PRIMARY BELT COVER

- Billet aluminum construction with a chrome-plated finish
- Styled to match Belt Drives' popular Top Fuel belt drive cover
- Fits 3" open BDL belt drive systems with 3 1/2" x 4" motor plate bolt pattern

PART #	DESCRIPTION
1120-0049	Cover for BDL 3" primary

DS-191026

POLISHED DOMED PULLEY COVER KITS

- Includes clutch basket cover, motor pulley cover, special tape and button-head bolts with template for permanent installation

PART #	DESCRIPTION
DS-191026	For 47-tooth motor shaft pulley and 72-tooth clutch basket (Evolution)
DS360420	For 47-tooth motor shaft pulley and 76-tooth clutch basket

PRIMARY CHAIN DRIVE KIT WITH BALL-BEARING LOCKUP CLUTCH

- Complete chain drive kit featuring BDL's ball-bearing lockup clutch for riders who want a lighter, easier to operate clutch
- Provides approximately 60% more surface contact area than stock clutch for smooth, sure power transfer to the rear wheel
- Complete kit includes rear basket with BDL ball-bearing clutch with 66-tooth ring gear, 9-tooth pinion gear, front 25-tooth sprocket, Diamond primary chain and adjuster assembly plus BDL's patented compensator

PART #	DESCRIPTION
1120-0179	For 00-06 FXST/FLST and 99-05 FXD

PRIMARY DRIVE KIT

- Kit includes compensating sprocket assembly, chain adjuster assembly and complete clutch assembly with aramid friction plates
- Primary chain sold separately

PART #	DESCRIPTION
1120-0076	For 99-06 Big Twin (except 06 Dyna), 25/36T

COMPENSATOR SPROCKET KITS

- Three-piece patented design with no spring
- Weighs less than the stock sprocket

U.S. Patent #6,234,909B1.

PART #	DESCRIPTION
FOR 07-20 BIG TWIN MODELS (EXCEPT 08-11 FXCW/FXCWC, 13-17 FXSB, 18-20 FLFB/FLFBS, 18-20 FXBR/FXBRS/FXDRS)	
1120-0292	34-tooth compensator sprocket

1120-0292

PART #	DESCRIPTION
FOR 99-06 BIG TWIN	
1101-5001	25-tooth compensator sprocket
1101-5002	24-tooth compensator sprocket

SOLID PRIMARY SPROCKET KIT

- Eliminates the need for a complete compensator assembly
- Includes 24-tooth sprocket, flat washer and front pulley/sprocket nut

PART #	DESCRIPTION
1120-0412	For 99-06 Big Twin (except FLT/FLHT/FLHR/FLTR)

SOLID PRIMARY SPROCKET KITS

- Solid steel one-piece design
- 34-tooth sprocket
- Spring-less and much quieter than the stock or diaphragm spring-style compensators
- Eliminate the need for a complete compensator assembly
- Kits include washer, spacer and instructions
- Retain and use stock installation bolt

1120-0413

1120-0390

PART #	DESCRIPTION
1120-0413	For 17-20 FLHT/FLHR/FLHX/FLTRX/FLTRU/FLTRK, 18-20 FLHC/FLDE/FLSB/FLSL/FXBB/FXFB/FXLR
1120-0390	For 07-16 FLHT/FLHR/FLTR/FLHX, 07-17 Softail and 06-17 Dyna

REKLUSE clutch rEvolution

All Rekluse clutch products are precision-engineered and made of high-quality materials to provide the best in performance and durability. Their components are stronger, lighter, longer-lasting and built for maximum performance. Rekluse's industry-leading auto clutches are optimized for each bike model as it comes from the factory and they've designed each clutch to be fine-tuned for every rider. Rekluse's manual clutches deliver unprecedented performance, tuning and durability with a design that provides more disks in less space, allowing up to four additional friction disks over stock.

CORE MANUAL TORQDRIVE® CLUTCH

- Core Manual TorqDrive delivers unprecedented performance and durability within your OEM clutch footprint
- TorqDrive provides more disks in less space, allowing the addition of four friction disks over stock
- More frictions equals more torque capacity, thus unlocking the full power of your engine without the need to add stiffer pressure plate springs or a lock-up device
- The clutch is converted from a diaphragm spring to six coil springs, allowing for increased tuning options and improved lever feel
- The billet center hub and pressure plate work together to move more oil through the clutch, decreasing operating temperatures and increasing clutch pack life
- Core Manual TorqDrive increases torque capacity by 20 percent while decreasing lever pull by 10 percent

PART #	DESCRIPTION
1130-0435	For 03-20 XL models

RADIUS CX CLUTCH KIT

- RadiusCX is a top-of-the-line auto clutch product that brings together all of Rekluse's latest technology into one package
- TorqDrive friction disk technology coupled with EXP and Core technology results in significant advancement in auto performance with exceptional hook-up, lever feel and durability
- Take off and stop in gear without using clutch lever
- Centrifugally activated technology automatically prevents engine stalls
- Cruise through traffic like you're on the open road – you don't have to hold the clutch in at red lights or in heavy traffic anymore
- Effortless low-speed maneuverability
- Increase in torque capacity for reduced wear, reduced heat and increased power transfer capability
- Standard clutch lever function with full override
- Shifting transmission remains unchanged (clutch lever use is recommended for shifting)
- No modification to stock components

REKLUSE clutch rEvolution

V-TWIN CORE EXP CLUTCH KIT

- Core EXP 3.0 is a centrifugal auto clutch featuring Rekluse's EXP (auto clutch) technology
- Full clutch control and use of the lever is retained for a no-compromise riding experience
- Core EXP 3.0 offers dead-on clutch engagement every time and allows riders to take off and stop in gear without using the clutch lever
- With Core EXP 3.0, you'll confidently navigate traffic and slow-speed conditions
- Rekluse's billet center hub and pressure plate convert the clutch to six coil springs which improves lever feel, clutch performance, and durability
- Increased oil passages in the center hub and pressure plate move more oil through the clutch, decreasing operating temperatures and increasing clutch life

- Installing Core EXP 3.0 does not require modification to stock components
- Shifting the transmission remains unchanged (clutch lever use is recommended for shifting)

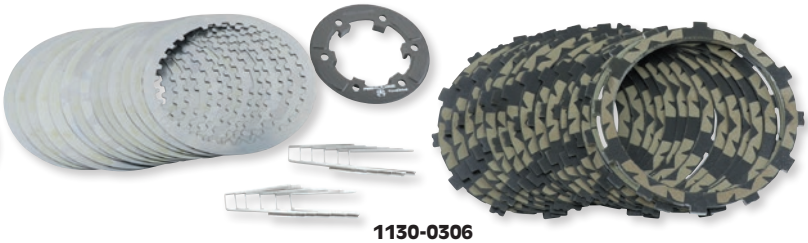
V-TWIN RADIUSX CLUTCH KITS

- RadiusX is a high-performance centrifugal auto clutch combining Rekluse's TorqDrive® and EXP technologies
- TorqDrive provides more clutch disks in less space, allowing for maximum performance within the bike's existing clutch footprint
- Full clutch control and use of the lever is retained for a no-compromise riding experience
- RadiusX offers dead-on clutch engagement every time and allows riders to take off and stop in gear without using the clutch lever
- Riders will experience maximum power delivery
- Rekluse TorqDrive friction disks deliver higher torque capacity and increased power transfer
- With RadiusX, you'll confidently navigate traffic and slow-speed conditions
- Rekluse sleeves eliminate basket wear and notching



1130-0316

- Installing RadiusX does not require modification to stock components
- Shifting the transmission remains unchanged (clutch lever use is recommended for shifting)

V-TWIN TORQDRIVE® CLUTCH KITS

- TorqDrive provides more disks in less space, allowing us to add up to six additional friction disks to the clutch pack over stock
- More frictions = more torque capacity, thus unlocking the full power of your engine without the need to add stiffer pressure plate springs or a lock-up device
- TorqDrive provides smoother shifting and improved lever feel
- Rekluse basket sleeves eliminate basket wear and notching

PART #	DESCRIPTION

COMPETITION SERIES CLUTCH PLATE KITS

- Clutch friction plate kits are supplied as a separate kit from springs and drive plates
- Different friction materials are used to match original specification
- Friction plates should be allowed to bed in to avoid glazing friction surface
- Clutch steel plates are made from corrosion-free steel
- Check old plates for color and wear and preferably replace at the same time as friction plates
- Increase in clutch spring strength is achieved either through the extra length or by tighter winding

NOTE: Some synthetic oils increase the danger of clutch slip with friction plates.

CLUTCH KITS AND SPRINGS

CK STANDARD SERIES

- Cork-based material impregnated with aluminum particles to increase wear life and heat resistance
- Highly compressed construction avoids swell and clutch drag
- Ideal for general-purpose street/sport/touring bikes
- Kit includes complete set of friction plates only
- Not for use with semi-synthetic or full synthetic oil

SRC SERIES CLUTCH KITS

- Aramid fiber paper-lined plate set, complete with heavy-duty clutch springs
- SRC kits have longer plate life and higher heat resistance
- SRC kits have a more aggressive/faster clutch takeup than the CK Standard series clutch kits

SRK SERIES CLUTCH KITS

- Include aramid fiber-lined friction plates, steel separator plates and springs
- Diaphragm-style spring used in kits for bikes with OEM diaphragm clutch springs
- All kits designed to withstand the rigors of hard street use

SCORPION LOW-PROFILE LOCK-UP PRESSURE PLATES

- Low-profile design fits under stock primary cover
- Direct bolt-on design retro-fits to existing Scorpion billet clutches
- Progressively increases pressure as rpm increases
- CNC-machined, 6061-T6 billet aluminum
- Perfect for large-displacement, high-horsepower motors

PART #	DESCRIPTION
1131-2447	For 99-17 Twin Cam w/ existing mechanical Scorpion clutch
1131-2448	For 99-17 Twin Cam w/ existing hydraulic Scorpion clutch

1131-2404

Barnett Performance Products

LOW PROFILE LOCK-UP PRESSURE PLATE CONVERSION KITS

- Specifically designed to fit under the stock or aftermarket primary/derby covers and increase the capacity of your stock clutch by using stainless steel weighted arms that progressively increase pressure to the clutch as rpm increases
- This also allows lever effort to be kept to a minimum – even with big-inch motors
- Three different sets of six coil springs (light, medium, heavy) are included for a variety of spring pressure options
- Coil spring design provides much smoother shifting and a more progressive, linear engagement compared to a diaphragm-type spring
- Simple bolt-on installation is all that is required with no modifications needed
- Cable-actuated and hydraulic versions are available

PART #	DESCRIPTION
1131-2404	For 99-17 Twin Cam w/ cable-operated clutches
1131-2405	For 99-12 Twin Cam CVO models w/ hydraulic-operated clutches

MAGNUM

BRAIDED DOT HYDRAULIC CLUTCH LINES

- Constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket
- Three unique stainless steel transmission fittings eliminate the use of adapters
- Two color choices of the Industry's highest quality braid available to complement your bike: Sterling Chromite® II with chrome banjo or Black Pearl with black chrome banjo
- Braid color and weave match all other Magnum control cables and brake lines
- Crystal-clear outer jacket offers exceptional protection against scuffing the bike's paint or chrome and will never discolor
- Inner PTFE tubing braided with aramid fiber provides the ultimate in high performance and is compatible with all hydraulic fluids
- Choice of 90°, 35° or 180° banjos with rotating feature for perfect no-kink fitments
- Highly polished banjos are chrome or black chrome-plated
- Transmission fittings for all hydraulic clutch lines have a natural stainless steel finish

NOTE: 99-12 OE Harley, CVO, P&A and 02-17 V-Rod hydraulic clutch line fittings require taking a measurement to determine ordering length.

STAINLESS STEEL BRAIDED HYDRAULIC CLUTCH LINE KITS

- -3 hydraulic clutch lines feature clear PVC-coated, PTFE-lined, premium stainless steel braided hose
- PVC hose coating is extruded to the stainless braiding, adding great looks and abrasion protection to expensive parts, while offering resistance to damaging UV rays
- PTFE liner is an inert material, which is compatible with all hydraulic and brake fluids; has a heat range of -105 °C to 260 °C (-158 °F to 500 °F)
- Stainless steel braid is superior in pressure rating, flame resistance and volumetric expansion to all other materials

BYO® BUILD-YOUR-OWN DOT HYDRAULIC CLUTCH LINE KIT

- Braided stainless hydraulic clutch line kit with 10 mm 35° upper banjo
- Assembles in five minutes with only side cutters and $^{7}/_{16}$" wrench
- Hydraulic hose and fittings are labeled, pressure tested and 100% inspected
- Hydraulic clutch kit contains all components to build one complete stock or custom hydraulic line which includes 213 cm (7') of BYO non-yellowing clear-coated braided stainless hose, chrome-plated banjos, polished stainless hardware, copper crush washers, a vise wrench and a natural finish, stainless steel transmission fitting
- All components and hoses are available separately to build your own DOT hydraulic clutch line; choose banjo fittings, and then cut bulk line to the exact length needed to eliminate ordering guesswork and a perfect fit every time

NOTE: Compatible Magnum Shielding BYO® brand hydraulic hose and BYO® components have been specifically designed to only work in conjunction with each other. Use with any other Magnum brake line products or other manufacturer's brands will void any warranty, performance, or liability claims.

ELECTRIC EASY SHIFT™ SPEED SHIFTER KITS

- For speed, comfort and fun
- Electronically suspends the ignition system, allowing the transmission to smoothly shift up or down with just the push of a button
- Shift up at partial or full throttle and back down at the touch of a button
- There is no need to use the foot shifter, and the clutch is used only when starting or stopping
- Works for normal street riding or full-throttle shifting
- Also a perfect match for male and female riders who own bikes that require a lot of hand strength to pull in the clutch lever
- OEM shifting ability is retained after installation
- Includes a dual-button handlebar control, a shift cylinder plated with a lustrous chrome finish, bolt-on shift cylinder support bracket and a state-of-the-art control module that sends a quick signal from the handlebar control to the shift cylinder
- Also included is the electronic ignition kill module and step-by-step instructions with photos for easy installation
- PART #s 1601-0524 and 1601-0525 for models with 1 1/2" heated grips
- Universal kits also available with dual-button handlebar control to fit 7/8" or 1" diameter handlebars/clip-ons; installation may require purchase of frame tube brackets for shift cylinder mounting (sold separately)
- Not suitable for 4-speed transmissions

Dynojet

DYNOJET QUICK SHIFTER (DQS) SENSORS USB/V

- Dynojet's Quick Shifter (DQS) kit allows full-throttle, clutchless upshifts in racing and performance riding applications
- The shift rod pressure/tension sensor kit is a universal sensor that mounts to the shift rod in either a push or pull configuration
- Requires modification of gear-linkage tierod
- The linear travel sensor kit works with bikes that have no shift rod, or on those the shift rod sensor will not fit
- Mount one end to the shift lever and the other to a fixed point on the chassis
- Push- or pull-types available with universal mounting kit
- Plugs directly into the Power Commander expansion port with no rewiring required
- Power Commander Control Center software lets you set engine dead time during upshifts and minimum rpm for system operation
- PART #s 1601-0327 and 1601-0328 are "linear" sensors for PCIII USB
- PART #s 1601-0329 and 1601-0330 are "linear" sensors for PC V

NOTE: All models must have a Power Commander III USB module installed in order to use a Dynojet Quick Shifter kit. Power Commander PCII, PCIII and PCIIIr modules are not compatible with the DQS.

PANTHER
MOTORCYCLE DRIVE BELTS

PANTHER REAR DRIVE BELTS

- Improved RPP™ Panther® Design
- Features ULTRA-CORD™ tensile members and the Able™ compound
- ULTRA-CORD doesn't stretch or shrink, thus reducing the strain on bearings, shafts and other drive components
- ULTRA-CORD resists degradation and moisture to give you longer belt life
- The Able compound, an advanced polymer, resists tooth shear, adding to the belt's stability
- The rugged parabolic tooth profile reduces noise and offers drive efficiency up to 98%

NOTE: No warranty claims are made or implied.

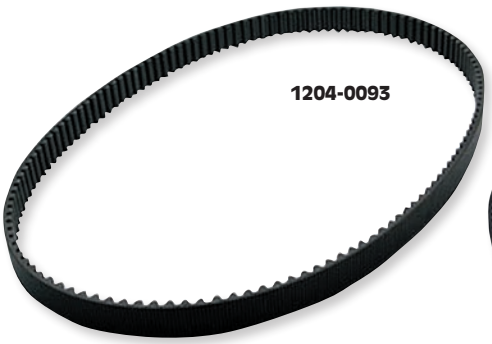
REAR DRIVE BELTS



- BDL now offers Gates carbon X3N material for its rear belts
- The same brand used by Harley-Davidson since 1980 due to its reliability
- Teeth on the belts have a slick surface that is easy on pulleys
- Outer surface of the Gates belt is ribbed to help with flexibility
- Higher reliability due to increased length stability and better pitch
- Higher resistance to humidity
- Higher tensile strength and robust construction

NOTE: No warranty claims are made or implied.

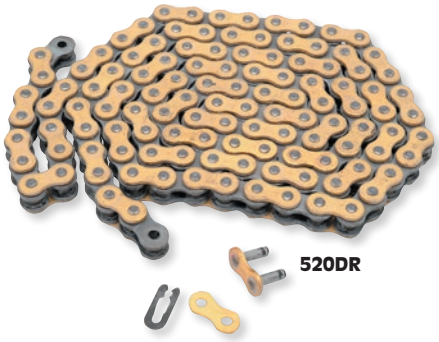
REGINA CHAIN
PERFORMANCE IN MOTION

ZRT SERIES



- Z-ring chains feature Z44 sealing rings, which greatly improve performance and wear life, making previous X-ring and Z-ring chains obsolete
- 50% reduction in friction compared to traditional O-rings
- Constant lubrication from special high-temperature grease in the critical pin/bushing area provides long life
- High-carbon allow pins to minimize wear and increased roller thickness to prolong durability
- Thicker outer plates and quad-riveting for greater tensile strength
- Original equipment on Aprilia RSV4, BMW S100RR, Ducati Panigale 1199, KTM RC8 and many others
- Ideal for street bikes and superbikes up to 1300cc
- Gold color

Genuine JAMES GASKETS

REPLACEMENT GASKETS, SEALS AND O-RINGS FOR BIG TWIN

- Selection of high-quality Genuine James gaskets, seals and O-rings
- Our deep inventory, wide selection, fast shipping and friendly service makes stocking easy

RUBBER-COVERED METAL (RCM)

The James Gaskets Rubber-Covered Metal line of gaskets are made from a solid steel sheet coated on two sides with a high-temperature elastomer. Strategically placed elastomer beading helps insure a positive seal while our clear silicone conformal coating fills in minor imperfections in the flanges and provides for easy release upon removal. They have excellent torque retention properties and will not extrude under high torque load.

FOAMET® EXPANDED RUBBER GASKETS

Our Foamet® product line features an aluminum core coated on two sides with expanded nitrile rubber, then coated with a silicone release coating to insure a positive seal with excellent release characteristic upon disassembly. Available in beaded and non-beaded construction depending on the application.

MICROPORE® PAPER GASKETS

The James Gasket flexible paper gasket product line utilizes the latest in gasket paper technology called MicroPore®. These gaskets exhibit exceptional fluid resistance and sealability in a wide range of applications and flange conditions. With a reduced pore size, this material is very resistant to wicking or fluid migration through the material and capable of handling operating temperatures in excess of 260 °C (500 °F).

EXPANDED METAL CORE HEAD GASKETS

Our expanded metal core head gaskets are made from top-quality graphite-coated high-temperature fiber material chemically and mechanically fused to an expanded metal core. They provide excellent sealing performance, load retention, and structural strength and provide a clean release upon removal. The stainless steel armor protects the cylinder bore from the hot combustion gases and provides a positive seal at the combustion chamber.

REPLACEMENT GASKETS, SEALS AND O-RINGS FOR XL/XR/XG/BUELL MODELS

- Drag Specialties has all your gasket needs covered
- All are top-quality Genuine James gaskets, seals and O-rings

Rubber-Covered Metal (RCM)

The James Gaskets Rubber-Covered Metal line of gaskets are made from a solid steel sheet coated on two sides with a high-temperature elastomer. Strategically placed elastomer beading helps insure a positive seal while our clear silicone conformal coating fills in minor imperfections in the flanges and provides for easy release upon removal. They have excellent torque retention properties and will not extrude under high torque load.

Foamet® Expanded Rubber Gaskets

Our Foamet® product line features an aluminum core coated on two sides with expanded nitrile rubber, then coated with a silicone release coating to insure a positive seal with excellent release characteristic upon disassembly. Available in beaded and non-beaded construction depending on the application.

MicroPore® Paper Gaskets

The James Gaskets flexible paper gasket product line utilizes the latest in gasket paper technology called MicroPore®. These gaskets exhibit exceptional fluid resistance and sealability in a wide range of applications and flange conditions. With a reduced pore size, this material is very resistant to wicking or fluid migration through the material and capable of handling operating temperatures in excess of 260 °C (500 °F).

Expanded Metal Core Head Gaskets

Our expanded metal core head gaskets are made from top-quality graphite-coated high-temperature fiber material chemically and mechanically fused to an expanded metal core. They provide excellent sealing performance, load retention, and structural strength and provide a clean release upon removal. The stainless steel armor protects the cylinder bore from the hot combustion gases and provides a positive seal at the combustion chamber.

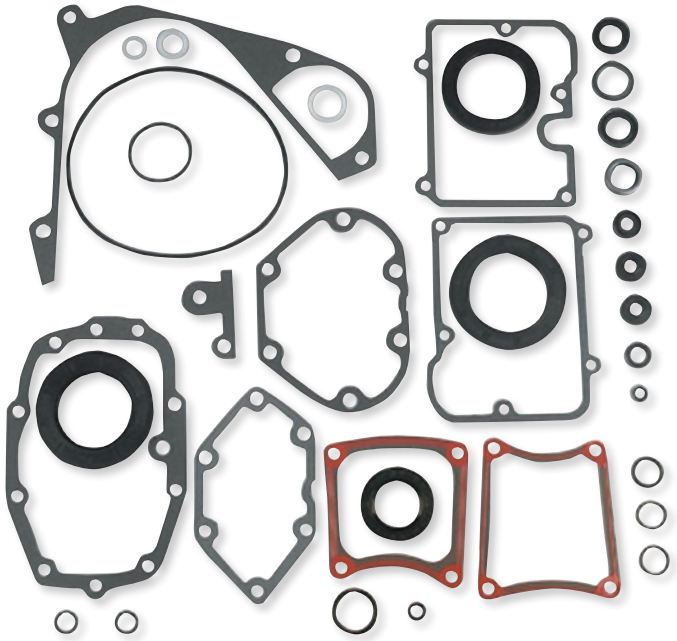
Genuine JAMES GASKETS

REPLACEMENT GASKETS, SEALS AND O-RINGS FOR BIG TWIN TRANSMISSIONS

- Get the top quality of Genuine James, delivered with the great service of Drag Specialties
- Genuine James gaskets, seals and O-rings for Big Twin transmissions are made to last

Rubber-Covered Metal (RCM)



The James Gaskets Rubber-Covered Metal line of gaskets are made from a solid steel sheet coated on two sides with a high-temperature elastomer. Strategically placed elastomer beading helps insure a positive seal while our clear silicone conformal coating fills in minor imperfections in the flanges and provides for easy release upon removal. They have excellent torque retention properties and will not extrude under high torque load.

Foamet® Expanded Rubber Gaskets

Our Foamet® product line features an aluminum core coated on two sides with expanded nitrile rubber, then coated with a silicone release coating to ensure a positive seal with excellent release characteristic upon disassembly. Available in beaded and non-beaded construction depending on the application.

MicroPore® Paper Gaskets

The James Gaskets flexible paper gasket product line utilizes the latest in gasket paper technology called MicroPore®. These gaskets exhibit exceptional fluid resistance and sealability in a wide range of applications and flange conditions. With a reduced pore size, this material is very resistant to wicking or fluid migration through the material and capable of handling operating temperatures in excess of 260 °C (500 °F).

Expanded Metal Core Head Gaskets

Our expanded metal core head gaskets are made from top-quality graphite-coated high-temperature fiber material chemically and mechanically fused to an expanded metal core. They provide excellent sealing performance, load retention, and structural strength and provide a clean release upon removal. The stainless steel armor protects the cylinder bore from the hot combustion gases and provides a positive seal at the combustion chamber.

REPLACEMENT GASKETS/SEALS/O-RINGS

- High-quality products for long-term reliability
- Manufactured from premium fuel-resistant materials that will not creep, crack or become brittle
- Gaskets available in multiple types to best suit the intended application
- Multi-Layer Steel (MLS) gaskets feature two outer Viton®-coated embossed spring steel layers with an inner steel layer to provide additional support
- Aluminum Foamette Material (AFM) gaskets feature an aluminum core and a chemically blown, compounded nitrile synthetic rubber coating that is bonded to the outside layer; do not require gasket sealer
- Viton® gaskets feature a stainless steel core with a 0,001" thick coating of Viton rubber on both sides

DRAG Specialties

FORK SEAL AND DUST SEAL KITS

- Patent-pending seal design and special elastomer has 1/3 of the stiction and up to four times the life of an OEM seal
- Dual-lip design balances the drag forces across both sealing lips, resulting in less lip distortion, which extends seal life and reduces seal operating temperature
- Sold in pairs or 10-pk. as noted

LEAK PROOF PRO-MOLY FORK SEALS

FORK SEALS

- Leak Proof Classic fork seals are made of a premium-blend Buna-N rubber compound
- Classic fork seals are rated up to 400 psi – nearly four times that of OEM; their pressure-balanced design allows them to float in the cavity, reducing running and break-away friction, resulting in improved abrasion resistance, longer seal life and a 20% reduction in stiction over stock seals
- Leak Proof Pro-Moly seals have an added G+ formula that reduces stiction 60% over stock seals – they seal effectively in pressurized and non-pressurized forks, conventional or upside-down
- Sold in pairs
- Leak Proof seals require no special tools for installation

8 MM CUSTOM-COLORED PLUG WIRES

- Designer plug wire sets come in distinctive, highly visible colors
- Precut and have the plug/coil boots and terminals already installed
- Boots and wires are made from extra-high-temperature silicone, which gives protection up to 316 °C (600 °F)
- Spiro-Pro core provides up to 10 times the conductivity of a standard carbon-core wire
- Low resistance means they run cooler and last 3-4 times longer than carbon-core wires
- Designed for electronic ignitions, but also work great on point types
- Available in prefitted styles
- Universal wire kits feature 61 cm (24") wire leads (not for Twin Cam)
- Sold in pairs

PERFORMANCE SPARK PLUGS

- Conventional style spark plugs, available in OEM heat ranges
- Plugs have a unique look with a black ceramic body and bold red logo/script
- Insulator is made of 95% pure alumina, features strong resistance to heat shock and superior insulation
- Multi-rib design of the insulator eliminates flashover
- Nickel-plated housing prevents oxidation and corrosion
- Multi-layer gaskets and heat crimping process ensure a leak-free, gas-tight seal
- Copper core electrode prevents oxidation and corrosion, has good electrical and heat conductivity and creates long spark plug service life
- Sold in pairs in blister pack

IRIDIUM SPARK PLUGS

- The ultimate in spark plug technology and performance
- Iridium electrode is smaller than a standard electrode; requires less voltage
- Hotter spark and extended spark plug service life compared to conventional plugs
- Has the distinctive black ceramic with red lettering and gold-colored corrosion-protected coating on the metal shell
- Exceed OEM specifications for plug service life
- Sold in pairs in convenient blister pack

IRIDIUM IX SPARK PLUGS

- The ultimate in spark plug technology and performance from the industry leader
- The iridium electrode is 25% smaller than a platinum electrode, and it's just 1/4 the size of a conventional nickel electrode
- Ultra-small diameter center electrode reduces voltage requirement and extends ignition system life
- New metal shell plating has enhanced anti-corrosion qualities
- Sold each

POWERMADD

E3 RESISTOR SPARK PLUGS

2103-0084

- Unique electrode shape maximizes the power created by the spark plug – Diamond Fire technology
- Electrode is a combination of performance and technology that results in an improved flame kernel shape
- This flame front ignites the bulk air/fuel mixture faster, moves heat into the combustion chamber faster and creates a more localized pressure front for faster pressure rise during the cylinder power stroke
- The result is more complete combustion and an improvement in engine performance
- A truly premium performance plug
- Sold each

DSK62

IGNITION AND COIL KITS

- Complete electronic ignition systems built with the latest state-of-the-art engineering
- The same ignition used by top drag and road racers to set records and bring home victories over the past decade
- The Dyna S is completely housed behind the ignition cover and uses a magnetic rotor with the original advance unit, so the factory advance curve is maintained
- Coils provide spark voltages in excess of 30.000V and spark energies second to none
- The DSK61 Dyna S and coil system includes a DC7-1 high energy coil
- The DSK62 Dyna S and coil system is designed for single-fire applications; includes two DC10-1 Dyna coils

NOTE: Not for fuel-injected models.

NOTE: Later models will require the use of a mechanical advance unit.

PART #	DESCRIPTION
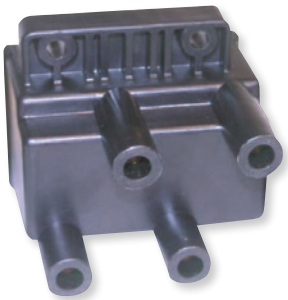
FOR 86-03 XL (EXCEPT TWIN CAM, 1200S) (CONT)	
DSK62	Single-fire ignition kit



TWIN-FIRE II COIL

- Single-fire just got easier
- High-technology materials now make it possible to put two coils in the same space as the stock coil with greater output
- No exposed laminations to rust and degrade performance
- High-voltage and primary terminals machined from brass
- High-impact thermoplastic housing is ultrasonically welded and sealed against moisture
- Compact size fits easily under stock covers
- Peak gap current in excess of 50mA
- Over 40.000V per output
- Rated at 3-ohms; accepts 7 to 8 mm wires

NOTE: Not for Twin Cam applications.

NOTE: Not for use with DS6-2 ignition system.

PART #	DESCRIPTION
DC6-5	Twin-Fire II Miniature, dual output towers

TWIN-FIRE COIL

- Design incorporates two individual performance ignition coils into a single, easy-to-mount package that is only slightly larger than the stock coil and uses the stock mounting bracket
- Delivers spark voltage in excess of 30.000V with fast rise times and high energy
- For all single-fire, dual-plug head applications
- Can be used with any electronic advance ignition system that incorporates dwell control, but cannot be used with the DS6-2 Dyna S or similar ignitions
- All coils are rated at 3-ohms

NOTE: Not for Twin Cam applications.

PART #	DESCRIPTION
DC6-4	Twin-Fire, four output towers

2102-0283

2102-0141

DUAL-OUTPUT COILS

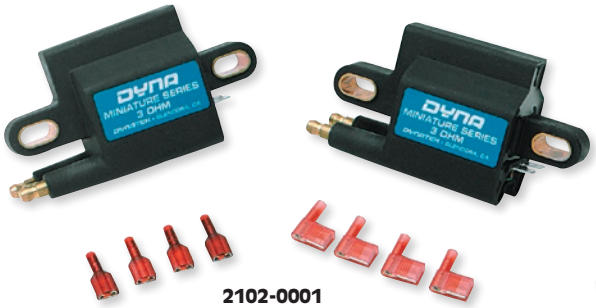
- Designed for aftermarket and OEM ignitions

PART #	DESCRIPTION
2102-0283	For 07-17 Twin Cam (except 14-16 FXS/FXSB/FLS/FLSS); 0,4-ohm; repl. OEM #31696-07A
2102-0141	For 12-17 FLS/FLSS, 99-06 Twin Cam carbureted models and 04-06 XL models (except Dresser models); 0,5-ohm, repl. OEM #31655-99
2102-0246	For 01-06 Big Twin Delphi EFI; 0,4-ohm; repl. OEM #31743-01
2102-0307	For 07-20 XL

DC6-1

12V COILS

- The "industry standard" with 35.000V spark energies second to none
- Designed to work with any Dyna ignition system
- Can be used for single- or dual-plug applications



NOTE: Not for Twin Cam applications.

PART #	DESCRIPTION
DC10-1	5-ohm (black), angled single output street application (pr.)
DC3-1	3-ohm (green), angled single output, for use w/ DS-62 single-fire ignition-only race application (pr.)
DC2-1	1,5-ohm (brown), angled dual output (pr.)
DC1-1	3-ohm (green), angled dual output (pr.)
DC6-1	3-ohm (green), straight dual output, Std. H-D style (86-up electronic ignition) (ea.)
DC8-1	5-ohm (black), angled dual output (points) (pr.)
DC7-1	5-ohm (black), straight dual output with single-plug heads

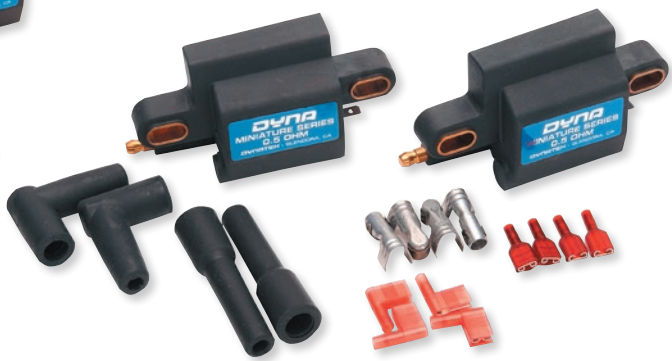
MINIATURE SERIES COILS

- One of the smallest packages delivers high output with advanced magnetic core technology
- Designed for use with Dyna 2000 and 3000 series ignitions, factory-installed electronics or with aftermarket ignitions that employ dwell control
- Secondary resistance is 11,5-ohms
- Great for customs where coils need to be hidden

NOTE: Not for Twin Cam applications.



NOTE: Not for use with the Dyna "S," DYNA III or earlier generation ignitions.

DYNA 2000TC PROGRAMMABLE DIGITAL PERFORMANCE IGNITION MODULE

- Single-fire, fully programmable performance ignition
- Sixteen programmable advance curves in three groups: stock-to-slightly-modified motors, heavily-modified motors and insanely-modified motors
- Eight rev limiter settings in 250 rpm steps from 5750-7250 rpm
- All functions offer full digital accuracy
- Compatible with stock and performance coils – less than 1-ohm resistance
- Coil current constantly monitored to provide constant full-spark energy
- Uses all stock sensors and connectors
- Built-in reverse battery and spike protection
- Data recording includes total engine hours, time wide-open throttle, longest time operating at wide-open throttle, max rpm, seconds near rev limit and number of engine starts
- PC programmability makes possible an eight-point, fully definable, wide-open throttle curve and a fully definable part-throttle curve, programmable rev limit in 50 rpm steps, 0-5 programmable dead-cranking revs, total of +/- 10° rear cylinder offset, programmable rev limiter, and security lock-out (pin # activated)

PART #	DESCRIPTION

2101-0063

2101-0071

DYNA 2000TC-3 DIGITAL PERFORMANCE IGNITION MODULES

- Module has a single connector
- Loaded with 16 different advance curves, giving engine builder a wide range of curves to work with
- Adjustable rev limiter allows the user to select a rev limit ranging from 5750 to 7500 rpm in 250 rpm steps

PART #	DESCRIPTION

DYNA2000

2000-HDE PC-PROGRAMMABLE DIGITAL IGNITION MODULES

- A plug-in upgrade to the electronic advance ignition found on late model Harleys, these ignitions are micro-computer controlled, generating extremely accurate control over the entire ignition process
- Allow riders to tailor the advance curve and rev limiter to the specific needs of their particular engine; four built-in advance curves cover the needs of stock to highly modified engines over a variety of operating conditions; four independent rev limiter choices from 6000 to 7500 rpm set the exact protection level needed
- PC programmability allows you to define a wide-open and part-throttle curve, rev limits, dead-cranking revs and rear cylinder offset
- PART #2101-0045 comes with 8-pin connectors; operates in single-fire or dual-fire modes
- PART #2101-0046 comes with 8-pin connectors; operates in dual-fire mode only
- PART #2101-0045 and 2101-0046 offer a quick curve which simulates a mechanical advancer for hot rod motors; option to use vacuum advance compensation via a VOES switch and retard mode, which allows selection of ignition retard of 5°, 7° or 10° upon activation of a retard input

PART #	DESCRIPTION
2101-0045	For 94-97 XL single- or dual-fire system (w/ 8-pin)
2101-0046	For 94-97 XL dual-fire system (w/ 8-pin)

- PART #2101-0044 is for use with a dual-fire ignition only; it simply plugs right into your 7-pin stock harness and mounts right in the original ignition mounting area
- PART #2101-0043 comes with a 7-pin connector; can be used with either one ignition coil firing both cylinders (dual fire), or with two ignition coils, one firing each cylinder (single-fire); no other ignition offers this flexibility
- A separate tach output wire allows clean tach operation during rev limiting and when in single-fire mode
- A diagnostic LED indicator is included on the back of the control module to assist trouble shooting and static timing

IMPORTANT NOTE: On any electronic advance ignition such as the Dyna 2000-HD1 or the stock Harley ignition, you must use carbon fiber-type suppression spark plug wires to reduce radio frequency interference. Use of copper wires may cause malfunction of the ignition due to severe electrical noise generated at the spark plugs. The original wire supplied by Harley-Davidson should be okay.

NOTE: HDE systems are not compatible with Dyna "S" systems. Use HD1/HD2 systems only.

PLUG-IN IGNITION MODULES

- Feature two advance curve families that are adjustable to accommodate stock and modified engines
- Selectable multi-spark mode for quick starting and smooth cruising
- Five rotary switches for mode select, timing adjustments, advance slope and rpm limit (in 100 rpm steps)
- Coil outputs protected against short circuits
- Require OEM coils with less than 1 ohm primary resistance and low-resistance spiral-core or carbon-core suppression-type plug wires
- 12V power adapters are used to power up the modules when removed from the bike (sold separately)
- Optional USB interface PART #2101-0075 and software required for programming (programs available on website http://www.daytona-twintec.com/index.html) custom curves
- Include easy-to-follow instructions

NOTE: Will not work on fuel-injected models.

TWIN CAM STAND-ALONE IGNITION SYSTEM

- Designed for use in custom applications where a Twin Cam motor and crank sensor are used
- Complete ignition system includes module, coil, wires, Smart Link software, communication cable and instructions (no Harley factory harness required)
- Consolidates ignition components into a small, easy-to-mount package
- Integrated high-output single-fire operation
- Fully programmable spark timing and rev-limit setting
- Real-time diagnostic features aid in troubleshooting and tuning
- Uses factory crank trigger for improved starting and performance
- Rugged billet aluminum housing is weather- and vibration-resistant
- Custom mounting with 1/4"-20 bolts, 50,8 mm (2") apart

PART #	DESCRIPTION
2101-0070	For carbureted 01-06 Twin Cam models

PROVEN S&S PERFORMANCE

GUARDIAN DIAGNOSTIC SYSTEM™

- Offers engine builders and tuners some powerful tools to use with the S&S IST ignition module
- Contains a software CD for PCs, a translator unit, and two cables that connect the translator to the COM port of your PC and to the data link on the motorcycle wiring harness
- Once connection between the computer and IST module is made, the software allows access to new functions and diagnostic data
- These functions allow you to, among other things: turn on the break-in "Rev" limit function to protect a new or rebuilt engine from over-revving during break-in; adjust the final rev limit; look at diagnostic test codes; look at live data for both cylinders while the engine is running (e.g., rpm, manifold absolute pressure, engine temperature, battery voltage, spark timing, etc.); look at a wide range of history information; and calibrate the speedometer in 04-06 models
- Includes software, translator unit and cables

2101-0131	Guardian Diagnostic System

Daytona Twin Tec

V-TWIN ELECTRONIC IGNITION SYSTEM

- Dual-fire electronic ignition system features fully encapsulated construction
- Includes special trigger rotor for use with traditional mechanical advance mechanism
- Precise digitally set rpm limiter (200 rpm steps from 5200 to 7000 rpm)
- Status LED for easy static timing
- Electronic dwell control for maximum ignition energy at high rpm and reduced current draw at low rpm
- Compatible with most OE and aftermarket dual-fire ignition coils
- Hall effect sensor detects teeth on trigger rotor and provides stable spark timing
- Operates down to below 6 volts
- Easy installation; two-wire hookup to coil
- Waterproof and highly resistant to vibration and shock
- Over-temperature protection; rated to operate at 125 °C (260 °F)

NOTE: Not for fuel-injected models.

PART #	DESCRIPTION
2101-0267	For 86-97 XL models

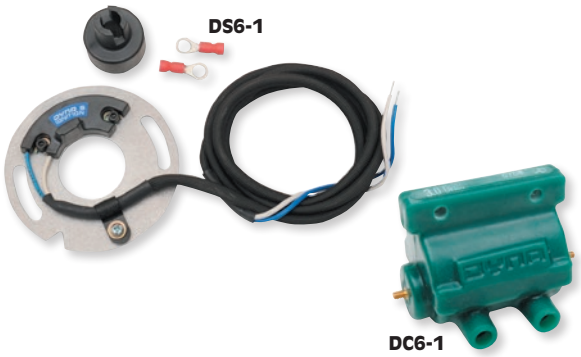
dyna performance electronics



DUAL-FIRE ELECTRONIC IGNITION SYSTEM

- Perfect ignition timing once and for all
- Self-contained ignition system features Hall Effect magnetic sensors, which are not sensitive to rpm changes or affected by dirt and oil
- Improves overall performance by changing the timing less than three degrees, extends plug life, eliminates the use of points and condensers; can be easily installed
- Used and endorsed by many championship racers

NOTE: An advance weight mechanism is required.

NOTE: Not for Twin Cam.

NOTE: Not recommended for use with OEM coils.

PART #	DESCRIPTION
DS6-1	For 86-03 XL models using a mechanical advance unit

APPLICATION CHART FOR DYNA COILS WHEN USING DYNA "S" IGNITION SYSTEMS

FITMENT	APPLICATION	PART #
W/ single-plug heads	Race only, 3-ohm (green), each	DC6-1
W/ dual-plug heads	Race/Street, 1,5-ohm (brown), pair	DC2-1
W/ dual-plug heads	Street, 5-ohm (black), pair	DC7-1

SINGLE-FIRE ELECTRONIC IGNITION SYSTEM

- All the features of the famous Dyna "S", plus the special feature of firing the front and rear cylinders independent of each other, allowing a much more accurate timing of each cylinder
- The stock ignition system fires both cylinders at the same time, which works fine for the front cylinder but the rear receives the "wasted" spark when the cylinder has started its intake stroke; this can result in harder starting, increased engine vibration, backfire and raw fuel being spit back into the carb, all creating a power loss
- Dyno and top-speed testing have shown a dramatic improvement in power in all areas; bikes with hotter cams show the greatest improvement
- If you truly want to get the most out of your stock, slightly modified or all-out customized Harley-Davidson, you need a Dyna "S" single-fire ignition system

NOTE: Not recommended for use with OEM coils.

NOTE: An advance weight mechanism is required.

NOTE: This unit must be used with special Dyna coils; see coil chart for correct coils.

NOTE: Tach adapter is required when using an electric tach.

NOTE: Not for use on Twin Cam models.

ACCEL

SINGLE-FIRE "SUPER SYSTEM"

- Kit features a programmable ignition module with adjustable rev limiter
- Single-fire coil (3,0 ohms)
- Accel U-groove spark plugs with black 8,8 mm plug wires

NOTE: Not for fuel-injected models.

PART #	DESCRIPTION
7805-1039	For 86-03 XL (except 1200S); use w/ Original Equipment rotor #32402-83 (PART #2101-0025)

SINGLE- OR DUAL-FIRE IGNITION MODULE

- For use in single- or dual-fire applications with proper coil
- Features adjustable rev limiter and 15% advance curves
- Requires graphite plug wires and resistor spark plugs
- Uses stock rotor cup OEM #32402-83 or equivalent

NOTE: Not for fuel-injected models.

PART #	DESCRIPTION
7805-1040	For 86-03 XL (exc. 1200s models)

BREAKERLESS DUAL-FIRE IGNITION KIT

- Eliminates the need for points and condenser
- Unilite module has no moving parts and consists of an integrated photo coupler, a signal processor and a power switch
- Recommended coils are 2,0 - 3,0 ohms for racing or 3,0 - 4,0 ohms for street

NOTE: Not for fuel-injected models.

NOTE: Requires the use of an advance unit and spiral-core or carbon core plug wires.

PART #	DESCRIPTION
DS243085	For 86-03 XL models

HI-4N IGNITION MODULE

- Single-fire and dual-fire function built into a single module
- All-metal housing provides improved heat dissipation
- Ignition advance and timing degree markings are on the metal flange
- Sensor housings contain advanced flux concentrators with high-temperature-resistant samarium/cobalt magnets for accurate, reliable ignition triggering
- Electronics are fully enclosed to resist vibration, moisture and dirt
- Four rotary switches for ignition mode selection, advance rate, and rev limit

NOTE: Not for fuel-injected models.

TWO-STAGE REV LIMITER FOR EFI

- Precisely controls over-revving and launch rpm
- Designed for the odd firing angle of Harley V-Twins
- Over-rev limit guarantees against damage due to missed shifts or drivetrain breakage; adjustable from 5500 to 9250 rpm
- Launch limit gives maximum off-the-line performance; adjusts between 2500 and 6250 rpm in 250 rpm increments
- Spares unnecessary poundings of expensive engine components

HIGH-PERFORMANCE STARTER MOTORS

- 100% new – not remanufactured!
- Special pinion shaft threads and extended jackshaft bolt allow for a wider range of applications
- Starters feature oversize clutch rollers, cold headed steel idler gears and armature hairpins that are resistance-fused to the armature
- All 99-06 starters are supplied with 10/32 threaded output shafts
- 1,4 kW is a new replacement unit for stock and slightly modified engines; generates more power than the OEM stock starter
- 1,7 kW is a new replacement unit for highly modified engines in touring bikes, featuring a permanent magnet motor coupled to the OEM-style offset gear reduction case making a drop-in solution to hard-starting touring bikes (due to the high in rush current of a permanent-magnet motor a minimum 300 CCA battery is recommended with 4-gauge battery cables)
- Available in black or chrome finish

NOTE: For optimum performance, use with Drag Specialties battery and battery cables.

SLUGGER 1,8 kW HIGH-TORQUE STARTER MOTORS

- Starters are assembled with heavy-duty components and tested with state-of-the-art equipment
- Starter offers superior windings, high-tolerance heavy-duty clutch and a thicker commutator that resists flying shorts
- 1,8 kW output has the torque to start any monster motor with the least amount of amperage drain
- Static balanced for smoother operation
- Low-profile design will clear the electronic speedometer sensor for easy installation
- Starters for late model 07-17 Twin Cam and 06 Dyna Glide are longer than stock but require no modifications to bike for a perfect fit

NOTE: Starters on 99-06 FLT models will require use of spacer block PART #DS-196233. On FXST/FLST, Dyna and FXR models you must relocate oil lines and some wiring.

DS-196190

STARTER MOTORS

- Nippondenso starters are assembled with heavy-duty components and tested with state-of-the-art equipment
- Solenoid plunger, return damper and springs are replaced with stronger components
- Clutch shaft and rollers are replaced with precision-ground and hardened parts for longer service life
- All components are assembled with a special lube for starter roller clutch applications
- CNC-machined billet mounting noses are held together with aerospace fasteners
- After assembly, all starters go to a dyno test including hi-low voltage, stall torque, solenoid engagement, amperage draw, load test, maximum rpm and motor impulse wave form
- Starters have a 4,4:1 gear reduction and produce 46% more cranking torque than the stock starter
- Starters available in four kilowatt ratings (1,2, 1,4, 1,6 and 2,0)
- The 1,6 kW starter is designed for 96" or bigger motors with limited size batteries such as FXR, FXST and FXD models
- The 1,2/1,4/1,5 kW starters are designed for OEM applications; use Terry battery cables and a battery with 300+ cranking amps like the Drag Specialties battery for best results
- The 2,0 kW starter will start any monster motor (for best results, use with Terry battery cables and a battery with 300+ cold cranking amps like the Drag Specialties battery)
- Choose from two finishes: black wrinkle or polished/chrome

NOTE: 1,6 and 2,0 kW starters will require spacer block PART #DS-196233 when used on 99-06 FLT models. On Softail, Dyna and FXR models, you must relocate oil lines and some wiring.

NOTE: PART #DS-196182 has a raw finish starter nose.

Daytona Twin Tec

IGNITION POWER RELAY KIT

- Kit is designed to correct starting problems in motorcycles with high compression ratios or large displacement engines that use Twin Tec PART #s DS-242373 and 2101-0241 single-fire installations
- The combined draw of the starter motor, single-fire coil and the long length of wire between the battery, engine stop-run switch and the coil may leave too little energy at the coil to provide enough spark to fire the engine – the power relay kit solves the problem by supplying full battery voltage to the coil
- Includes a high-quality relay, wire and all required terminals

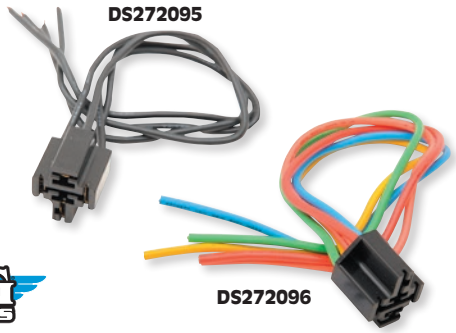
PART #	DESCRIPTION
2101-0078	For single-fire ignition power conversions

KURYAKYN

UNIVERSAL WIRING AND RELAY KIT

- Recommended for use with halogen Silver Bullets when they are used as additional running/driving lights
- Relay lets you wire the lights separately to avoid overloading the headlight circuit
- Kit provides switch, relay, universal wiring harness and general instructions for installation
- For custom applications

PART #	DESCRIPTION
2050-0131	Universal wiring/relay kit



K&S TECHNOLOGIES INCORPORATED

UNIVERSAL STARTER RELAY

- Features a 12V solenoid
- Includes starter relay, two metal brackets, three extra sets of terminal wires, three extra 30 amp blade-type fuses and five wires with terminals

PART #	DESCRIPTION
2110-0325	Universal starter relay

DRAG Specialties

RELAY SOCKET ASSEMBLIES

- Used for starter relay and other relays on later-model bikes
- Available with black wires or colored wires (red, green, blue, yellow and orange)

PART #	DESCRIPTION
DS272095	Black four-wire relay socket
DS272096	Colored five-wire relay socket

- For the starter, brake light and fuel pump

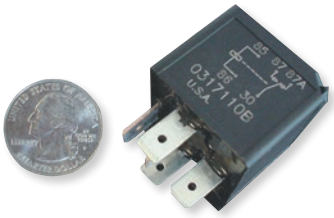
PART #	DESCRIPTION
DS-325866	For 91-07 models (w/ a diode); repl. OEM #31504-91A

STANDARD MOTORCYCLE PRODUCTS

RELAY

- For use with starter, fuel pump and brake light

PART #	DESCRIPTION
2110-0374	For 91-07 models w/ a diode; repl. OEM #31504-91A



COMP CAMS

FAST START BOOST RELAY

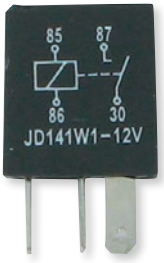
- Provides full battery voltage to single-fire coil during cranking
- Eliminates hard starting due to voltage drop
- 30 amp sealed relay with complete installation hardware
- High-temperature rated sealed housing
- Measures 38 mm x 25 mm x 25 mm (1,5" x 1" x 1") with mounting flange hole

PART #	DESCRIPTION
2110-0830	For single-fire ignition applications

RIVCO

WATERPROOF 30-AMP ELECTRIC RELAY

- Protects light-duty OEM wiring and switches (horn button) from damage when adding accessories that draw high amounts of current
- Strongly recommended for use with all dual electrical horn systems
- Also works well with driving lights; waterproof and vibration-proof



PART #	DESCRIPTION
2050-0094	Waterproof 30A electric relay

CYCLE ELECTRIC ALTERNATOR KITS

- Kit includes stator, rotor, black rectifying voltage regulator and mounting hardware

NOTE: Adding electrical accessories increases amperage usage. When doing so, it is important to consider amperage ratings of switches and wires. If you draw too many amps through a switch or wire, it will heat up and may burn. Fuses and breakers are sized to protect wiring and switches. DO NOT CHANGE 30A MAIN BREAKER TO A 50A BREAKER. THE SWITCHES AND WIRING WILL NOT BE PROTECTED.

Cycle Electric Inc. Charging Systems for American V-twins MADE IN U.S.A.

CYCLE ELECTRIC RECTIFYING REGULATORS

- Controls voltage on Harley-Davidson and Buell alternators, unlike other rectifiers or regulators that dump to ground and cause maximum stator current and higher temperatures
- Cycle Electric rectifying regulators block current to control voltage; this reduces stator current, resulting in low temperature and less drag on the motor, which means more efficient operation
- Low voltage style features reduced charging voltage to prevent overcharging the battery

LITHIUM LIFEPO4 BATTERIES

2113-0785

- Innovative lithium-ion motorcycle and powersport batteries
- Designed for the most demanding riders looking for higher performance, safer performance, faster acceleration, reduced weight and a much longer battery life
- Very low self-discharge provide the possibility to start an engine after a very long period of storage; even in very cold temperature conditions
- Robust brass terminals for enhanced electrical performance
- Super fast charging capabilities
- Multi-position mounting (up to 180°)
- Very safe and environmental friendly
- Up to 70% lighter than lead acid batteries
- Waterproof design
- Heat temperature resistance up to 230 °C
- Ready to use; no need for preparation, just plug and play

PARTS EUROPE

HEAVY-DUTY BATTERY KIT

- Parts Europe Heavy-Duty batteries are built to the same exacting specifications and quality-control standards as OEM
- Rugged and provide more cranking power over standard batteries
- Lead calcium alloy reduces water loss and service by 66% compared to standard batteries
- Includes anti-sulfation chemical formulated to reduce sulfate crystal buildup on the battery plates
- Reduces self-discharge for longer time between charges
- Fiberglass separators improve acid flow
- Kit includes battery, pre-measured acid pack, red filler tube, hardware kit and clear vent tube

CUSTOM BATTERY CABLE KITS

- Build custom-length cables for an exact fit
- Each kit contains the following: 7,6 m (25') cable (1), 1/4" terminals (20), 3/8" terminals (8), 5/16" terminals (12), black heat shrink (40) and red heat shrink (12)
- Using 30,5 cm (12") cables as an example, this 7,6 m (25') custom cable kit will make 27 cables (a 30,5 cm (12") cable uses 28 cm (11") of cable and two terminal ends), for a substantial savings over precut lengths
- Available in clear or black

NOTE: See Drag Specialties Tire & Service catalog for crimping tool.

- A custom detail for riders using a smooth tank or doing a custom build
- Reuses stock ignition switch and key; ignition switch mount replaces the obtrusive horn mount and requires horn relocation
- Easy-to-install; allows switch to use factory wiring
- Necessary mounting hardware included

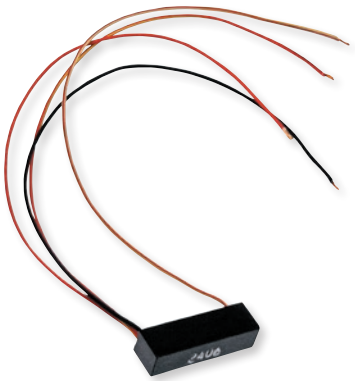
ELECTRONIC HARNESS CONTROLLER

- Compact design makes it easy to hide on a custom motorcycle
- Performs all fuse, relay and signal-canceling functions tin one simple package
- Allows a dual-filament bulb to be used in three ways: tail, brake and turn signal (excluding the need for a center brake light); includes ribbon cable for integrating generic indicator lights
- Weather-resistant connections for trouble-free use in extreme environments
- Trim-to-fit harnesses allow installation on most custom bikes

PART #	DESCRIPTION
2120-0675	"D" model electronic controller w/ ribbon cable for indicator lights

MICRO HARNESS CONTROLLERS



- Billet 6061-T6 aluminum housing and 213 cm (7') trim-to-fit wiring design is compact and easily hidden on custom motorcycles
- Performs all fuse, relay (includes starter relay) and signal-canceling functions in one simple package
- Provides multiple flasher combinations (signal canceling, hazard lights, running lights and turn signal) from one dual-filament bulb
- Utilizes relays to distribute all power functions, thus eliminating the need to run large wires to all the switches
- Can be used with micro switches
- PART #2120-0086 includes brake light module for separate brake light output
- Optional push-button momentary switch converter available separately (PART #2120-0085)
- Weather-resistant connections for trouble-free use in extreme environments
- Designed for U.S. and European applications
- Weighs 1 kg (2,25 lb)

18 CM (7") PROBEAM® LED HEADLAMPS

- Low beam consists of three high-power advanced optical D lenses and a position light
- High beam keeps low beam illuminated and adds two additional advanced optical D lenses with three projector lenses for an incredibly wide optical pattern producing an ideal beam pattern with illumination down the road as well as on either side
- Made from a heavy-duty, lightweight die-cast aluminum, the low-profile housing requires no trim ring and offers a plug-and-play installation
- Durable polycarbonate lens for long-term durability
- SAE compliant
- Available with a chrome or True Black finish
- Adapters may be required; sold separately, see below

COOL MAGIC BILLET BULLET LED DRIVING LIGHTS

2040-0989

2001-0886

- Made from 6061-T6 billet aluminum with either a show chrome or black anodized finish
- Body dimensions: 79 mm L x 57 mm diameter (3,125" x 2,25"), 5/16"-20 mounting stud
- Do not get hot like halogen bulbs and only draw 6 watts of power as compared to 20W-50W in most Halogen driving lights
- With no filament, there are no worries about vibration burning them out
- Crisp, clean, pure white output will match most HID headlamps and give your bike a clean look

PART #	DESCRIPTION
2040-0989	Chrome finish

- Three super-flux 2-watt high-output LEDs (6 watts total)
- Low current draw
- 30° pattern
- Light output equivalent to 50-watt halogen bulbs

PANACEA™ TAILLIGHTS

2010-0803

2010-0806

- Complete plug-and-play LED rear taillight upgrade
- Taillight has run/turn/brake functions
- Taillight running mode: taillight is illuminated red
- Turn signal activated: taillight is illuminated red and a flashing amber arrow appears on the appropriate side of the taillight
- Brake activated: taillight gives a three-pulse flash and then illuminates bright red until brake is released
- Amber turn signal arrow will function if brakes are activated
- Taillight can be combined with Kuryakyn Panacea turn signal inserts for a complete run/turn/brake system (inserts sold separately)
- Stock or other single-filament lights can be used with a Panacea taillight, but they will function as turn signals only
- Available with smoke or red lens color in Deluxe lens style w/ chrome accent or low-profile lens style

NOTE: Flashing brake and amber arrow can be disabled if desired using a switch on the included Panacea rear taillight control module.

NOTE: Not compatible with H-D accessory or other aftermarket lighting modules. These must be removed before installing Panacea taillights.

ECLIPZE2® DUAL-INTENSITY MODULES

- Converts single-intensity LEDs to dual-intensity with the advantage of 100% ON running lights and a full-contrast turn signal flash
- Work with any size LED up to 300mA per side
- Increases front visibility by changing the running light from 30% brightness to 100% brightness and flashing the LEDs from 0% to 100% to give more contrast to the turn signal
- Eclipze2® modules work with emergency hazard flashers and all alarm systems when the vehicle is off or on
- Sold in pairs

PART #	DESCRIPTION
2050-0085	Eclipze2® dual-intensity module

PROBEAM® ECLIPZE® CONVERTERS

- For use ONLY with Custom Dynamics® ProBEAM® Fillerz® on 15-20 FLHT, 14-20 Road King Standard, 14-15 Limited CVO, and 15 Road Glide Ultra CVO to function as run/brake/turn signals
- Allow ProBEAM® Fillerz® nine running light pipes to stay illuminated as a running light while producing a full-contrast brake and turn signal flash to provide maximum visibility
- Without this module installed, ProBEAM® Fillerz® will function only as running lights and turn signals on these models
- Sold in pairs

PART #	DESCRIPTION
2050-0293	Run/turn/brake converters

WRAPAROUNDS™ WIRE CONVERTERS

- Convert 2-wire Custom Dynamics WrapArounds™ to 3-wire
- Convert wire function to run as both running and turn instead of just turn
- Required when WrapArounds™ are installed and front OEM turn signals are removed on 11-20 Softail, 12-17 Dyna, 14-20 Touring and 14-20 Sportster models
- Sold in pairs

PART #	DESCRIPTION
2050-0251	WrapArounds™ wire converter

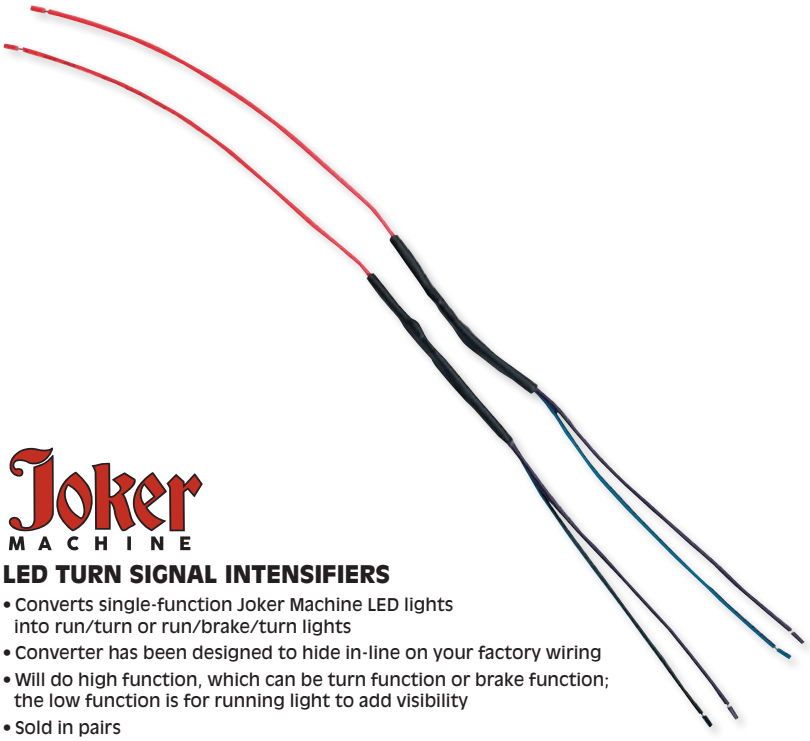
- Works with turn signals, marker lights, neon accent lighting or driving lights
- Capable or running up to two 50W driving lights without any heat issues (two inputs, two outputs)



PART #	DESCRIPTION
2050-0090	For custom/universal applications

INTENSIFIER HIGH-LOW MODULE III

- Converts single-function LED bulbs into high-low dual-function bulbs; run-stop, run-turn or high-low
- Includes hard-wired pair of two-function intensifiers with a universal LED fitment (500-milliamp maximum)
- Works with LED turn signals, marker lights or driving lights
- Will not work with incandescent or halogen bulbs

PART #	DESCRIPTION
2050-0189	For custom/universal applications

LED TURN SIGNAL INTENSIFIERS

- Converts single-function Joker Machine LED lights into run/turn or run/brake/turn lights
- Converter has been designed to hide in-line on your factory wiring
- Will do high function, which can be turn function or brake function; the low function is for running light to add visibility
- Sold in pairs

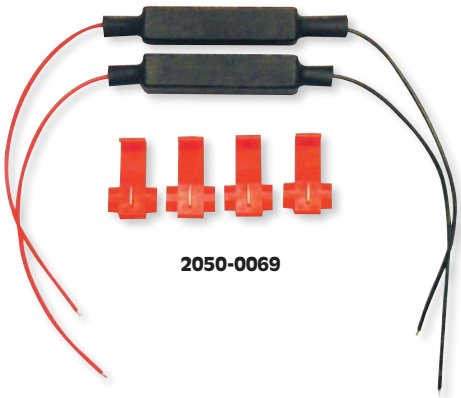
NOTE: In-line converter is not for incandescent or halogen bulbs and max rated for 500 miliamps.

PART #	DESCRIPTION
2050-0270	LED turn signal intensifiers

TURN SIGNAL WIRE ADAPTERS

- Eliminate the need to cut and splice wiring when using aftermarket turn signals or marker lights
- Plug into the OEM turn signal plug and then use pin connectors used on aftermarket lights
- Sold in pairs

PART #	DESCRIPTION
2020-1170	Universal turn signal wire adapters



2050-0065

IN-LINE RESISTORS

- 10W/3-ohm universal in-line resistors or 20W/8,5-ohm heavy-duty in-line resistors
- Work great with LED lights
- Extra terminals included
- Sold in pairs

2050-0069

PART #	DESCRIPTION
2050-0065	Universal in-line resistors (10W/3-ohm)
2050-0069	Heavy-duty in-line resistors (20W/8,5-ohm)

KURYAKYN

SELF-REGULATING LOAD EQUALIZER

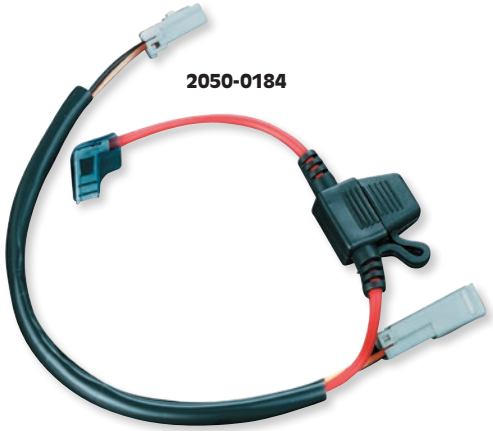
- Compatible with all H-D factory security systems
- Won't overheat
- Plug-n-play when used with Kuryakyn Panacea taillight, run/turn/brake controller or load equalizer adapters
- Can also be spliced in custom applications

PART #	DESCRIPTION
2050-0212	For 99-13 H-D models (except 11-13 Softail and 12-13 Dynas) equipped w/ electronic TSM or TSSM

2050-0108

LOAD EQUALIZER ADAPTERS

- Allows splice-free installation of Kuryakyn load equalizers equipped with three-pin connectors
- Sold each



PART #	DESCRIPTION
2050-0108	For 99-13 Dressers and Road Kings, 00-13 Softails, 99-13 Dyna and 99-03 XL
2050-0213	For 10-13 FLHX/FLTRX models

RUN/TURN/BRAKE LIGHT CONTROLLER

- Module makes single-filament or single-circuit turn signals on the rear of the bike function as running lights, turn signals and brake lights
- Can be used with LED or halogen lights, incandescent fender strut lights, stock turn signals or any single-filament light that may already be installed on the rear of bike
- Kit with Tour-Pak® harness also converts Tour-Pak® lights to run/turn/brake lights
- Complete plug-in for most 99-13 H-D models with single-filament turn signals and a taillight with running and brake functions
- Compatible with 02-later H-D models with factory cruise control

PART #	DESCRIPTION
2050-0139	For 99-13 FLHT/FLHR, 06-09 FLHX, 99-09 FLTR (except 09 FLTRSE, 13 FLHRSE), 00-10 FXST/C/S, 00-16 FLST/C/F/FB/SB/N (except 10-12 FLSTSE, 14-15 FLSTNSE), 99-17 FXD/B/CL, 99-08 FXDWG (except 09-17 FXDB), 99-03 XL (w/o harness)

2050-0185

TOTAL CONTROL PASSING LAMP HARNESS

- Allows passing lamps to remain lit when the high beam is in use
- Required when using Kuryakyn Phase 6 or Phase 7 LED headlamp/passing lamps
- Plug-and-play installation
- Sold each

PART #	DESCRIPTION
2050-0184	For 99-13 FLHR, 00-17 FLST (all models w/ passing lamps)
2050-0185	For 99-13 FLHT/FLHX, 09-13 FLHTCUTG/FLHXXX (all models w/ passing lamps)

6-PIN TO 8-PIN WIRE ADAPTER

- Plug-in adapter is required for installation of Kuryakyn Panacea Taillights or Run-Turn-Brake controllers

PART #	DESCRIPTION
3902-0111	For 04-13 XL (except 07-13 XL1200N, 10-13 XL1200X, 10-13 XL883N and 12-13 XL1200V)

8-PIN HARDWIRE ADAPTER

- Splice-in 8-pin amp connector is required to install Panacea taillights or a Kuryakyn Run-Turn-Brake controller
- Sold each

PART #	DESCRIPTION
2050-0014	For 94-98 XL

All part numbers in BLUE are new for 2021.

DUAL LOAD EQUALIZER

- Allows LED turn signals to operate in place of stock incandescent bulb turn signals without replacing the flasher module
- Splice into existing turn signal system

PART #	DESCRIPTION
2050-0044	Dual load equalizer

motogadget

MO.RELAY+ PUSH-BUTTON FLASHER RELAY

- Combines a load-independent digital flasher relay with electronic push-button controls
- Four different operating modes: lane change, turn, continuous flashing and hazard
- No additional push-button control unit or load resistor necessary
- Constant and correct flashing rate: suitable for almost all LED blinkers and all micro-blinkers
- Works with four signal lights or two handlebar end blinkers

PART #	DESCRIPTION
2050-0044	Dual load equalizer

2020-0631

- Features an automatic overload protection; does not generate heat during operation
- Takes 5V-18V to operate
- Watertight and vibration-resistant; will not ever short circuit

PART #	DESCRIPTION
2020-0631	mo.relay+ push-button flasher relay

motogadget

MO.STOP BRAKE LIGHT MODULATOR

- Adjustable digital brake light controller
- Increases road safety
- Allows brake light to pulsate, creating faster reaction time for traffic behind you
- Can also be used as a normal flasher relay or a flasher relay with automatic switch-off
- Route through the handlebars, frame tubing or in the cable harness
- Six different light/blink variants adjustable for brake light: normal mode (no flashing, direct transmission); rise and fall at 3 Hz; flashing at 5 Hz; flashing eight times at 5 Hz, then continuous illumination; flashing two times at 5 Hz, then one second continuous illumination and again repeat; three second transmission, then flashing at 5 Hz

- Works with almost all LED brake lights and all conventional brake light lamps
- Easy to install
- Watertight, vibration-resistant and does not generate heat during operation
- Features an automatic overload protection

HIGH-PERFORMANCE HALOGEN BULBS

- Because of their unique filament materials, reflective technology, and proprietary coatings, PIAA bulbs offer far greater output than standard halogen bulbs
- While standard halogen bulbs give off a yellowish light that's not at all similar to sunlight, PIAA's technology gives off a whiter, brighter light or piercing amber light, enhancing visibility
- XTRA technology in Super Plasma and Star White bulbs allows light output to be dramatically higher than normal bulbs drawing the same wattage
- Each bulb is factory tested, ensuring it's within PIAA's extremely high manufacturing tolerances and performance standards

SUPER PLASMA GT-X

- For the look of HID there is nothing closer than the GT-X Super Plasma bulbs
- With the H4 shining at 3800 to 5000K (Kelvin Color Temperature) and the H3 at 5000K, you will never sacrifice performance; with the XTRA technology, these bulbs have power to spare

XTREME WHITE

- Bulbs shine at 4150 Kelvin color temperature
- Closest in brightness to PIAA's High Intensity Discharge (HID) lights

XTREME WHITE PLUS

- Bulbs shine at 4000 Kelvin color temperature
- Provides a brilliant extreme cool white light

XTREME WHITE HYBRID

- Constructed utilizing the best balance between performance and bulb life
- Provides high output and reliability
- Bulb coatings provide drivers with a brighter and whiter beam than stock

32 MM (1 1/4") BIG JOHNSON FL HANDLEBARS

- Improves the rider's overall body position
- Provides a more comfortable ride, is easier to steer and makes the bike feel 90 kg (200 lb) lighter
- Will work with all stock cables, lines and controls
- Is a direct replacement for stock bars with a 25,4 mm (1") riser clamp diameter
- Reduced reach and improved back position is provided by the 33 cm (13") pullback
- A lower grip point helps relax the shoulders for added comfort
- An improved bar length helps increase the leverage, which makes the bike easier to steer
- Reduced or eliminated hand numbness comes from the realigned wrist position
- PART #s 0601-2754 and 0601-2755 are dimpled and drilled for internal/external wiring
- Will not interfere with stock mirrors
- 25,4 mm (1") clamping area
- Width 97 cm (38"), rise 12,5 cm (5"), pullback 33 cm (13")

MAGNUM

VIKING HANDLEBARS

32 MM (1¼") VIKING HANDLEBARS

- Viking handlebar internal design guarantees easy installations of complete wiring harnesses
- Without taking away from the clean look of the peak, the novel design creates enough room to allow the complete wiring harness with factory vinyl covering and the terminal connections along with their respective shrink sleeve to easily pass through without chaffing
- Using a unique flaring process, the burr-free internal radius creates a generous pocket of additional clearance within the troublesome peak of the handlebar
- To make wiring installations even easier, Magnum preloads the bars with E-Z pull-thru plastic woven sleeving
- Insert the wiring harness into the sleeving and pull through, it's that simple
- Manufactured with the highest quality construction, including machined control mounts (not swaged) plus burr-free internal wiring holes and electronic throttle control slots
- All handlebars are 32 mm (1¼") diameter (except Warrior bars with 32 mm (1¼") center), have 25,4 mm (1") diameter center sections, 89 mm (3½") on center knurling and work with standard controls, including hydraulic clutch and OE heated grips
- Each handlebar is CNC-mandrel bent for an accurate fit and incorporates an aggressive look with wrist angles engineered for riding comfort
- Warrior bars work with OE risers and clamps, are knurled, have the factory wiring hole location, do not require removal of the riser pin and incorporate over 30° of adjustability for comfort
- Bagger style bars are designed for the correct clearance on Batwing models
- Available in 25,5 cm (10"), 30,5 cm (12"), 35,5 cm (14") and 40,5 cm (16") high Bagger or Ape Hanger styles with high-luster chrome or gloss black finishes for an unsurpassed appearance

NOTE: Not for use with stock risers and handlebar clamp/gauge mount clamp on 883C/1200C models.

NOTE: Except for Warrior handlebars with a 32 mm (1¼") center section, all other Viking handlebars have a 25,4 mm (1") diameter center section and fit 25,4 mm (1") risers. Models originally equipped with handlebars that have a center section diameter larger than 25,4 mm (1") will require changing the risers to a 25,4 mm (1") ID version.

32 MM (1¼") KING APE BAGGER HANDLEBARS

- It seems you can never make an ape hanger too big, so we shot for the sky with our King Ape
- We borrowed some style from our classic Vintage bar and made everything a little larger, including the tubing diameter to give you a punk tall bar with attitude, style and quality hand TIG welding
- 32 mm (1¼") diameter bar with 25,4 mm (1") diameter center mounting surface and control clamping surface
- Stylish multi-hole drilled corner gusset offers strength and rigidity
- Slotted and drilled for internal wiring; notched for electronic throttle
- Lower contour bend allows fitment on FLHT/FLHX without any modifications to the fairing
- Knurling for risers at 89 mm (3½") on-center
- Black Ops™ is a textured black handlebar with gloss black billet aluminum end caps

32 MM (1¼") 3-WAY ADJUSTABLE HANDLEBARS

- Design enables the rider to adjust wrist angle, height and set the bar distance closer or further away
- Multiple adjustment feature allows rider to set handlebar at their personal preferred riding position
- Handlebar can be adjusted at any time
- 4130 chromoly 3 mm (0,120") wall tubing is CNC-machined and mandrel bent; each adjustment point is knurled for a secure fit
- Heat-treated prior to CNC processes and finishing powder, allowing tubing to settle for exact tolerances every time
- CNC-machined 6061-T6 billet aluminum clamps lock handlebar sections securely in place with premium-grade hardware; extensive CAD and physical testing ensure 100% rider confidence
- Internal wiring is as easy as it gets because of multi-piece design
- All handlebars include 25,4 mm (1") tubing spacers to raise the height if desired

NOTE: Dimensions measured with handlebars at vertical position and grip tubes at a 30° angle.

25,4 MM (1") HANDLEBARS

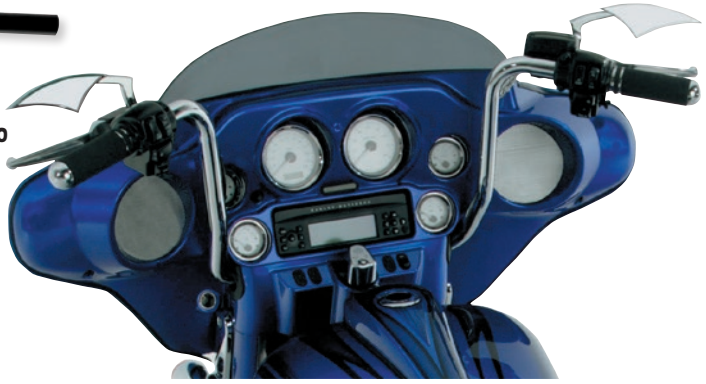
- Available in Bagger or Ape Hanger styles with 25,5 cm (10"), 30,5 cm (12") and 35,5 cm (14") height options
- Feature a high-luster chrome or gloss black finish
- Manufactured with quality construction, including laser-cut, burr-free holes and slots for internal or external wiring
- All handlebars have 89 mm (3 1/2") on-center knurling and are notched for Throttle-By-Wire applications
- All handlebars are CNC bent for an accurate fit and incorporate comfortable, but aggressive looking wrist angles
- Bagger bars are designed for correct clearance on Batwing models



NOTE: Fits 25,4 mm (1") risers. Models originally equipped with handlebars having a center section diameter larger than 25,4 mm (1") will require changing the risers to a 25,4 mm (1") ID version.

25,4 MM (1") HANDLEBARS

- Manufactured from 25,4 mm OD x 3,1 mm wall (1" x 0,120") seamless 4130 chromoly tubing
- All bends are created with internal mandrels on a CNC bender to reduce flat spots in the bends
- All welded joints are precision-mitered and TIG-welded
- Available in chrome or black electroplated finishes
- Three handlebar options: undimpled for aftermarket hand controls/custom applications, slotted or dimpled for stock OEM switches and levers
- All T-Bar style bars have 89 mm (3,5") on-center mounting points
- GTÜ approved unless noted

NOTE: Not notched for TBW applications.

ODI

25,4 MM (1") PODIUM FLIGHT MX HANDLEBAR

- Constructed of high-strength seamless double-butted 2014-T6 alloy
- Handlebar has been shot-peened and hard anodized for improved durability
- Oversized 28,6 mm (1 1/8") clamp diameter improves bar/clamp grip; requires "oversized" triple clamps or bar mounts
- Tapers to a standard 25,4 mm (1") to accept grips and controls
- Lightly knurled left slide helps with grip bar adhesion, without interfering with Lock-On Grips
- Stealth Podium FLIGHT two-toned graphics

MJK PERFORMANCE

COMPLETE HANDLEBAR/GAUGE POD/RISER KITS

- Kit includes 30,5 cm (12") straight risers, 25 mm (1") TBW handlebars with 12,5 cm (5") end rise and 30,5 cm (12") pullback, gauge relocation pod, upper triple tree clamp and triple clamp stem with cover and bearing
- CNC-machined 6061-T6 aluminum risers, pod and upper clamp
- Triple-clamp machined for better riser location
- Tilt-adjusted gauge pod
- Pod accepts stock OEM gauges
- Machined for internal wiring
- Ignition switch delete required for installation (see notes)

NOTE: Any Techno Research Dealer or Harley-Davidson® Dealer can perform a Switchless mode to eliminate the ignition switch. Techno Research features a Switchless mode in their Centurion Digital Diagnostic Tool under the BCM Configuration. Now your bike can perform without the ignition key by using ignition RUN/STOP switch located on the right hand side of the handlebars. Harley-Davidson CVOs have same feature.

NOTE: Motorcycle must be equipped with a factory HD security system - it requires the FOB in order to start.

NOTE: For easier installation, use NAMZ extended wiring harness, PART #2120-0783 (sold separately).

EZ INSTALL HANDLEBARS

38 MM (1 1/2") EZ INSTALL FLAT TOP HANDLEBAR KIT

- Revolutionary interlocking bolt-together two-piece handlebar design that takes up half the shelf space, is economical to ship and even faster to install
- New adjustable 38 mm (1 1/2") collar next to the handlebar controls for a custom-finished look
- CNC mandrel-bent from 38 mm (1 1/2") diameter x 2,5 mm (0,095") wall heavy tube
- EZ Install - no more need to fight internal wiring; with our handlebars you can install wiring in minutes
- Available with pointed top handlebars
- Pointed top bars feature billet machined top with a large internal machined radius that allows for EZ pulling of wiring (non-welded top corner)
- Install kit includes everything to install the handlebars in half the time of other kits due to our design that only extends the existing clutch cable/clutch line and brake lines; no need to waste time and money replacing the existing cables and lines
- Black bars come with wire extensions and smooth black braided lines/vinyl cable extensions as required; chrome bars come with wire extensions and braided stainless lines/cable extensions as required **(see note)**
- Gloss black powdercoat finish
- Designed to work with ABS and non-ABS models
- Knurled and notched for TBW applications

NOTE: Kits only include the necessary components needed to install handlebars based on the model, and the height of the handlebar. Certain models and heights of handlebar kits will include brake line extension, clutch line/cable extension and wiring harness. Some of the shorter handlebar kits will only have a wiring harness or only a clutch line/cable extension.

NOTE: Some 25,5 cm (10") and 30,5 cm (12") kits are not available for certain models, as these models only require a handlebar change and reuse the existing brake and clutch lines.

NOTE: Accept OEM heated grips.

MAGNUM

32 MM (1¼") CALIBER HANDLEBAR KITS

- The only complete Handlebar Kits with matching braided cables and brake lines that include Magnum Caliber Handlebars
- Magnum Caliber Handlebar Kits are available in Bagger or Ape Hanger styles for select ABS and non-ABS Harley-Davidson® motorcycles with 30,5 cm (12"), 35,5 cm (14") and 40,5 cm (16") height options
- Magnum 32 mm (1¼") Caliber handlebars are manufactured with the highest quality construction, including machined control mounts (not swaged) and feature high-luster chrome or gloss black finish for an unsurpassed appearance
- All handlebars are 32 mm (1¼") diameter with 25,4 mm (1") diameter center section and 89 mm (3½") on-center knurling, work with standard controls, including hydraulic clutch, and are machined for internal wiring and electric throttle control
- All Caliber Handlebars are preloaded with E-Z pull-thru sleeving to make wiring installations a breeze
- Kits include: Magnum 32 mm (1¼") Caliber Handlebars, throttle and idle cables or Throttle-By-Wire extensions, a clutch cable or hydraulic clutch line, brake lines, copper crush washers, hardware, and any necessary switch wiring or turn signal extensions
- All cable and brake lines feature either Sterling Chromite® II or Black Pearl braid with highly polished chrome or black chrome-plated fittings
- All cables are a low-effort, high-efficiency design that meets or exceeds all OE specifications for fitment, construction, endurance
- Kits for dual disc models include an all brazed manifold that eliminates leaks, alignment problems, and unattractive threaded connections

NOTE: Cable and line lengths are based on using 51 mm (2") risers; except for Touring models.

NOTE: Caliber Handlebars have a 25,4 mm (1") diameter center section and fit 25,4 mm (1") risers. Models originally equipped with handlebars that have a center section diameter larger than 25,4 mm (1") will require changing the risers to a 25,4 mm (1") ID version. Examples would be, but not limited to FLSTF, FLSTFB and some CVO models. Please check before ordering.

32 MM (1¼") VIKING HANDLEBAR KITS

- The only complete Handlebar Kits with matching braided cables and brake lines that include Magnum Viking Handlebars
- Viking handlebar internal design guarantees easy installation of complete wiring harnesses without taking away from the clean look of the peak
- Novel design creates enough room to allow the complete wiring harness with factory vinyl covering and the terminal connections, along with their respective shrink sleeve to easily pass through without chaffing
- Using a unique flaring process, the burr-free internal radius creates a generous pocket of additional clearance within the troublesome peak of the handlebar
- To make wiring installations even easier, Magnum preloads the bars with E-Z pull-thru plastic woven sleeving
- Insert the wiring harness into the sleeving and pull through; it's that simple
- Aggressive looking Viking handlebars are manufactured with the highest quality construction, work with standard controls, including hydraulic clutch, and feature high-luster chrome finish for an unsurpassed appearance
- Each 32 mm (1¼") diameter handlebar is CNC mandrel bent for an accurate fit, incorporate wrist angles engineered for riding comfort, have 25,4 mm (1") diameter center sections, 89 mm (3½") on-center knurling, and feature machined control mounts (not swaged) plus burr free internal wiring holes and electronic throttle control slots
- Kits are available in Bagger or Ape Hanger styles for select ABS and non-ABS Harley-Davidson® motorcycles with 25,5 cm (10"), 30,5 cm (12"), 35,5 cm (14") and 40,5 cm (16") height options
- Kits include: Magnum Viking Handlebars, throttle and idle cables or Throttle-By-Wire extensions, clutch cable or hydraulic clutch line, brake lines, copper crush washers, hardware, and any necessary switch or turn signal extensions
- Cables and brake lines feature Sterling Chromite® II braid with highly polished chrome-plated fittings
- All cables are a low effort, high-efficiency design that meets or exceeds all OE specifications for fitment, construction, endurance
- Kits for dual disc models include an all brazed manifold that eliminates leaks, alignment problems, and unattractive threaded connections

NOTE: Cable and line lengths are based on using 51 mm (2") risers; except for Touring models.

NOTE: 25,5 cm (10") kits do not include wiring extension as the stock wiring should work for most applications.

NOTE: Viking Handlebars have a 25,4 mm (1") diameter center section and fit 25,4 mm (1") risers. Models originally equipped with handlebars that have a center section diameter larger than 25,4 mm (1") will require changing the risers to a 25,4 mm (1") ID version. CHROME BOSS BLADES WITH ADJUSTABLE CLUTCH LEVER

- Clutch lever design relocates the cable anchor point, so the lever adjuster can be closer to the handlebar and not interfere with lever adjustment or clutch actuation
- Wide, deep-dished design provides the shortest reach possible to the lever
- Sold in pairs

NOTE: Must ensure proper clutch engagement with levers that are installed. Clutch and clutch cable must be correctly adjusted after installation, and you must verify that grip diameter does not affect clutch operation.

STEALTH MIRROR WITH DUAL INTENSITY LEDS

- Four rows of dual-intensity LEDs are built into the front of each of these chromed, clear-glass mirrors
- Low-intensity brightness can be wired for supplementary running lights, high-intensity brightness for supplementary turn signals
- The wiring is hidden in the mirror head and stem and leaves the stem through a hollow bolt
- Measures 12,5 cm x 64 mm (5" x 2½") with a 15 cm (6") pivot stem
- Mirror head screws and pivot ball are stainless steel
- Mounts on 99-20 H-D clutch or brake lever housings and most custom applications
- Replacement stems available separately

NOTE: May require a load equalizer when used in conjunction with custom lighting.

STEALTH I AND II MIRRORS

- The original chrome and black Stealth mirrors are available in clear or "Blue Sapphire" tinted designs
- "Blue Sapphire" design looks great and helps reduce glare
- The original Stealth I mirror with a 12 cm (4¾") stem; works great on most pullback and Ape Hanger bars
- The Stealth II – same great custom mirror head but has a 15 cm (6") stem – fabulous for drag or custom handlebars
- Stems fit all Stealth mirror heads plus most OEM and aftermarket OEM-style mirror heads that thread at the mirror head
- All feature familiar stud-style mounting common to other mirrors, or we supply chrome socket-head Allen bolts for a new style of custom mounting
- Oval head measures 12,5 cm x 64 mm (5" x 2½"); right- or left-side installation
- Mount on 99-20 H-D clutch or brake lever housings and most custom mounting applications
- Mirror head screws and pivots are stainless steel

Joker MACHINE

VIEW TECH BILLET MIRRORS

- Stems and heads are completely CNC-machined from billet aluminum (not cast), with a design that is lightweight, strong and fully adjustable in every direction
- View Tech V mirrors have a super-streamlined teardrop head with 57 mm (2 1/4") diameter lenses and Joker's "pocketed" aircraft milling design along the stem for lightness; fits left or right side; made to work with Joker's JX LED front turn signals PART #s 2040-0325 and 2040-0326
- View Tech VII design provides an old-school look that includes retro-style holes along the stem for lightness; fully adjustable 83 mm (3 1/4") diameter mirror heads
- All styles provide exceptional rear visibility due to the use of exclusive custom-made convex mirror glass
- Once the mirror is positioned, a simple twist of a wrench keeps it at the desired tension setting, unlike nonadjustable designs that fail with time
- Swivel post assembly is completely serviceable and is machined from stainless steel alloy to ensure corrosion-free operation
- Unique conical teardrop head that makes on-the-road adjustments super-easy, while providing exceptional rear visibility due to the use of custom-made convex 57 mm (2 1/4") dia. mirror glass
- Unique "Drilled-Hole & Sculpted" milling design along the stem increases lightness; mirror dimensions: 15,5 cm x 84 mm x 11 cm (6 1/16" x 3 5/16" x 4 5/16")
- A direct bolt-on fit for 84-20 Harley hand controls (including V-Rod) and most aftermarket hand controls
- Mounting hardware is included

BEER SCHOONER MIRRORS

- Unique "Schooner Beer Glass"-shaped head makes on-the-road adjustments super easy, while providing exceptional rear visibility due to the use of Joker's exclusive custom-made convex 57 mm (2 1/4") diameter mirror glass
- Unique "Drilled-Hole & Sculpted" milling design along the stem increases lightness while giving you that popular "retro" look
- The mirror stems and heads are completely CNC machined from billet aluminum (not cast) – they're lightweight, strong and fully adjustable in every direction
- Once the mirror is positioned, a simple twist of a wrench keeps them at your desired tension setting right where you want them
- Swivel post assembly is completely serviceable and is machined from stainless-steel alloy to ensure corrosion-free operation
- Mirror dimensions: 15,5 cm x 84 mm x 11 cm (6 1/16" x 3 5/16" x 4 5/16")
- Dual-tone black and silver anodized finish
- A direct bolt-on fit for late model Harley hand controls (including V-Rod) and most aftermarket hand controls

FOLDING BAR END MIRRORS

- Inspired by aircraft structural design combined with unique "cafe racer" styling
- Our mirror heads and mounting arms are completely CNC-machined from billet aluminum, super lightweight, strong, and fully adjustable in a multitude of directions and settings
- All parts are anodized for durability
- Mirror heads swivel (fold) a full 180° frontwards and backwards, a full 360° rotational on the bracket arm, and feature a ball bearing detent when they are in the extended position; the bracket arm may be rotated up or down to your desired position on the bar mounting shaft
- All rotational tension of the parts may be set to your preference with an Allen wrench, and all hardware is top-quality heat-treated alloy plated with our "gold cad" finish for strength and durability
- All moving parts feature super-smooth pivoting action due to the use of nylon spacers between the mating parts

BRAIDED AND BLACK VINYL HIGH EFFICIENCY (H.E.) CLUTCH CABLES

- Low effort, maximum efficiency cable design meets or exceeds all OEM specifications for fitment, construction and endurance requirements
- Cables feature chrome-plated fittings, stainless-steel braided or black vinyl outer casings, tempered-steel inner wire and a nylon inner sleeve for smooth operation
- Braiding is coated with a non-yellowing clear coating for abrasion resistance
- High-performance cables use the latest technology of longitudinally winding the outer housing lengthwise rather than spirally so cable bends in a more natural arc and eliminates spring and compression
- Available in undersize/standard/oversize lengths for most models

HOW TO MEASURE CLUTCH CABLES

NOTE: Late-style cables are measured with the adjuster completely collapsed.

NOTE: Adjuster measured from bottom of cable.

HOW TO MEASURE CLUTCH CABLES

NOTE: Late style cables are measured with the adjuster completely collapsed.

CONTROL CABLES

BRAIDED THROTTLE AND IDLE/IDLE-CRUISE CABLES

- The industry's highest quality braid in three color choices to complement your bike; Sterling Chromite® II, Black Pearl and Polished Stainless, the brightest "stainless" braid on the market
- Braid color and weave match on all Magnum control cables and brake lines
- All fittings are polished and chrome or black chrome-plated
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- All cables are made with anti-friction inner liners, nylon adjuster inserts, and are factory lubricated for smooth, consistent, long lasting operation
- Meets or exceeds all OE specifications for fitment, construction and endurance

NOTE: Length given is length of outer housing only, excluding elbows.

NOTE: All pre-96 cables have threaded elbows; 96 and later cables have non-threaded elbows.

BRAIDED HIGH EFFICIENCY CLUTCH CABLES

- The industry's highest quality braid available in three color choices to complement your bike; Sterling Chromite® II, Black Pearl and Polished stainless, the brightest "stainless" braid on the market
- Braid color and weave match on all Magnum control cables and brake lines
- Coated with a non-yellowing, crystal-clear FEP fluoropolymer outer jacket for exceptional protection against scuffing paint or chrome
- Low-effort, high-efficiency cable design meets or exceeds all OE specifications for fitment, construction, and endurance
- All fittings are polished and chrome or black chrome-plated
- Rubber seal in transmission fitting eliminates fluid leaks
- All cables are factory lubricated for smooth, consistent, long-lasting operation

NOTE: Check torque spec on transmission fitting when installing.

Barnett Performance Products

STAINLESS STEEL THROTTLE AND IDLE CABLES

- Barnett cables are smooth-working, long-lasting and are made with the finest components available, making them virtually indestructible
- Stainless steel cables with clear coating offer that custom look without the fear of damaging areas that the cables come in contact with
- Available with nylon-lined, PVC-coated casings

NOTE: Length of throttle and idle cables means length of outer housing only, excluding the elbows and/or adjusters.

BYO™ BUILD YOUR OWN™ CONTROL CABLE KITS

- Available in three styles: stainless steel braid with chrome fittings, black-vinyl with black chrome fittings and black vinyl with chrome fittings
- Looks and performance like a factory-made cable
- Build the perfect length every time
- BYO cables are extra long to ensure fitment for most plus-length applications
- Easy installation – route, cut, and assemble in less than 10 minutes
- Throttle and idle cables make up to a 132 cm (52") housing length with a choice of 90 degree or 45 degree elbows

0650-1060 Shown assembled

- Throttle and idle kits sold separately
- Clutch cables are high-efficiency design with cable fitting pull off strength of 226+ kg (500+ lb) and can make up to 203 cm (80") of total length
- All adjusters and transmission fittings are chrome-plated
- Black clutch cables include a black boot to cover the adjuster
- Use enclosed template to set free or travel length to factory specifications

MAGNUM STERLING CHROMITE™ II BLACK PEARL

DESIGNER HANDLEBAR INSTALLATION KITS FOR APE HANGERS

- The only complete kits with matching braided cables and DOT brake lines
- Kits are available for most ABS and non-ABS Harley-Davidson® motorcycles with 25,5 cm to 51 cm (10" to 20") ape hanger style handlebars
- Kits include throttle and idle cables or Throttle-By-Wire extensions, clutch cable or hydraulic clutch line, brake lines, copper crush washers, hardware, and any necessary switch wiring or turn signal extension
- All cable and brake lines feature either Sterling Chromite® II or Black Pearl braid with highly polished chrome or black chrome-plated fittings

- All cables are a low-effort, high-efficiency design that meets or exceeds all OE specifications for fitment, construction, endurance
- Kits for dual disc models include an all brazed manifold that eliminates leaks, alignment problems, and unattractive threaded connections

NOTE: Kits are based on using ape hanger style handlebars with 51 mm (2") risers; except Touring models.

XR STAINLESS DOT HANDLEBAR INSTALLATION KITS

- Magnum XR DOT Handlebar Installation Kits offer a great fit and excellent quality at an economical price
- XR DOT Handlebar Installation Kits are available for popular ABS and non-ABS Harley-Davidson® motorcycles with 254 mm (10") to 43 cm (17") ape hanger style handlebars
- Three color combinations to complement your bike: clear-coated stainless steel with chrome fittings, black-coated with chrome fittings or black-coated with black fittings
- All cables are a low-effort, high-efficiency design that meets or exceeds all OE specifications for fitment, construction, endurance
- Magnum XR DOT brake lines use an enhanced construction of heavy gauge stainless steel embedded in tough abrasion-resistant nylon outer jacket for superior durability
- The coating on cables and brake lines offers exceptional protection for paint or chrome
- Kits that include manifolds use an all-brazed construction to ensure optimal OE fitment and appearance
- Manifolds use -3 AN connections for an easy installation
- Kits include throttle and idle cables or Throttle-By-Wire extensions, clutch cable or XR hydraulic clutch line, XR DOT brake lines, copper crush washers, hardware, fully terminated turn signal and switch wiring extensions

Note: Kits are based on using ape hanger style handlebars and 51 mm (2") risers (except Touring models).

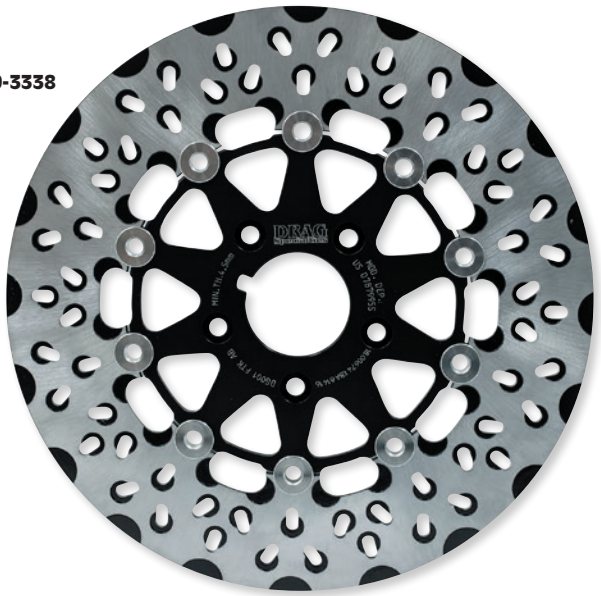
STAINLESS STEEL DRILLED BRAKE ROTORS WITH ABE (CONT)

1710-3352



TYPE FT DISC

- Stainless steel fully floating brake rotors
- Design provides enhanced braking performance and eliminates rotor fade/warp even during extreme use
- Rotors with aluminum rotor carriers feature carrier rings fully-machined from aluminum, and give an anodized finish for durability and protection from the elements
- Rotors with stainless steel rotor carriers feature carrier rings ground and machined from stainless steel; non-machined surfaces are finished using anti-corrosive paint for durability and protection from the elements
- Rotor bobbins are stainless steel for efficient rotor "float" so the rotor will not warp and distort under extreme stress/heat
- Stainless steel outer rotor rings are machined and the surfaces finished using a bilateral cross-textured grinding process that keeps rotor runout to no more than 0,01 mm
- Manufactured in Europe to ISO/TS 16949 certified standards that meet or exceed OEM specifications
- ABE/TÜV approved

TYPE FTK DISC

- Stainless steel fully floating brake rotors
- Outer brake ring features machined and painted rotor slots
- Innovative design improves brake performance and helps cool the rotor faster during extreme use
- Design gives maximum resistance to fade/warp from heat and mechanical stresses
- Rotor design allows for better heat exchange
- Rotor bobbins are stainless steel for efficient rotor "float" so the rotor will not warp and distort under extreme stress/heat
- Stainless steel outer rotor rings are machined and the surfaces finished using a bilateral cross-textured grinding process that keeps rotor runout to no more than 0,01 mm
- Rotor weight and inertia are not increased compared to other brake rotor disc types; do not impede the motorcycle's steering/handling characteristics
- Very original style, great for customizers or to enhance the look on older stock bikes
- Manufactured in Europe to ISO/TS 16949 certified standards that meet or exceed OEM specifications
- ABE/TÜV approved

SIX-PISTON DIFFERENTIAL-BORE FRONT CALIPERS

- Designed for 11,5" or 13" rotors
- Dual-disc applications require a left and right caliper
- Work with OEM-style or Performance Machine rotors
- Chrome calipers are highly polished then chrome-plated
- Contrast Cut™ finish starts with a polished caliper that has been black anodized, then recut to open the design
- Black Ops™ is a gloss black finish on top of a contrasting textured black finish for outstanding toughness and design
- Include brake pads, bleeder screw and $^{3}/_{8}$"-24 banjo bolt
- TÜV approved unless noted

NOTE: Will fit 08-20 FLHT/FLHR/FLHR/FLHX, 08-13 FL H-D Trike (w/ 13" rotors only). Calipers for 00-03 XL will fit 04-13 XL/XLH models, but will require an $^{11}/_{16}$" bore master cylinder for dual-disc applications and a $^{9}/_{16}$" bore master cylinder for single-disc applications.

NOTE: Will not fit FXD/FXR/XL models with wire spoke wheels.

VINTAGE CALIPERS/CALIPERS BRACKETS

- Get their braking power from Performance Machine's proven four-piston internals, but have taken their styling cues from our Dual-Action Cast caliper
- The reminiscent, CNC-machined fins give the caliper its vintage style while keeping the caliper cool and providing optimal braking power with no flex
- The precision-machined Performance Machine logo around the accent bolt and centrally located banjo are the finishing touches to a true classic
- Available in chrome, Black Ops™, Machine Ops™ and black finishes
- Black Ops™ is a gloss black finish on top of a contrasting textured black finish for outstanding toughness and design
- Machine Ops™ is a fusion of textured natural aluminum and detailed machining that exposes the true beauty of their aluminum alloy, and then they dip the fresh machined parts in a slick clear anodize to protect the surface while keeping its raw aesthetic protected
- Calipers and brackets sold separately

NRS Technology

BRAKE PADS

STANDARD PADS

- Organic material
- Long pad service life
- Suitable for use with all brake discs
- Solid performance, even in wet conditions
- Features NRS Technology, precluding loss of lining material under extreme thermal conditions
- All parts are ABE approved, unless noted

RQ ORGANIC PADS

- Organic material
- Suitable for use with all brake discs
- Solid performance, even in wet conditions

PC ORGANIC CUSTOM PADS

- Organic carbon mixture
- High braking performance
- Special mixture with low braking noise maximizes comfort
- Compatible also with brake discs of stainless steel, die-cast, chrome-plated or polished steel
- Reduced brake dust

SV/SH SINTERED METAL PADS

- Completely metallic sintered brake pads
- Good all-around performance
- Suitable for use with most brake discs
- No bedding is required

SRT SINTERED ROAD/TRACK PADS

- Premium compound pad with state-of-the-art technology for high durability, performance and ideal modulation (feel)
- Completely metallic sinter pad compound
- Provide stable, non-fade performance; excellent choice for heavy vehicles
- Compatible with nearly all brake disc types

SRQ SINTERED METAL ROAD RACING PADS

- Completely metallic sintered brake pads
- Extremely high friction rate
- Very effective performance with low pressure at the lever
- Suitable for high-performance use

CRQ CARBON RACING PADS

- Carbon-based racing pad
- Greater durability than the SRQ pad
- High friction levels; requires low effort at the lever
- Suitable for high-performance use

Sintered Metal

Organic Aramid Fiber

See chart for details

BRAKE PADS

- Sintered metal brake pads are the OEM-type replacement pads for most bikes from the late 1970s to the present
- Sintered metal brake pads are second-to-none in their stopping abilities and wear characteristics while still providing excellent reduction in noise and dust
- Organic Aramid pads are the perfect choice for polished or chromed rotors and Billet Steel Rotors
- Both compounds of Drag Specialties brake pads are asbestos, nickel, and lead free
- ABE/TÜV approved unless noted

NOTE: If you are using aftermarket billet steel rotors it is recommended you use our Organic Aramid brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

BRAKE PADS

ORGANIC/ARAMID BRAKE PADS

- Provide excellent stopping power without noise and rotor galling, even on polished rotors
- Fingertip control and strong, predictable brake response

DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating, the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads

SEMI-SINTERED "V" PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design provides the long life and great feel of sintered pads, without the rotor damage common to them
- Can be used to replace aramid or sintered metal compound pads

EXTREME PERFORMANCE SINTERED METAL

- The newest sintered metal brake pad fusion technology
- Has the highest friction rating available in a pad - 0,6 - for strong, fade-free stopping power
- No lead, iron or steel additives; no more rotor outline etching or rotor stiction
- Super-fast bed-in; full friction after 10 to 15 race stop uses
- Great heat cycle ability; pads cool after extreme use and perform just as strong the next day

VLD LIMITED EDITION SEMI-SINTERED CHROME PADS

- Same features as the semi-sintered V-Pads but have polished chrome backing plates instead of orange backing plates
- 30% copper content by weight in a high-density matrix provides great brake feel and longer life with low heat transfer and less disc damage
- Great brake performance over a wide range of operating temperatures
- Manufactured using the NUCAP® of Canada NRS™ backing plate hook system which uses small hooks pressed into the surface of the backing plate which bond the friction material to the backing plate more securely than adhesive bonding

NOTE: Brake pads include abutment shims where required.

RDP Race

DP BRAKES SINTERED METAL BRAKE PADS

- Give your bike peak braking performance with DP Brakes brake pads
- Pads have a quick break-in period so you get peak braking performance fast
- DP Brakes design and materials ensure consistent, hard stops and fade-free performance
- Pads give long pad life – sintered metal compounds outlast conventional organic or aramid pads
- Made with DP Brakes' proven sintered metal pad material
- Gray-colored aluminum oxide-based ceramic material on backplate of pad keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Excellent initial bite and feel in both wet and dry conditions
- GG friction rated
- Quiet and non-abusive to most rotors; no brake dust or brake fade
- OEM pads for Performance Machine calipers

SDP SPORT HH+ SINTERED METAL BRAKE PADS

- Feature the industry-high, HH+ friction rating
- Provide superior stopping power with no mileage penalty
- Gray-colored aluminum oxide-based ceramic material on backplate of pad keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Quick pad break-in time so you get maximum stopping power fast
- Quiet and dust-free

RDP RACING SINTERED METAL BRAKE PADS

- Developed with the aid of top works teams to give your bike maximum stopping power
- Gray-colored aluminum oxide-based ceramic material on backplate of pad keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Designed to give maximum initial power, with fingertip control throughout the stop
- Quiet and dust-free

NOTE: DP Brakes brake pads are not for use with polished rotors.
