ICON HELMETS

ICON HELMETS ARE THE CULMINATION OF OUR UNIQUE RIDER DRIVEN DESIGN

An aggressive style, combined with peerless engineering, has carved ICON a unique niche within the riding community. Our commitment to quality has won us the prestigious J.D. Powers customer satisfaction award, and accolades from riders the world over. Whether your riding includes blasting high-speed circuits, storming the dirt of Baja, or strafing pockmarked highways; there's an ICON helmet for you.

AIRFRAME PRO

The modern riding position - higher rear sets, lower clip-ons - has dramatically altered how a rider interacts with the modern hypersport motorcycle. Compressed into an ever more compact shape, the rider's head positioning requires increased angle to maintain visibility and stability. With this in mind, ICON designed the AIRFRAME PRO™.

VARIANT PRO

The VARIANT PRO™ showcases composite shells. Featuring a 3D molded shield and an aerodynamically optimized visor, it has a style all its own. From streetfighters to sportbikes to cruisers to ADV bikes, the VARIANT PRO™ is for those who ride outside the boundaries of convention. The VARIANT PRO™ is our premier all-terrain option.

AIRFLITE

A neo-retro glimpse into one possible future, the AIRFLITE™ is the vessel of your dreams. The visually-defining shield makes a statement on the streets while the helmet's versatility and customizable ability speak to the development and design. Remove the shield, replace it with the AIRFLITE™ peak, and the helmet goes from street to dirt in a matter of moments. Combine that with a recessed twin-channel cooling system, HydraDry™ comfort liner, sculpted neck-roll, and internal speaker pockets, and you get the ultimate street-style helmet.

AIRFORM

For almost two decades, ICON Motosports has come to define moto-street style. Proven design, comfortable fit, and superb quality for the maximum value, the AIRFORM™ helmet is an excellent entry point into the ICON family. Includes world-renowned HydraDry comfort liner, ventilation, and an inner DROPSHIELD for those rides that start before sunrise and end well after the sunset. Highly customizable for those who like to dial it in.

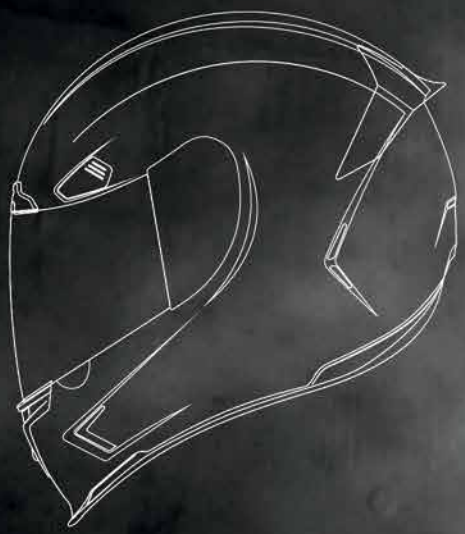

AIRMADA

The AIRMADA™ brings track level specs to the mid-price helmet category. Unique manufacturing processes allow for a significantly reduced shell size, thereby reducing both weight and drag. Its long-oval headform, a first in this category, offers a race fit while eliminating pressure points. The AIRMADA™ is an optimal choice for those wanting maximum performance at an attainable price.

Sometimes benevolent, mostly untamed, the Airform Lycan™ helmet feels the eternal pull of the moon (insert blood-curdling howl here). This wolf hybrid is a shape-shifting lunatic with raw, untapped animal power. Who knew a helmet graphic could be so omnipotent? We did, and that's why it's part of our pack.

NEW AIRMADA TL™ HELMET

Blacklights and rock 'n' roll desires, the things of teen basement lore. The mind-melting luminosity of the Airmada TL™ brings you back to those head-shoppy days of youth with a trippy palette of glow-in-the-dark paints. The giant winged chin only takes a back seat to its rear-facing eagle pilot. He flies from behind, allowing you to lead the pack.

HELMET FITMENT

CHOOSING THE CORRECT HELMET SIZE

Helmet fit is critical to helmet protective performance. The correct helmet size can only be checked and confirmed by physically fitting the helmet to the user. Always try the helmet on in a store, before purchasing it, to be sure you are purchasing the correct sized helmet for you.

HEAD MEASUREMENT INSTRUCTIONS

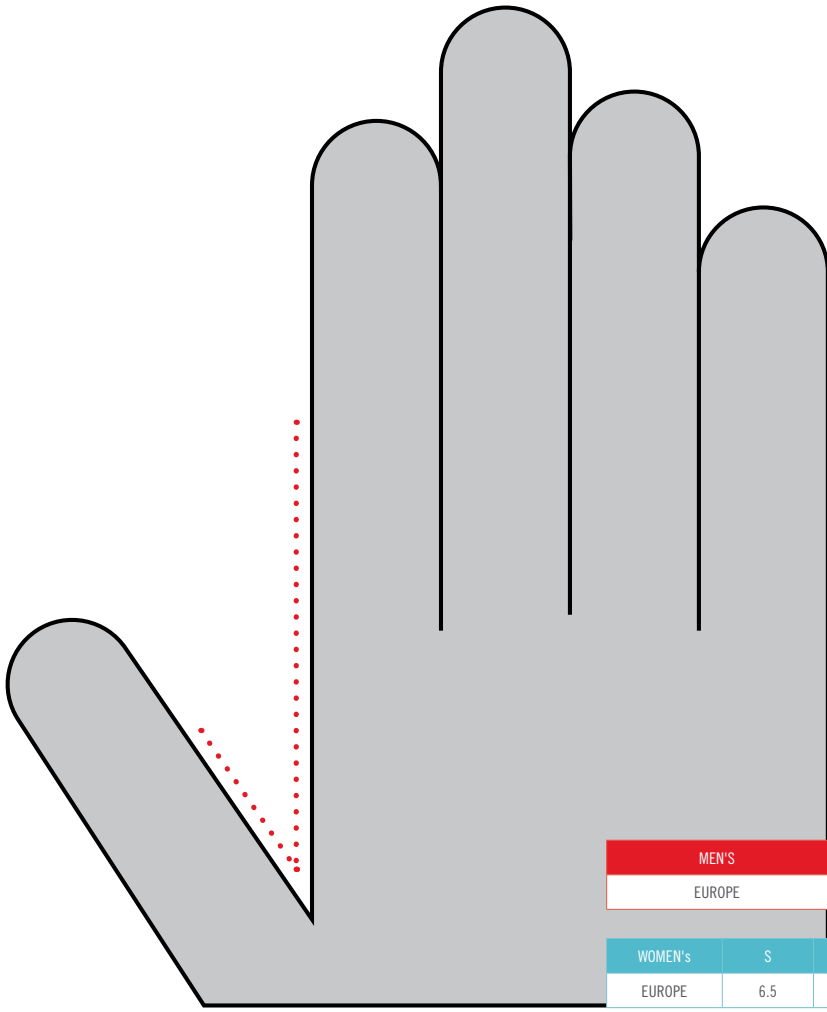

Wrap a flexible tape measure around your head approximately one inch above the eyebrows and ears. Use this measurement (in either inches or centimeters) to find your helmet size.

HELMET SIZING INFORMATION

To achieve proper helmet fitment, begin by finding your head circumference size using the method described below. Remember that the helmet size you choose should fit around the crown of your head comfortably with no pressure points. The cheekpads should fit firmly around your face. Once your chin strap is fastened, grab the chin bar of the helmet and move it side to side. Your cheeks should move with the helmet, which should not slide across your face. Different thickness cheekpads can be purchased to obtain the best fit. Ask your dealer or visit www.rideicon.com for more information.

When sizing your helmet please refer to the size charts that are unique to each helmet shell:

GLOVE FITMENT

HOW TO DETERMINE YOUR GLOVE SIZE

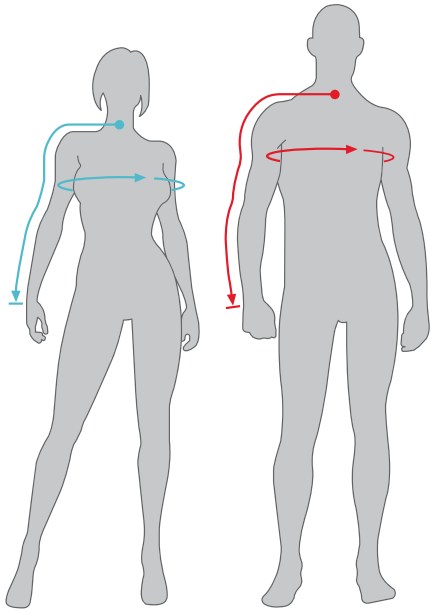

ICON glove size is determined by measuring the width of your palm at its widest point - a little below the knuckles. To get this measurement, place your hand on the page as shown with the crook of your thumb positioned at the “V” intersection of the two dotted lines and on top of the Men’s and Women’s measuring bars.

THIS CHART SERVES ONLY AS A GUIDE. TO ENSURE THE PROPER FIT ALWAYS TRY ON THE ACTUAL PRODUCT.
