BRAIDED UNIVERSAL SPARK PLUG WIRES

- Intended for use with electronic ignitions
- 94 cm (37") wire length can be cut to reach anywhere it needs to go
- Tin-plated copper wire with silicone insulation jacket and fiberglass coating along with silicone boot combine to make these wires flame retardant and high temperature resistant
- Insulation diameter is 6 to 6,5 mm with 0,5 mm fiberglass outer cover
- External braided cover is made of fiberglass and comes in attractive colors to add to the customization of your bike

PERFORMANCE SPARK PLUGS

- Conventional style spark plugs, available in OEM heat ranges
- Plugs have a unique look with a black ceramic body and bold red logo/script
- Insulator is made of 95% pure alumina, features strong resistance to heat shock and superior insulation
- Multi-rib design of the insulator eliminates flashover
- Nickel-plated housing prevents oxidation and corrosion
- Multi-layer gaskets and heat crimping process ensure a leak-free, gas-tight seal
- Copper core electrode prevents oxidation and corrosion, has good electrical and heat conductivity and creates long spark plug service life

POWERMADD

E3 RESISTOR SPARK PLUGS

- Unique electrode shape maximizes the power created by the spark plug – Diamond Fire technology
- Electrode is a combination of performance and technology that results in an improved flame kernel shape
- This flame front ignites the bulk air/fuel mixture faster, moves heat into the combustion chamber faster and creates a more localized pressure front for faster pressure rise during the cylinder power stroke
- The result is more complete combustion and an improvement in engine performance
- A truly premium performance plug

IGNITION AND COIL KITS

- Complete electronic ignition systems built with the latest state-of-the-art engineering
- The same ignition used by top drag and road racers to set records and bring home victories over the past decade
- The Dyna S is completely housed behind the ignition cover and uses a magnetic rotor with the original advance unit, so the factory advance curve is maintained
- Coils provide spark voltages in excess of 30.000V and spark energies second to none
- The DSK61 Dyna S and coil system includes a DC7-1 high energy coil
- The DSK62 Dyna S and coil system is designed for single-fire applications; includes two DC10-1 Dyna coils

NOTE: Not for fuel-injected models.

NOTE: Later models will require the use of a mechanical advance unit.

TWIN-FIRE II COIL

- Single-fire just got easier
- High-technology materials now make it possible to put two coils in the same space as the stock coil with greater output
- No exposed laminations to rust and degrade performance
- High-voltage and primary terminals machined from brass
- High-impact thermoplastic housing is ultrasonically welded and sealed against moisture
- Compact size fits easily under stock covers
- Peak gap current in excess of 50mA
- Over 40.000V per output
- Rated at 3-ohms; accepts 7 to 8 mm wires

NOTE: Not for Twin Cam applications.

NOTE: Not for use with DS6-2 ignition system.

MINIATURE SERIES COILS

2102-0003

- One of the smallest packages delivers high output with advanced magnetic core technology
- Designed for use with Dyna 2000 and 3000 series ignitions, factory-installed electronics or with aftermarket ignitions that employ dwell control
- Secondary resistance is 11,5 ohms
- Great for customs where coils need to be hidden

NOTE: Not for Twin Cam applications.

NOTE: Not for use with the Dyna "S," DYNA III or earlier generation ignitions.

DYNA 2000TC PROGRAMMABLE DIGITAL PERFORMANCE IGNITION MODULE

- Single-fire, fully programmable performance ignition
- Sixteen programmable advance curves in three groups: stock-to-slightly-modified motors, heavily-modified motors and insanely-modified motors
- Eight rev limiter settings in 250 rpm steps from 5750 to 7250 rpm
- All functions offer full digital accuracy
- Compatible with stock and performance coils – less than 1-ohm resistance
- Coil current constantly monitored to provide constant full-spark energy
- Uses all stock sensors and connectors
- Built-in reverse battery and spike protection
- Data recording includes total engine hours, time wide-open throttle, longest time operating at wide-open throttle, max rpm, seconds near rev limit and number of engine starts
- PC programmability makes possible an eight-point, fully definable, wide-open throttle curve and a fully definable part-throttle curve, programmable rev limit in 50 rpm steps, 0 to 5 programmable dead-cranking revs, total of +/- 10° rear cylinder offset, programmable rev limiter, and security lock-out (pin # activated)

PART #	DESCRIPTION
2101-0033	For carbureted 99-03 Twin Cam

DYNA 2000TC-3 DIGITAL PERFORMANCE IGNITION MODULES

- Module has a single connector
- Loaded with 16 different advance curves, giving engine builder a wide range of curves to work with
- Adjustable rev limiter allows the user to select a rev limit ranging from 5750 to 7500 rpm in 250 rpm steps

DYNA2000

2000-HDE PC-PROGRAMMABLE DIGITAL IGNITION MODULES

- A plug-in upgrade to the electronic advance ignition found on late models, these ignitions are micro-computer controlled, generating extremely accurate control over the entire ignition process
- Allow riders to tailor the advance curve and rev limiter to the specific needs of their particular engine; four built-in advance curves cover the needs of stock to highly modified engines over a variety of operating conditions; four independent rev limiter choices from 6000 to 7500 rpm set the exact protection level needed
- PC programmability allows you to define a wide-open and part-throttle curve, rev limits, dead-cranking revs and rear cylinder offset
- PART #2101-0045 comes with 8-pin connectors; operates in single-fire or dual-fire modes
- PART #2101-0046 comes with 8-pin connectors; operates in dual-fire mode only
- PART #2101-0045 and 2101-0046 offer a quick curve which simulates a mechanical advancer for hot rod motors; option to use vacuum advance compensation via a VOES switch and retard mode, which allows selection of ignition retard of 5°, 7° or 10° upon activation of a retard input
- PART #2101-0044 is for use with a dual-fire ignition only; it simply plugs right into your 7-pin stock harness and mounts right in the original ignition mounting area
- PART #2101-0043 comes with a 7-pin connector; can be used with either one ignition coil firing both cylinders (dual fire), or with two ignition coils, one firing each cylinder (single-fire); no other ignition offers this flexibility
- A separate tach output wire allows clean tach operation during rev limiting and when in single-fire mode
- A diagnostic LED indicator is included on the back of the control module to assist trouble shooting and static timing

IMPORTANT NOTE: On any electronic advance ignition such as the Dyna 2000-HD1 or the stock ignition, you must use carbon fiber-type suppression spark plug wires to reduce radio frequency interference. Use of copper wires may cause malfunction of the ignition due to severe electrical noise generated at the spark plugs. The original wire supplied by Harley-Davidson should be okay.

NOTE: HDE systems are not compatible with Dyna "S" systems. Use HD1/HD2 systems only.

2000I PC PROGRAMMABLE ELECTRONIC IGNITION KITS

- Completely self-contained so entire unit hides under the cam cover for a clean look on custom bikes
- Single-fire operation down to zero rpm for easier cranking and kicking
- Will operate in all combinations of single-fire or dual-fire with single-plug or dual-plug heads
- Ten advance curves cover a broad range of engine builds and riding styles
- Engine over-rev protection, adjustable from 6000 to 7500 rpm
- Adjustable timing retard for nitrous and turbo applications
- VOES indicator lets you monitor VOES switch at a glance
- Built-in tach driver can be used to activate shift lights, auto-shifters and other accessories
- Easy static timing with built-in timing indicator
- Intelligent over-current/short-circuit protection
- Active dwell control
- Over-voltage protected against momentary spikes
- Data recording includes total engine hours, time wide-open throttle, longest time operating at wide-open throttle, max rpm, seconds near rev limit and number of engine starts
- PC programmability makes possible an eight-point, fully definable, wide-open throttle curve and a fully definable part-throttle curve, rev limit programmable in 50 rpm steps, programmable dead-cranking revs 0 to 5, rear cylinder offset, total of +/- 10°, programmable rev limiter, security lock-out (pin # activated), single- or dual-fire
- Programming and downloading data and graphs from module requires proper programming kit (sold separately)
- Pigtail connector enables the user to connect the ignition to a PC to either download recorded info from the ignition or program their own power curves, rev limits, dead revs or rear cylinder off-set timing; connector remains on bike

NOTE: Not for fuel-injected models.

NOTE: Programming kit is not necessary to use all selectable functions of the current ignition.

INTERNAL IGNITION KIT

- Includes ignition system, 8,5 mm spark plug wires, single-fire coil and instructions
- Ignition system has two advance curve families with adjustable advance curves to accommodate stock to wild engine modifications
- Four rotary switches for adjusting timing and single/dual fire rpm limit
- Digitally set rpm limit (in 100 rpm steps), selectable single- or dual-fire mode
- Selectable multi-spark mode for quick starting and smooth cruising
- Coil outputs protected against short circuits
- Optional USB interface kit and software available for programming custom curves (programs available on website www.daytona-twintec.com)
- Requires the use of an OEM timing rotor (OEM #32402-83 or PART #2101-0234)
- Use the tachometer wire for the USB interface and comes with a connector

NOTE: Not for fuel-injected models.

TWIN CAM STAND-ALONE IGNITION SYSTEM

- Designed for use in custom applications where a Twin Cam motor and crank sensor are used
- Complete ignition system includes module, coil, wires, Smart Link software, communication cable and instructions (no H-D factory harness required)
- Consolidates ignition components into a small, easy-to-mount package
- Integrated high-output single-fire operation
- Fully programmable spark timing and rev-limit setting
- Real-time diagnostic features aid in troubleshooting and tuning
- Uses factory crank trigger for improved starting and performance
- Rugged billet aluminum housing is weather- and vibration-resistant
- Custom mounting with ¼"-20 bolts, 50,8 mm (2") apart

DAYTONA TWIN TEC

V-TWIN ELECTRONIC IGNITION SYSTEM

- Dual-fire electronic ignition system features fully encapsulated construction
- Includes special trigger rotor for use with traditional mechanical advance mechanism
- Precise digitally set rpm limiter (200 rpm steps from 5200 to 7000 rpm)
- Status LED for easy static timing
- Electronic dwell control for maximum ignition energy at high rpm and reduced current draw at low rpm
- Compatible with most OE and aftermarket dual-fire ignition coils
- Hall effect sensor detects teeth on trigger rotor and provides stable spark timing
- Operates down to below 6V
- Easy installation; two-wire hookup to coil
- Waterproof and highly resistant to vibration and shock
- Over-temperature protection; rated to operate at 125 °C (260 °F)

NOTE: Not for fuel-injected models.

DYNATEK
dyna performance electronics

DUAL-FIRE ELECTRONIC IGNITION SYSTEM

- Perfect ignition timing once and for all
- Self-contained ignition system features Hall Effect magnetic sensors, which are not sensitive to rpm changes or affected by dirt and oil
- Improves overall performance by changing the timing less than three degrees, extends plug life, eliminates the use of points and condensers; can be easily installed
- Used and endorsed by many championship racers

NOTE: An advance weight mechanism is required.

NOTE: Not for Twin Cam.

NOTE: Not recommended for use with OEM coils.

NOTE: Street applications require the use of a 5-ohm coil.

FITMENT	APPLICATION	PART #

SINGLE-FIRE ELECTRONIC IGNITION SYSTEM

- All the features of the famous Dyna "S", plus the special feature of firing the front and rear cylinders independent of each other, allowing a much more accurate timing of each cylinder
- The stock ignition system fires both cylinders at the same time, which works fine for the front cylinder but the rear receives the "wasted" spark when the cylinder has started its intake stroke; this can result in harder starting, increased engine vibration, backfire and raw fuel being spit back into the carb, all creating a power loss
- Dyno and top-speed testing have shown a dramatic improvement in power in all areas; bikes with hotter cams show the greatest improvement
- If you truly want to get the most out of your stock, slightly modified or all-out customized Harley-Davidson, you need a Dyna "S" single-fire ignition system

NOTE: Not recommended for use with OEM coils.

NOTE: An advance weight mechanism is required.

NOTE: This unit must be used with special Dyna coils; see coil chart for correct coils.

NOTE: Tach adapter is required when using an electric tach.

NOTE: Not for use on Twin Cam models.

TWO-STAGE REV LIMITER

- Two independent rev limiters
- One for engine launch, one for engine high side over-rev protection
- Creates a smoother rev limiter than OEM
- Launch limiter is adjustable from 2500 to 6250 rpm
- High side limiter is adjustable from 5500 to 9250 rpm
- Holds launch limit at +/- 50 rpm for precise limiting
- Direct plug-in connection at the ignition coil

SUPER STOCK® IGNITION KIT

- Single-fire operation ignition kit
- Requires a single-fire coil for single spark plug applications
- Overload and short-circuit protected
- Minimum of 3-ohms primary resistance
- VOES switches to a less aggressive curve under load or strong acceleration
- 6300 rpm rev limiter
- Has a 24-hour break-in rev limiter to prevent engine damage
- Datalogging and diagnostic capabilities
- Can be set to kick or electric start mode

PART #	DESCRIPTION
2101-0497	For 84-99 Big Twin

HI-4N IGNITION MODULE

- Single-fire and dual-fire function built into a single module
- All-metal housing provides improved heat dissipation
- Ignition advance and timing degree markings are on the metal flange
- Sensor housings contain advanced flux concentrators with high-temperature-resistant samarium/cobalt magnets for accurate, reliable ignition triggering
- Electronics are fully enclosed to resist vibration, moisture and dirt
- Four rotary switches for ignition mode selection, advance rate, and rev limit

NOTE: Not for fuel-injected models.

HIGH-PERFORMANCE STARTER MOTORS

- 100% new – not remanufactured!
- Special pinion shaft threads and extended jackshaft bolt allow for a wider range of applications
- Starters feature oversize clutch rollers, cold headed steel idler gears and armature hairpins that are resistance-fused to the armature
- All 99-06 starters are supplied with 10/32 threaded output shafts
- 1,4 kW is a new replacement unit for stock and slightly modified engines; generates more power than the OEM stock starter

STARTER MOTORS

- Nippondenso starters are assembled with heavy-duty components and tested with state-of-the-art equipment
- Solenoid plunger, return damper and springs are replaced with stronger components
- Clutch shaft and rollers are replaced with precision-ground and hardened parts for longer service life
- All components are assembled with a special lube for starter roller clutch applications
- CNC machined billet mounting noses are held together with aerospace fasteners
- After assembly, all starters go to a dyno test including hi-low voltage, stall torque, solenoid engagement, amperage draw, load test, maximum rpm and motor impulse wave form
- Starters have a 4,4:1 gear reduction and produce 46% more cranking torque than the stock starter
- Starters available in four kilowatt ratings (1,2, 1,4, 1,6 and 2,0)
- The 1,6kW starter is designed for 96" or bigger motors with limited size batteries such as FXR, FXST and FXD
- The 1,2/1,4/1,5kW starters are designed for OEM applications; use Terry battery cables and a battery with 300+ cranking amps like the Drag Specialties battery for best results
- The 2,0kW starter will start any monster motor (for best results, use with Terry battery cables and a battery with 300+ cold cranking amps like the Drag Specialties battery)

NOTE: 1,6 and 2,0kW starters will require spacer block PART #DS-196233 when used on 99-06 FLT. On Softail, Dyna and FXR, you must relocate oil lines and some wiring.

NOTE: PART #DS-196182 has a raw finish starter nose.

CYCLE ELECTRIC CHARGING KITS

- Kits include stator, rotor, black rectifying voltage regulator and mounting hardware

NOTE: Some kits may contain some imported components.

NOTE: Adding electrical accessories increases amperage usage. When doing so, it is important to consider amperage ratings of switches and wires. If you draw too many amps through a switch or wire, it will heat up and may burn. Fuses and breakers are sized to protect wiring and switches. DO NOT CHANGE 30A MAIN BREAKER TO A 50A BREAKER. THE SWITCHES AND WIRING WILL NOT BE PROTECTED.

Cycle Electric Inc.
Charging Systems for American V-twins MADE IN U.S.A.

CYCLE ELECTRIC RECTIFYING REGULATORS

- Controls voltage on Harley-Davidson and Buell alternators, unlike other rectifiers or regulators that dump to ground and cause maximum stator current and higher temperatures
- Cycle Electric rectifying regulators block current to control voltage; this reduces stator current, resulting in low temperature and less drag on the motor, which means more efficient operation
- Low-voltage style features reduced charging voltage to prevent overcharging the battery

BS BATTERY

HIGH PERFORMANCE LITHIUM BATTERIES

- Innovative lithium-ion motorcycle and powersport batteries
- Designed for the most demanding riders looking for higher performance, safer performance, faster acceleration, reduced weight and a much longer battery life
- Very low self-discharge provide the possibility to start an engine after a very long period of storage; even in very cold temperature conditions
- Robust brass terminals for enhanced electrical performance
- Super fast charging capabilities
- Multi-position mounting (up to 180°)
- Very safe and environmental friendly
- Up to 70% lighter than lead acid batteries
- Waterproof design
- Heat temperature resistance up to 230 °C
- Ready to use; no need for preparation, just plug and play

CUSTOM BATTERY CABLE KITS

- Build custom-length cables for an exact fit
- Each kit contains the following: 7,6 m (25') cable (1), 1/4" terminals (20), 3/8" terminals (8), 5/16" terminals (12), black heat shrink (40) and red heat shrink (12)
- Using 30,5 cm (12") cables as an example, this 7,6 m (25') custom cable kit will make 27 cables (a 30,5 cm (12") cable uses 28 cm (11") of cable and two terminal ends), for a substantial savings over precut lengths

BATTERY CABLE WITH AUXILIARY WIRE

- The perfect choice when doing custom wiring work
- Positive battery cable with auxiliary wire eliminates stacking cables on the battery
- Perfect for wiring directly to the terminal block, regulator or any accessory
- Positive cable is 18K gold-plated and tinned copper 1666 strand Mega Cable
- Auxiliary wire is 12-gauge tinned copper 259 strand Mega Cable
- Negative battery cable is the perfect solution for the ground wire on custom bikes
- Eliminates poor electrical ground
- Install the 4-gauge wire to the transmission and the 12-gauge wire to any accessory for the ground
- Auxiliary wire measures 30,5 cm L (12") on both positive and negative battery cable wires

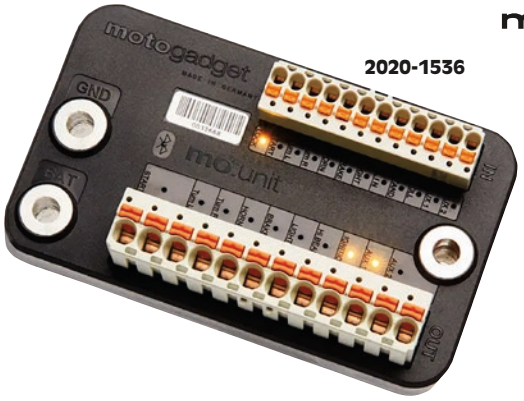
KILL SWITCH HOW TO ORDER

NOTICE TO CUSTOMERS: There are two types of stop switches: (1) Normally Open (NO) or (2) Normally Closed (NC).



Switches in this catalog are typically of the Normally Open (NO) type. They work by GROUNDING the primary ignition lead when activated.

Note that they will not work on electrical systems requiring a Normally Closed (NC) switch, which works by OPENING the circuit when activated. NC switches are typically used on battery type ignitions, which may have an ignition key as an identifier. NC switches are generally found on newer machines. If in doubt, check your machine's wiring schematic.

mo.RELAY

- Small, compact relay
- Designed to control almost any kind of device including high-beam light, driving light, horn, ignition, etc.
- Moves high loads and currents directly to the switched devices
- Enhances the electrical reliability of your bike
- Reduces voltage drops in power supply
- Load and current at the handlebar switch gear and ignition lock is reduced to a minimum, allowing small diameter wiring at the switch gear for easier wiring
- CNC-machined and black anodized
- Molded internally, waterproof and vibration-resistant
- Two red cables allow the connection of devices for 12V power supply and up to 20A load current
- Two black cables allow the connection of the switch gear
- Not intended as a control unit for push buttons
- Easy to install

ELECTRONIC HARNESS CONTROLLER

- Compact design makes it easy to hide on a custom motorcycle
- Performs all fuse, relay and signal-canceling functions in one simple package
- Allows a dual-filament bulb to be used in three ways: tail, brake and turn signal (excluding the need for a center brake light); includes ribbon cable for integrating generic indicator lights
- Weather-resistant connections for trouble-free use in extreme environments
- Trim-to-fit harnesses allow installation on most custom bikes

PART #	DESCRIPTION
2120-0675	"D" model electronic controller w/ ribbon cable for indicator lights

2120-0023

MICRO HARNESS CONTROLLER

- Billet 6061-T6 aluminum housing and 213 cm (7') trim-to-fit wiring design is compact and easily hidden on custom motorcycles
- Performs all fuse, relay (includes starter relay) and signal-canceling functions in one simple package
- Provides multiple flasher combinations (signal canceling, hazard lights, running lights and turn signal) from one dual-filament bulb
- Utilizes relays to distribute all power functions, thus eliminating the need to run large wires to all the switches
- Can be used with micro switches
- Optional push-button momentary switch converter available separately (PART #2120-0085)
- Weather-resistant connections for trouble-free use in extreme environments
- Designed for U.S. and European applications
- Weighs 1,04 kgs (2,3 lbs)

- For use on models with self-canceling turn signals

PART #	DESCRIPTION
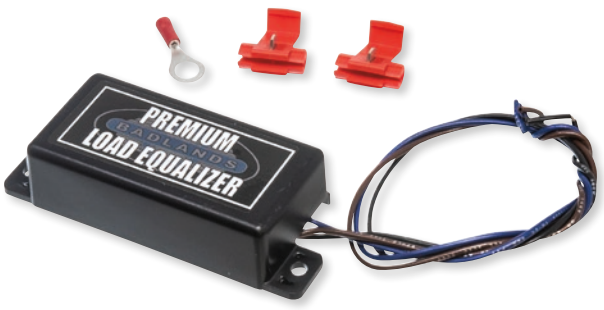
2050-0242[1]	For 24-25 FLHTK/FLTRK/FLHRXS, 14-23 FLHT/FLHR/FLTR/FLHX (except 23 FLHXSE/FLTRXSE)
2050-0049	For 99-13 FLHT/FLHR, 99-09 FLTR, 06-09 FLHX (except all CVO models), 00-10 FXST/FLST, 99-11 Dyna and 99-03 XL
2050-0080	For 10-13 FLHX/FLTRX (6-pin)
2050-0172	For 09-13 FLHXSE/FLTRXSE (8-pin)

PART #	DESCRIPTION
2050-0239[1]	For 11-17 FXST/FLST, 12-17 FXDF/FXDB/P, FXDWG/FLD/FXDC/L, FLSTC/FLSTF/B, FLSTN/FXST
2050-0240	Fits 11-17 FXS, 12-17 FLS
2050-0241[1]	For 11-17 FXST/FLST, 12-27 FXDF/FXDB/P, FXDWG/FLD/FXDC/L, FLSTC/FLSTF.B, FLSTN/FXST
2050-0050	For 04-13 XL

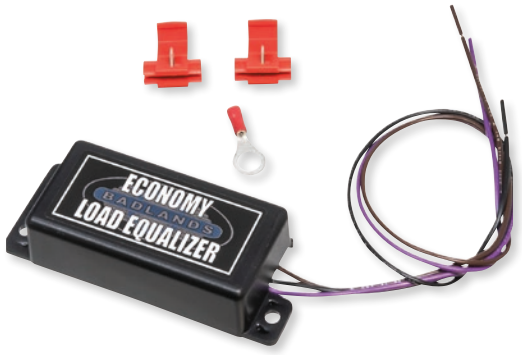


[1] For use with non CAN bus compliant LEDs (rear turn signals ONLY).

TURN SIGNAL LOAD EQUALIZER™ III

- Designed specifically to work with OEM alarm systems (TSSM) or turn signal module (TSM)
- Eliminates erratic blinking of turn signals
- Compatible with most custom turn signals (including halogen and LED signals)
- Solid-state waterproof module
- Produces absolutely no heat so it is OK for parade use

PART #	DESCRIPTION
0904-0003	For 99-13 FLHT/FLHR/FLTR/FLHX, 00-10 Softail, 99-11 Dyna, 91-13 XL and 01-17 V-Rod

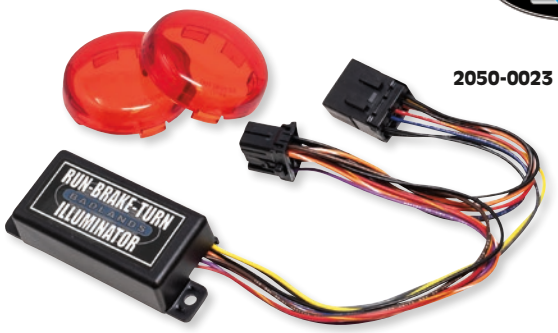


TURN SIGNAL LOAD EQUALIZER™ II

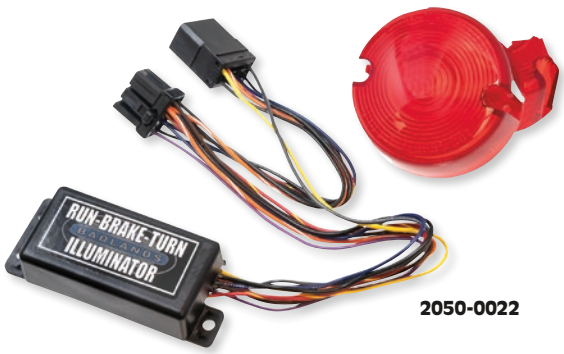
- Improved design with all the features of the original Load Equalizer, plus retains emergency flasher capability
- Returns amperage draw to the correct factory specification when aftermarket marker lights are used to replace stock turn signals

NOTE: Not intended for use in parades or with the turn signals running for an extended time.

PART #	DESCRIPTION
BLLE02	For 99 H-D models w/ a self-canceling turn signal system



TURN SIGNAL LOAD EQUALIZER™

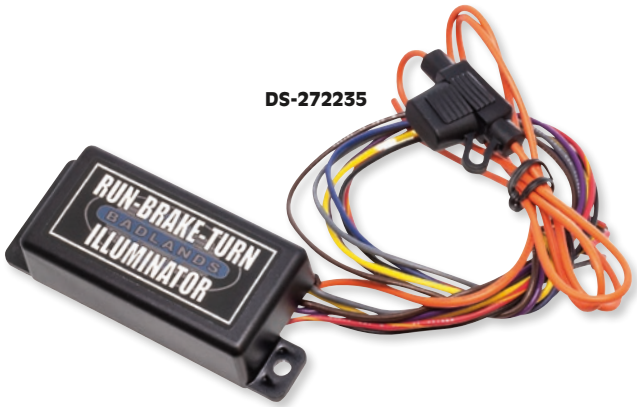


- Badlands Electronic Unit returns amperage draw to correct factory specifications when aftermarket marker lights are used to replace stock turn signals on bikes with self-canceling systems
- The self-canceling "Brain Box" must have the correct draw in order to function properly

PART #	DESCRIPTION
DS-272236	For 99 H-D models

All part numbers in BLUE are new for 2026.

2050-0023



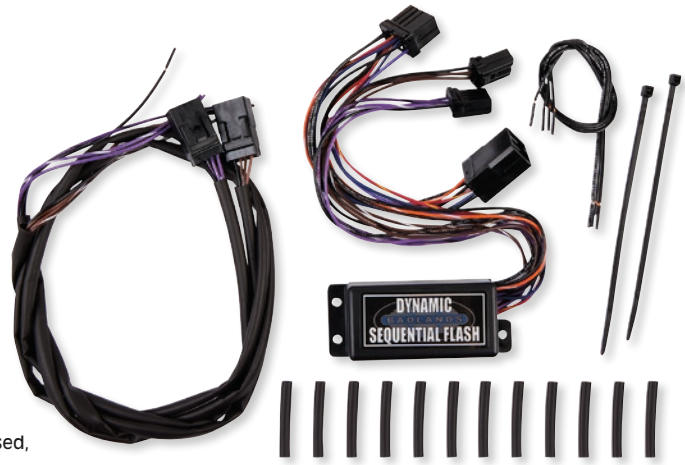
2050-0022

PLUG-IN ILLUMINATORS WITH RED LENSES

- Our Illuminators run-brake-turn signal module packaged together with red signal lenses
- Lenses fit the rear OEM turn signal assemblies
- Give you three running/brake lights and maintain turn signal functions
- Greatly increase the visibility of the motorcycle when seen from the rear
- Illuminators plug into OEM wiring harness for a quick installation that does not require cutting and splicing wires

PART #	DESCRIPTION
2050-0023	For 04-13 FLHR, 04-09 FLTR, 06-09 FLHX, 04-05 FLHTCUSE, 04-07 FLHRXS, 11-13 FLTRU, 08 FLHRSE, 00-10 FXST/FLST, 00-11 Dyna and 02-03 XL w/ Deuce-style turn signal lenses
2050-0022	For 00-01 FXST/FLST and Dyna w/ raised-style turn signal lenses

DS-272235



ILLUMINATOR PLUG-IN STYLE RUN, BRAKE AND TURN SIGNAL MODULES

- Compatible with TSM/TSSM modules and security systems
- Turns stock or custom rear turn signals into running lights and brake lights; still maintains turn signal function
- Increases visibility of the motorcycle from the rear
- Built-in load equalizer works with stock signals and can run the smallest custom signals, even LEDs
- Comes with easy-to-follow instructions and features plug-in connectors for hassle-free installation on select models
- Works with incandescent, halogen and 12V LED signals and markers
- PART # 2050-0174 has return run, brake and turn signal light function after the stock fender has been removed

PART #	DESCRIPTION
2050-0247	For 14-24 FLHR/FLHTP
DS-272235	For 99-13 FLHT/FLHR, 99-09 FLTR, 06-09 FLHX, 00-10 FXST/FLST, 00-11 Dyna, 86-13 XL and 01-17 V-Rod (hardwire design)
7808-1028	For 99-13 FLHT/FLHR, 99-09 FLTR, 06-09 FLHX, 00-10 FXST/FLST, 00-11 Dyna and 99-03 XL (8-pin connector)
2050-0174	Adapter for use with10-13 FLHX, FLTRX w/ custom rear fender and lighting w/ 6-pin connector
2050-0379	For 18-24 FLHC/S, FLDE, FXLR

PART #	DESCRIPTION
2050-0235[1]	For 14-23 FLHT/FLHR/FLTR/FLHX (except 23 FLHXSE/FLTRXSE), 11-24 Softail, 12-17 Dyna and 14-22 XL
2050-0236	For 11-17 FXST/FLST, 12-17 FXDB/FXDC/FXDF/FXDWG/FLD
2050-0048	For 08-11 FXCW/C (12-pin connector) (use when replacing OEM turn signals)
2050-0237	For 14-17 XL (w/ single center taillight)

[1] For models with center taillight, must be hardwired.

DYNAMIC SEQUENTIAL SIGNAL MODULE

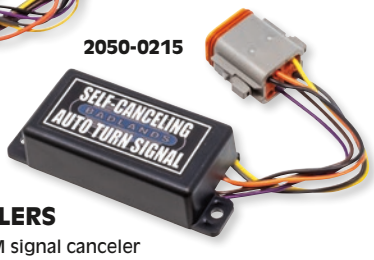
- Allows for the three separate LED turn signals installed on the rear of the bike and flash sequentially
- LEDs will also perform brake and running light functions
- Includes color-coded replacement rear fender harness and installation instructions
- Built-in load-equalizer prevents rapid flashing
- Dynamic sequential flashing: When the turn signal button is pressed, the first LED will light up then power off, followed by the second on/off and third on/off before the sequence starts again

PART #	DESCRIPTION
2050-0308	For 99-13 FLHT/FLHR, 99-09 FLTR, 06-09 FLHX, 00-10 FXST/FLST, 00-11 Dyna and 99-03 XL

All part numbers in BLUE are new for 2026.

2050-0548

2050-0446

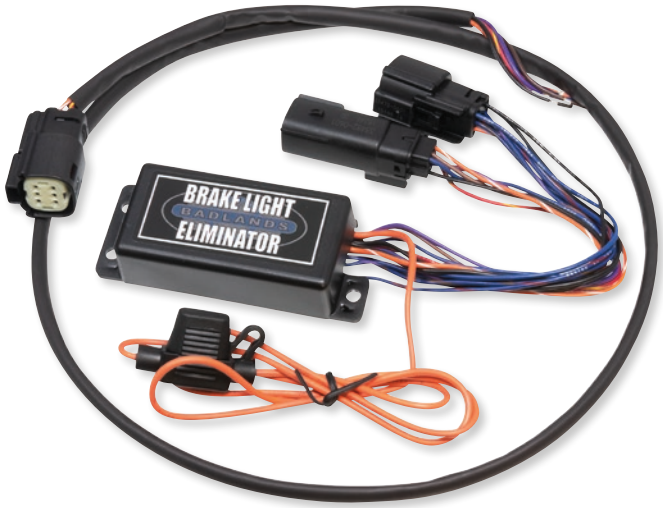


SELF-CANCELING TURN SIGNAL MODULE

- Plug-n-play installation
- Allows the turn signal to flash for 11 seconds before automatically canceling
- Works with momentary switches

PART #	DESCRIPTION
2050-0548	For 01-13 FLHT/FLHR/FLTR/FLHX, 01-10 Softail, 01-11 Dyna, and 04-13 XL when used w/ OEM TSM or TSSM
2050-0446	For 01-13 FLHT/FLHR/FLHX/FLTR, 01-10 FXST/FLST, 01-11 Dyna and 04-13 XL (with aftermarket ignition module or ECM ONLY)

0904-0002



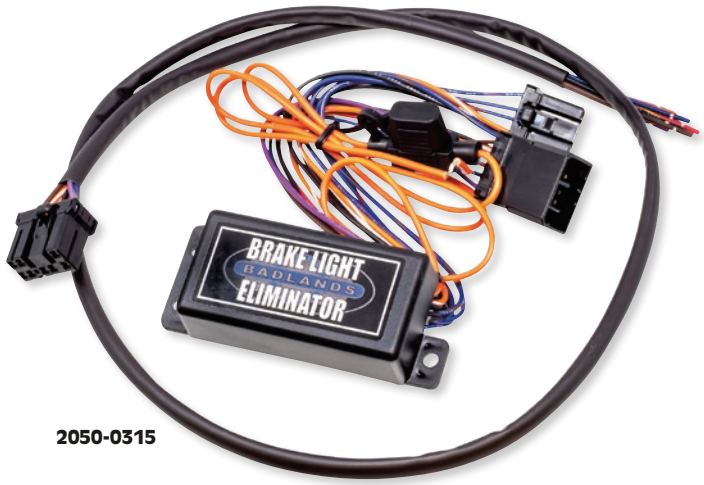
2050-0215

PLUG-IN AUTOMATIC TURN SIGNAL CANCELERS

- Plug in and replace the OEM signal canceler
- Do not require stock speedometer for proper operation
- Automatically flashes for 11 seconds; can be manually canceled at any time
- Built-in emergency flasher mode
- Built-in load equalizer runs LEDs of up to 100W per side
- Measure 73 mm L x 35 mm W x 22 mm D ($2\frac{7}{8}$" x $1\frac{3}{8}$" x $\frac{7}{8}$")

NOTE: Be sure to identify which connector is on the bike before purchasing, as the factory was not consistent during 1994-2000.

PART #	DESCRIPTION
0904-0002	Automatic turn signal canceling module, custom fitment
2050-0215	For 94-96 XL w/ installed 8-position FEMALE connector
7808-1030	For 99-00 FLHT/FLHR, 00 FXST/FLST, 99-00 Dyna and 97-03 XL w/ installed 8-pin MALE connector



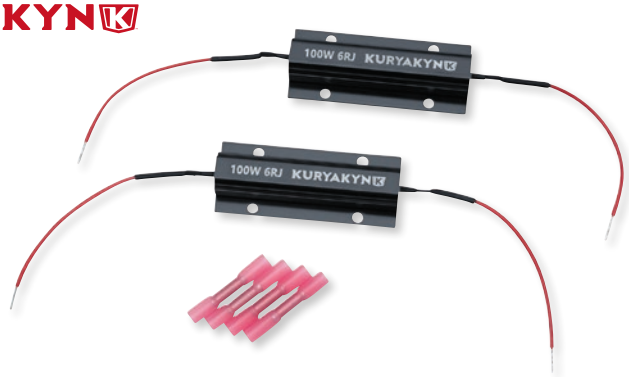
PLUG-N-PLAY BRAKE LIGHT ELIMINATOR

- Removes the brake light feature from the rear turn signals
- Keeps the turn signals and brake light functions separate
- Module comes with a new rear fender harness to allow customers flexibility when wiring in new signals and taillights

NOTE: Requires the separate purchase of single-function amber lights to be used as turn signals.

PART #	DESCRIPTION
2050-0188	For 14-23 FLHX/FLHTCU/FLTRX (except 23 FLHXSE/FLTRXSE)

2050-0315

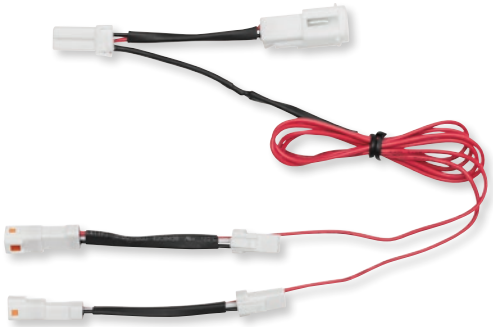


BRAKE LIGHT ELIMINATORS

- Separates running and brake light functionality from flashing turn signal function
- Allows the use of amber turn signals functioning separately from brake light
- Enables use of brake and running lights, left- and right-only turn signals and license plate illumination
- Includes new rear fender harness to replace stock

PART #	DESCRIPTION
2050-0318	For 18-23 FXBR/FXBRS
2050-0315	For 12-17 FXD/FXDWG w/ OEM red rear run/brake/turn signals
2050-0316	For 11-17 FXS/B, 12-17 FLS/S
2050-0317	For 14-22 XL (except RH Sportster) w/ OEM red rear run/brake/turn signals

All part numbers in BLUE are new for 2026.



KURYAKYN

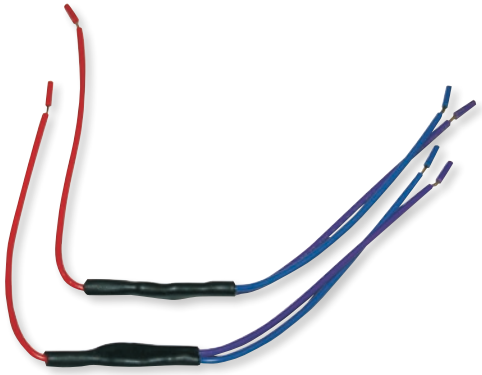
ALUMINUM LOAD EQUALIZERS

- Perfect for any custom application when replacing OEM incandescent turn signals with low-draw LED turn signals
- 100W – 6-ohm rating
- Black anodized aluminum housings for durability and heat dissipation
- Includes heat shrink butt connectors
- In most instances, this kit will allow all four turn signals to be replaced with LED lights
- Sold in pairs

PART #	DESCRIPTION
2050-0433	For universal 12V applications

TRACER LIGHTING POWER ADAPTOR

- Designed to ensure Tracer lights receive the correct amount of power and optimization for H-D models
- Easy plug-and-play installation

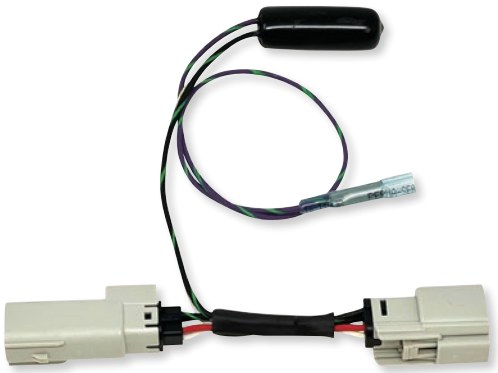


PART #	DESCRIPTION
2050-0483	For 14-25 FLHT/FLHR/FLHX/FLTR/FLHTCUTG and FLRT

TOTAL CONTROL PASSING LAMP HARNESS

- Allows passing lamps to remain lit when the high beam is in use
- Required when using Kuryakyn Phase 6 or Phase 7 LED headlamp/passing lamps
- Plug-and-play installation
- Sold each

PART #	DESCRIPTION
2050-0185	For 99-13 FLHT/FLHX, 09-13 FLHTCUTG/FLHXXX (all models w/ passing lamps)



NAMZ Custom Cycle Products

INTENSIFIER HIGH-LOW MODULE III

- Converts single-function LED bulbs into high-low dual-function bulbs; run-stop, run-turn or high-low
- Includes hard-wired pair of two-function intensifiers with a universal LED fitment (500-milliamp maximum)
- Works with LED turn signals, marker lights or driving lights
- Will not work with incandescent or halogen bulbs

PART #	DESCRIPTION
2050-0189	For custom/universal applications

NAMZ Custom Cycle Products

FUEL LIGHT RESISTOR PAK

- For use with Dakota Digital speedometer gauges (see chart)
- Keeps the fuel light working correctly
- Plug-in installation

PART #	DESCRIPTION
2050-0502	For use w/ Dakota Digital gauge PART #s 2210-0514, 2210-0515

CULT-WERK

MINI RESISTOR FOR HARLEY-DAVIDSON LED INDICATORS

- Required for all H-D models with turn signal relays that are retrofitted with LED turn signals
- Required for new H-D models with a control unit in order to adjust the frequency of the display on the speedometer

PART #	DESCRIPTION
2050-0467	Mini resistor

VARI LOAD DIGITAL LOADEQUALIZER

- The Vari Load is a programmable Load-Equalizer that affords you to use LED flasher in any bike
- The Vari Load's power is adjusted using the thin blue cable
- Simply hold the blue cable against +12V and the load will slowly increase in 50 steps up to approximately 10W
- If you hold the blue cable against ground, the load will decrease until it reaches 0W
- As soon as you disconnect the cable from ground or +12V, the set load value is saved and recalled the next time you turn it on
- A complete cycle through all available power values takes approximately 20 seconds
- The built-in LED flashes up to 50 times when the power value changes, indirectly indicating the set value through its number of flashes
- As soon as one of the two limits (0W or approximately 10W) is reached, it lights up continuously
- Dimensions: 56 mm x 37 mm x 17 mm
- Body material: ABS
- Input voltage range: 7 to 18V
- Connections: Inputs 0,14 mm², Outputs 0,75 qmm
- Output power range: Between 2 x 1W and 2 x 15W
- Maximum ambience temperature: 80 °C

PART #	DESCRIPTION
2120-1438	Vari Load digital loadequalizer

REAR LIGHT CONVERSION MODULE

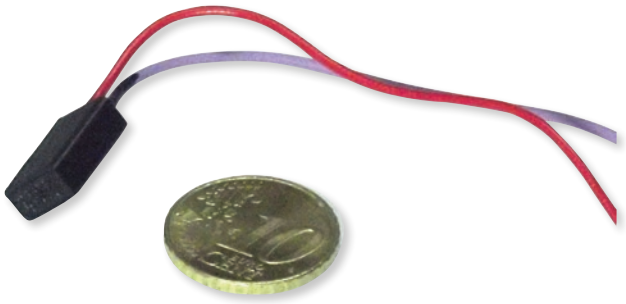
- A simple solution for rewiring imported bikes to match local standards
- Convert brake light/indicator signals from US requirements to European requirements
- Cheaper and easier than rewiring manually

NOTE: Module does not differentiate between brake light and emergency flashers; external emergency switch is required for emergency flasher function.

PART #	DESCRIPTION
2120-0962	US to EU conversion module

BRAKE 2 FLASHER MODULE

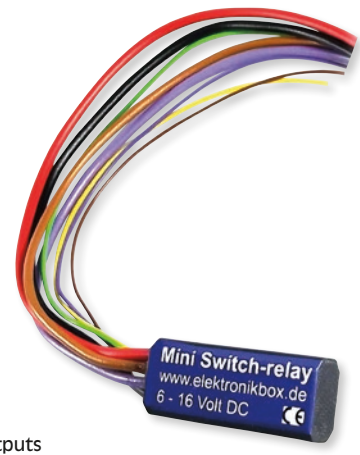
- Add flasher functionality to brake lights
- Makes bike more visible on the road for a safer ride
- 14 different programmable modes



PART #	DESCRIPTION
2120-0964	Brake 2 flasher module

MULTI FLASHER RELAY

- Small flasher for push-button lighting that will fit any handlebars
- Comfort flasher function switches off indicators if no buttons are pushed for a short while
- Measures 38 mm x 16 mm x 11 mm



PART #	DESCRIPTION
2120-0965	Multi flasher relay

NANOFLASH FLASHER RELAY

- Small enough to fit anywhere on a bike
- Measures only 15 mm x 9 mm x 5 mm
- Durable ABS housing

PART #	DESCRIPTION
2120-0967	Nanoflash flasher relay

MINI SWITCH RELAY

- Features two 60W power outputs
- Change between outputs with the push of a button
- Measures 38 mm x 16 mm x 11 mm

PART #	DESCRIPTION
2120-0966	Mini switch relay

All part numbers in BLUE are new for 2026.

motogadget

mo.STOP BRAKE LIGHT MODULATOR

- Adjustable digital brake light controller
- Increases road safety
- Allows brake light to pulsate, creating faster reaction time for traffic behind you
- Can also be used as a normal flasher relay or a flasher relay with automatic switch-off
- Route through the handlebars, frame tubing or in the cable harness
- Six different light/blink variants adjustable for brake light: normal mode (no flashing, direct transmission); rise and fall at 3 Hz; flashing at 5 Hz; flashing eight times at 5 Hz, then continuous illumination; flashing two times at 5 Hz, then one second continuous illumination and again repeat; three second transmission, then flashing at 5 Hz
- Works with almost all LED brake lights and all conventional brake light lamps
- Easy to install
- Watertight, vibration-resistant and does not generate heat during operation
- Features an automatic overload protection

PART #	DESCRIPTION
2020-0465	mo.stop digital brake light modulator

motogadget

mo.RELAY+ PUSH-BUTTON FLASHER RELAY

- Combines a load-independent digital flasher relay with electronic push-button controls
- Four different operating modes: lane change, turn, continuous flashing and hazard
- No additional push-button control unit or load resistor necessary
- Constant and correct flashing rate: suitable for almost all LED blinkers and all micro-blinkers
- Works with four signal lights or two handlebar end blinkers
- Features an automatic overload protection; does not generate heat during operation
- Takes 5V to 18V to operate
- Watertight and vibration-resistant; will not ever short circuit

PART #	DESCRIPTION
2020-0631	mo.relay+ push-button flasher relay

DENALI ELECTRONICS

CANSMART™ CONTROLLER GEN II FOR V-TWIN

- Advanced accessory management system for the H-D CANbus electrical system
- Allows for plug-and-play installation and provides integrated control of up to four accessories, enabling customizable settings that can be managed directly from the motorcycle's hand controls
- Control of auxiliary lights, horns, and brake lights with various customizable settings
- High/Low sync for auxiliary lights

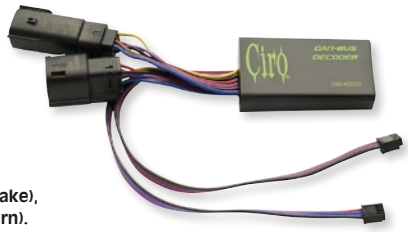
PART #	DESCRIPTION
2050-0557	For 14-23 H-D models

DENALI ELECTRONICS

EURO 5 CANSMART PASS-THROUGH

- Use the EURO 5 CANbus pass-through if you want to add an additional accessory when you already have a CANsmart™ controller installed
- This adapter provides the additional connector that is needed to install a fuel management system or an additional CANsmart

PART #	DESCRIPTION
2040-3327	EURO 5 CANbus pass-through for H-D



All part numbers in BLUE are new for 2026.

CAN BUS CONTROLLER

- Works with any Ciro® lighting product
- Plug-and-play installation
- Will not trip engine trouble codes

NOTE: Output wire function is: black (ground), red (brake), blue (run), brown (right turn) and violet (left turn).

PART #	DESCRIPTION
2050-0517	For 14-24 Touring (except 23-24 FLHXSE/FLTRXSE, 24 FLHX/FLTRX/FLTRXSTSE)

LIGHTING Y-SPLITTERS

- Allow easy plug-in installation of multiple lighting accessories
- Sold in pairs

2120-0985

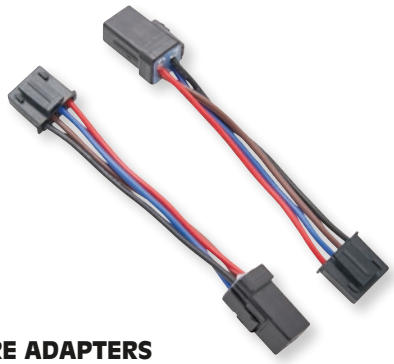
FRONT END LIGHTING 4-WAY SPLITTER

- Eliminate the need for multiple wiring harnesses
- Allows a single wiring adapter to be used for up to four different pairs of Ciro® front end plug-and-play lights
- Wiring adapter not included
- Works with all 14-24 H-D Touring models

PART #	DESCRIPTION
2120-1362	For all 14-24 Touring

PLUG-AND-PLAY STANDARD HARNESS

- Required to install Ciro® lighting parts on H-D touring models
- Accommodates one light or one set of lights but can be easily expanded with y-splitters (sold separately)
- Utilizes factory-style waterproof locking connectors for easy install with no modifications



PART #	DESCRIPTION
2120-1418	For 23-25 FLHXSE/FLTRXSE, 24-25 FLHX/FLHXU/FLTRX/FLTRXSTSE

FRONT-END LIGHTING Y-CONNECTORS

- Used to install multiple Ciro® front-end lights with amber turn signals
- Simplifies internal wiring for a clean look
- Plug-and-play
- Sold in pairs

PART #	DESCRIPTION
2120-1154	For 14-23 Touring w/ Ciro® front-end amber turn signal lighting (except 23 FLHXSE/FLTRXSE)

4-PIN TO 6-PIN WIRE ADAPTERS

- Add 4-pin rear end Ciro® lighting to Tour-Pak
- Plug-and-play installation
- Sold in pairs

PART #	DESCRIPTION
2120-1497	For 23-25 FLHXSE/FLTRXSE, 24-25 FLHX/FLTRX/FLTRXSTSE, 25 FLHXU

WIRING EXTENSIONS

- For Ciro® rear end lighting accessories with 3- or 4-wire systems
- Sold in pairs

R1 LOAD-INDEPENDENT FLASHER RELAY

- Simple installation infeed to the turn indicator switch
- Connection to flasher dashboard light also possible
- Restricts the accompanying flashing of non-activated turn indicators
- Flashes independently of load at a steady 75 pulses per minute
- Dimensions: 21 mm L x 11 mm W x 6 mm H (0,82" x 0,43" x 0,23")
- Suitable for turn indicator switches and motorcycles with 6V and 12V electrical systems
- Sold each

PART #	DESCRIPTION
2020-0625	R1 flasher relay

ECE Type Approved

LOAD-INDEPENDENT INDICATOR RELAY

- Ideal for use with LED or halogen indicators
- In addition to regulating the indicating frequency, this relay offers the advantage of cancelling the function of the unused indicator
- Optimally suited for motorcycles with one or two indicator lights and as a replacement for two- or three-poled original relays
- Includes all necessary mounting hardware

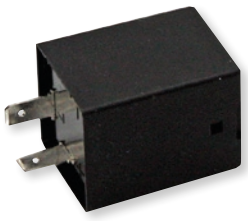
UNIVERSAL MINI LED FLASHER RELAY



- Ultra-compact design for LED turn signal applications
- Easy installation; no need to install in-line resistors
- Two-wire relay can be used to replace the OE flasher or for custom builds
- Designed to eliminate the "fast flashing" mode encountered when installing LED turn signals on motorcycles
- Maximum operating voltage: 16V; minimum operating voltage: 8V
- Maximum operating amperage: 2A; minimum operating amperage: 0,065A
- 4" wire available in black
- Sold each

38 MM (1,5") TREE HUGGER HANDLEBARS

- The lowest profile handlebars on the market
- Innovative adjustable riser design allows you to adjust the handlebars forward or backward
- 13 mm (0,5)" risers let you hug the top of the triple tree (89 mm (3,5") on-center)
- Can be used with cable and early-style TBW (Throttle-By-Wire) applications
- Designed to flow with a Wide Glide triple tree on a Softail or Dyna, and fit under the nacelle on 99 and later Road Kings
- Slotted for internal wiring

NOTE: Accept H-D OEM heated grips.

NOTE: Not for use with handlebar mounted gauges.

EZ INSTALL HANDLEBARS

38 MM (1 1/2") EZ INSTALL ROUND TOP HANDLEBARS

- Revolutionary interlocking bolt-together two-piece handlebar design that takes up half the shelf space, is economical to ship and even faster to install
- CNC mandrel-bent from 38 mm (1 1/2") diameter x 2,5 mm (0,095") wall heavy tube
- 14-23 applications feature adjustable 38 mm (1 1/2") diameter collars next to the handlebar controls for a custom finished look
- EZ Install - no more need to fight internal wiring; with our handlebars you can install wiring in minutes
- Bars are knurled and notched for early-style TBW applications

NOTE: Accept OEM heated grips.

32 MM (1 1/4") BUFFALO BARS

- The ultimate 32 mm (1 1/4") diameter handlebar, designed for maximum comfort
- 25,4 mm (1") diameter in clamping area (except T-Bars)
- Slotted and notched for early-style Throttle-By-Wire applications unless noted
- Standard bars have 89 mm (3 1/2") on-center knurling to prevent movement (except T-Bars)
- Springer-style bars have 12 cm (4 3/4") center diamond knurling for a smooth finished look; work with the OEM Springer risers and handlebar clamps
- Optional 32 mm (1 1/4") thick Buffalo risers are also available to complete the look
- Optional handlebar clamps cover all of the center area that is sized down to 25,4 mm (1")
- Optional gauge mounts for T-Bars sold separately; see DASHES & GAUGES section
- See pages 1089-1103 for handlebar clamps and risers

NOTE: Not for use with stock risers and handlebar/gauge mount on XL883C/1200C.

NOTE: Compatible with hydraulic clutch controls.

NOTE: Accepts OEM heated grips unless noted.

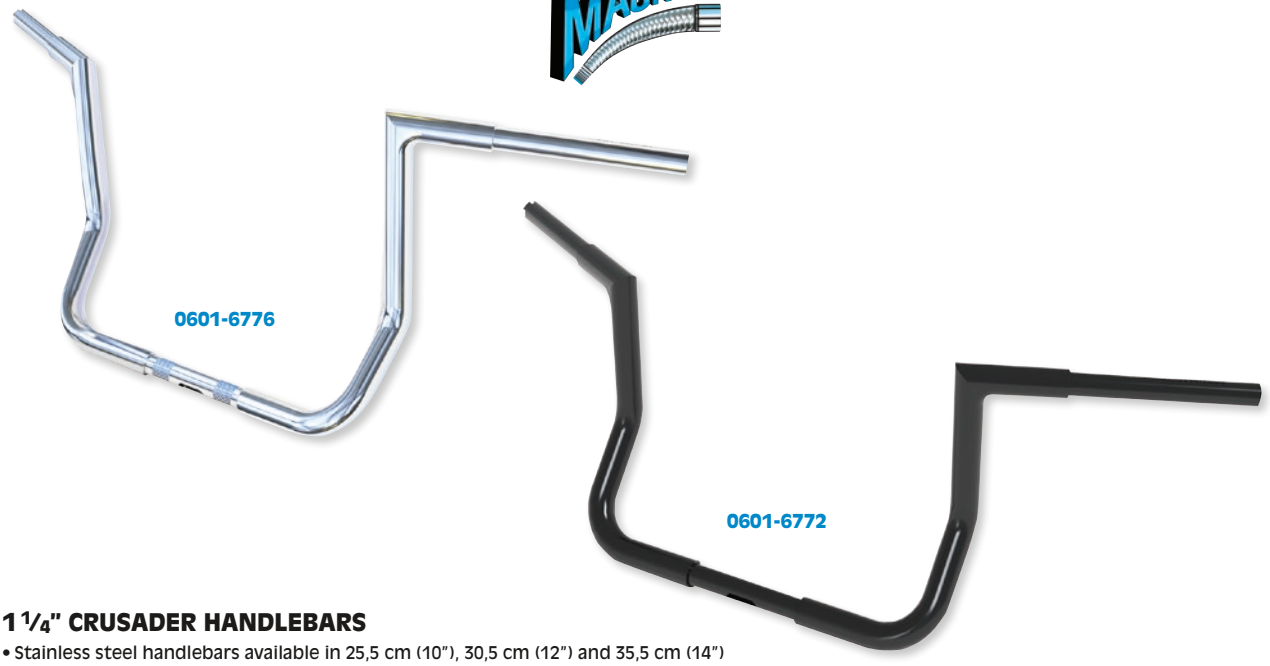
MAGNUM VIKING HANDLEBARS

32 MM (1 1/4") VIKING HANDLEBARS

- Magnum's patented Viking handlebar internal design guarantees easy installations of complete wiring harnesses
- Without taking away from the clean look of the peak, the novel design creates enough room to allow the complete wiring harness with factory vinyl covering and the terminal connections along with their respective shrink sleeve to easily pass through without chaffing
- Using a unique flaring process, the burr-free internal radius creates a generous pocket of additional clearance within the troublesome peak of the handlebar
- To make wiring installations even easier, Magnum preloads the bars with E-Z pull-thru plastic woven sleeving
- Insert the wiring harness into the sleeving and pull through, it's that simple
- Manufactured with the highest quality construction, including smooth, round CNC mandrel bends, machined control mounts (not swaged), plus burr-free internal wiring holes and electronic throttle control slots
- High luster chrome or gloss black finishes for an unsurpassed appearance
- All Bagger style and Ape Hanger handlebars are 32 mm (1 1/4") diameter, have 25,4 mm (1") diameter center sections, 89 mm (3 1/2") on center knurling and work with standard controls, including hydraulic clutch and OE heated grips
- All Warrior handlebars have a 32 mm (1 1/4") center section, work with OE risers/clamps, are knurled and have the wiring hole in the factory location
- Bagger style bars are designed for the correct clearance on Batwing models
- Warrior bars work with OE risers and clamps, are knurled, have the factory wiring hole location, do not require removal of the riser pin and incorporate over 30° of adjustability for comfort
- Available in 25,5 cm (10"), 30,5 cm (12"), 35,5 cm (14") and 40,5 cm (16") high Ape Hanger, Bagger or Warrior styles for H-D models with the Throttle-By-Wire sensor located in the control housing, Throttle-By-Wire sensor in the grip or traditional throttle/idle cables

U.S. Patent # 10,882,578.



NOTE: Not for use with stock risers and handlebar clamp/gauge mount clamp on XL883C/1200C models.

NOTE: Except for Warrior handlebars with a 32 mm (1 1/4") center section, all other Viking Handlebars have a 25,4 mm (1") diameter center section and fit 25,4 mm (1") risers. Models originally equipped with handlebars that have a center section diameter larger than 25,4 mm (1") will require changing the risers to a 25,4 mm (1") ID version.

PULLBACK KLIP HANGER HANDLEBARS

- Innovative bars present the ultimate in rider personal adjustment and fit
- Offer more pullback than the standard Klip Hanger bars for a more relaxed ride
- Unique "Klamps" allow control/grip portions of the handlebar to be adjusted in several directions; rider can tailor to his/her exact liking
- Bar sections are manufactured from DOM tubing, 'Klamps' are machined from 6061 billet aluminum, and all hardware is stainless steel
- Feature a fully knurled riser clamp area for standard 13,5 cm (5 1/4") width 25,4 mm (1") risers
- Drilled/slotted for wiring and bar end is notched for Throttle-By-Wire applications
- Include chromed and billet aluminum, domed bar end plugs for a finished look

NOTE: Will fit most 99-07 models if used with 08 and later FLHT-style master cylinder.

NOTE: Works with HD OEM heated grips.

38 MM (1 1/2") EZ INSTALL HANDLEBAR KITS

- New adjustable 38 mm (1 1/2") collar next to the handlebar controls for a custom-finished look
- Revolutionary interlocking bolt-together two-piece handlebar design that takes up half the shelf space, is economical to ship and even faster to install
- CNC mandrel-bent from 38 mm (1 1/2") diameter x 2,5 mm (0,095") wall heavy tube
- EZ Install - no more need to fight internal wiring; with our handlebars you can install wiring in minutes
- Available with pointed top, round top or flat top handlebars
- Pointed top bars feature billet machined top with a large internal machined radius that allows for EZ pulling of wiring (non-welded top corner)
- Install kit includes everything to install the handlebars in half the time of other kits due to our design that only extends the existing clutch cable/clutch line and brake lines; no need to waste time and money replacing the existing cables and lines
- Black bars come with wire extensions and smooth black braided lines/vinyl cable extensions as required; chrome bars come with wire extensions and braided stainless lines/cable extensions as required **(unless noted)**
- Designed to work with ABS and non-ABS models
- All bars are knurled and designed for TBW applications

Adjustable collar

NOTE: All 2021-2023 kits will include black brake lines and black clutch cable extensions.

NOTE: Kits only include the necessary components needed to install handlebars based on the model, and the height of the handlebar. Certain models and heights of handlebar kits will include brake line extension, clutch line/cable extension and wiring harness. Some of the shorter handlebar kits will only have a wiring harness or only a clutch line/cable extension.

NOTE: Some 25,5 cm (10") and 30,5 cm (12") kits are not available for certain models, as these models only require a handlebar change and reuse the existing brake and clutch lines.

NOTE: Accept OEM heated grips.

32 MM (1 1/4") EZ INSTALL POINTED TOP HANDLEBAR KITS

- Revolutionary interlocking bolt-together two-piece handlebar design that takes up half the shelf space, is economical to ship and even faster to install
- CNC mandrel-bent from 32 mm (1 1/4") diameter x 3 mm (0,120") wall heavy tube
- EZ Install - no more need to fight internal wiring; with our handlebars you can install wiring in minutes
- Pointed top bars feature billet machined top with a large internal machined radius that allows for EZ pulling of wiring (non-welded top corner)
- Install kits include everything to install the handlebars in half the time of other kits due to our design that only extends the existing clutch cable/clutch line and brake lines; no need to waste time and money replacing the existing cables and lines
- Black bars come with wire extensions and smooth black braided lines/vinyl cable extensions; chrome bars come with wire extensions and braided stainless lines/cable extensions as required
- Kits are designed to work with ABS and non-ABS models
- All bars are knurled and designed to work with TBW applications

NOTE: Kits only include the necessary components needed to install handlebars based on the model, and the height of the handlebar. Certain models and heights of handlebar kits will include brake line extension, clutch line/cable extension and wiring harness. Some of the shorter handlebar kits will only have a wiring harness or only a clutch line/cable extension.

NOTE: Some 25,5 cm (10") and 30,5 cm (12") kits are not available for certain models as these models only require a handlebar change and reuse the existing brake and clutch lines.

NOTE: Accept OEM heated grips.

VIKING HANDLEBARS

32 MM (1 1/4") VIKING HANDLEBAR KITS

- The only complete Handlebar Kits with matching braided cables and brake lines that include Magnum Viking 32 mm (1 1/4") handlebars
- Patented Viking handlebar internal design guarantees easy installation of complete wiring harnesses without taking away from the clean look of the peak
- Magnum's patented Viking handlebar internal design guarantees easy installations of complete wiring harnesses
- Without taking away from the clean look of the peak, the novel design creates enough room to allow the complete wiring harness with factory vinyl covering and the terminal connections, along with their respective shrink sleeve, to easily pass through without chaffing
- Unique flaring process creates a burr free internal radius with a generous pocket of additional clearance within the troublesome peak of the handlebar
- To make wiring installations even easier, Magnum preloads the bars with E-Z pull-thru plastic woven sleeving
- Insert the wiring harness into the sleeving and pull through, it's that simple!
- Viking handlebars are manufactured with the highest quality construction, work with standard controls, including hydraulic clutch, and feature high luster chrome or gloss black finishes for an unsurpassed appearance
- Each 32 mm (1 1/4") diameter handlebar is CNC mandrel bent for an accurate fit, incorporate wrist angles engineered for riding comfort, have 25,4 mm (1") diameter center sections, 89 mm (3 1/2") on-center knurling, and feature machined control mounts (not swaged) plus burr free internal wiring holes and electronic throttle control slots
- Kits are available in Bagger, Ape Hanger, and Warrior (Road Glide) styles for select ABS and non-ABS Harley-Davidson motorcycles with 25,5 cm (10"), 30,5 cm (12") and 35,5 cm (14") height options
- Kits include: Magnum Viking Handlebars, throttle and idle cables or Throttle-By-Wire extensions, clutch cable or hydraulic clutch line, brake lines, copper crush washers, hardware and any necessary switch or turn signal extensions
- Cables and brake lines feature Sterling Chromite® or Black Pearl braid with highly polished chrome or black chrome-plated fittings

U.S. Patent # 10,882,578.

NOTE: Accepts H-D OEM heated grips.

NOTE: Except for Touring models, cable and brake line lengths are based on using 51 mm (2") risers.

NOTE: 25,5 cm (10") kits do not include wiring extension as the stock wiring should work for most applications.

NOTE: Viking Bagger and Ape Hanger Handlebars have a 25,4 mm (1") diameter center section and fit 25,4 mm (1") risers. Models originally equipped with handlebars that have a center section diameter larger than 25,4 mm (1") will require changing the risers to a 25,4 mm (1") ID version. Examples would be, but not limited to FLSTF, FLSTFB and some CVO models. Please check before ordering.

FLARE® HANDGUARDS

- Klassic tint options are crafted from a high-quality polycarbonate
- Kolor and Ice options are manufactured from a high-quality acrylic to achieve the eye-catching and paint-matching pop of color riders love
- Hardware manufactured from aluminum, come in black and are e-coated from out of the box
- For something more custom, hardware can be stripped, polished and anodized to color match build components
- Available to match your Flare Windshield or custom build
- Paint-friendly: Designed to look great as-is but can be painted for a personalized touch (results may vary)
- Easy installation with simple setup and all necessary hardware
- Sold in pairs: (left and right)

NOTE: Fitment may vary based on turn signal, handlebar, and windshield setups. Check the fitment and installation before ordering.

NOTE: Clean with gentle solutions like Shine Werks® or mild soapy water. Avoid ammonia, alcohol, or solvent-based cleaners (like Windex®) to preserve tint, coating, and UV protection. If using dish soap, follow with a wax-based cleaner for optimal performance, like Shine Werks, sold separately.

NOTE: Does not fit 04-13 XL models without a shim, 04-22 XL models with offset mirror brackets or with bar end mirrors. Certain handlebar and windshield combinations may have clearance issues. We recommend holding the Handguards and bracket hardware up to your handlebars to anticipate any contact issues before installation. Contact issues will likely only occur in close quarters/parking scenarios.

FEATHERLIGHT CLUTCH CABLES

- Clutch cables made to Venhill's high-quality Featherlight specifications
- Marine-grade stainless steel inner wire that runs through a PTFE liner
- Reduced friction provides a light action, easing pressure on the hand, especially in stop/start traffic and during long rides
- PTFE lining removes the need for lubrication
- "Bird-cage" process is applied to inner wire, allowing solder to penetrate the weave of the cable and making the bond with the nipple much stronger
- Sold each

BRAIDED AND BLACK VINYL THROTTLE AND IDLE CABLES

- Cables feature polished-chrome fittings, tempered-steel inner conduit and an inner nylon liner for smooth operation and long life
- Braided cables feature outer housings coated with a non-yellowing clear covering for abrasion resistance
- Available in undersize/standard/oversize lengths for most single and dual cable applications

NOTE: Length given is the length of the outer housing only, excluding the elbow.

NOTE: Cables will also fit late style Mikuni carbs.

BRAIDED AND BLACK VINYL HIGH EFFICIENCY (H.E.) CLUTCH CABLES

- Low effort, maximum efficiency cable design meets or exceeds all OEM specifications for fitment, construction and endurance requirements
- Cables feature chrome-plated fittings, tempered-steel inner wire and a nylon inner sleeve for smooth operation
- Braiding is coated with a non-yellowing clear coating for abrasion resistance
- High-performance cables use the latest technology of longitudinally winding the outer housing lengthwise rather than spirally, so cable bends in a more natural arc and eliminates spring and compression
- Available in undersize/standard/oversize lengths for most models

HOW TO MEASURE CLUTCH CABLES

NOTE: Late-style cables are measured with the adjuster completely collapsed.

NOTE: Adjuster measured from bottom of cable.

QUICK CONNECT BRAIDED UPPER CLUTCH CABLES

- Quick Connect braided upper clutch cables economically replace the OE upper cable section on 18-25 Softails and 21-25 Touring models
- Easily and quickly connects to the existing lower cable section with a durable metal threaded adjuster
- Significantly reduces installation time, plus there's no need to drain transmission fluid
- Unique design incorporates durable metal threaded adjuster and adjuster housing
- Quick Connect cables feature the industry's highest quality braid in four color choices to complement your bike: Sterling Chromite®, Black Pearl, KarbonFibr and Polished Stainless
- KarbonFibr braid is created from metallic distinct gray and black-toned metallic wires, blended and interwoven to mimic the distinct look of carbon fiber
- Braid color and weave match on all Magnum control cables and brake lines
- Crystal-clear outer jacket will never discolor and provides exceptional protection against scuffing paint and chrome
- Chrome or black chrome-plated handlebar fittings with bent tube end caps for Batwing fairing models and standard end caps for all other Touring and Softail models
- Low-effort, high-efficiency cable design meets or exceeds OE specifications for fitment, construction and endurance
- Upper cables are made with anti-friction inner liners and are factory lubricated for smooth, consistent, long lasting operation

HOW TO MEASURE CLUTCH CABLES

NOTE: Late style cables are measured with the adjuster completely collapsed.

CONTROL CABLES

BRAIDED THROTTLE AND IDLE/IDLE-CRUISE CABLES

- The industry's highest quality braid in four color choices to complement your bike; Sterling Chromite®, Black Pearl, KarbonFibr and Polished stainless
- KarbonFibr braid is created from metallic wire with distinct black tone colors, blended and interwoven to mimic the distinct look of carbon fiber
- Braid color and weave match on all Magnum control cables and brake lines
- All fittings are polished and chrome or black chrome-plated
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- All cables are made with anti-friction inner liners, nylon adjuster inserts, and are factory lubricated for smooth, consistent, long lasting operation
- Meets or exceeds all OE specifications for fitment, construction and endurance

NOTE: Length given is length of outer housing only, excluding elbows.

NOTE: All pre-96 cables have threaded elbows; 96 and later cables have non-threaded elbows.

BRAIDED HIGH EFFICIENCY CLUTCH CABLES

- The industry's highest quality braid available in four color choices to complement your bike; Sterling Chromite®, Black Pearl, KarbonFibr and Polished Stainless
- KarbonFibr braid is created from metallic wire with distinct black tone colors, blended and interwoven to mimic the distinct look of carbon fiber
- Braid color and weave match on all Magnum control cables and brake lines
- Coated with a non-yellowing, crystal-clear FEP fluoropolymer outer jacket for exceptional protection against scuffing paint or chrome
- Low-effort, high-efficiency cable design meets or exceeds all OE specifications for fitment, construction, and endurance
- All fittings are polished and chrome or black chrome-plated (including the bent tube end fitting used for 2021+Touring models with Batwing fairings)
- Rubber seal in transmission fitting eliminates fluid leaks
- All cables are factory lubricated for smooth, consistent, long-lasting operation

NOTE: Check torque spec on transmission fitting when installing.

BLACK VINYL UPPER CLUTCH CABLES

- Replaces the top half of the clutch cable assembly on 21-24 Touring applications and 18-24 Softail applications
- Innovative design eliminates the unreliable plastic junction box parts and spring mechanism on OEM cables
- Elimination of plastic components provides improved feel, precision and rigidity
- Junction box and cover are machined from 6061-T6 aluminum with high quality black anodized finish
- Threaded adjuster provides precise and reliable cable adjustment
- Premium chrome fittings
- POM liner provides smoothness and reliability
- Longitudinally wound black housing resists compression

NOTE: Cable lengths are for the upper clutch cable only.

BYO® BUILD YOUR OWN® CONTROL CABLE KITS

- Available in three styles: stainless steel braid with chrome fittings, black vinyl with black chrome fittings and black vinyl with chrome fittings
- Looks and performance like a factory-made cable
- Build the perfect length every time
- BYO® cables are extra long to ensure fitment for most plus-length applications
- Easy installation – route, cut, and assemble in less than 10 minutes
- Throttle and idle cables make up to a 132 cm (52") housing length with a choice of 90 degree or 45 degree elbows
- Throttle and idle kits sold separately
- Clutch cables are high-efficiency design with cable fitting pull off strength of 226+ kg (500+ lbs) and can make up to 203 cm (80") of total length
- All adjusters and transmission fittings are chrome-plated
- Black clutch cables include a black boot to cover the adjuster
- Use enclosed template to set free or travel length to factory specifications

DESIGNER DOT HANDLEBAR INSTALLATION KITS

- The only complete kits with matching braided cables and brake lines
- Kits are available for most ABS and non-ABS Harley-Davidson motorcycles with 15 cm (6") to 51 cm (20") ape hanger style handlebars
- Kits include throttle and idle cables or Throttle-By-Wire extensions, clutch cable or hydraulic clutch line, brake lines, copper crush washers, hardware and any necessary switch wiring or turn signal extension (unless noted)
- Select kits for 18-24 Softail and 21-23 Touring models are also available with Quick Connect upper clutch cables that reuse the existing lower clutch section
- All cables and DOT brake lines feature either Sterling Chromite®, Black Pearl or KarbonFibr braid with highly polished chrome or black chrome-plated fittings
- KarbonFibr braid is created from metallic wire with distinct black and gray tone colors, blended and interwoven to mimic the distinct look of carbon fiber
- Brake lines are constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket
- All cables are a low-effort, high-efficiency design that meets or exceeds all OE specifications for fitment, construction and endurance
- Kits for dual disc models include an all brazed manifold that eliminates leaks, alignment problems and unattractive threaded connections

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

NOTE: Kits are based on using ape hanger style handlebars with 51 mm (2") risers; except Touring models.

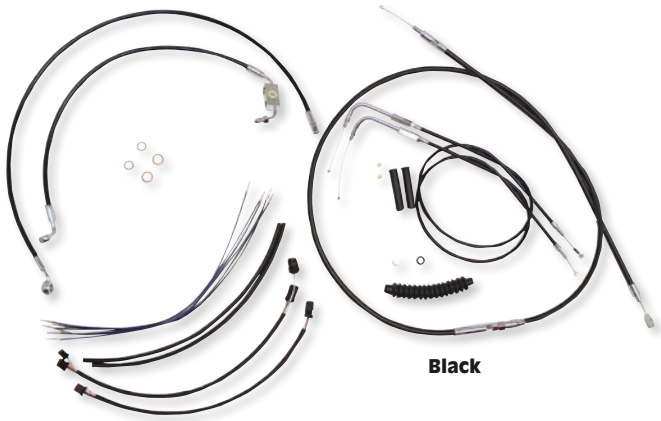
MAGNUM



XR STAINLESS DOT HANDLEBAR INSTALLATION KITS

- Magnum XR DOT Handlebar Installation Kits offer a great fit and excellent quality at an economical price
- XR DOT Handlebar Installation Kits are available for popular ABS and non-ABS Harley-Davidson motorcycles with 25,5 cm (10") to 43 cm (17") ape hanger style handlebars
- Kits include throttle and idle cables or fully terminated throttle-by-wire extensions, clutch cable or hydraulic clutch line, XR DOT brake lines, copper crush washers, hardware, fully terminated turn signal and switch wiring extensions
- Select kits for 2018+ Softail and 2021+ Touring models are also available with Quick Connect upper clutch cables that re-use the existing lower clutch section
- Three color combinations to complement your bike: clear-coated stainless steel with chrome fittings, black-coated with chrome fittings or black-coated with black fittings
- All cables are a low-effort, high-efficiency design that meets or exceeds all OE specifications for fitment, construction, endurance
- Magnum XR DOT brake lines use an enhanced construction of heavy gauge stainless steel embedded in tough abrasion-resistant nylon outer jacket for superior durability and excellent braking response
- Kits that include manifolds use an all-brazed construction to ensure optimal OE fitment and appearance
- Manifolds use AN-3 connections for an easy installation
- Kits include throttle and idle cables or Throttle-By-Wire extensions, clutch cable or XR hydraulic clutch line, XR DOT brake lines, copper crush washers, hardware, fully terminated turn signal and switch wiring extensions

Note: Kits are based on using ape hanger style handlebars and 51 mm (2") risers (except Touring models).

TYPE FT DISC

- Stainless steel fully floating brake rotors
- Design provides enhanced braking performance and eliminates rotor fade/warp even during extreme use
- Rotors with aluminum rotor carriers feature carrier rings fully-machined from aluminum, and give an anodized finish for durability and protection from the elements
- Rotors with stainless steel rotor carriers feature carrier rings ground and machined from stainless steel; non-machined surfaces are finished using anti-corrosive paint for durability and protection from the elements
- Rotor bobbins are stainless steel for efficient rotor "float" so the rotor will not warp and distort under extreme stress/heat
- Stainless steel outer rotor rings are machined and the surfaces finished using a bilateral cross-textured grinding process that keeps rotor runout to no more than 0,01 mm
- Manufactured in Europe to ISO/TS 16949 certified standards that meet or exceed OEM specifications

STAINLESS STEEL DRILLED BRAKE ROTORS WITH ABE (CONT)

1710-3338

TYPE FTK DISC

- Stainless steel fully floating brake rotors
- Outer brake ring features machined and painted rotor slots
- Innovative design improves brake performance and helps cool the rotor faster during extreme use
- Design gives maximum resistance to fade/warp from heat and mechanical stresses
- Rotor design allows for better heat exchange
- Rotor bobbins are stainless steel for efficient rotor "float" so the rotor will not warp and distort under extreme stress/heat
- Stainless steel outer rotor rings are machined and the surfaces finished using a bilateral cross-textured grinding process that keeps rotor runout to no more than 0,01 mm
- Rotor weight and inertia are not increased compared to other brake rotor disc types; do not impede the motorcycle's steering/handling characteristics
- Very original style, great for customizers or to enhance the look on older stock bikes
- Manufactured in Europe to ISO/TS 16949 certified standards that meet or exceed OEM specifications
- ABE approved

OVERSIZE CUBIQ® FRONT BRAKE ROTORS

- Oversize brake rotor design
- Bolt-on design works with the stock hub pattern
- Cubiq® brake rotor combines state-of-the-art technology with modern design
- Rotor shape promotes uniform brake pad wear - the same contact surface between the pad and disc every revolution generates regular wear
- Less unsprung weight (up to 40% lighter than standard round rotors) reduces gyroscopic effect and improves the manueverability of the motorcycle
- Increased perimeter surface design generates more cooling surface around the rotor for better temperature dissipation
- Available in semi- or full-floating designs
- Non-directional design, can be used in right or left applications
- Sold each

NOTE: Brake caliper relocation brackets not included.

NOTE: For maximum braking performance and rotor longevity, Galfer recommends using Galfer brake pads with Galfer rotors. See page 1280 for Galfer brake pads.

SPIDER ROTORS

- Performance brake rotor series for Arlen Ness wheels and cartridge hubs only
- CNC machined billet inner carrier features clean style and follows the coped design of Arlen Ness cartridge hubs
- Brake disc is made from high carbon stainless steel, features the Jagged rotor design and CNC machined finishing on every surface for optimum braking performance with a smooth feel
- Titanium floating brake rotor hardware with lightning hole design

NOTE: 14" rotors require separate purchase of brake caliper adapter PART #s 1704-0448 and 1704-0449 to install stock calipers or can be used with Arlen Ness Six-Piston Differential Bore brake calipers for 14" rotors; see page 1256

BIG BRAKE FULL FLOATING ROTOR KITS

- CNC machined billet inner carrier
- Each 14" full floating rotor is constructed from 420 stainless steel outer disc that is drilled for optimum performance and a 6061 billet inner carrier
- Drastically improves braking performance, upgrades the style and provides an anodized color accent to your factory front wheel
- Billet brake caliper adapters are included in each kit to properly relocate your factory caliper to the proper position
- Utilizes factory brake caliper, rotor hardware and brake hose
- Easy bolt-on installation with no need to re-bleed the brake system
- Each kit includes a 14" rotor, caliper adapter bracket and all necessary hardware (must order right and left separately)

BIG BRAKE FLOATING ROTOR KITS

- Power is nothing without control; Big Brake floating rotor kits dramatically improve braking performance while adding styling to your factory wheel
- Each kit provides about 30% more stopping power than smaller factory rotors
- Each kit includes oversized rotor cut from 420 stainless steel, billet aluminum caliper adapter bracket and necessary hardware
- Utilizes factory brake caliper, brake line and wheel
- Easy installation with no need to re-bleed the brake system
- 14" kits are designed for 00-25 Touring models with 17" larger front wheels in spoke or hub mounted applications
- 15" kits are designed for Dyna, Softail and Sportster models with 19" or larger front wheels in spoke or hub mounted applications

NOTE: 14" kits are designed to work with factory fork legs and Arlen Ness "Hot Legs" fork legs.

NOTE: 15" kits are designed to work with factory fork legs. 15" kits will NOT work with Arlen Ness "Hot Legs" fork legs.

SIX-PISTON DIFFERENTIAL BORE BRAKE CALIPERS

- CNC machined from billet aluminum
- Differential bore for optimal and consistent braking performance
- Compatible with ABS brake systems
- Designed and engineered to be extremely rigid and perform consistently in all braking scenarios
- Cooling fins are CNC machined into each side of the inner caliper to disperse heat
- Front calipers available for 11,8"/12,6" or 14" brake rotors and include DP brake pads, bleeder screw, banjo bolt, sealing washers, mounting hardware and shim kit
- Rear calipers (PART #s 1701-0618, 1701-0619, 1701-0624 and 1701-0625) are for 11,8" rear brake rotor applications and include CNC-machined billet caliper bracket and necessary hardware
- Rear caliper kits (PART #s 1701-0773 and 1701-0775) allow you to keep factory brake lines eliminating the need to replace troublesome factory ABS lines (only kit on the market)
- Rear caliper kits (PART #s 1701-0773 and 1701-0775) include billet caliper bracket, 6-piston differential-bore brake caliper, jumper brake line, banjo bolt and any necessary installation hardware
- Rear caliper kits (PART #s 1701-0773 and 1701-0775) properly locates the brake caliper for use with factory diameter 11,5" rear brake rotors
- Brake caliper rebuild kit available; sold separately

FOUR-PISTON BRAKE CALIPERS

- CNC machined from billet aluminum
- Compatible with ABS brake systems
- Designed and engineered to be extremely rigid and perform consistently in all braking scenarios
- Cooling fins are CNC machined into each side of the inner caliper to disperse heat
- Front calipers available for 11,8"/12,6" brake rotors and include DP brake pads, bleeder screw, banjo bolt, sealing washers, mounting hardware and shim kit
- Rear calipers (PART #s 1701-0620, 1701-0621, 1701-0626 and 1701-0627) are for 11,8" rear brake rotor applications and include CNC machined billet caliper bracket and necessary hardware
- Rear caliper kits (PART #s 1701-0774 and 1701-0776) allow you to keep factory brake lines eliminating the need to replace troublesome factory ABS lines (only kit on the market)
- Rear caliper kits (PART #s 1701-0774 and 1701-0776) include billet caliper bracket, 4-piston differential-bore brake caliper, jumper brake line, banjo bolt and any necessary installation hardware
- Rear caliper kits (PART #s 1701-0774 and 1701-0776) properly locates the brake caliper for use with factory diameter 11,5" rear brake rotors
- Brake caliper rebuild kit available; sold separately

FOUR-PISTON RADIAL MOUNT FRONT BRAKE CALIPERS

1701-0731

- Designed to fit Arlen Ness Method Fork Legs with 100 mm radial caliper brackets (PART #0403-0176) or fork legs with radial brake caliper brackets that have 100 mm bolt spacing
- Brake calipers are engineered for form and function, 3D sculptured design helps facilitate cooling incurred while braking
- Cooling fins are machined into the inner caliper halves help disperse heat
- Extremely rigid under stress ensuring precise and consistent braking performance
- CNC machined from billet aluminum
- Compatible with ABS or non-ABS applications
- Designed for 11,8" diameter brake rotors
- Includes brake pads, bleeder screw and banjo bolt
- Black anodized finish

SIX-PISTON DIFFERENTIAL-BORE FRONT CALIPERS

- Designed for 11,5" or 13" rotors
- Dual-disc applications require a left and right caliper
- Work with OEM-style or Performance Machine rotors
- Chrome calipers are highly polished then chrome-plated
- Black Ops™ is a gloss black finish on top of a contrasting textured black finish for outstanding toughness and design
- Contrast Cut™ finish starts with a polished caliper that has been black anodized, then recut to open the design
- Include brake pads, bleeder screw and $^{3}/_{8}$"-24 banjo bolt

NOTE: Will fit 08-20 FLHT/FLHR/FLHR/FLHX, 08-13 FL H-D Trike (w/ 13" rotors only). Calipers for 00-03 XL will fit 04-13 XL/XLH, but will require an $^{11}/_{16}$" bore master cylinder for dual-disc applications and a $^{9}/_{16}$" bore master cylinder for single-disc applications.

NOTE: Will not fit FXD/FXR/XL models with wire spoke wheels.

RADIAL FRONT BRAKE CALIPER BRACKETS

- One-piece brackets allow mounting of radial mount calipers for 43 mm fork tubes (calipers sold separately)
- Have increased feedback and better caliper to disc alignment as they are secured to the bracket at both ends versus axial mounted calipers for better pad to disc contact during extreme braking
- Radial mounting also allows fitment to larger diameter rotors
- Reuses existing axle
- Sold in pairs

PART #	DESCRIPTION
1701-0733	For 18-25 FXFB/FXFBS/FXLRS/FXLRST

REAR BRAKE CALIPER BRACKET KIT

- CNC-machined rear brake caliper bracket that allows performance brake calipers to be installed on the rear of M-Eight Softail models
- Innovative design allows you to keep factory brake lines
- Designed to accept Arlen Ness performance brake calipers (both Four-Piston and Six-Piston)
- Each kit includes billet caliper bracket, jumper brake line, banjo bolt and necessary hardware
- Black anodized finish

BRAKE PADS

- Sintered metal brake pads are the OEM-type replacement pads for most bikes
- Sintered metal brake pads are second-to-none in their stopping abilities and wear characteristics while still providing excellent reduction in noise and dust
- Organic aramid fiber pads are OEM type replacement brake pads for 1970s and earlier models
- Organic aramid fiber pads are the perfect choice for polished or chromed rotors and billet steel rotors
- Both compounds of Drag Specialties brake pads are asbestos, nickel and lead free

NOTE: If you are using aftermarket billet steel rotors, it is recommended you use our organic aramid fiber brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

Organic Pads

Double-H Pads

Semi-Sintered V

Extreme Performance Pad

BRAKE PADS

ORGANIC/ARAMID BRAKE PADS

- Provide excellent stopping power without noise and rotor galling, even on polished rotors
- Fingertip control and strong, predictable brake response

DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating, the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads

SEMI-SINTERED "V" PADS

- All-new semi-sintered construction containing 30% copper by weight within an organic matrix
- This design provides the long life and great feel of sintered pads, without the rotor damage common to them
- Can be used to replace aramid or sintered metal compound pads

EXTREME PERFORMANCE SINTERED METAL

- The newest sintered metal brake pad fusion technology
- Has the highest friction rating available in a pad - 0,6 - for strong, fade-free stopping power
- No lead, iron or steel additives; no more rotor outline etching or rotor stiction
- Super-fast bed-in; full friction after 10 to 15 race stop uses
- Great heat cycle ability; pads cool after extreme use and perform just as strong the next day

NOTE: Brake pads include abutment shims where required.

NRS Technology

BRAKE PADS

STANDARD PADS

- Organic material
- Long pad service life
- Suitable for use with all brake discs
- Solid performance, even in wet conditions
- Features NRS Technology, precluding loss of lining material under extreme thermal conditions
- All parts are ABE approved, unless noted

RQ ORGANIC PADS

- Organic material
- Suitable for use with all brake discs
- Solid performance, even in wet conditions

SV/SH SINTERED METAL PADS

- Completely metallic sintered brake pads
- Good all-around performance
- Suitable for use with most brake discs
- No bedding is required

SRT SINTERED ROAD/TRACK PADS

- Premium compound pad with state-of-the-art technology for high durability, performance and ideal modulation (feel)
- Completely metallic sinter pad compound
- Provide stable, non-fade performance; excellent choice for heavy vehicles
- Compatible with nearly all brake disc types

CRQ CARBON RACING PADS

- Carbon-based racing pad
- Greater durability than the SRQ pad
- High friction levels; requires low effort at the lever
- Suitable for high-performance use

GALFER BRAKE PADS

SEMI-METALLIC (1054)

- Great feel and modulation for OEM brake pad replacement
- Long-lasting brake pad and very little rotor wear
- Good in wet and/or dry conditions
- Overall a very versatile brake pad compound for almost every need
- GG Rated

SINTERED METAL STREET COMPOUND (1370/1371)

- For moderately aggressive everyday or sport street riding
- Advanced ceramic composites ready to withstand higher temperatures than regular semi-metallic carbon brake pads
- HH friction-rated compounds deliver excellent feel and modulation
- Great heat recovery and easy on rotor discs
- Developed for aggressive street riding and sport touring, great choice for heavier street bikes

ROAD BRAKE PADS

- Developed to give the most performance and longest life from your brake system
- Available in sinter compound
- Perfectly match Moto-Master brake discs
- ECE R90 approved unless otherwise noted

FRONT PAD SINTER COMPOUND

- For new generation high-performance touring and custom motorcycles
- Offers fade-free brake performance, great brake feel and thermal stability
- Developed for sport riding and high loads from heavy motorcycles

RDP Race

DP BRAKES SINTERED METAL BRAKE PADS

- Give your bike peak braking performance with DP Brakes brake pads
- Pads have a quick break-in period so you get peak braking performance fast
- DP Brakes design and materials ensure consistent, hard stops and fade-free performance
- Pads give long pad life – sintered metal compounds outlast conventional organic or aramid pads
- Made with DP Brakes' proven sintered metal pad material
- Gray-colored aluminum oxide-based ceramic material on backplate of pad keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Excellent initial bite and feel in both wet and dry conditions
- GG friction rated
- Quiet and non-abusive to most rotors; no brake dust or brake fade
- OEM pads for Performance Machine calipers

SDP SPORT HH+ SINTERED METAL BRAKE PADS

- Feature the industry-high, HH+ friction rating
- Provide superior stopping power with no mileage penalty
- Gray-colored aluminum oxide-based ceramic material on backplate of pad keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Quick pad break-in time so you get maximum stopping power fast
- Quiet and dust-free

RDP RACING SINTERED METAL BRAKE PADS

- Developed with the aid of top works teams to give your bike maximum stopping power
- Gray-colored aluminum oxide-based ceramic material on backplate of pad keeps heat away from caliper piston and fluid in extreme conditions for fade-free performance
- Designed to give maximum initial power, with fingertip control throughout the stop
- Quiet and dust-free

NOTE: DP Brakes brake pads are not for use with polished rotors.

WARNING: RDP Race pads are for Race/Track use only; not for street use. Any other use could result in death or serious injury.

CULT-WERK

MASTER CYLINDER COVERS AND SETS

- Cover is milled from aluminum on the latest 5-axis CNC machines and replaces the original, somewhat boring cover
- CNC-milling on the inside of the cover corresponds to the OE cover allowing use of OE seals
- Racing cover sets are approximately 25 mm higher than the original covers and have been milled very elaborately
- Different levels, depressions and different radii make them appear extremely 3-dimensional

DESIGNER SERIES DOT ABS-SPECIFIC FRONT BRAKE LINES

- The industry's highest quality braid available in four color choices to complement your bike: Sterling Chromite®, Black Pearl, KarbonFibr and Polished Stainless
- KarbonFibr braid is created from metallic wire with distinct gray and black tone colors, blended and interwoven to mimic the distinct look of carbon fiber
- Manufactured with an enhanced construction designed to be compatible with Harley-Davidson ABS requirements for stock and alternate length brake lines
- Kits to fit most Harley-Davidson models – Touring, Trikes, Softail, Dyna and Sportster
- Direct fit lower assemblies used in conjunction with mid lines (on select models) and alternative length upper lines
- Feature AN-3 connections for easy installations
- Choice of 35°, 90° or 180° upper brake line banjo angles ensure a great fit
- All fittings are highly polished and chrome or black chrome-plated
- Braid color and weave match all Magnum control cables and brake lines
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Inner PTFE tubing braided with Aramid Fiber reinforcement provides the ultimate in high performance by greatly reducing line expansion
- Brake lines are constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket

NOTES:

General:

Magnum Shielding brake lines are designed to follow the same routing path as OE routing path.

Upper, lower, mid brake line kits and adapters are sold separately for a perfect fit.

Non-stock applications require taking a measurement for upper brake line length and banjo angle to ensure correct fitment (see How to Order).

Harley-Davidson motorcycles equipped with ABS (anti-lock brake system) require ABS specific brake line kits. Failure to do so may result in compromised anti-lock braking ability. Magnum Shielding upper brake line kits manufactured specifically for these applications are identified with the letters "**ABS**" printed directly on the brake hose.

Touring and Trike models:

Touring models use three kits – one upper, one mid-line and one lower. Lower kits are optional.

Trikes use two kits - one upper and one mid-line. No lower is available.

Designer mid and upper brake lines are required for ABS Touring and Trike models. In the fairing or nacelle, mid lines connect the upper brake line to the ABS controller.

Softail models:

Softail models utilize three kits – one upper line and one adapter are required for handlebar changes. Lower kits are optional.

Adapters for Softail models connect the upper brake line to the ABS controller (11-17) or to the lower brake line manifold (18+)

11–17 Softail model lower kits include an adapter.

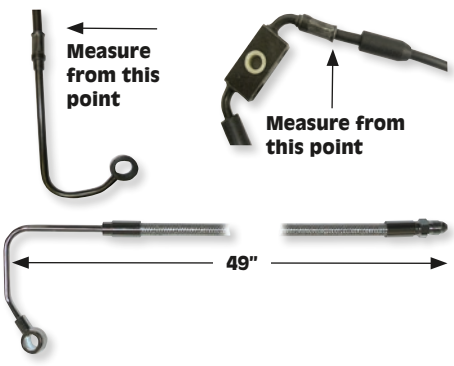
18+ Softail model lower kits do **NOT** include an adapter.

Dyna and Sportster models:

Dyna and Sportster models require two kits – one upper and one lower.

IMPORTANT – HOW TO ORDER:

Stock fitments: Stock fitment chart determines upper, lower, adapter and mid-line kits needed for your application. Lowers, adapters and mid-lines are model specific. Stock upper line length and banjo angle is listed for each application to help select alternative lines.



Alternative fitments: For handlebar changes, fitment options are accommodated with UPPER lines only. Non-stock routing may require a different length or banjo angle. The alternative length chart lists available lengths and banjo angles.

Touring and Trike model upper line length is determined using the 124,5 cm (49") Designer mid-line as a reference point to measure the additional length needed to complete the routing from the ABS controller to the master cylinder. (see diagrams below)

18+ Softail –Upper line replacement requires an adapter. Lengths are determined by using the upper brake line as a guide. Measure from master cylinder to the point where the upper line connects to the lower brake line manifold. Subtract 38 mm (1 1/2") (adapter length) from that measurement to determine upper line length. (see diagram below)

Upper line length for 11-17 Softail, Dyna and 14-22 XL models is determined using the stock upper brake line as a guide. Pull the rubber boot back and measure from where the flexible line enters the crimp collar on the lower portion, up to the master cylinder. (see diagrams below)

DESIGNER SERIES DOT EXTENDED ABS TOURING LOWER BRAKE LINE KITS

- Lower brake line kits available in extended length versions to fit 14-23 Harley-Davidson Touring models with ABS
- Extended length allows brake calipers to be moved to different mounting locations and new banjo angle options allow for different caliper orientations, particularly radial brake calipers
- Caliper lines are extended and incorporate EZ-Align banjos for easy installation
- Plus 50,8 mm (2") or plus 102 mm (4") length stock style, two-line configurations
- Left side dual to single disc conversions in stock, plus 50,8 mm (2") or plus 102 mm (4") lengths
- CNC precision bent tubes for a factory fit
- Brake lines are constructed with PTFE inner tubing, DuPont™ Kevlar® Aramid Fiber, premium Signature Magnum braids and a crystal-clear outer PVC jacket that will never discolor
- Aramid Fiber reinforcement greatly reduces line expansion for the ultimate in high performance
- The industry's highest quality braid in two Signature color choices; Sterling Chromite® and Black Pearl
- Highly polished fittings are chrome or black chrome-plated
- Matching upper brake lines, hydraulic clutch lines and clutch cables are available separately to complement the lower brake lines; see pages 704-705, 1186-1197, 1304-1319

NOTE: Magnum Shielding brake lines are designed to follow the same routing path as OEM lines.

NOTE: Harley-Davidson motorcycles equipped with ABS (anti-lock brake system) require ABS specific upper and lower brake line kits. Failure to do so may result in compromised anti-lock braking ability. Magnum Shielding brake line kits manufactured specifically for these applications are identified with the letters "ABS" printed directly on the brake hose.

DESIGNER SERIES DOT BRAIDED NON-ABS FRONT BRAKE LINES

- Brake kits utilize a superior two-piece design consisting of a direct fit lower assembly used in conjunction with alternative length upper lines
- All brazed manifold construction eliminates leaks, alignment problems and unattractive threaded connections for a sleek appearance
- Choice of 35°, 90° or 180° upper brake line banjo angles ensure a great fit
- AN-3 connections for easy installations
- All fittings are highly polished and chrome or black chrome-plated
- The Industry's highest quality braid in four color choices to complement your bike: Sterling Chromite®, Black Pearl, KarbonFibr and Polished Stainless
- Braid color and weave match on all Magnum control cables and brake lines
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Inner PTFE tubing braided with Aramid Fiber reinforcement provides the ultimate in high performance by greatly reducing line expansion
- Brake lines are constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

NOTE: Upper and lower brake line kits are sold separately to allow for a perfect fitment.

NOTE: Non-stock applications require taking a measurement for the upper brake line length and banjo angle to ensure correct fitment (see How to Order).

NOTE: 2014-2019 Trike models require an adapter and upper brake line. Lower brake line is optional.

IMPORTANT - HOW TO ORDER

Stock fitments: Use the stock fitment chart to determine the upper and lower kits needed for your application. The stock upper line length and banjo angle is also listed for each application. This information may be helpful when choosing alternative length lines.

Lower lines are model specific. Use the stock fitment chart to determine which kit is required.

Alternative fitments: Due to handlebar changes, fitment options are accommodated with the UPPER line only. You may prefer to use a different length or banjo angle based on your specific routing. See the alternative length chart for available lengths and banjo angles.

Upper line length is determined by measuring the routing path from the top of the lower triple tree to the master cylinder. The upper and lower connection is made at this point – see diagram.

XR STAINLESS EXTREME RESPONSE FRONT DOT BRAKELINE KITS

- Manufactured with an enhanced construction for great braking response and durability
- Designed to be compatible with Harley-Davidson ABS requirements for stock and alternate length brake lines
- Three color choices: Clear-coated with chrome fittings, OE-style black stainless steel with chrome fittings or black-coated stainless steel with black chrome fittings
- Available in stock and plus lengths to fit most ABS or non-ABS Harley-Davidson Models – Touring, Softail, Dyna, and Sportster
- All fittings are highly polished and chrome or black chrome plated
- Inner PTFE tubing braided with XR Stainless Steel reinforcement embedded in a tough nylon outer jacket offers exceptional protection for paint or chrome
- All brazed manifold construction eliminates leaks, alignment problems, and unattractive threaded connections for a sleek appearance
- AN-3 connections for easy installations

NOTE: Complete kits contain brake line assemblies to connect the caliper(s) to the master cylinder.

Non-ABS: All non-ABS kits are complete kits with lower and upper brake lines included.

ABS Dyna, Sportster and 2018+ Dual Disc Softail: kits come complete with an upper and lower brake line.

ABS Touring, Trike and single disc Softail: brake line kits are available separately as upper and lower kits.

ABS Upper Kits contain a brake line assembly with any needed adapters to connect the ABS controller to the master cylinder. A lower brake line assembly is not required.

ABS Lower Kits are optional and do not require an upper line for installation.

STERLING CHROMITE BLACK PEARL KARBONFIBR POLISHED STAINLESS

E-Z ALIGN DOT BRAIDED SINGLE DISC NON-ABS FRONT BRAKE LINES

- E-Z Align rotating caliper banjo feature for perfect no-kink fitments
- Choice of 35°, 60°, 90° or 180° upper brake line banjo angles
- Brake lines are available with either a 7/16" or 10 mm master cylinder banjo fitting
- Constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket
- All fittings are polished and chrome or black chrome-plated
- The industry's highest quality braid available in four color choices to complement your bike: Sterling Chromite®, Black Pearl, KarbonFibr and Polished Stainless
- KarbonFibr braid is created from metallic wire with distinct black and gray tone colors, blended and interwoven to mimic the distinct look of carbon fiber
- Braid color and weave match on all Magnum control cables and brake lines
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Inner PTFE tubing braided with aramid fiber reinforcement provides the ultimate in high performance by greatly reducing line expansion

MAGNUM

STERLING CHROMITE POLISHED STAINLESS BLACK PEARL

BRAIDED DOT REAR BRAKE LINE KITS

- The industry's highest quality braid available in three color choices to complement your bike: Sterling Chromite®, Black Pearl and Polished Stainless
- Braid color and weave match all other Magnum control cables and brake lines
- All fittings are polished and chrome-plated
- 14-23 Touring and 18-24 Softail kits offer modular configurations to enable extended or mid-mounted controls, extended swingarms, etc. when used in conjunction with a universal brake line
- Kits use OE-style manifolds or universal T-blocks for a complete installation
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Inner PTFE tubing braided with aramid fiber provides the ultimate in high performance and is compatible with all hydraulic fluids
- Constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

BYO® BUILD-YOUR-OWN DOT BRAKE LINE BUILDER KITS

- Assemble lines in only five minutes with side cutters and a 7/16" wrench for a perfect fit and alignment every time
- Two different kits are available in two colors to solve your brake line assembly challenges
- Basic Builder Single Disc Kits contain 7/16" and 10 mm banjos and fittings to build multiple front single disc brake lines
- Deluxe Builder Kits contain banjos and fittings to build multiple front single disc brake lines, hydraulic clutch lines and most rear brake lines
- All kits are organized in a labeled, compartmental carrying case and include 7,6 m (25') of non-yellowing clear or black coated braided stainless steel hose, chrome or black chrome-plated banjos, polished stainless hardware, copper crush washers plus a set of durable Aluminum BYO® Vise Jaws. Kit contents are listed below
- Brake hose and fittings are compliance labeled, pressure tested and 100% inspected
- NOT for use with Anti-lock Brake Systems

NOTE: BYO® brand brake hose and components have been specifically designed to work ONLY in conjunction with each other. Use with any other Magnum brake line products or other manufacturer's brands will void all warranty, performance, and liability claims.

NOTE: Black and Basic BYO® Single Disc Builder Kits do NOT contain rear brake line T-blocks or inverted flare fittings.

NOTE: Black and Basic BYO® Single Disc Builder Kits Hydraulic Clutch Fittings are a natural stainless steel finish.

BYO® BUILD-YOUR-OWN® UNIVERSAL BRAKE LINES

- Assembles in five minutes with only side cutters and 7/16" wrench
- All components and hoses are available separately to build your own DOT brake line – choose banjo fittings, and then cut bulk line to the exact length needed to eliminate ordering guesswork for a perfect fit every time
- Brake hose is 100% pressure tested and fittings are 100% inspected
- -3 bulk stainless brake line is fully labeled and sold in multiple lengths (includes one vise wrench for assembly)
- -3 braided stainless brake line is coated with a non-yellowing clear outer jacket – banjos and inverted flare fittings are polished and chrome-plated with polished stainless steel fittings
- -3 braided black stainless brake line is coated with an opaque black outer jacket – banjos are black chrome-plated and include black heat shrink to cover the stainless fittings once assembled
- Aluminum BYO® Vise Jaws are available separately and made specifically to assemble BYO fittings

NOTE: Compatible Magnum Shielding BYO® brand brake hose and BYO components have been specifically designed to only work in conjunction with each other. Use with any other Magnum brake line products or other manufacturer's brands will void any warranty, performance, liability and DOT FMVSS-106 compliance claims.

NOTE: All BYO® brand brake lines are intended for non-ABS applications ONLY.

NOTE: Please see pages 1336-1337 for compatible Drag Specialties and Magnum banjo bolts and crush washers.

BRAIDED DOT UNIVERSAL BRAKE LINES AND FITTINGS

- Brake lines available in Universal DOT or ABS Universal DOT
- ABS Universal DOT brake lines are manufactured with an enhanced construction designed to be compatible with Harley-Davidson ABS requirements for alternate length brake lines
- All constructed with PTFE inner tubing, DuPont™ Kevlar® aramid fiber, premium Signature Magnum braids and an outer PVC jacket
- The industry's highest quality braid in four color choices to complement your bike: Sterling Chromite®, Black Pearl, KarbonFibr and Polished Stainless
- Braid color and weave match on all Magnum control cables and brake lines
- Inner PTFE tubing braided with aramid fiber reinforcement greatly reduces line expansion to provide the ultimate in high performance
- Crystal-clear outer jacket offers exceptional protection against scuffing paint or chrome and will never discolor
- Universal AN-3 fittings, banjos and manifolds are chrome or black chrome-plated
- Banjos are offered in most popular sizes and bend angles
- AN-3 Male Mini Tee with bracket and Rear Brake Switch block are available to complete custom builds

DuPont™ and Kevlar® are trademarks or registered trademarks of E.I. du Pont de Nemours and Company.

NOTE: For banjo bolts, see pages 1336-1337 and for crush washers, see page 1337.

TANK LIFTS

- Raises the tank at the front attachment point
- Raises the front of Softail tanks from 40 mm to 50 mm; raises the front of Sportster tanks from 35 mm to 50 mm
- By raising the tank, the shape of the tank comes into its own even better
- An additional advantage of this tank lift is that there is enough space between the frame and the tank to allow the wiring harness to disappear under the tank; nothing needs to be changed on the cables
- Design fits perfectly with the look of the other Cult-Werk® custom parts
- CNC-lasered and then black powdercoated

TANK FITTING KITS FOR FUEL-INJECTION TO CARBURETOR CONVERSION

- Use when converting from OEM fuel-injection systems to use a carburetor in order to deliver adequate fuel for large-displacement engines
- Kit replaces the factory tank fittings, allowing the use of a high-quality, high-flow Pingel fuel valve to feed the carburetor
- Made of stainless steel
- Kit includes adapter and plug or adapter only with O-rings or gaskets
- See Pingel fuel valves on pages 1351-1352

NOTE: Due to tight tolerances in the tank fittings, a Pingel fuel valve is the only one that will fit.

PART #	DESCRIPTION
0705-0031	For 01-03 models w/ Delphi EFI (adapter and plug); for use w/ any Pingel 22 mm valve
0705-0030	For 99-01 FLT/FLHT w/ Magneti Marelli EFI (adapter and plug); for use w/ any Pingel 22 mm valve

PART #	DESCRIPTION
0705-0097	For 07-22 XL (except RH Sportsters); for use w/ any Pingel 1/4" NPT valve

VENTED DIPSTICKS

- Billet dipsticks vent/breathe excessive crank case pressure from the oil tank through a PCV style breather consisting of an oil separator system, perforated disc, replaceable filter element and umbrella flapper valve
- Screws into the factory oil fill spout as a stock replacement part
- These breathing dipsticks remove unwanted build-up of blowby pressure
- Larger cubic inch engines as well as engines with worn and/or loose ring clearances will have increased blowby
- Blowby is pressure that is forced past the rings and cylinders, pushed into the crankcase and then forced back into the oil tank
- Feuling® test results show a decrease in engine oil sump levels, more freely/smoother revving engine, increased MPG and decreased blowby
- Dipsticks vent/breath excessive crank case pressure from the oil tank through a breather system consisting of a oil separator system, perforated disc, replaceable filter element and umbrella flapper valve
- Kits includes two venting style options to choose from when installing the dipstick
- Option 1: 1/8" NPT breather vent fitting with internal porous filter element (this option gives a clean look, however it can produce an oil misting/residue out of the element on engines with excessive leakdown/blowby)
- Option 2: Quick-disconnect coupler fitting with rubber hose and filter element (this option will run any excessive oil misting/residue through the line and into the filter element, however this option does requires disconnecting the fitting in order to check the oil
- For Option 2, Feuling recommends routing the line up the frame rail, up under the seat/abs area then back down along the right side frame rail and the filter element can fit cleanly between the engine/trans matting area on the inside of the lower right frame rail
- Checking oil level: There are two ways to read the oil level with this dipstick, with the bike on the jiffy stand (FHS) or the bike upright and level (FHU)
- FHS = FULL HOT STAND
- FHU = FULL HOT UPRIGHT
- Available in fade-resistant black or polished
- Vented dipstick rebuild kit PART #1012-0254 fits all Feuling vented dipsticks and includes replacement K&N® filter element, rubber umbrella flapper valve, filter element, setscrew, 545™ Loctite® and zip ties; sold separately

NOTE: These dipsticks do get hot; use a glove when checking oil level.

NOTE: Feuling® highly recommends staying off the rev limiter and running conventional oil in the M-Eight engines to help maintain ring seal and minimize blowby.

NOTE: It is important to get the correct hot oil level in your bike. Feuling recommends running the oil level 90% to 99% full when hot.

NOTE: The oil pickup port is on the right side of the engine. Letting the bike idle or warm up on the kickstand will naturally fill the engine case and skew the oil level in the tank.

NOTE: Feuling In-house testing shows venting the air cleaner to atmosphere may be problematic resulting in oil carry over/misting out of the breathers. When air filter venting is accompanied with the use of oil tank venting such as the Feuling vented dipstick and/or a vented transmission top cover the oil carry over/misting can be increased.

POLISHED OIL FILTER MOUNTING BRACKET KIT

- Billet oil filter mounting bracket for Twin Cam engines was specially designed and created for the S&S 124" Twin Cam engines, but makes a great cosmetic and functional upgrade for engines built with stock Twin Cam crankcases with a removable oil filter mount as well
- No voids or other casting defects in the material to cause leaks
- Position of the filter has been shifted slightly to give additional clearance between the filter body and the crankcase for easier filter installation and removal
- Also machined to make it easy to install an oil cooler in the pressure-side of the system; if a cooler is not needed, simply install the pipe plugs in the threaded holes in the filter bracket, instead of the hose fittings

OIL FILTER ADAPTERS WITH THERMOSTAT

- Automatic thermostatic oil bypass valve allows oil to bypass the oil cooler until reaching operating temperature for faster vehicle warmup times
- Flows oil through the filter first for better flow
- Stock-to-Jagg oil filter nipple is required when converting from stock H-D oil filter adapters to Jagg oil filter adapters; available separately
- Required for oil cooler installation on Twin Cam models
- Optional anti-rotation device for PART #0713-0271 bolts to face of offset oil filter adapter to lock in place during future oil filter removals; available separately
- Service kit for PART #0713-0145 includes two replacement quad-seal O-rings

PART #	DESCRIPTION

VISCOSITY REGULATED FLOW ACTUATOR KIT

- Replaces thermostatic actuator element in offset oil filter adapter PART #0713-0271 with new Viscosity Regulated Flow (VRF) actuator
- After filtration, the oil may either travel to the oil cooler or bypass the oil cooler, according to the built-in Viscosity Regulated Flow (VRF) plug function - cold, viscous oil will bypass the oil cooler, speeding warmup to standard operating temperature; as the engine reaches operating temperature and oil reaches optimal viscosity range, the VRF plug will keep the adapter's bypass hole closed, sending hot, filtered oil to oil cooler, and delivering cool, clean oil to engine
- Includes viscosity regulated flow plug, spring, button head with O-ring and gaskets

OIL FILTER ADAPTER

- Installs between the oil filter landing and the oil filter for easy oil supply access for installing an oil cooler (not included)
- Machined from anodized billet aluminum
- Flows oil through oil cooler full-time, with no oil bypass
- Sweeping internal flow passages produce optimal flow characteristics
- ProLine swivel fittings for easy oil plumbing
- HyperFlow technology balances performance and flow
- NPT port and plug for optional installation of sending unit or switch

HIFLOFILTRO

OIL FILTERS

- The original Hiflofiltro factory was founded in 1955 and has been manufacturing filters for the OEM motor industry since 1963
- With the experience of more than five decades, constant research and development and featuring a completely modern production facility, Hiflofiltro offers some of the best quality filters in the world
- Monitored production to ensure OEM or better quality
- Constructed using the best materials available
- One of the broadest ranges of aftermarket coverage

PERFORMANCE OIL FILTERS

- Heavy-duty steel casing features a pre-drilled welded hex nut for easy removal and installation
- Performance filters feature premium high flow tri-fiber filtration media which stops more contaminants from reaching critical engine components
- Racing technology engineered for everyday use and standard service intervals
- Fully compatible with all oil types

K&N

PERFORMANCE OIL FILTERS

- K&N® delivers a premium oil filter which is built with a synthetic media specifically designed to withstand the high concentrates of synthetic racing oils
- A large filter media provides high-flow rates and outstanding oil filtration to keep your motor running clean and smooth
- Uniform pleated synthetic filter media provides high capacity and outstanding filtration
- Synthetic Media allows for the higher-flow rates associated with synthetic and synthetic blended oils
- Protected by a heavy-duty canister and baseplate, with a double-rolled seal
- Check-valve/anti-drain back valve prevents drain-back and dry starts (where applicable)
- Pre-lubed base gasket
- 17 mm hex nut (pre-drilled for safety wire security) allows easy-on, wrench-off removal (where applicable)

OIL FILTERS

- Sturdy steel canister houses the finest filtering media and internal components available
- Canister is slightly smaller in diameter than stock filters to make them easier to remove and install; O-rings included
- Designed with a direct bypass valve that routes bypass oil directly to the filter exit, which minimizes the amount of contaminants carried to the engine in the unfiltered bypass oil
- The nominal particle capture size is smaller than that of stock filters while the resistance to oil flow is nearly the same
- Includes drain plug O-ring with filter
- Sold each unless noted as 12-packs

DEEP CUT RE-USABLE OIL FILTER

- Constructed using billet aluminum with a black anodized finish
- Oil filter element is made from laser-cut 304 stainless steel medical-grade micronic cloth
- Filter catches items down to 35 microns, about three times better than traditional premium oil filters
- Filter maintains consistent flow under all conditions including extreme heat, presence of water, and cold starts
- Simple filter cleaning and service

FORCEFLOW CYLINDER HEAD COOLERS

- The perfect solution for those hot running Big Twin bikes
- The only cooling system made for Big Twin bikes that consistently reduces operating temperatures up to 38 °C (100 °F)
- High-tech, waterproof cooling fan pushes air around cylinders and cylinder heads
- Included temperature switch automatically turns the ForceFlow on at 60 °C (140 °F)
- At higher speeds, air is directed in through side scoop and around cylinder head and cylinder
- Built-in, quality OEM-type replacement horn included
- Easy plug-and-play installation with no drilling
- Includes Forceflow assembly with high-powered fan, horn, thermostat, coil relocation kit with plug wires, hardware and detailed instructions
- 110" motors require optional adapter mount (available separately)

NOTE: Not for Twin Cooled models with liquid cooled heads.

Jagg Oil Coolers

VERTICAL FRAME-MOUNT OIL COOLER KITS

Installation time measured in minutes
Extra riding time measured in years

- Cooler oil makes engines last longer – simple as that!
- Jagg oil coolers feature cutting-edge technology to keep your engine cool under the most punishing conditions
- And because they're designed to look as good as they perform, they'll perfectly complement your bike's style
- Hoses and clamps are included with oil cooler kits

Engineered to perform

- Multipass oil flow configuration ensures the oil's utilization of the entire oil cooler
- Specially designed turbulators in each oil passageway gently stir oil, exposing it to more critical heat dissipation surface area for superior cooling with minimal oil pressure restriction
- Highly concentrated mini-louvered air fins allow maximum heat transfer

NOTE: Vertical oil coolers do not fit touring models with lower fairings.

NOTE: Ten-row coolers are recommended for 95" and larger motors.

MANUAL OIL BYPASS VALVE

- Acts as a manual thermostat, allowing you to bypass the oil cooling system for cold-weather riding or for faster warm-ups on cool days
- Durable anodized billet aluminum construction
- Knurled grip knob
- Works with all oil coolers
- Compact in-line installation
- Service kit contains replacement O-rings, snap-ring retaining clip for manual bypass knob and spare decal

NOTE: If oil hoses between the oil cooler and the oil source are too short, the oil cooler bypass valve may not fit in the oil lines. Jagg bypass valves require at least 76 mm (3") of straight hose.

DASH COVERS AND DASH COVER SETS WITH SPEEDOMETER OFFSET

- Provides a clean, cool and flatter look on the tank and is required as a replacement for the original cover if the fittings are relocated to the headlight mask with our offset
- Cover is a 100% custom-fit ABS plastic part
- All bores and millings are milled on the most modern 5-axis CNC machining centers
- During assembly it is necessary to shorten the holder for the original dash cover and then holes have to be drilled - then the cover is attached with the new supplied bracket
- Dash covers available in raw paintable or gloss black
- Speedometers offsets are made from steel with a gloss black powdercoat
- Contains TEILEGUTACHTEN/German Parts Certificate
