3015 MODEL SPEEDOMETER/TACHOMETER

- High-brightness, vacuum fluorescent graphic display technology
- Includes turn signal, high beam, low oil, neutral and engine indicator lights (found on fuel-injected bikes)
- Speedometer is easily recalibrated for any gearing and tire size combination
- Includes an odometer with resettable trip meter
- Selectable displays allow the rider to choose between speedometer only, speedometer with odometer and trip meter or speedometer with bar/graph tachometer
- Tachometer offers an adjustable shift point warning; calibration adjusts easily for any combination of one to 15 cylinders without using coils
- Features high-beam, turn signal, neutral and low oil pressure indicators
- Automatic turn signal canceling compatible
- Displays "check engine" and "wait-to-start" lights
- Sending units, adapters and mounting brackets available separately for use with either electronic or cable drive systems – OEM electronic speedometer sensor cable plugs directly into the back of gauge if desired
- Order brackets below, available separately

CULT-WERK

SPEEDOMETER OFFSET KIT

- Relocates the speedometer to the original headlight mask
- This ensures a much better view of the fittings as you no longer have to look down at the tank
- The offset is required in connection with our Dash Cover
- No cables need to be extended during assembly, it is enough to reroute the cables to get to the right position
- Kit replaces the original holder of the mask and the mask can then be attached to the new holder again
- Two covers are supplied for the fittings, which serve as splash protection from below and for attachment
- It is made of steel and then powdercoated in glossy black

PART #	DESCRIPTION
2210-0620	For 18-21 FXLR/FXLRS

CULT-WERK

SIDE-MOUNT SPEEDOMETER BRACKET KITS

- Moves the speedometer from the handlebars to the left side of the tank for a supercool look
- The indicator light unit is also mounted on the speedometer bracket
- Nothing needs to be changed on the cables
- CNC lasered and black powdercoated

NOTE: Please make sure to use screw locking during assembly. Otherwise the screws can loosen due to the strong engine vibrations.

RIVCO

COMPLETELY HIDDEN TRAILER HITCHES

- Laser-cut from high-tensile strength steel, then formed and TIG-welded by hand for superior fit, strength and reliability
- Vertical receiver hitch features chrome tongue; installs in seconds without tools
- Simple bolt-on installation mounts to bike at five points for superior rigidity
- Plug-in wiring harnesses are available (see page 1442)
- Once installed, the black powdercoated main hitch is virtually unseen; only the removable chrome vertical receiver remains visible
- Hitch tongue detaches easily to keep that clean look when not towing a trailer
- Includes hitch and tongue; does not include trailer-hitch ball or wiring

NOTE: Not for 10-17 Street Glide/Road Glide/ Road King Special models with fender tip taillight.

SAFETY WARNINGS: For information on the care, safety, maintenance, mounting, manufacturer's warranty and other information, consult the motorcycle manufacturer's and the trailer-hitch manufacturer's publication(s) and/ or website(s) for complete information. Towing can negatively affect handling, cornering, stopping and stability and may void your warranty. Towing increases the likelihood of serious injury or death. If you tow a trailer, never exceed the motorcycle manufacturer's Gross Vehicle Weight.

PART #	DESCRIPTION
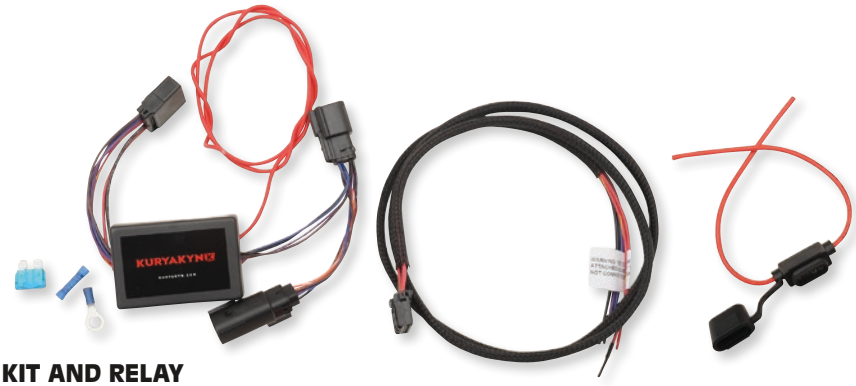
DS-708136	Five-pin male/female connector

MOTOR TRIKE INCORPORATED



TRAILER HITCH WIRE HARNESSES

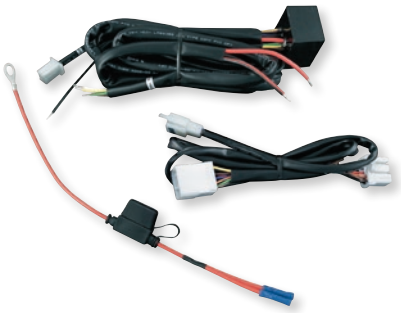
- Essential for connecting wiring to a trailer of any kind
- Wiring is plug-and-play; no splicing required
- Maintains the integrity of original bike/trike harness
- Six-pin connector allows for auxiliary power to be run to trailer

PART #	DESCRIPTION
3902-0163	For 14-24 FLHTCUTG

PART #	DESCRIPTION
3902-0129	For 09-13 FLHTCUTG

KURYAKYN

PLUS 1 TRAILER WIRING HARNESS KIT AND RELAY



- Eliminates overloading stock lighting or accessory circuits
- Harness utilizes inputs from the motorcycle to direct power from the battery to the appropriate trailer lighting circuit
- 5-Wire kit does not include receptacle kits because the style of receptacle required varies by trailer manufacturer

PART #	DESCRIPTION
3902-0195	For 14-25 FLHT/FLTR/FLHX, 17-25 FLHRXS w/ 5-Wire trailer

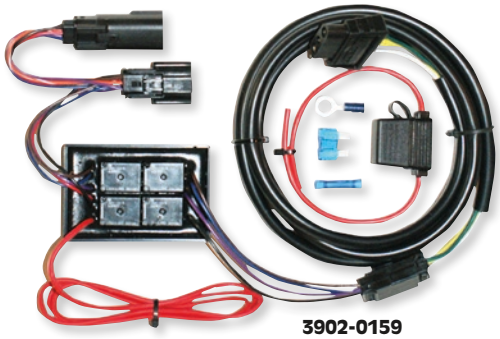
KURYAKYN

TRAILER WIRING HARNESS AND RELAY

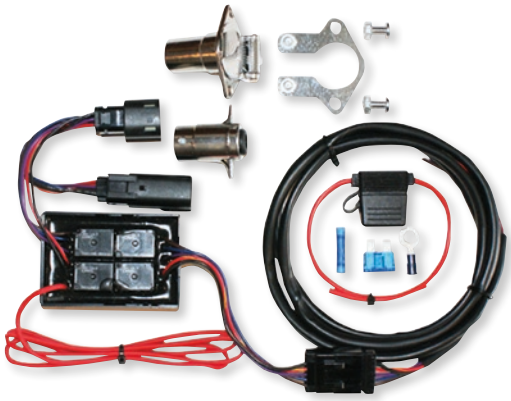
- Eliminate blown fuses caused by overload of the stock lighting or accessory circuits; relay harness utilizes inputs from the motorcycle to direct power from the battery to the appropriate trailer lighting circuit
- Kits provide standard five-wire output (run, brake, left turn, right turn, ground) plus a bonus wire that can be connected to provide 12V fused power to the trailer for compartment lights or keyless entry systems
- Does not include receptacle kits

PART #	DESCRIPTION
2120-0560	For 99-13 FLHT, 99-13 FLTR (except 09 FLTRSE, 10-13 FLTRX), 06-09 FLTRX, 99-13 FLHR, 00-10 FXST/FLST (except 08-10 FXCW/X, 10 FLSTSE), 99-11 FXD/FXDWG (except 10-11 FXDWG)

All part numbers in BLUE are new for 2026.



KHROME WERKS



TRAILER WIRING CONNECTOR KIT WITH ISOLATOR

- To be used with trailers with the same number of wires as the motorcycle
- Wiring harness features an isolator module with a fused, separate circuit from battery positive to power the trailer lighting; works through built-in relays and prevents overloading of factory lighting circuit
- 5-pin, die-cast, automotive-style connector
- Mounts using mounting bracket that bolts directly to the safety chain bracket on current production Khrome Werks trailer hitches
- An isolator is a must for 2009 and later H-D models pulling trailers with conventional incandescent lighting (higher amperage requirements than trailers with LED lighting)

PART #	DESCRIPTION
3902-0082	For 99-13 FLT/FLHT w/ 8-pin rear light connectors (except 10-13 FLHX/FLHXSE/FLTRX/FLTRSE, 09-13 SE CVO)

3902-0159

3902-0160

TRAILER WIRING KITS

- All kits include 6-pin Molex isolator, 15A fuse/fuse holder, two butt connectors and ring terminal (no converter needed)
- PART #3902-0159 also includes 4-wire, 142 cm (56") harness with a flat 4-position connector
- PART #3902-0160 also includes 5-wire, 142 cm (56") harness, 5-pin round connector set and bracket for KW hitches
- PART #3902-0161 also includes 4-wire, 142 cm (56") harness with a flat 4-position connector
- PART #3902-0182 has 8-pin multi-lock plugs and also includes 4-wire, 122 cm (48") harness with a flat 4-position connector

PART #	DESCRIPTION
3902-0159	For 14-24 FLTRX/FLHX/FLHTCU/FLHTK/FLTRU/FLHTCUTG (except 24 FLHX/FLTRX, 23-24 CVO)
3902-0160	For 14-24 FLHR, 14-16 FLHTCU/FLHTKSE/FLTRUSE (except 23-24 CVO)

PART #	DESCRIPTION
3902-0161	For 14-24 FLHR 14-15 FLHTCU/FLHTKSE
3902-0182	For 15-24 FLRT (except 24 FLTRX, 23-24 CVO)

FOUR- TO FIVE-WIRE CONVERTER

- Allows 14-and-later Touring models with combined brake lights and turn signals (four-wire) to connect directly to trailers with separate turn signals (five-wire)
- Designed to be used with Khrome Werks four wire Isolator PART #s 3902-0159 or 3902-0182 (sold separately)
- No need to rewire trailers with separate turn signals (five wire)
- Plugs between the outlet connector of the four-wire Isolator PART #3902-0159 and the new five-wire supplied harness
- Includes a converter module with a five-wire harness, five-pin round connector set and a mounting bracket
- Mounting bracket fits all current Khrome Werks hitches

PART #	DESCRIPTION

RIVCO

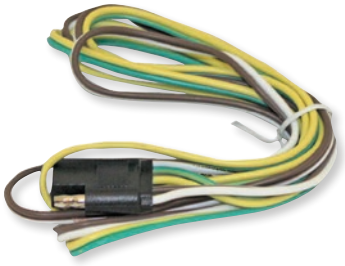
TRAILER WIRING SUB-HARNESS

- Trailer wiring sub-harness plugs into the bike's stock wiring harness on one end and Rivco's own 5- to 4-wire converter or isolator on the other
- Eliminates the need to cut and splice the stock wiring harness
- Sub-harnesses requires two additional parts for a complete trailer wiring harness assembly: a 5- to 4-wire converter and Rivco's Universal Trailer Wiring Isolator (PART #3902-0221) (both sold separately)

PART #	DESCRIPTION
3902-0147	For 00-10 FXST/FLST (except SE models), 06-09 FLHX, 99-13 FLHR, 99-09 FLTR, 99-13 FLHT/FLHTC/FLHTCU/FLHTK/FLHTCSE/FLHTCUSE and 09-13 H-D Trikes (8-pin AMP multi-lock)

RIVCO

4- TO 5-WIRE SIGNAL DECODER



- A must-have for trailers with a 5-wire system; separates the 4-wire CAN bus signal to work with 5-wire trailer systems
- For use ONLY with Rivco Universal Trailer Wiring Isolator (sold separately)

NOTE: 14-20 models come equipped with a new CAN bus-style wiring and require the use of an isolator. This will draw all power for trailer lights directly from battery and not adversely affect CAN bus system.

PART #	DESCRIPTION
3902-0164	For 14-20 FLHT/FLHR/FLHX/H-D FL Trike (except FLHTKSE)

Custom DYNAMICS

4-PIN TRAILER WIRE HARNESS

- Universal trailer harness provides plug-and-play wire hook-up to any 4-way flat trailer plug
- Extended 127 cm (50") wire leads provide easy hook-up for run, brake, and turn signal functions
- Heavy-duty 14ga wire for long-lasting durability
- Sold each

BURLY BRAND
MOTORCYCLE ACCESSORIES

BRAWLER KITS

- Designed to grind down during impacts to prevent bike from catching and flipping
- Functions as a highway bar for a secure grip and comfortable footrest on long rides
- Durable materials ensure strong defense against damage during stunts or everyday use
- Safeguards your investment and reduces potential repair costs
- Balances performance with style, suited for both aggressive riding and extended journey
- TIG-welded for maximum durability
- Black powdercoated finish
- 7-gauge mild steel mount and gussets
- Replaceable Delrin sliders
- ST-Style saddlebag adapter for Softail designed for seamless integration of the Brawler Kit when using ST-style bags and ensures optimal fitment, providing a smooth and hassle-free installation
- ½"-13 socket head cap screw hardware included

NOTE: Due to interference from water cooling lines, the crash bar kit does not fit Twin-Cooled touring models.

NOTE: For 09-13 Road Glide models, the Burly crash bar kit does not integrate with the original lower fairing support brackets. Installation requires fabrication of new lower fairing support brackets (not included).

NOTE: For 15-23 Road Glide models, (except 18-22 FLTRXSE CVO Road Glide, 21-23 FLTRXS Road Glide Special and 22-23 FLTRXST Road Glide ST), installation requires new lower fairing support bracketry because the crash bar kit does not integrate with the original lower fairing support brackets. A singular fairing support bracket is recommended (not included), H-D PART #47200354 and any necessary hardware.

7 & 7 RAKED TRIPLE TREES

- Triple trees offer 7° of rake while maintaining 7" of trail when using a 23" wheel for the ultimate in handling, no frame modifications necessary
- Designed to work with 23" and 21" wheels only (stock diameter wheels will not handle correctly)
- 21" wheels provide 6 1/8" of trail
- Triple Trees are machined from forged 6061-T6 billet aluminum and then finished in black anodize
- Each kit includes top and bottom tree, pressed in steel stem, lower fork bearing and travel limiters on 14-25 applications
- Batwing style Fairings maintain stock position and do not require angled headlight wedges or special brackets to properly adjust headlights

NOTE: Will not work with factory diameter wheels.

NOTE: The larger the wheel, the less fork travel. Always check lower tree to fender clearance.

NOTE: Raked triple trees change the handling characteristics of the motorcycle. Use caution until familiar with the changes.

41 MM TRIPLE TREES

- CNC-machined billet aluminum
- Stem threads into underside of top triple tree for cleaner look
- Available in a smooth- or radius-groove design

NOTE: Raked triple trees change the handling characteristics of the motorcycle. Steering geometry must be calculated to determine which degree of rake is most suited for your application. Trees with more than 3° of rake should not be used in stock frame applications.

SM SPEEDMERCHANT

ELITE 49 MM TRIPLE TREE

- Manufactured from 6061 billet aluminum with a black finish
- Bottom headlight mount included
- Designed with a modifed offset to provide increased stability
- All hardware is stainless steel

NOTE: Does not have fork lock capability.

PART #	DESCRIPTION
0408-0362	For 06-17 FXD/FXDB/FXDC (except FXDWG)

SM SPEEDMERCHANT

39 MM SPEED TRIPLE TREE

- CNC machined out of 6061 aluminum
- Available in black anodized finish
- Includes steering stem and external hardware for use with stock XL steering stops
- Pre-drilled for internal fork stops
- This tree has been designed for better stability, especially when used with longer-than-stock shocks
- Will provide more stability at high speed, with a modified offset to increase the trail

NOTE: Does not have fork lock capability.

PART #	FITS MODEL
0408-0298	For 99-05 FXD and 88-22 XL (except XL1200X/XS, XL1200T, XL1200C/CX and XL883L)

0408-0310

0408-0313

6° RAKED TRIPLE TREE KITS

- Get that longer Bagger look
- Increase frame-to-fender clearance for larger front wheels
- No modifications to OEM frame needed
- Accept all OEM components
- Maintain stock ride height of the vehicle
- Reduced steering effort on bikes with trike conversions installed without eliminating steering feel – reduced effort leads to reduced rider fatigue, allowing for longer rides

NOTE: Raked necks change the handling characteristics of the motorcycle. Use caution until familiar with the changes.

PART #	DESCRIPTION
0408-0322	For 14-23 FLHT/FLHR/FLHX/FLTRX/FLTRU/FLTRK (except FLHTCUL/FLHTKL), 24 FLHR/FLHTK, 25 FLHR
0408-0310[1]	For 02-13 FLHT/FLHR/FLHX/FLTR
0408-0313	Adapter for FLHR

[1] Road King models require PART #0408-0313 to overcome clearance issues.

39 MM TRIPLE TREE

- CNC-machined out of solid 6061-T6 aluminum
- Increased clamping area of 0,25" on the bottom tree reduces lateral and torsional fork flex, which increases the rigidity and stability of the front end
- Machined cut-out in top tree for clean cable and wire routing
- No fork lock capabilities
- Will fit most 39 mm front ends with 7" On Center forks
- Designed to accept standard risers (3 1/2" On Center)

NOTE: Models with risers cast into the upper triple tree will require separate purchase of risers, bushings and mounting hardware.

PART #	DESCRIPTION
0408-0374	For 99-05 FXD and 88-22 XL (except RH Sportster)

BLACKLINE 41 MM TOP TRIPLE TREE

- Allows the use of most handlebars and risers with a standard 3 1/2" on-center mounting
- Mounting holes for stock Blackline gauge mount
- Riser mounting holes are 3/4" further forward than standard top tree
- Billet aluminum with a flat black finish

PART #	DESCRIPTION
0408-0297	For 11-13 FXS

TOP TRIPLE CLAMP FOR SPORTSTER "48"

- Custom upper triple tree allows you to install bushings and risers
- Greatly expands your custom handlebar installation options
- Will work with OEM turn signals
- Gloss black powdercoat finish that won't fade, unlike anodized finishes
- Use with LA Choppers handlebar angle adapters for the ultimate custom look

PART #	DESCRIPTION
0408-0342	For 10-15 XL1200X

CHROME FL-STYLE TRIPLE TREE

- Forged steel construction and highly chromed
- A distinctive addition to any Harley-Davidson Big Twin model with FXST and 41 mm FL fork tubes

NOTE: Does not allow fork-lock capability.

NOTE: Not for use with fork tins.

FORK SPRINGS

- High-quality, high-performance replacement fork springs
- A Progressive Suspension-rate spring has the advantage of a rising rate resistance to compression
- The benefit is the spring can be soft enough at the start of the travel to offer a "plush" ride, yet firm enough at the end of the travel to soak up the big bumps
- Spring rates have been chosen to reduce front-end dive during braking, yet still provide excellent ride comfort
- Sold in pairs

PREMIUM RIDE-HEIGHT ADJUSTABLE SHOCKS

- Nitrogen-charged steel monotube damper bodies with hard chrome-plated shafts
- Dual-rate progressive wound springs for a smooth, comfortable ride
- Adjustable spring preload
- Ride-height adjustable, +/- 12,7 mm (½") from size listed
- Chrome shocks feature chrome springs and damper bodies with clear anodized end caps/eyelets
- Black shocks feature black springs and damper bodies with black end caps/eyelets
- Available in standard or heavy-duty applications (loads over 136 kg (300 lbs))
- Mount with existing hardware

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swingarm/axle to exhaust contact, as well as chain/belt guard or tire contact.

NOTE: Lowering the motorcycle will reduce ground and cornering clearance.

NOTE: Shocks shorter than OEM length have reduced travel, this may affect the ride quality and handling of the motorcycle.

NOTE: Not for use with rear lowering kits.

NOTE: OEM upper shock mount covers will not fit with these shocks.

NOTE: May require custom mounting on models that have OEM-style offset mount shocks.

LEGEND 345 MM (13,6") REVO COIL SUSPENSION FOR M-EIGHT TRIKE MODELS

- 345 mm (13,6") length maximizes rear ride height on 2017 and newer trikes utilizing OEM shock mount plates
- Eliminates the need for a lift kit
- Levels out trike models that sit low in the rear from the factory
- Reduces dragging and scuffing of mufflers when rolling through drain basins, backing up to curbs, or loading on a trailer
- Easier steering due to less trail in the front end
- Legend's touring-specific coil spring rates provide superior ride comfort, improved performance, and increased resistance to bottoming for all-day comfort
- Adjusts by hand, no tools needed
- Trike-specific spring rate
- Available only in Black Type III hard coat anodize
- Easy installation and alignment, provided by spherical bearings on both top and bottom mounting points
- High-flow piston improves fluid flow management and allows quick response
- Deflective disc valving self-adjusts to frequency and ensures controlled performance

- Low friction sealing system and sliding bearings for improved performance and feel
- Sold in pairs

NOTE: Shocks are designed to be installed using the OEM lower shock mount brackets.

NOTE: Not compatible with aftermarket lift kits.

444 SERIES

- Features Frequency Sensing Technology (FST), which allows the shocks to sense the frequency of a bump and automatically adjust damping for superior ride quality
- Deflective disc-valving
- Adjust spring pre-load by hand, no special tool needed
- Includes a progressive-rate spring and is high-pressure gas charged for consistent performance
- Standard, heavy-duty or super-duty spring rate with a black or chrome finish
- Sold in pairs
- Contains TEILEGUTACHTEN/German Parts Certificate

NOTE: A shock which is slightly longer than stock may alter the head angle slightly and provide somewhat quicker steering.

NOTE: A shock which is slightly shorter than stock may slightly alter the head angle and provide somewhat slower steering.

NOTE: For OEM shock lengths, see the Quick Reference Guide in the back of the FatBook.

NOTE: Heavy-duty applications are recommended for bikes operating at or near the manufacturer's maximum load rating over 50% of the time.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

412 CRUISE SERIES SHOCKS

- The perfect balance of lowered stance and ride quality
- Combine a flat-wire spring with a progressive main spring, the 318 mm (12,5") shock sits like 292 mm (11,5") units under the weight of the bike, yet utilizes the full stroke as terrain demands it
- The result is a lowered shock that rides like a traditional height unit

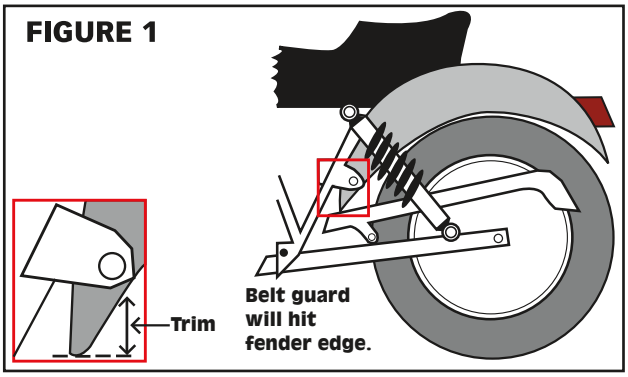
- Manufactured from the finest materials available
- Designed specifically for H-D
- The 412s' simple, durable design makes them a cost-effective improvement to your motorcycle's suspension performance
- A five-position cam-style spring load preload adjuster lets you easily dial in your ride
- Available with either standard or heavy-duty progressive spring rates
- There are multiple style options available, like full show-chrome or black covers; or either chrome or black springs and end caps
- Sold in pairs
- Contains TEILEGUTACHTEN/German Parts Certificate

NOTE: All shocks are measured center-of-eyelet to center-of-eyelet.



NOTE: When installing shocks on 86-20 XL models, it may be necessary to modify or space the chain/belt guard to allow proper clearance.

NOTE: A shock which is slightly longer than stock may alter the head angle slightly and provide somewhat quicker steering.

NOTE: A shock which is slightly shorter than stock may alter the head angle slightly and provide somewhat slower steering.

NOTE: For OEM shock lengths, see Quick Reference Guide in the back of the catalog.

FIGURE 1

To use the 279 mm (11") or 292 mm (11,5") shocks on FXDWG models, the fender must be modified as follows: When the shock is compressed, the belt guard will hit the fender edge (see Figure 1). Trim the fender as shown in Figure 1 inset. After the fender is trimmed, install one shock with springs removed and compress shock to verify that belt guard clearance is sufficient.

NOTE: Heavy-duty applications are recommended for bikes that are operated at or near the manufacturer's maximum load rating over 50% of the time.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

FREQUENCY SENSING TECHNOLOGY

GERMAN PARTS CERTIFICATE

944 FST ULTRA TOURING/LOW SHOCKS

- Unique Ultra touring spring configuration provides the superb ride quality and suspension travel of a 13" shock but the custom lowered look of a 12" shock
- Ultra Low Series shocks are designed to sit even lower; 2" lower than a stock Touring model
- Built around Progressive Suspension's Frequency Sensing Technology (FST)
- Allows the shocks to sense the frequency of a bump and automatically adjust damping for superior ride quality
- 944 FST Ultra Touring shocks are available in three configurations: standard (Up to 250 lbs), heavy-duty (250 to 350 lbs) and super heavy duty (350+ lbs)
- Unique spring combination delivers a dropped ride height while being ridden, but also while the bike is on a side stand
- This allows you to better manage your bike at intersections and when parking
- Adjust spring preload by hand; no special tool needed
- Progressive rate mainsprings specifically designed for touring models
- High-pressure gas charged for consistent performance

QPS UPGRADE KIT

- With the QPS upgrade kit installed on 444 Series and 944 Series shocks, it's no longer necessary to take saddlebags off to adjust the sag when going from a single rider, to a two up riding configuration, and then back to a solo riding experience
- QPS upgrade kit utilizes a sealed gear drive to smoothly adjust preload and offers the same range of preload adjustment as the original 444 or 944 series shock when it comes from the factory

NOTE: Super heavy-duty applications are recommended for bikes operating above the manufacturer's maximum load rating over 50% of the time.

NOTE: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

- Revo-A coil designed specifically for M-Eight Softail
- Available in 317 mm (12,5"), 330 mm (13") and 343 mm (13,5"), standard or heavy-duty applications
- Adjustable preload for rider setup, also allows for minimal pre-load adjustment when changing between rider's weights and loads
- Legend's touring-specific spring rates provide superior ride comfort, improved performance, and increased resistance to bottoming for all-day comfort
- Features adjustable rebound damping that is specifically designed to make fast, precise, and repeatable changes to ride comfort and performance with a simple turn of a knob
- Provides optimum rebound performance that can be fine-tuned for any given rider weight, personal ride preference, or personal riding style
- Low friction sleeve bearings both top and bottom for ease of installation, this also allows the shock to float in its mount and avoid shock bind
- Hard anodized, 46 mm billet aluminum monotube design utilizes a lightweight high flow piston design for improved fluid flow resulting in unmatched handling and bike control
- Hard chromed shaft is 14% larger for increased strength
- Internal floating nitrogen piston ensures consistent damping performance
- Deflective disc valving self-adjusts to frequency and ensures controlled performance
- Legend's durable and low-friction sealing system and sliding bearings provide improved performance and feel
- Available in Black Type III hard coat anodize
- Easy installation that utilizes the OEM mounting hardware
- Included preload wrench makes adjusting easy

- Sold as Mono Shock (1 shock only)
- Designed for optimum performance with the Legend Axeo front suspension

Note: Heavy-duty application is recommended for 158 kg (350 lbs)+ rider and passenger total weight. Also consider heavy-duty if the majority of your riding is two up with a passenger and/or gear.

- Crafted with a high-pressure nitrogen charged damper
- Utilizes a hard chrome precision ground piston rod and features a steel monotube construction with an Internal Floating Piston (IFP) to provide incredible ride performance, even at increased speeds
- 31 cm (12,2") shock length
- Deflective disc valving
- Preload adjustment via threaded preload adjuster with included preload spanner wrench
- Sold each

PART #	DESCRIPTION
1310-2325	For 18-25 Softail

BURLY BRAND MOTORCYCLE ACCESSORIES

M-EIGHT SOFTAIL STILETTO SHOCK

- Dual-spring, high-performance damper
- Main spring coil absorbs big hits and prevents bottoming, while the secondary coil smooths out minor road imperfections
- Provides a plush ride that's not afraid to play rough
- May require modification to exhaust brackets for adequate belt clearance
- Shock length 342 mm (13,5")
- Sold each

NOTE: Before purchasing or attempting to install shocks that are different from the OEM length, confirm that your wheel travel can be altered without causing clearance issues, such as swingarm/axle to exhaust contact as well as chain/belt guard or tire contact.

SPRING SUSPENSION LIMITERS

- The compression travel of the rear shock absorbers can be limited with these universal spring deflection limiters
- The big advantage of these spring deflection limiters is that they are made of relatively soft rubber
- When you touch down on the spring deflection limiter, no hard impacts are caused, but a "gentle" touchdown takes place
- Dimensions: 13 mm inner diameter, 38 mm outer diameter, 10 mm thick
- Easy installation
- It is not necessary to remove the suspension

SPECIAL FRONT FENDERS FOR V-ROD

- Shorter and narrower design with a light edge that originates from the design of the airbox cover and continues on the fender, fitting perfectly into the overall picture
- Two air inlets were integrated into the new front fender, which make the front fender appear narrower from the front and provides a clear view of the front wheel
- The air inlets in the area of the original metal bracket make your V-Rod look more aggressive and brawny
- This front fender is a 100% custom-fit ABS plastic part
- No adjustment work necessary for mounting and minimum painting effort due to perfect surface finish
- All bores and millings are milled on the latest 5-axis CNC machining centers, so that the fender only has to be exchanged for the original fender
- The original metal bracket can still be used, because only this bracket offers perfect support and security
- The fender is TOP processed, fits perfectly and gives a clear view of the front wheel
- Black zinc-plated screw kit PART #1410-0164 (4 pk.) is also available separately
- Contains TEILEGUTACHTEN/German Parts Certificate

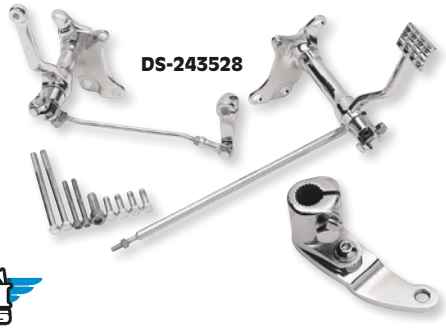
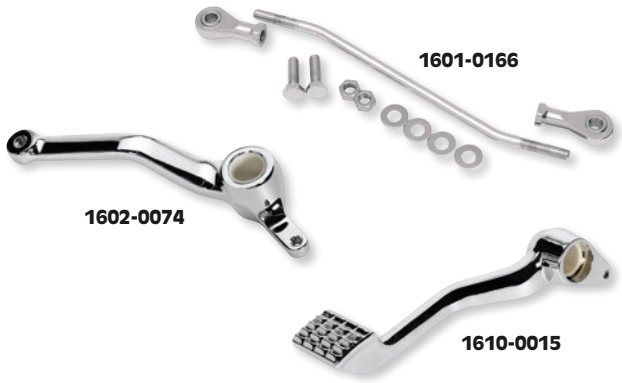
XL FORWARD CONTROL CONVERSION KITS



- Late-model XL models with forward controls no longer allow the fitting of standard rider footpegs; these kits let you mount standard footpegs on the late model XL's with forward controls
- Also works as replacement footpeg mounts on select OEM and Drag Specialties forward control kits for 04-16 XL models
- Kits include a left and right footpeg mount in either chrome or anodized black finish complete with mounting hardware
- Available in standard length or +2" extended length



NOTE: If converting standard forward controls to extended, a longer shifter linkage rod (10 1/4" long) is also required, available separately. We suggest using the 2" extension, PART #1601-0003 along with the original linkage rod.

"RAIL" FOOT AND SHIFTER PEGS

- Another unique design from Drag and Arlen Ness
- Protective rubber rails run completely around diameter for great looks no matter how pegs rotate or pivot
- Each is precisely die-cast, chrome-plated aluminum
- End cap is super-clean and uses a Grade-8 countersunk flat-head socket screw
- Very tight tolerances ensure a great-quality, superstrong footpeg assembly
- Carbon-steel pivot ends are stronger than other die-cast pivots
- Peg diameter is 1,5" (between a standard large-size driver and the smaller passenger-style pegs); length is 4" without pivot end
- Shifter peg matches footpegs
- Sold in pairs with pivot ends installed

NOTE: See page 1590 for an explanation of footpeg mount styles.

HEAD BOLT KITS

2401-0946

- Quality hex-head, hardened stainless steel bolts with a polished "show" corrosion-resistant finish
- Tensile strength rated @ 180.000 psi; superior and stronger than OEM and grade 8 fasteners
- Precision j-form threads for optimum engagement, to prevent galling and promote more consistent torque loading
- Wide underhead flange bolts and hardened chamfered washers provide even load distribution for optimum sealing of surfaces to prevent leaks
- Eliminate thread problems associated with chromed and soft stainless steel hardware
- Manufactured by ARP® to Feuling's® exact specifications

PART #	DESCRIPTION
2401-0946	For 17-25 M-Eight (3,125" under head length)
2401-0825	For 99-17 Twin Cam, 92-22 XL (except RH Sportster), 00-09 Buell

FEULING ARP automotive Racing products

ROCKER ARM SHAFT STUD AND NUT KIT

- Keep those cylinder heads from cracking
- Feuling® rocker arm shaft studs and nuts help relieve the stress put on the factory and SE cylinder heads, which have an extremely weak link with the rocker arm shaft standoffs
- Using a stud helps transfer some of the stress from the standoff casting into the stud
- Highly recommended if using higher lift camshafts and heavier valve springs

PART #	DESCRIPTION
2401-1045	For 17-25 M-Eight

PROVEN S&S PERFORMANCE

ROCKER ARM STUD KIT

- Extends the life of your cylinder heads
- Helps prevent damage to the rocker arm towers
- Re-torque rocker arm nuts after installation
- 12-point nuts
- Black oxide finish
- Sold as a kit

2401-1139	For 17-25 M-Eight

Kibblewhite Precision Machining Manufacturer of Valvetrain Components

ROCKER ARM SHAFT STUD AND NUT KIT

- Studs are heat-treated 180.000 psi aircraft alloy steel
- Nuts are machined from billet high-tensile steel and heat treated
- Both nut and stud have rolled threads for the strongest possible threads
- All are black oxide treated for enhanced corrosion resistance

PART #	DESCRIPTION
2401-1107	For 17-25 M-Eight

M-EIGHT STUD KITS

STUDS

- 4140 chromoly studs, oil-quenched and tempered to 39-44 HRC
- 180.000 psi tensile strength
- Rounded thread roots, rather than flat, improve fatigue strength
- Positive stop shoulder allows for consistent installed height

HEADBOLTS

- Reusable
- 14% increase over stock
- Heat-treated 8640 steel
- 200.000 psi tensile strength
- Durable black oxide coating
- $^{9}/_{16}$" 12-point heads with integral washers
- Formed threads
- Cold formed heads

CYLINDER STUDS

- Made of U.S. milled-and-certified 180.000 psi yield strength aircraft-quality materials
- Stud body is the same size as the major diameter of the stud thread, allowing for a stronger stud and stronger body
- The complete surface has been ground to remove all the imperfections of standard rough-milled material, which also removes notch sensitivity
- Threads are rolled under hydraulic force, creating the strongest possible thread
- A radius is ground on the last thread to reduce the potential of the stud failing at that point
- Sold in a matched set of eight

2401-1105

PART #	DESCRIPTION
2401-1105	For 17-25 M-Eight; repl. OEM #16800063

ECE TYPE APPROVED

This logo symbolizes that the article conforms to applicable UN ECE regulations. Type approved means that a product meets a minimum set of regulatory, technical and safety requirements.

ECE R90 TYPE APPROVED

This logo symbolizes that the article conforms to applicable UN ECE R90 regulations. Type approved means that a product meets a minimum set of regulatory, technical and safety requirements.

PPE (Personal Protective Equipment)

This logo indicates the article's conformity with the Essential Health and Safety Requirements of Regulation (EU) 2016/425.

EC TYPE APPROVED

This logo symbolizes that the conforms to applicable EU EC directives. Type approved means that a product meets a minimum set of regulatory, technical and safety requirements.

EU TYPE APPROVED

This logo symbolizes that the article conforms to applicable EU Regulation (generally for newer products). Type approved means that a product meets a minimum set of regulatory, technical and safety requirements.

PPE

This logo indicates the article's conformity with the Essential Health and Safety Requirements of Regulation (EU) 2016/425. (Non-motorcycle articles, e.g. Watercraft articles)

ECE R22.06

This logo symbolizes that a helmet, helmet visor/shield or other helmet accessory has been tested and certified to ECE R22.06 regulation.

ART

The ART quality mark symbolizes that the lock is independently tested according to the standard for two-wheeler theft prevention. (MBT-04) and certified by the ART Foundation. The locks are rated according to a 5 stars category designation system based on the use of a lock (bicycle, E-bike, scooter, motorcycle, other). The more stars a lock has, the higher its preventative value and the better it protects against theft.

ABE

This logo symbolizes the article has been approved by KBA (German Federal Motor Transport Authority) for specific vehicle application.

TEILEGUTACHTEN (German Parts Certificate)

This logo symbolizes that the article contains a TEILEGUTACHTEN (German Parts Certificate) to ensure the legal part installation. Issued by a German inspection body.

CLASSE S.R.A.

The logo symbolizes that the anti-theft device is tested and approved according to the SRA (SÉCURITÉ et RÉPARATION AUTOMOBILES France) rules for theft prevention. The classification in the "SRA classes" includes electronic protection systems (engine cut-off, alarm, etc.) and mechanical protection systems (U-locks, chains and disc locks).

SOLD SECURE

The logo symbolizes that the lock is tested and approved according to Sold Secure (UK's testing and certification house for security products) standards for theft prevention.

WIRE GAUGE SELECTOR

It's important to match up wire diameter and current properly. To choose the right gauge wire, you will need to know how much Wattage (or Amperage) you will draw and what the length of the cable will be.

NOTE: The chart below is based on a 12V system. To find the appropriate wire for 6V systems, the Amp and Watt numbers should be divided in half.

FORMULAS

DISPLACEMENT

Bore x bore x stroke x 1,5708 = Displacement in Cubic Inches

Bore x bore x stroke x 25,744019 = Displacement in Cubic Centimeters

Example: A stock 96" Twin Cam has a bore of 3,750" and a stroke of 4,375".

Formula: 3,750" x 3,750" x 4,375" x 1,5708 = 96,64 cubic inch

3,750" x 3,750" x 4,375" x 25,744019 = 1583,86cc

COMPRESSION RATIO

Ratio = Cylinder displacement plus combustion chamber volume divided by combustion chamber volume.

Example: A 96" cubic inch Twin Cam has 794cc per cylinder. Combustion chamber volume is approximately 86cc.

Formula: 794 + 86 = 880 : 86 = 10,2:1 Compression Ratio (CR)

Note: When calculating compression ratio, do not forget to include gasket thickness, valve pockets and ringlands in the piston. CC-ing the heads, filling them with fluid after heads have been installed, will give you accurate numbers.

HEAD/BASE GASKET VOLUME

Bore x bore x 12,87 x compressed gasket thickness = Gasket volume in cubic centimeters

Example: A head gasket has a thickness of 0,045"; bore is 3,750".

Formula: 3,750" x 3,750" x 12,87 x 0,045" = 8,144cc

AREA OF CIRCLE

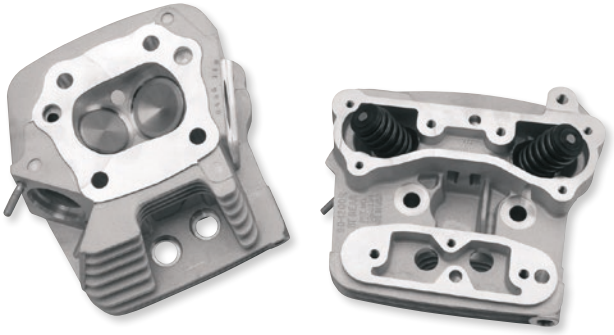
The radius is the diameter of a circle divided in half.

Radius x radius x 3,1416 = Area of a circle

Example : A stock 96" Twin Cam has a bore of 3,750".

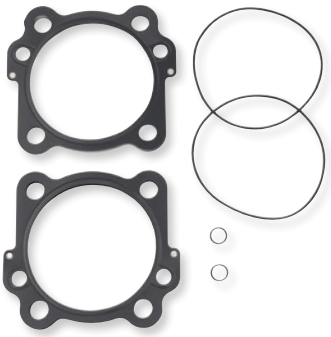
Formula: 1,875" x 1,875" x 3,1416 = 11,05 Inch^2

47,63 mm x 47,63 mm x 3,1416 = 7127,09 mm^2 (71,271 cm^2)



ELECTRICAL: AMPERAGE, WATT AND VOLTS

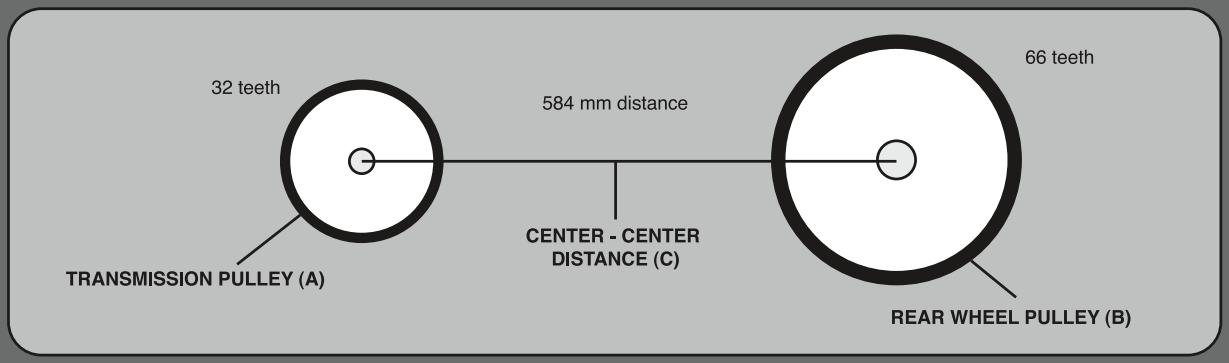
Understanding electrical current is important to prevent a meltdown within the electrical wiring of a motorcycle. It is useful to calculate what fuse you will need for a certain application.



Watt divided by Volt = Amp

Amp multiplied by Volt = Watt

Watt divided by Amp = Volt



- THE 3-STEP BELT FORMULA -

How to find the correct belt

Formula

A = number of tooth transmission pulley
B = number of tooth rear wheel pulley
C = center to center distance between both pulleys

THE 3-STEP BELT FORMULA

Step 1) $\frac{(C \times 2)}{13,8} = D$

Step 2) $\frac{A + B}{2} = E$

Step 3) D + E = Number of teeth

Example

Transmission pulley has 32 tooth
Rear wheel pulley has 66 tooth
Center to center distance is 584 mm

Step 1) $\frac{584 \times 2 = 1168}{13,8 \text{ (belt pitch)}} = 84,6$

Step 2) $\frac{32 + 66}{2} = 49$

Step 3) 84,6 + 49 = 133,6 teeth
This means you must use a 133 tooth belt, because 137 tooth is not manufactured
