Bobblehead [bob-uh l - hed]

Verb

A repeated, jerky movement due to riding without a Flare™ Windshield.

WATCH FOR #BRIANTHEBOBBLEHEAD THROUGHOUT THE CATALOG!

He's here to give you hints and info about Klock Werks parts!

#BRIANTHEBOBBLEHEAD

As we brought our original and patented Flare™ Windshield to events and rallies with our "Try It Before You Buy it" test ride program, the same response was heard over and over again. Riding with the Klock Werks Flare™ Windshield got rid of their head buffeting or "bobbling". Next thing you know, the idea of a Brian Klock bobblehead took off.

The Brian Klock bobblehead is a LITERAL representation of the "Bobblehead Syndrome" riders experience when riding with any windshield other than a Klock Werks original and patented Flare™ Windshield. Symptoms include: buffeting, stiff neck, blurred vision, bugs in their teeth, trouble hearing from wind hitting their ears, etc.

Look for #brianthebobblehead throughout our catalog to offer you some tips and more information about our products. We're sure you will see him on social media, traveling with Klock Werks Ambassadors, and of course Team Klock Werks to all sorts of events, rallies, and places in a galaxy far, far away to educate riders. You may even see him pop up on a dealership parts counter near you!

Flare™ Windshield. Eliminating bobblehead since 2006.

COMMITMENT

BRIAN KLOCK, PRESIDENT
FOUNDER AND LEAD GEAR HEAD

When its time to do a new catalog again and I'm called on to reflect on 18 years in business, it leaves me wondering where to begin. Going way back, I remember learning to ride on a green 1971 Honda QA50 in the small town of Emery, South Dakota (pop. 384) where I grew up. Great memories! My love for motorcycles started at a really young age, so I guess it's no surprise I am where I am today. Laura continues to lead her Helping with Horsepower™ charitable efforts, Karlee works at Klock Werks full time, and we are one fast family on the salt flats!

It is because of YOU - the customers and friends we have met over the years that we get to share our passion with - that any of it matters. It is because of you that we strive so hard to design and build the best parts your hard earned dollars can buy. From accurate fitments, to coating and material choices, we stake our reputation with you on it and never short cut on quality.

We will continue to innovate on the bikes we build to develop even more parts that are available to YOU to kustomize your own ride. Please continue to share your experiences and photos with us! And if you're passing through Mitchell, South Dakota, just stop in! We'd love to give you a tour.

Thank you for choosing our brand, our family, and to ride with us.

BKlock

DEDICATION

DAN CHEESEMAN, C.O.O.
KLOCK WERKS FIRST EMPLOYEE

When we started Klock Werks - 18 years ago to be exact - we set out to build the smoothest, sleekest custom motorcycles on the face of the planet. There were plenty of other shops building customs at that time, but we set our brand apart by not only making our bikes look great, we dedicated ourselves to making them function as well as they looked. It didn't take long before we realized that while simply building great bikes was our focus at the outset, Klock Werks had grown into more than that. It had grown into a set of ideals. It was Family. It was Customer Service second to none. It was unmatched Quality. Klock Werks had grown into something we were all very proud to be a part of. Something that I literally wear on my sleeve.

Now as the focus of our company has shifted from simple beginnings and cool customs into the expansive Klock Werks Brand parts line that graces these pages, one thing has always remained: Dedication. We are still family. We still offer the best customer service. And we assure unmatched quality by utilizing AMERICAN MANUFACTURING.

Thank you for being part of the Klock Werks family. I hope that you enjoy using our products as much as we enjoy producing them.

at Bonneville
Salt Flats.

The FLARE™
Windshield is
designed and
tested then
wins product of
the year, twice.

THE STORY OF THE FLARE™

Not 3 weeks after winning the Discovery Channel's Biker Build Off in 2006, Klock Werks found themselves at the Bonneville Salt Flats with the winning Bagger and Laura Klock as the pilot. In the first 2 passes she rode to a National Land Speed Record. Reporting a lift in the front end as she increased speed with a stock windshield, Klock Werks set out to design a windshield that would make the bike more stable at high speeds.

Starting simply, Brian held his arm out the window while driving, testing airflow with his hand held in different positions to figure out how to add downforce. From there a prototype was designed, and the Flare™ Windshield was born. After extensive planning and testing, including an incredible opportunity to test the design in Nascar Country at the A2 Wind Tunnel in Mooresville, NC, the Flare™ Windshield is now available to you!

FLARE™ WINDSHIELDS

INSTRUCTIONS, AND MORE!

FLARE™ WINDSHIELDS

The **Flare™ Windshield** was developed at Klock Werks out of a desire and need for stability at highway speeds and for racing on the Bonneville Salt Flats. The Flare™ is the ORIGINAL windshield of its kind, and has surprised riders everywhere with not only how great it looks, but also with how well it performs. The innovative design features "hips" at the outer edge of the shield that re-route the air to add downforce to the front of the bike. This creates stability superior to riding with a stock shield. The "flip" at the top of the Flare™ is designed to kick the air up and back as "clean", less turbulent air for the rider and passenger. Made from hard-coated polycarbonate material for added durability. Made in the USA.

NAVBag FOR 96-13 FLH

The NAVBag from Klock Werks is a multi-functional windshield bag designed to work with Klock Werks 96-13 H-D Flare™ Windshields, 6.5" and taller. Also fits stock and most aftermarket windshields on H-D and other "batwing" style fairings. This innovative water resistant bag features a powerful magnetic closure and a special compartment that securely displays your GPS, cell phone, MP3 player or other device behind a protective screen. The screen is capable of transmitting the electrostatic energy necessary to operate most touch-screen devices. The NAVBag has a soft felt back to resist scratching your windshield and comes complete with EVA Foam inserts to custom fit your device, dual accessory cable ports, and a large storage capacity for your personal items. Storage capacity is comparable to many 3-pouch bags in one convenient package. Display window measures approximately 3-7/8" x 2-1/2"; 4-1/2" diagonally.

FLARE NUTS FOR 98-13 FLTR

Klock Werks Flare™ Nuts are designed to replace the factory windshield mount well nuts on all 1998 through 2013 Road Glide models.

We all know factory well-nuts are prone to failure after a few uses. Klock Werks Flare™ Nuts are manufactured out of a superior material and have a revolutionary design, including a metal washer molded into the flange to prevent the well nut from pushing through the windshield mounting hole and ending up inside your fairing. In addition, we've added a superior brass threaded insert that tightens the well-nut, but allows for continuous installation and removal. These advantages ensure these are the last set of well-nuts you will need for your Road Glide!

SPORT FLARE™ FOR 2015+ FLTR

The Sport Flare™ is more streamlined and offers radical curves and a sportier stance. It compliments the lines of the new fairing with a more aggressive profile, and aids stability and handling with improved air management. Still awesome for the long haul, definitely kool for showing off your ride.

JOE SPARROW

If you happen to see Joe Sparrow's Gold Wing in a parking lot, it will be readily apparent that the bike gets a lot of use — Iron Butt "1,500 miles in 24 hrs" license plate frame, two GPS units, extra clocks, HID lights custom mounted under the mirrors, travel stickers from everywhere on the trunk — but what might catch your eye is the hand-written reminder on the dash: "Change oil @ 429,000."

Joe works for J&P Cycles, going to rallies around the country, setting up the tractor-trailer-hauled display booth, and helping explain and sell motorcycle products. Joe is also a great friend to Klock Werks. Since he is absolutely a long distance rider, Klock Werks called on Joe to test the new Flare™ Windshield for Honda Gold Wing, because we knew he'd give us his honest opinion. Thankfully, he loves it. The Flare™ is now a permanent fixture on this interesting Gold Wing, and Klock Werks has gone so far as to create a custom decal for the front of his bike, so that he can update the amount of miles he's ridden as he knocks them down.

So if you're attending a motorcycle rally this summer, seek out the J&P Cycles booth and look for Joe Sparrow. He's friendly, funny, and he'll give you his opinion about Klock Werks Flare™ Windshield for Honda Gold Wings. Just don't try and brag about your own Honda with 183,000 or 259,000 miles on it. He won't be impressed.

THE NEW STANDARD IN TOURING COMFORT

Not only does the Flare™ Windshield look great, it performs even better. Our innovative design features "hips" at the outer edge of the shield that re-route the air to add downforce and aid stability. The "flip" at the top sends clean, less turbulent air to rider and passenger.

Made from hard-coated polycarbonate for outstanding impact strength, and available in a variety of heights and colors for many models.

THE ULTIMATE IN RIDER COMFORT AND ADJUSTABILITY.

No two riders are the same. Klock Werks innovative, machined “Klamps” allow the control/grip portion of the KlipHanger HandlebaR to be positioned exactly where you want your wrists to be, and then locked into place with the same technology used with clip-on race bars. The manufactured bar portions are 1” or 1-1/4” DOM tubing, drilled/slotted for internal wiring, and work with heated grips. Bars are offered in several heights to fit a wide range of preferred riding positions, and come in chrome, black and raw combinations. KlipHangers truly are the ultimate in personal choice! Chrome hardware, chrome billet aluminum dome bar end caps, and complete installation instructions included.

ERGO BARS

FOR A MORE RELAXED AND COMFORTABLE WRIST POSITION.

Ergonomically correct wrist position not only reduces stress to your wrists, but may help reduce that pinched feeling between your shoulder blades after a day of riding! Klock Werks ERGO Bars are offered in three different styles to cover a large range of riders and preferred riding positions. ERGO bar options are designed specifically to adjust your wrist to a more natural relaxed position, vs. riding with stock bars. ERGO bars accept stock controls/housings, and are predrilled and slotted for internal wiring. They are designed to work with stock length cables, wires and heated grips.

THE DIFFERENCE IN WRIST POSITION

Ergo Bars have been designed specifically to have a more relaxed, comfortable wrist position.

THE DIFFERENCES IN HEIGHTS

Various heights have been designed to fit every riding style.

MENTELE BARS

1-1/4" Mentele Bars are a narrower, more comfortable alternative to beach bars, that still provide a thicker, classic look. The King Mentele Bars are specifically designed to fit the dimensions of the Road King gas tank but are also an option for you Softail riders looking for a slightly wider bar.

When used on a Road King they work with stock length cables and stock controls. All Mentele bars are slotted for late-model style controls, predrilled for internal wiring and notched for Throttle By Wire applications. Choose from black powder-coat, chrome or raw finish. Made in the USA.

A SPECIAL STREET GLIDE SPECIAL

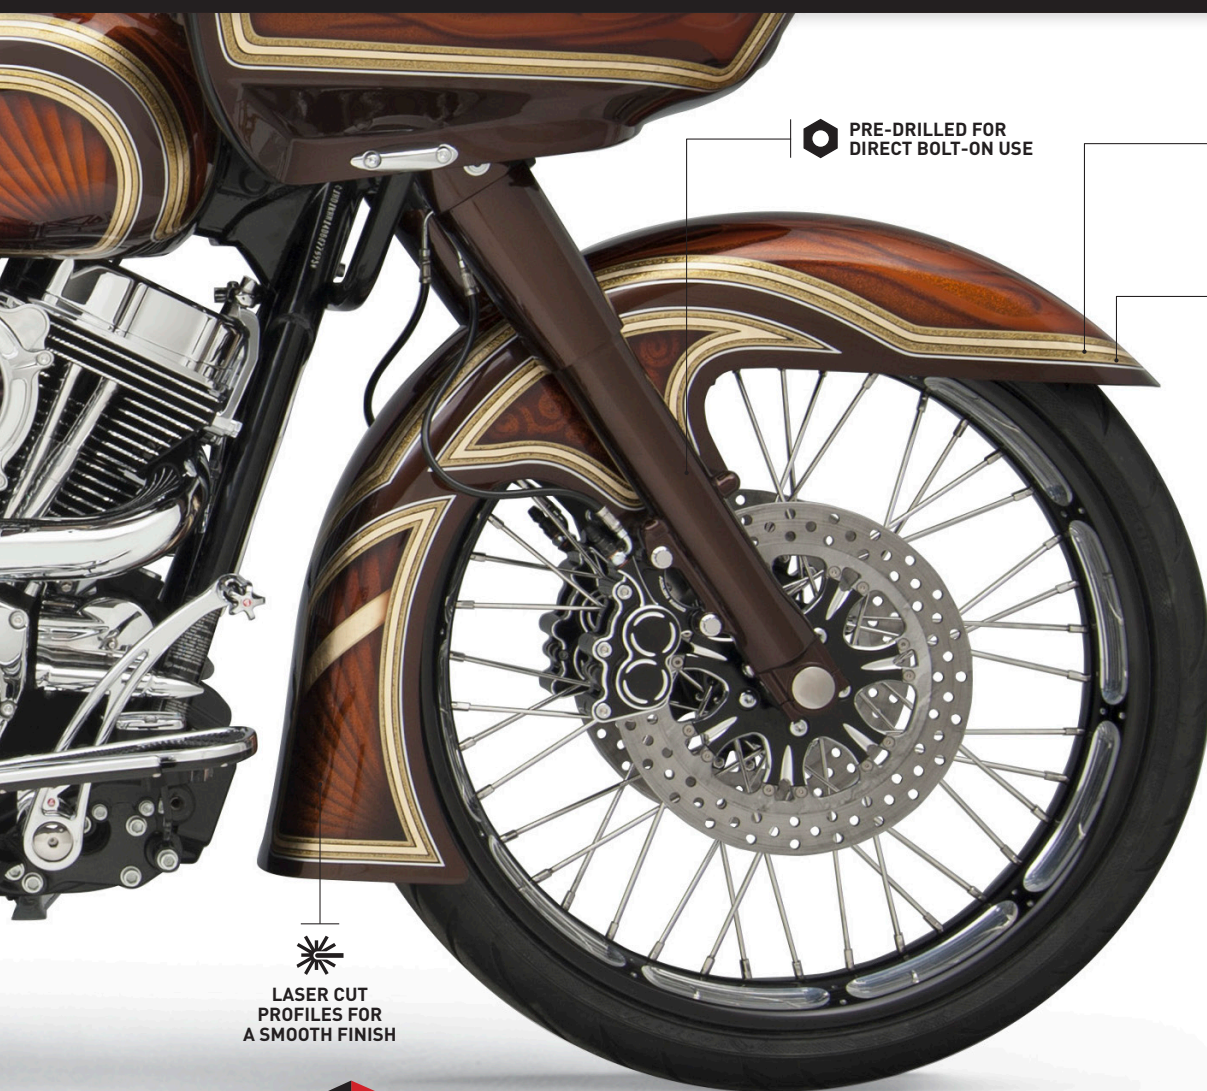

Klock Werks thanks Chris Weber for the use of his bike! Chris and Klock Werks go way back. Chris actually worked with the Klock Werks team a number of years ago before he began Pico's Garage, Inc. in Sioux Falls, SD, and set out on his own. The teams remained friends, and after Chris secured one of the first camo suede 2014 Street Glide Specials to hit the showroom floor, he contacted Klock Werks to see what Klock Werks Brand parts would fit his new 2014!

The teams quickly identified and fit a parts list, and through the process, the 2014 Flare™ Windshield fitments were developed and finalized, 2014+ front fender blocks made, and the kustomized bike you see here was put together.

Both teams work with Brad Smith at thefactorymatch.com, so the new parts were painted to match the factory color.

The result: this extra special Street Glide Special!

E-COATED TO PREVENT
RUST AND CORROSION

LASER CUT
PROFILES FOR
A SMOOTH FINISH

PRECISION, DEEP-DRAW
STAMPING TECHNOLOGY

When you buy a fender from Klock Werks, you can count on quality and accurate bolt-on fitment. To make installation even easier, some of our fenders are packaged with mounting blocks and hardware in one box. Look for the FIT KIT logo!

In the **FRONT FENDER FIT KITS** we include:

- 1 Stamped Steel Front Fender
- 2 Chrome Billet Aluminum Mounting Blocks
- 3 All Necessary Hardware

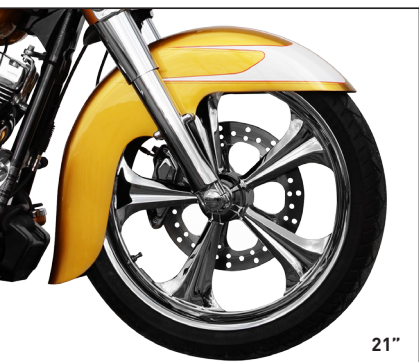

SOME FRONT FENDER INSTALLATION REQUIRES USE OF MOUNTING BLOCKS. IF YOU ARE NOT BUYING A FIT KIT, MAKE SURE YOU HAVE THE RIGHT MOUNTING BLOCKS.

STAMPED STEEL FRONT FENDERS

Changing your front fender is an easy way to add some personal style! The Klock Werks design team has put together great options ranging from traditional bagger style, to tire hugging options, to one-piece front fenders for big wheel bagger projects.

All of Klock Werks Front Fenders are stamped from 14 gauge steel using precision, deep-draw stamping technology that ensures a consistently smooth and flawless finish, minimizing bodywork. Laser cut using 5-axis laser technology to ensure accurate fitment for direct bolt-on installation. Klock Werks then goes the extra mile to add e-coat, a process to prevent rust and corrosion. Painters love Klock Werks Fenders and you will too!

BENCHMARK STYLE FRONT FENDERS

Traditional bagger style without the factory rivets. Benchmark Style Front Fenders offer rivetless smooth sides, an extended (1-1/2") rear tail, and a lower profile than your stock fender. The 14 gauge stamped steel is rigid enough to act as a fork brace. Benchmark fenders are 6-1/2" wide with fitments available for 16, 17", 18", 19" or 21" wheels. Fit up to 140 series tire.

Installation requires use of front fender mounting blocks on some models. Some fitments are available as FIT KITS.

BIG WHEEL STEEL FRONT FENDERS

When you choose to put that big wheel on your bagger, it will draw attention to the front of your bike, making your fender choice even more important! Klock Werks Big Wheel Steel Front Fender options for your 23" or 26" front wheel with raked neck and tree setups offer the right lines that flow correctly around a big wheel. A slammed stance, perfect spacing, rivetless smooth sides, and stretched rear sections define big wheel style. These ONE PIECE stamped steel fenders are 6-1/2" wide, and come ready for paint. Bolt right on to make your big wheel look bad ass!

TIRE HUGGER SERIES FRONT FENDERS

If you'd like to step away from traditional "full coverage" fender style, take a look at our Tire Hugger Series Front Fender options. Designed to hug your tire closely and let you show off your wheel, these direct bolt-on replacement fenders will dramatically change the look of your bike. Pick a style, send it to paint, bolt it on! The use of 5-axis laser cutting ensures accurate fitment, and the stamped steel with e-coat minimizes any need for bodywork and continues to resist rust and corrosion even after it's painted. We love it when something so simple can make such a big difference, and we think you will too.

Installation requires use of front fender mounting blocks on some models. Some fitments are available as FIT KITS.

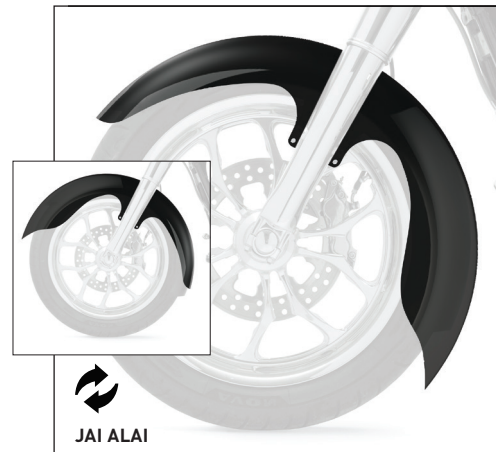

TIRE HUGGER SIZING CHART

WHEEL SIZE	DESCRIPTION
16" / 17" / 18" / 19" Front Wheel	Measures 6.25" outside width and will accommodate a 130 series tire.
21" Front Wheels	Measures 5.875" outside width and will fit the current 120/21 series tire on 3 1/2" wide rims.
The Skinny 21"	The Skinny 21" measures 4 1/2" outside width and will fit models listed with the stock narrow rim and tire up to 100/100-21.

THESE FENDERS ARE REVERSIBLE AND WERE DESIGNED TO BE USED BOTH WAYS.

Flip the fender for two distinct styles.

THE ONE REAR FENDER

Klock Werks stamped steel rear fender with integrated bag/fender filler panels is "THE ONE" you've been waiting for! The one piece combination eliminates the need for separate rear fender and filler pieces, making installation simple while offering a seamless, smooth rear option for your bike.

THE ONE offers perfect spacing, lining up with 09+ rear top strut covers, and can be used with stretched or stock length bags. Integrated filler panels are 100% TIG welded to the fender. THE ONE accepts all stock detachable mounting hardware/brackets and comes pre-drilled with mounting holes.

STAMPED STEEL

MADE IN THE USA 

STAMPED STEEL REAR FENDERS

All Klock Werks Rear Fenders are stamped from 14 gauge US Steel and e-coated to prevent rust and corrosion. The use of precision deep-draw stamping technology ensures a consistent flawless finish that minimizes body work. All mounting holes are pre-cut using 5-axis laser technology for accurate fitment and bolt-on ease.

SOFTAIL DASH AND IGNITION RELOCATION KIT

Here's an innovative kit that gives your Softail a more streamlined, smooth, show finish. It visually increases length of tank without actually stretching it.

The Klock Werks Stainless Steel dash has a raw finish and fits stock-length Softail tanks. The kit reuses stock ignition switch and key; ignition switch mount replaces the horn mount and requires horn relocation. The ignition switch relocation mount is CNC-machined from T-6061 aluminum, show chromed, is easy to install and uses factory wiring. All necessary mounting hardware is included.

FOR 00+ FXST • FLST MODELS (EXCEPT FXS, FXSTD)

Ignition Switch (Mount Only)	2106-0074

MADE IN THE USA

TUCK-IT BRACKET OIL COOLER RELOCATION

Tuck-It Oil Cooler Relocation Bracket allows you to easily move your stock oil cooler and cover back and closer to the frame. For use with long, low front fender applications where extra clearance is needed. Perfect solution for bikes with 23" wheel and raked trees. Tuck-It is made from stainless steel, making it easy to polish, powder coat, paint, or leave raw without worry of rusting. All necessary hardware included. Trimming of plastic oil cooler cover is required. Complete instructions and trim template included.

FLUSH-MOUNT FRONT AXLES

Great style and great strength. Klock Werks' Flush-Mount Front Axles are made from stress-proof steel that is two to three times stronger than stock and is black-nitrate coated for superior corrosion resistance. Also features polished stainless steel end caps for added longevity. Caps can be powder coated if desired. Easy to install.

UPPER FILLERS

All eyes will be on the rear of your bike when you choose Klock Werks Upper Fillers. These 16-gauge steel fillers have an E-coat finish (ready-to-paint) and mate up to Klock Werks Lower Fillers or the stock panels on Street Glides, accenting the line of your fender and hiding clutter for a custom look. Upper Fillers are available in two versions: a smooth version for models with or without detachable backrests, and a slotted version for models with detachable Tour-Pak®. Eliminates stock license plate mount bar. All are sold in pairs and include all necessary hardware and instructions to install them.

OVAL LED TAILLIGHT

This light is CNC machined from 6061 T-6 billet aluminum with a chrome finish, smooth recessed lens and internal prism. It features bright LED light for safety and function but generates virtually no heat, uses little power and lasts longer. Your light comes fully assembled with detailed instructions including color-coded wiring for easy installation and all stainless hardware and zinc-plated mounting brackets are included. The low-profile body (2-5/8" x 5-3/8") with an 1-1/4" total thickness means installation requires a mere 1-1/2" behind the body panel for mounting and protrudes less than 3/16" from the outside of body panel. The weld-in light ring is designed to add stabilization, ease installation, and highly recommended.

DESCRIPTION	PART #
Oval LED Taillight	2010-0585
Weld-in light ring for flush mounting	2010-0605

SPADE LED TAILLIGHT

Make your bagger look 100% cooler by installing this awesome spade shaped light with super bright LED's that function as taillight and strobing brake light. Machined from 6061 T6 billet and beautifully chrome plated. Simple bolt-on installation for surface mounting on any FLAT surface. Can also be flush mounted by welding in a Klock Werks Spade TailLight Weld-in Pocket, sold separately. Can be installed either way! Spade Taillights can also be used as turn signals if TWO or more lights are used.

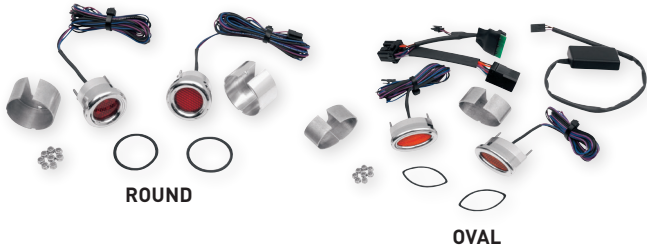

DESCRIPTION	PART #
Spade LED Taillight	2010-1198
Weld-in Light Ring for flush mounting	2010-1197

LED AUXILIARY LIGHT KITS

Designed to fit Klock Werks Lower Fillers, but go ahead and be creative as these can also be used as accessory lighting on saddlebags, fenders, or just about anywhere you have a flat surface.

High-quality dual-function LED lights use the latest in technology and come in complete enclosures with the necessary hardware to flush-mount to most surfaces. Kits include two chrome bezel lights, wiring, load equalizer, and plugs to install directly to OEM harness on most 97-08 models. They can also be adapted to work with any other year (plug and play for rear, some wiring required on some applications). Includes complete instructions for easy installation.

1.625" Diameter	Round Amber	2040-0415

THE OUTRIDER ONE WHO LEADS. FORERUNNER.

Following the Sturgis reveal of the new 2015 Indian Scout model, Indian Motorcycle chose select shops to customize a Scout. Klock Werks graciously accepted the opportunity, and decided the design lead should fall to their youngest team member: Karlee Cobb.

"My goal was to design something that looks completely customized, yet simple enough that someone could do something similar to their own Scout in their garage. I decided to go for the old-skool bobber look, and I think it turned out great! I've got a great team of friends and family in and around Klock Werks, and want to thank Indian Motorcycle for the chance to be one of the first to customize this historic bike!" says Cobb, of her project she calls "Outrider".

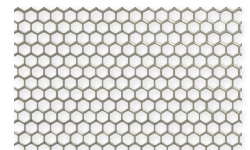

Klock Werks has developed several new "Outrider" series parts, named after their debut on this bike, and a few more! There is more to come, so watch our website and social media pages but for now, start planning the kustomization of your new Indian Scout.

THE KLOCK WERKS KREW

Since 1997, Klock Werks has tripled its employees, increased our Klock Werks Brand line of parts, and been blessed with many bike features in national and international magazines. Our team has set multiple national land speed records and made history on the Bonneville Salt Flats, received more awards, recognition, and attention than I ever dreamed possible. When I reflect however, it's really not about the accomplishments as much as what we've learned along the way. I will never forget our humble beginnings and all the people that had faith in me.

People "buy" from people. At Klock Werks we are proud of ours! True to our small town upbringing, we are committed to caring for our customers and providing products we are proud of as a team. You will find family and faith at the core in all facets of our daily lives, and we love to share our story with others. Stop by our shop for a tour when you pass through Mitchell, South Dakota. We welcome you to be part of our family and the Klock Werks brand!

B. Klock

DEALERS

We are proudly distributed by Drag Specialties / Parts Unlimited, so we can be found almost anywhere! Check with your local dealer for availability on the parts you see listed here, or simply contact us directly and we'll be happy to help! Don't forget to visit the Dealer Locator Page at www.KustomBaggers.com to find an official "Try It Before You Buy It!" Flare™ Windshield Demo location near you!!

If you are a licensed motorcycle shop or business operating in a retail capacity and are interested in becoming a Klock Werks dealer, please contact us directly for details on how to get setup. We are easy to work with and would like to welcome you to our family.

WARRANTY

If you believe you have a warranty related issue with a genuine Klock Werks branded part, please contact us immediately. We will be happy to replace the part with a new one if the conditions of our warranty policy are met. Klock Werks reserves the right to refuse any item we believe is damaged as a result of improper care. Please contact us directly for details on specific parts.

RETURNS & EXCHANGES

All items shipped back to Klock Werks must have a Return Authorization Number clearly displayed on the outside of the package. To request an authorization number simply email info@kustomcycles.com or call (605) 996-3700. Failure to request and display the RMA # properly may result in your package being refused.

All returns and exchanges are subject to a 20% restocking fee assessed at our discretion. Any request to return or exchange a product must be made within 30 days of purchase (proof of purchase required). Refunds will only be issued on parts that are 100% new and never been installed. Klock Werks reserves the right to refuse any item we believe is damaged as a result of improper care.

IMPORTANT

Careful thought and effort have been used to ensure accuracy in this catalog. However, mistakes can happen. Carefully test fit all parts prior to painting! Klock Werks will not be responsible for any painted parts, or assume any other liability due to an error in a parts listing.

All prices, descriptions, fitments, and availability of the parts listed in this catalog are subject to change at any time and without notice. Contact us directly for the latest information.
