# ICON HELMETS

---

ICON HELMETS ARE THE CULMINATION OF OUR UNIQUE RIDER DRIVEN DESIGN

An aggressive style, combined with peerless engineering, has carved ICON a unique niche within the riding community. Our commitment to quality has won us the prestigious J.D. Powers customer satisfaction award, and accolades from riders the world over. Whether your riding includes blasting high-speed circuits, storming the dirt of Baja, or strafing pockmarked highways; there's an ICON helmet for you.

## AIRFRAME PRO

The modern riding position - higher rear sets, lower clip-ons - has dramatically altered how a rider interacts with the modern hypersport motorcycle. Compressed into an ever more compact shape, the rider's head positioning requires increased angle to maintain visibility and stability. With this in mind, ICON designed the AIRFRAME PRO™.

## VARIANT PRO

The VARIANT PRO™ showcases composite shells. Featuring a 3D molded shield and an aerodynamically optimized visor, it has a style all its own. From streetfighters to sportbikes to cruisers to ADV bikes, the VARIANT PRO™ is for those who ride outside the boundaries of convention. The VARIANT PRO™ is our premier all-terrain option.

## AIRFLITE

A neo-retro glimpse into one possible future, the AIRFLITE™ is the vessel of your dreams. The visually-defining shield makes a statement on the streets while the helmet's versatility and customizable ability speak to the development and design. Remove the shield, replace it with the AIRFLITE™ visor, and the helmet goes from street to dirt in a matter of moments. Combine that with a recessed twin-channel cooling system, Hydradry™ comfort liner, inner DROPSHIELD, sculpted neck-roll, and internal speaker pockets, and you get the ultimate street-style helmet.

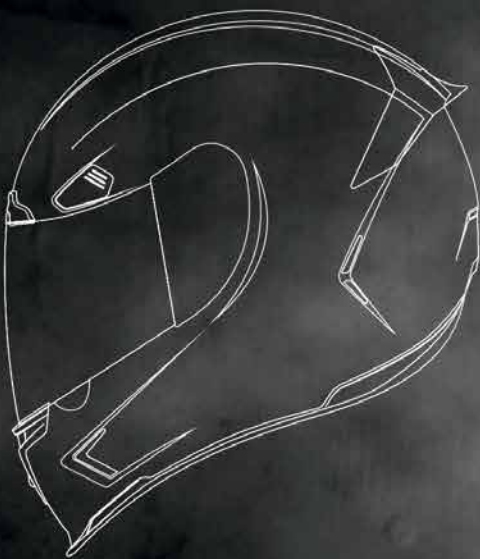

## AIRFORM

For almost two decades, ICON Motorsports has come to define moto-street style. Proven design, comfortable fit, and superb quality for the maximum value, the AIRFORM™ helmet is an excellent entry point into the ICON family. Includes world-renowned Hydradry™ comfort liner, ventilation, and an inner DROPSHIELD for those rides that start before sunrise and end well after the sunset. Highly customizable for those who like to dial it in.

**SAFETY WARNING:** Riding a motorcycle is a dangerous activity. No helmet can protect a wearer against all possible impacts. When riding, always wear a helmet, eye protection, protective clothing, gloves and boots. There is no assurance that serious injury or death can be avoided even if you wear a helmet. Take all precautions to avoid every risk when riding a motorcycle. This helmet is not meant for use as a fire retardant product and does not contain any fire retardant materials. Please ensure that your ICON® products fit properly. Improperly fitting products can impair your ability to control your motorcycle.

AIRFORM DEATH OR GLORY™  
HELMET

INCLUDES CLEAR & RST SILVER ICON OPTICS™ SHIELDS  
INCLUDES DARK SMOKE DROPSHIELD™

Somewhere around 2008, things went sideways. Opulent painted fat tires and \$30K hardtails gave way to hacked together CX500s, and BMW airheads became cool. It wasn't good. Thankfully, ICON maintained its course through these troubled waters and emerged, still flying our magnificent skull standard. The Airform Death or Glory™ is a throwback Thursday to those easy-refi chopper days. This time around the Death or Glory™ ships with a Silver RST ICON Optics™ shield, dark smoke Dropshield™, removable Hydradry™ liner, and enough skullage to forever cement us in the pantheon of protective ossuaries.

The jacket comes fully loaded with a full suite of D3O® impact protectors (shoulder, elbow, back). Laser perforated zones and zippered vents provide increased airflow necessary on hot days. # MIL-SPEC 2™ VEST

ICON MOTOSPORTS

It's never a bad idea to stack the deck in your favor, and the MIL-SPEC 2 vest stacks it with three different hi-visibility options. Form-fitting and breathable, the 4-way stretch poly chassis allows the vest to be worn over your riding jacket, working with its existing vents. The snug performance fit eliminates wind flap, unlike the plastic safety vests of yesteryear. Engineered with the goal of "visual conspicuity," its HiViz body is paired with retro reflective side and back paneling to aid in being detected in low-light conditions. See and be seen in the MIL-SPEC 2.

# FIELD ARMOR 3™ VEST

ICON MOTOSPORTS

When we first designed the Stryker™ vest, we didn't know it would become the de facto uniform of sportbike riders worldwide. We were designing gear for the most at-risk riders, you and us. After years in the ICON lineup, the time had come to update, so we went back to the drawing board and reworked a classic to bring you the rider developed Field Armor Vest™. Vented bio-foam and air mesh chassis are paired to an articulating injection molded shell with airflow channels, keeping you cool and comfortable when it's hot and not. The D3O® chest and back impact protectors provide industry-leading impact absorption. Elastic and hook & loop straps help ensure a snug fit over multiple body sizes, while the low-profile form factor fits easily under most jackets. We're paying homage to our past by looking to our future.

Every sublimation tells a story don't it? In this case, that story is some questionable Kanji, a considerable number '20' to celebrate or anniversary, and random things that Kurt says. Thankfully we added giant logos and just enough yellow to cause hesitation.

# HELMET FITMENT

## CHOOSING THE CORRECT HELMET SIZE

Helmet fit is critical to helmet protective performance. The correct helmet size can only be checked and confirmed by physically fitting the helmet to the user. Always try the helmet on in a store, before purchasing it, to be sure you are purchasing the correct sized helmet for you.

## HEAD MEASUREMENT INSTRUCTIONS

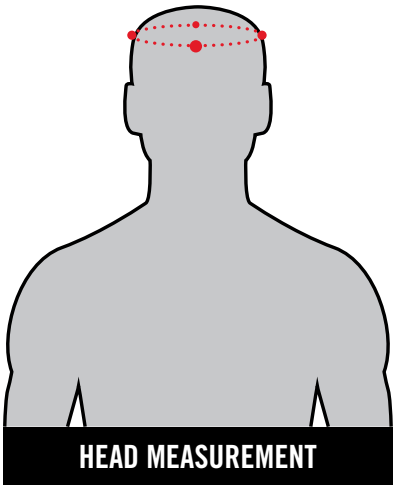

Wrap a flexible tape measure around your head approximately one inch above the eyebrows and ears. Use this measurement (in either inches or centimeters) to find your helmet size.

## HELMET SIZING INFORMATION

To achieve proper helmet fitment, begin by finding your head circumference size using the method described. Remember that the helmet size you choose should fit around the crown of your head comfortably with no pressure points. The cheekpads should fit firmly around your face. Once your chin strap is fastened, grab the chin bar of the helmet and move it side to side. Your cheeks should move with the helmet, which should not slide across your face. Different thickness cheekpads can be purchased to obtain the best fit. Ask your dealer or visit [www.rideicon.com](http://www.rideicon.com) for more information.

When sizing your helmet please refer to the size charts that are unique to each helmet shell:

- AIRFRAME PRO: SEE PAGE 2
- VARIANT PRO: SEE PAGE 8
- AIRFLITE: SEE PAGE 14
- AIRFORM: SEE PAGE 32

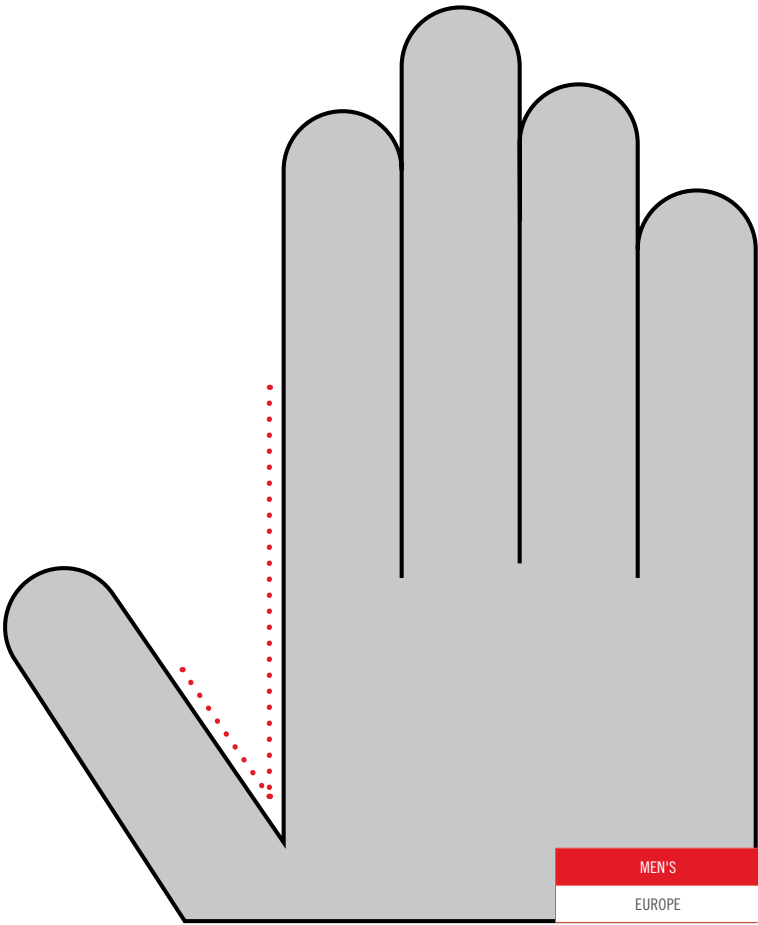

# GLOVE FITMENT

## HOW TO DETERMINE YOUR GLOVE SIZE

ICON glove size is determined by measuring the width of your palm at its widest point - a little below the knuckles. To get this measurement, place your hand on the page as shown with the crook of your thumb positioned at the "V" intersection of the two dotted lines and on top of the Men's and Women's measuring bars.

THIS CHART SERVES ONLY AS A GUIDE. TO ENSURE THE PROPER FIT ALWAYS TRY ON THE ACTUAL PRODUCT.

## JACKET FITMENT

### JACKET SIZING INFORMATION

There are three variables to consider when sizing an ICON jacket. The first two are the chest and sleeve measurements, which are what your jacket size is based on. The third is the jacket fit type, which defines the “cut” of the jacket (Attack, Sport, or Relaxed). Instructions, sizing charts and jacket fit details can be found below. The fit type of every ICON jacket can be found in the first bullet point of the copy block for that individual product.

### CHEST MEASUREMENT INSTRUCTIONS

While standing with your arms relaxed at your side, wrap a flexible tape measure around your chest at its largest point. The tape measure should go through your armpit and stay parallel with the floor while taking the measurement.

### SLEEVE MEASUREMENT INSTRUCTIONS

While standing with your arms relaxed at your side, place one end of a flexible tape measure on your spine at the base of your neck. Measure over the top of your shoulder, down over the point of your elbow, and finish at the wrist bone.

## PANT FITMENT

### PANT SIZING INFORMATION

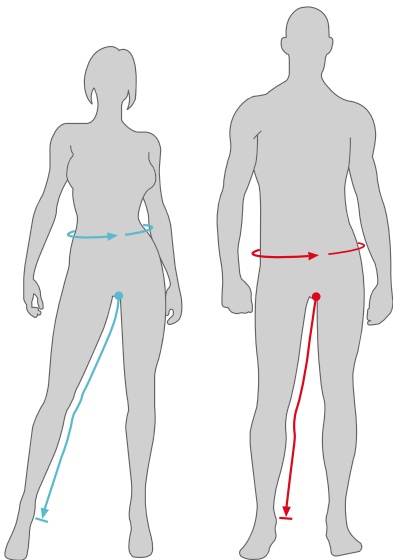

There are three variables to consider when sizing ICON pants. The first two are the waist and inseam measurements, which are what your pant size is based on. The third is the fit type of the pant. Measurement instructions and sizing charts can be found below. The fit type of every ICON® pant can be found in the first bullet point of the copy block for that individual product.

### WAIST MEASUREMENT INFORMATION

While standing in a relaxed position, measure around your natural waistline, while keeping the tape measure parallel to the floor.

### INSEAM MEASUREMENT INFORMATION

While standing in a relaxed position, measure the total length of the inside of your leg, from crotch to ankle.
