2022

Touring

WINDSHIELD RACING

- This windshield "Racing" is suitable for Harley-Davidson® Touring Road Glide models from the year 2015 (Road Glide®, Road Glide® Special, Road Glide® Ultra & CVO Road Glide)
- The windshield is an ABS plastic part and is CNC machined on state of the art 5-axis machining centers. This ensures that these parts are original equipment quality. You can have the plastic parts painted immediately, which again is very cheap because the surface is perfect and no preparation or rework of the parts is required. The assembly of the shield is not complex, because this is simply exchanged for the original

- The following two surface variants are available for this windshield:

- RAW paintable (Minimal painting effort - because of perfect surface finish. The shield is delivered ready for painting and can be painted immediately)
- Black glossy (Does not need to be painted - so you save the entire painting costs. Remove protective film and the sign shines in the original Harley-Davidson® black)

DESCRIPTION	STYLE	PART #

AIR FILTER COVERS

- The air filter cover is designed to fit exactly on the original air filter. 100% fitting ABS plastic part. No customization work required. This part is paintable. Minimal painting required due to perfect surface finish. Or available in glossy black
- All holes and milling are milled on the most modern 5-axis CNC machining centers, so the air filter cover only needs to be replaced with the original air filter cover

- The air filter cover is TOP processed, fits perfectly and turns the boring original air filter into a cool part in the popular old school style with fins and indicated perforation
- Available in glossy black (finished surface) or paintable

AIR BOX COVER

- Cult-Werk air filter cover suitable for V-Rod®, Night Rod Special® & Muscle®. This kit is required for all airbox covers with an integrated speedometer unit. The Cult-Werk air filter cover kit consists of 2 parts, an extremely flat cover for the air filter itself and a very flat upper part of the air filter box
- Manufactured from ABS plastic, milled on the most modern 5-axis CNC machining centers, no adjustment work required. The clips are simply clipped into the new upper part of the air filter box – just like the original. The hole for the sensor is also available (see also pictures below). A supplied adapter piece guarantees easy installation and a perfect hold of the sensor
- It is very important that the air filter box is properly closed again, otherwise water and too much air or dust can get into the air filter box, which in turn can cause damage to the engine

HARLEY V ROD NIGHT ROD SPECIAL LED HEADLIGHT DAYMAKER (BLACK)

- Fits all V-Rod, Night Rod & Muscle models that already had the original oval headlight installed (Or in connection with a mask from us that you can find in the "Headlight masks" area)
- The headlight comes in black with clear glass. It has four high beam projector lenses and four "D-shaped" low beam lenses
- The solid-state LEDs have a very long service life and are shock and vibration resistant. The installation of the headlight is very simple and it can be easily replaced. In addition, the plugs fit the original wiring
- Approval: E-mark and therefore registration-free
- Power: 60 Watts
- Voltage: 10-32V DC
- Lumens: Hi-3450l m, Lo-2800 lm

DESCRIPTION	STYLE	PART #
ALL V-ROD/NIGHT ROD & MUSCLE		
LED Headlight	(Black with Clear glass)	2001-2602

HARLEY TOURING 7" LED HEADLIGHT (BLACK)

- Fits all 2014 to present Harley-Davidson® Street Glide models as well as many other Touring models with 7" headlights
- IMPORTANT INFORMATION: You may have to solder the headlight. The adapter will definitely fit the Street Glide, because you can disconnect a main connector a little further back on the wiring harness to use our adapter
- The headlight comes in black with clear glass. It has two high beam projector lenses and two low beam lenses. The LEDs have a very long service life and are shock and vibration resistant. The installation of the headlight is very simple, it can be easily replaced. The adapter plugs required for installation are included – Plug & Play = ONLY WITH THE STREET GLIDE
- Power: 20 / 40 watts
- Voltage: 10-100 V DC
- Lumen: 1350 lm / 1770 lm
- Size: 176,5 mm x 176,5 mm x 98,3 mm

DESCRIPTION	STYLE	PART #

7" LED Headlight	(Black)	2001-2528

HARLEY 7" HEADLIGHT

- The headlight fits all Harley-Davidson® models that are attached to the center of the lower fork bridge with a screw. In addition, our side speedometer bracket (HD-SPO037) must be used with Sportster models to create enough space for the significantly larger headlight. 7" H4 headlight in matt black metal housing with prism reflector and clear lens for optimal light output
- Very easy and quick installation – simply swap it for the original Harley headlight
- Including 12V H4 60/55 W bulb and parking light. Overall diameter 205 mm and depth 120 mm
- Dimensions bracket: 20x32x60 mm
- With ECE

DESCRIPTION	STYLE	PART #

HEADLIGHT KITS

- The Cult-Werk headlight kit gives to your bike the popular look of the Harley-Davidson® Night Rod and fits all Harley-Davidson® Breakout models from 2013 to 2017 and Sportster S from 2021. Unfortunately, the original headlight cannot be used in conjunction with the kit, but our LED headlight "Daymaker" with the appearance of the V-Rod / Night Rod is included. The headlight must be soldered to the original wiring harness
- You will also receive a CNC lasered headlight bracket from us, which lowers the headlight by approx. 30 mm. This achieves an even more aggressive look and makes the Harley look deeper

DESCRIPTION	STYLE	PART #
BREAKOUT 13-17		
Headlight kit "CVO-Style"		2001-2533

and longer. The speedometer remains in the original position. You will also receive the headlight mask, which is made of high-quality ABS plastic. A perfect surface and a low painting effort are thus guaranteed. 100% fitting accuracy is a matter of course. No changes to the original cables are necessary

- All the holes required to attach the headlight kit are already there. All changes are mounted on the original breakpoints, thus ensuring a firm and secure hold. Like the original, the headlight can be adjusted via a slot in order to be able to optimally adjust the headlight range

HEADLIGHT MASK FOR NIGHT ROD SPECIAL

- The Cult-Werk headlight mask "New Night Rod Style" gives the V-Rod / Night Rod the popular look of the newer Harley-Davidson® V-Rod / Night Rod models and fits all Harley-Davidson® V-Rod / Night Rod models from the year of construction 2002 to 2011
- On the V-Rod models, the headlight remains and can continue to be used in conjunction with the kit. **IMPORTANT:** The original round headlight cannot be used on the Night Rod models, the headlight of the V-Rod is required here (Part number 2001-2602)
- In connection with the headlight mask, which is made of high-quality ABS plastic, you will receive a CNC-lasered headlight bracket from us, which lowers the headlight and ensures a perfect fit. This achieves an even more aggressive look and the Harley looks deeper and longer
- All the holes needed to attach the mask are already there. The changes are mounted on the original breakpoints, thus ensuring a firm and secure hold. The headlight can be adjusted, just like the original, in order to be able to set the headlight range optimally
- The following two surface variants are available for this headlight mask:
 - Can be painted (minimum painting effort - because of the perfect surface finish. The mask is delivered ready for painting and can basically be painted immediately)
 - Glossy black (does not have to be painted - so you save the entire painting costs. Remove protective film and the mask shines in the original Harley-Davidson® black)

HEADLIGHT MASK FOR V-ROD MUSCLE

- The Cult-Werk headlight mask "New Night Rod Style" gives the V-Rod Muscle the popular look of the Harley-Davidson® Night Rod and fits all Harley-Davidson® V-Rod Muscle models from 2009 to 2017 and also for all Night Rod Special models from 2012 to 2017
- **IMPORTANT:** The original headlight remains and can be used in conjunction with the kit
- In connection with the headlight mask, which is made of high-quality ABS plastic, you will receive a CNC-lasered headlight bracket from us, which lowers the headlight and ensures a perfect fit. This achieves an even more aggressive look and the Harley looks deeper and longer
- All the holes needed to attach the mask are already there. The changes are mounted on the original breakpoints, thus ensuring a firm and secure hold. The headlight can be adjusted, just like the original, in order to be able to set the headlight range optimally
- The following two surface variants are available for this headlight mask:

HEADLIGHT MASK FOR V-ROD

- Headlight mask "Night Rod Style" with odometer offset for V-Rod
- The Cult-Werk Night Rod Style headlight mask gives the V-Rod the popular look of the Night Rod, but in connection with the modern V-Rod headlight and not with the old -looking Night Rod headlight. In this way you can achieve the desired race style without having to buy a new headlight
- The original V-Rod headlight is retained. We provide you with a CNC lasered headlight bracket, which lowers the headlight by approx. 50mm. This achieves an even more aggressive look and makes your Harley look deeper and longer. The speedometer can be kept in the original position, or it disappears under the headlight mask (or in the Cult-Werk Airbox Cover Racing) the driver still has a clear

view of the entire speedometer unit. No changes to the original cables are necessary. This headlight mask is made of ABS plastic; A perfect surface and a low painting effort are thus guaranteed. 100% accuracy of fit is a matter of course. No adjustment work necessary

- All the holes are already there, the screws required to attach the headlight mask are concealed. The kit is mounted on the original breakpoints and thus ensures a firm and secure hold. Like the original, the headlight can be adjusted via a slot in order to be able to optimally adjust the headlight range
- Headlight / lamp mask suitable for Harley Davidson® V-Rod models (also for Night Rod®, but only in connection with V-Rod headlights)

HEADLIGHT MASK FOR BREAKOUT FROM 2018

- The Cult-Werk headlight mask "V-Rod Style" gives the Breakout the popular look of the Harley-Davidson® V-Rod / Night Rod and fits all Harley-Davidson® Breakout models from 2018
- The original Breakout 2018 LED headlight remains and will continue to be used in conjunction with the kit. In connection with the headlight mask, which is made of high-quality ABS plastic, you will receive a CNC-lasered headlight bracket from us, which lowers the headlight and ensures a perfect fit. This achieves an even more aggressive look and makes the Harley look deeper and longer. The speedometer remains in the original position. No changes to the original cables are necessary
- All the holes needed to attach the mask are already there. All changes are mounted on the original breakpoints, thus ensuring a firm and secure hold. The headlight can be adjusted, just like the original, in order to be able to set the headlight range optimally
- The following two surface variants are available for this headlight mask:
 - Can be painted (minimum painting effort - because of the perfect surface finish. The mask is delivered ready for painting and can basically be painted immediately)
 - Glossy black (does not have to be painted - so you save the entire painting costs. Remove protective film and the mask shines in the original Harley-Davidson® black)

HEADLIGHT MASK FOR SPORTSTER S

- The Cult-Werk headlight mask "NRS Style" is based on the popular look of the Harley-Davidson® V-Rod / Night Rod and fits all Harley-Davidson® Sportster S models from 2021
- The original Sportster S LED headlight remains and will continue to be used in conjunction with the kit. In connection with the headlight mask, which is made of high-quality ABS plastic, you will receive a CNC-lasered headlight bracket from us, which carries the new mask. This achieves an even more aggressive look and makes the Harley look deeper and longer. No changes to the original cables are necessary
- All the holes needed to attach the mask are already there. All changes are mounted on the original breakpoints, thus ensuring a firm and secure hold. The headlight can be adjusted, just like the original, in order to be able to set the headlight range optimally
- The following two surface variants are available for this headlight mask:
 - Can be painted (minimum painting effort - because of the perfect surface finish. The mask is delivered ready for painting and can basically be painted immediately)

HEADLIGHT MASK FOR STREET BOB/ SOFTAIL STANDARD M8 18-21

- The headlight mask fits the Harley-Davidson® Street Bob and Softail Standard models from 2018 and gives the motorcycle a significantly more modern look. The original Street Bob headlight remains and will continue to be used in conjunction with the kit. In connection with the headlight mask, which is made of high-quality ABS plastic, you will receive a CNC-lasered headlight bracket from us, which ensures a perfect fit for the headlight
- The speedometer remains in the original position. No changes to the original cables are necessary. All the holes needed to attach the mask are already there. All changes are mounted on the original breakpoints, thus ensuring a firm and secure hold. The headlight can be adjusted, just like the original, in order to be able to set the headlight range optimally

HEADLIGHT MASK FOR ROAD GLIDE

- This "Bad Look" headlight mask fits all Harley-Davidson® Touring Road Glide models from 2015 (Road Glide®, Road Glide® Special, Road Glide® Ultra & CVO Road Glide)
- The mask is an ABS plastic part and is CNC milled on the most modern 5-axis machining centers. This ensures that these parts are OE quality. You can have the plastic parts painted straight away, which in turn saves money as it is a perfect finish and no preparation or refinishing of the parts is required
- To assemble the headlight mask: This basically clamps by itself in the fairing. Nevertheless, a high-quality assembly adhesive is supplied with which the mask is glued to the headlight at four adhesive points. Important: The glue should dry for 12 hours at room temperature
- The following two surface variants are available for this headlight mask:
 - Can be painted (minimum painting effort - because of the perfect surface finish. The mask is delivered ready for painting and can basically be painted immediately)
 - Glossy black (does not have to be painted - so you save the entire painting costs. Remove protective film and the mask shines in the original Harley-Davidson® black)

TURN SIGNALS 3-1

- The LED set 3 in 1 (turn signal, taillight and brake light) fits all Harley-Davidson® models. Here hides innovative LED technology in the smallest space - a total of 5 powerful SMDs give the turn signal, taillight and brake light function of this tiny taillight / turn signal unit their bright light. The whole thing is packaged in a high quality black metal housing with tinted glass, E-approved for rear installation
- IMPORTANT: We recommend the use of the offered mini-resistor (2050-0467) so that the display as well as the flashing frequency works properly
- Dimensions: width 75 mm, height 13 mm & depth 15,5 mm (threaded bolt: M8 x 1.25 mm, length approx. 20 mm)
- Connections:
 - Black cable = ground (-)
 - White cable = turn signal (+)
 - Yellow cable = tail light (+)
 - Red cable = brake light (+)
- Scope of delivery: 1 pair
- Material: Metal
- Certificates: E-approved and therefore registration free

DESCRIPTION	PART #

LED Taillight / Turn signal 3 in 1 (black with Tinted Glas)	2010-1469

TURN SIGNALS FOR TOURING

- Fits all Harley-Davidson® Touring Street Glide models (Street Glide & Street Glide Special) from year of manufacture 2014
- IMPORTANT: The turn signal set comes with wiring harness incl. resistor for the correct flashing frequency. The set is therefore absolutely PLUG AND PLAY
- The turn signal set gives your Harley a clean and cool look. It is a 100% accurate fit ABS plastic part, therefore offers a 100% fit. No adjustment work necessary. All holes and milling are milled on the latest 5-axis CNC machining centers, so the turn signal set only needs to be replaced with the original. Original fit - new design
- Included in delivery:
 - 2x ABS plastic turn signal holder (glossy black)
 - 2x LED turn signals incl. E-mark and therefore registration free
 - Wiring harness incl. Resistor and plug = Plug and Play

SPORTSTER S REAR LIGHTING KIT

- Cult-Werk LED lighting set 3in1 incl. bracket suitable for Harley-Davidson® Sportster S models from 2021
- The bracket on which the LED 3in1 lighting including the E-mark is attached was made of steel and then powder-coated in glossy black
- The lighting unit is required if you remove the original lighting bracket and use a side license plate holder. The holder is screwed to the original mounting points in the rear part using the mounting material provided. Then the wiring of the LED lighting has to be carried out

Sportster S

DESCRIPTION	STYLE	PART #

LED Turn signals set 3 in 1 incl. holder	Sportster S	2020-2046

LICENSE PLATE

LICENSE PLATE HOLDER

- Cult-Werk side license plate holder with suitable for all European countries and a milled plate including insert frame for the license plate. The shortest license plate holder on the market guarantees you a TOP look. The license plate holder from Cult-Werk is made of high quality steel, CNC laser cut and then black powder coated. Incl. LED license plate light with E-mark
- The mounting is relatively easy, because the license plate holder is screwed to the rear axle. To do this, jack up the Indian and loosen the axle nut on the right side. Pull out the axle and then remove the original rectangular washer (only on the left side). Attach our license plate holder with the axle and screw it again on the right side with the original washer and axle nut. We always recommend to use some medium strength threadlocker. Since the Cult-Werk license plate holder, compared to other license plate holders available on the market, has an extra short mounting foot, it is visually far more appealing
- Scope of delivery:
1x side license plate holder
1x LED license plate light incl. E-mark (pre-assembled)
1x stainless steel special nut with collar M24x2
4x screws incl. nuts for license plate mounting

LICENSE PLATE & REAR LIGHTING KIT

- Cult-Werk LED lighting set 3in1 incl. bracket suitable for Harley-Davidson® Sportster S models from 2021. The bracket on which the LED 3in1 lighting including the E-mark is attached was made of steel and then powder-coated in glossy black
- The lighting unit is required if you remove the original lighting bracket and use a side license plate holder (included for all EU countries)
- The holder is screwed to the original mounting points in the rear part using the mounting material provided
- Then the wiring of the LED lighting has to be carried out

TURN SIGNALS MOUNTING PLATES

- The Cult-Werk turn signal mounting plates are needed for the conversion to smaller turn signals. The plates fit many Harley-Davidson® models such as Sportster, Dyna or Softail. The mounting plates are designed to also cover the pressure points in the paint from the original turn signals. Ideal for converting original turn signals to smaller turn signals. Suitable for all turn signals with 8 mm and 10 mm thread. The mounting plates are screwed with the smaller turn signals and thus cover the second hole of the original turn signals. CNC laser cut
- Color: black glossy powder coated, Scope of delivery: 2 pieces

UNIVERSAL TURN SIGNALS

- The "Old School" LED turn signal set is installed at Cult-Werk because of the optics mainly in the Sportster models, but it can also be used on various Harley models. In the black aluminum housing are high quality power LEDs installed and the entire turn signals are supplied with E-mark - REGISTRATION FREE
- IMPORTANT: We recommend the use of the offered mini-resistor (2050-0467) so that the display as well as the flashing frequency works properly
- Product specifications: 45 mm x approx. 70 mm, threaded bolt = M10 x 1.5 mm & Scope of delivery = 1 pair

REAR LIGHTING BRACKET FOR SPORTSTER S

- Cult-Werk lighting unit excl. LED lighting suitable for Harley-Davidson® Sportster S models from year 2021
- The holder, andem externally any LED 3in1 lighting means with an M8 thread can be attached, was made of steel and then powder-coated glossy black
- The lighting unit is needed if you remove the original lighting bracket and use a side license plate holder
- The holder is screwed to original mounting points in the rear section with the supplied mounting material
- Subsequently, the wiring of the LED lighting they want to use for this purpose is still to be done

DESCRIPTION	PART #
SPORTSTER S FROM 2021	
Lighting unit (without LED Lighting)	2010-1468

BRAKE/CLUTCH MASTER CYLINDER COVERS

- The mini-resistor is required for all Harley models with turn signal relay, where LED turn signals are retrofitted
- In addition, it is required for new Harley models with control unit to adjust the display on the speedometer frequency
- This ensures that the flashing frequency remains the same and thus the new LED turn signals work properly

DESCRIPTION	PART #

BRAKE/CLUTCH MASTER CYLINDER COVERS

- Cult-Werk "Custom" aluminum clutch and brake cylinder covers for V Rod®, Night Rod, Muscle and Touring models
- The "Custom" covers are milled from aluminum on the most modern 5-axis CNC machines and replace the original, somewhat boring covers
- The "Custom" covers are approx. 25 mm higher than the original covers and have been very elaborately milled. Different levels, indentations and different radii make the "Custom" covers appear extremely 3-dimensional and thus give your Harley a more aggressive and high-quality look
- The lids are black powder-coate

DESCRIPTION	STYLE	PART #

BRAKE MASTER CYLINDER COVER

- Cult-Werk® aluminum brake master cylinder cover with milling for all Harley-Davidson® Breakout models from the year of construction 2013 up to now as well as for Harley-Davidson® Softail models from the year of construction 2018
- The cover is milled from aluminum on the latest 5-axis CNC machines and replaces the original, somewhat boring cover. Of course, it is also CNC milled on the inside, ie the inside of the cover corresponds to the original cover, because guides for the seal are milled in there, which are still required

POP-UP GAS CAP

- This PopUp tank cap in Ultraflat design with a right-hand thread and vent fits all Harley-Davidson® tanks from the year 1996. (Dyna®, Softail®, Heritage®, Fatboy®, Touring® etc. ...)
- (Exception are models that have a vent pipe in the tank nozzle, which bumps against the catch of the pop-up function in the middle of the lid. It is best to check this beforehand, the tube may have to be removed. Most of the time, however, it is sufficient to move the locking cotter pin slightly on the side where it abuts the tube so that it is flush with the guide there. Or you grind the cotter pin at both ends a little bit, so that it does not protrude over the guide)
- The special feature of the high quality lid equipped with seal is the retractable thumbscrew with pop-up function. If you press with your thumb on the closed tank cap, the knurled screw can be sunk by a 90° rotation, the lid is now ultra-flat and gives a classic smooth look
- Dimensions: outer diameter 60 mm, height with knurled screw recessed 36 mm, diameter of knurled screw 38 mm, height of knurled screw 9 mm. Thread diameter approx. 45 mm, thread depth approx. 28 mm

DESCRIPTION	STYLE	PART #
ALL HARLEY-DAVIDSON		
Gas cap Pop-Up Ultraflat (black)	Black	0703-0893

GAS CAP

- This lockable gas cap fits all V-Rod®, Night Rod Special®, Muscle & Street Rod® models
- Like the original, the tank cap is made of black plastic, including 2 keys
- Since the seat cannot be locked, it is almost necessary to mount a lockable tank cap

DESCRIPTION	STYLE	PART #

Tank Cover	GT	0520-3718
Tank Cover	Racing	0520-3719

GAS TANK LIFTER

- For Softail M8: The Cult-Werk® Tanklift raises the tank at the front attachment point and fits the Harley-Davidson® Street Bob and Softail Standard from 2018. You can adjust the height of the tank to your own taste (approx. between 40 & 50 mm). By raising the tank, the shape of the tank comes into its own even better. An additional advantage of this tank lift is that there is enough space between the frame and the tank to allow the wiring harness to disappear under the tank. Nothing needs to be changed on the cables. Furthermore, the Cult-Werk tank lift was optically very beautiful and elaborately designed. The design fits perfectly with the look of the other Cult-Werk® custom parts and is therefore perfectly integrated. CNC-lasered and then black powder-coated
- For Sportster: The Cult-Werk Tanklift lifts the tank at the front attachment point and is height-adjustable from 35 - 50 mm. So you can adjust the height of the tank to your own taste. By raising the tank, the "Peanut" shape comes into its own even better. An additional advantage of this tank lift is that there is enough space between the frame and the tank to allow the wiring harness to disappear under the tank. Nothing needs to be changed on the cables

DASH COVER LOW RIDER S

- The Dash Cover of the company Cult-Werk® fits all Harley-Davidson® Low Rider S models from the year 2018. The part gives your Harley a clean, cool as well as flatter look at the tank and is needed as a replacement for the original cover when the fittings are moved to the headlight mask with our offset (available separately or in the bundle, see chart below). This cover is a 100% accurate fitting ABS plastic part. All holes and milling are milled on the latest 5-axis CNC machining centers. During assembly it is necessary to shorten the brackets for the original dash cover and holes have to be drilled afterwards - then the cover is fixed with the new bracket supplied (details can be found in the assembly instructions)
- The following finish option is available for this Dash Cover:
 - Paintable (Minimal painting effort - because perfect surface finish. The cover is delivered ready for painting and can be painted immediately)
 - Black glossy (Does not need to be painted - so you save the entire painting costs)
- Remove protective film and the cover shines in the original Harley-Davidson® black

FORK & SUSPENSION

SCREWS TRIPLE CLAMP

- Fork bridge screws (set of 5 pieces) black suitable for all Harley-Davidson® Muscle®, Night Rod Special® models. These triple tree bolts replace the original zinc-plated bolts with bolts of the same quality
- The black galvanized Cult-Werk screws are less noticeable in black and give the black fork the finishing touch. 5 pieces = 1 piece for the upper triple clamp and 4 pieces for the lower triple clamp. Since the screws are not painted or coated, there is no flaking when tightening, just permanently beautiful
- Material: high-strength steel / black galvanized

FORK & SUSPENSION

LOWERING KIT

- The lowering kit from Cult-Werk for all Sportster models from year of manufacture 2004 to current gives your Harley a far from sporty look. In addition, the spring travel limiters (item number: 1313-0228) are required for this

FORK & SUSPENSION

SUSPENSION LIMITER

- These universal spring travel limiters (4 pieces) can be used to limit the deflection of the rear shock absorbers. The great advantage of these spring travel limiters is that they are made of relatively soft rubber. When the shocks are placed on the travel limiters, no hard shocks are caused, but rather a "soft" touchdown takes place
- Thus, a possible touchdown on the tire is prevented. The assembly takes only a few seconds, because the limiters are only clipped on the piston rod. It is not necessary to remove the damper
- Dimensions: Inside Ø 13 mm, outside Ø 38 mm, thickness 10 mm

Suspension Limiter (4 Pieces)	Universal	1313-0228

FRAME

FRAME COVER

- 100% accurate fitting ABS plastic part - NO GRP. All existing holes and milling are milled on the latest 5-axis CNC machining centers, so that the frame cover only needs to be attached. Enhances your Sportster very much. The part is supplied in glossy black (Does not need to be painted - so you save the entire painting costs. Remove protective film and the fender shines in the original Harley-Davidson® black)
- IMPORTANT INFORMATION:** The frame cover should be used in conjunction with our swing saddles and to do this, two holes must still be drilled during assembly for the base plate of the saddles

FENDER

REAR FENDER

- This rear fender is designed so that it sits about 50 mm closer to the tire. So you save the lowering of the Sportster and the distance between fender and tire is reduced - this creates againrum a super cool look. Short rear fender with perforated optics, matching the design of the Sportster. 100% fitting ABS plastic part. No adjustment work necessary. Minimal painting effort, because of perfect surface finish
- All drillings and millings are milled on most modern 5-axis CNC machining centers, so that the rear fender must be exchanged only against the original rear fender. The rear fender is TOP processed, fits perfectly and makes the view of the rear wheel free. Original fit - super cool retro style. The struts must be shortened, we recommend the short fender struts from Cult-Werk to then cover everything again nice. After successful assembly, the spring travel must be checked. If necessary, the spring travel must be limited accordingly with spring travel limiter (part number: 1313-0228)
- IMPORTANT INFORMATION:**
The fender can only be used in conjunction with a very short single seat (single seat from Sportster 2016 not possible) or with one of our swinging saddles (part number: 0820-0194 & 0820-0195)

FENDER REAR KIT

- Complete rear conversion "Custom" incl. mounting kit suitable for Harley-Davidson® Touring models from year of manufacture 2014 (Street Glide, Road Glide & Road King – also special versions as well as Ultra and Limited)
- **IMPORTANT:** The rear conversion comes FROM NOW with wiring harness incl. resistor for the correct flashing frequency. The conversion is absolutely PLUG AND PLAY
- The original license plate light must be used and connected with the wiring harness on the existing wires (red & black)
- This Cult-Werk rear conversion is an ABS plastic part and is CNC milled on the most modern 5-axis machining centers. This ensures that these parts are OEM quality. No cheap GFK. You can have the plastic part painted immediately in a paintable version, which again is very affordable because it is a perfect finish. The complete conversion kit consists of a rear fender including mounting kit and integrated LED taillights, brake lights and turn signals
- The rear fender "Custom" V1 was designed visually very elaborate. The Cult-Werk rear fender is characterized by very simple assembly. It is best to remove the side cases at the rear before mounting, then the ABS rear fender is mounted over the original metal fender and

fastened with the original screws of the seat. In addition, the supplied sheet metal brackets are screwed on to secure the fender to the frame. Before final assembly of the ABS fender, the LED lights are to be fixed (these must be glued in – silicone or any other adhesive) and the wiring and routing of the wiring harness is to be carried out

- The following two finishes are available for this rear conversion:
 - Paintable (Minimal painting required – due to perfect surface finish. The fender is delivered ready for painting and can basically be painted immediately)
 - Black glossy (Does not need to be painted – so you save the entire painting costs. Remove protective film and the fender shines in the original Harley-Davidson® black)
- The following parts are included in delivery
- ABS rear fender
- 2x LED tail and brake lights 2 in 1 (already on the wiring harness)
- 2x LED turn signals (already on the wiring harness)
- 2x brackets for stiffening
- Wiring harness incl. resistor and plug = Plug and Play

Belt protection	Bottom	1202-0171
Belt protection	Top	1202-0174

HEADLIGHT

- The Cult-Werk® Headlight Mask "Custom" gives the Indian a slimmer look and fits all Indian® Scout Bobber models from 2018 onwards
- The original Indian headlight remains (can of course be replaced with an LED version with identical mounting) and continues to be used in conjunction with the kit. With the headlight mask, which is made of high quality ABS plastic (no GRP), you get a CNC lasered mask mount, which carries the mask and ensures perfect fit. This achieves an even more aggressive look as well as makes the Indian look much narrower from the front. The speedometer remains in the original position. No changes to the original cables are necessary
- All holes needed for mounting the mask are already present. All modifications are mounted on the original mounting points and thus ensure a firm and secure hold. The headlight can be adjusted, as original also, to be able to adjust the headlight range optimally (thereby the mask is also adjusted)
- The following two surface finishes are available for this headlight mask:
 - Paintable (Minimal painting effort - because of perfect surface finish. The mask is delivered ready for painting and can be painted immediately)
 - Glossy black (Does not need to be painted - so you save the entire painting costs)
 Remove protective film and the mask shines in black gloss

TURN SIGNALS

- Cult-Werk LED turn signal set "Shorty" incl. aluminum holder suitable for Indian® Scout models from the year 2015 to current
- The small holder in which the LED turn signal incl. E-mark is located was milled from an aluminum part and then powder coated black matte with structure (matching the frame).
- In the holder was still the new Cult-Werk icon milled to round off the set visually perfect. The turn signals are simply replaced against the original turn signals

FENDER REAR FENDER

- The Cult-Werk® rear fender "Bobber Clean" without lighting gives the Indian a narrower look and fits all Indian® Scout Bobber models from 2018 onwards. The fender is made of high-quality ABS plastic and all drilling and milling are state-of-the-art 5-Axis CNC machining centers milled so that the rear fender can be exchanged for the original and also attached to the original mounting points. The rear fender is TOP processed and fits perfectly between the original struts. All mounting material is included in the scope of delivery and no changes need to be made to the frame of the Indian!

The following two surface variants are available for this headlight mask:

- Can be painted (minimum painting effort - because of the perfect surface finish! The mask is delivered ready for painting and can basically be painted immediately)
- Glossy black (does not have to be painted - so you save the entire painting costs! Remove protective film and the mask shines in shiny black)

FENDER FRONT FENDER

- The front fender "Old School" of the company Cult-Werk® fits for Indian® Scout models from the year of manufacture 2015 to current. It is shorter, narrower and makes the view of the front wheel free. The part gives your Indian a clean and cool look. This fender is a 100% accurate fit ABS plastic part and the required brackets for mounting are included. The fender therefore offers a 100% accurate fit. No adjustment work necessary. All drillings and millings are milled on most modern 5-axis CNC machining centers, so that the fender must be exchanged only against the original

The following two surface finishes are available for this front fender:

- Paintable (Minimal painting effort - because perfect surface finish. The fender is delivered ready for painting and can basically be painted immediately)
- Black glossy (Does not need to be painted - so you save the entire painting costs. Remove protective film and the fender shines in black glossy)
