choosing the right layering garments is the first step towards this goal. Cotton-based products are absolutely not part of a Layering System. This includes sweatshirts and denim products.

During the activity of riding you generate moisture (sweat). The harder you ride, the more moisture you generate. Cotton products trap this moisture, which in turn transmits cold directly to your body.

HOW TO MEASURE

CHEST
Just below underarms circumference of broadest area of chest

HEIGHT

WARMME HEATED SOCKS

- Battery-powered heated socks for motorcycle riding, skiing, trekking, fishing and any other use
- Nylon/polyester protectors on calves protect against wear
- Made with breathable materials that offer lightness, strength and comfort, but also let natural perspiration escape
- Heating circuits radiate heat on the top part of foot and ensure benefits even at the lowest temperatures
- Hidden carbon fiber heating circuits are hyperflexible and ultra-thin, radiating infrared heat (up to 45 °C/113 °F) so as to maintain a comfortable foot temperature
- Temperature level can be adjusted to one of three levels by clicking the button on battery (on - low - medium - high - off)
- Small, lightweight and fast recharging 7,4 V - 2200 mAh lithium ion battery is stored in a small inner pocket on the top of calf
- Special cotton and spandex make the socks softer and more comfortable
- Hand washable in 30 °C (86 °F) water
- Battery and charger included; battery can also be purchased separately
- Sold in pairs

UNDERWARE GLOVE LINERS

ORIGINAL, QUALIFIER OR ULTRA

- Designed to be worn inside normal cold weather riding gloves
- Liners take the beating that palms and lower fingers usually endure from the inside of the riding gloves
- The DuPont™ Kevlar® fibers of the UnderWARE liners absorb the friction between glove and hand that would otherwise cause blisters, including the chafing and rubbing that hands normally endure while riding through the whoops or trails
- Almost no chance for blisters and the material is machine washable, right along with all the rest of the riding gear, for easy maintenance
- Original style features full fingers, and Qualifier style features open fingers
- Ultra style features waterproof material and is recommended for wet conditions where hands are moist from perspiration; material will not absorb moisture

ENIGMA BODYGUARD

- Made with polyester net and Airnet material
- Combines the positive features of SAS-TEC foam with Koroyd cores to something completely new that's lightweight and breathable with the highest-damping capacity
- Special micro structure of the SAS-TEC foam is responsible for an adaptive damping behavior – the higher the speed of the impact, the higher the resistance of the foam
- Koroyd's precise extrusion and unique thermal welding process leads to a structure with extremely efficient and consistent energy-absorption properties; upon high velocity impact, the cores crush in a completely controlled manner, decelerating the energy from the impact and greatly reducing the final trauma levels
- Available in white

WIRE GAUGE SELECTOR
It's important to match up wire diameter and current properly. To choose the right gauge wire, you will need to know how much Wattage (or Amperage) you will draw and what the length of the cable will be.

NOTE: The chart below is based on a 12V system. To find the appropriate wire for 6V systems, the Amp and Watt numbers should be divided in half.

AMP.	WATT	91 CM (3 FT)	152 CM (5 FT)	213 CM (7 FT)	305 CM (10 FT)	457 CM (15 FT)
