NEW MIPS TECHNOLOGY!

HOW MIPS WORKS*

In a helmet with MIPS Brain Protection System (BPS), there is a Low Friction Layer that separates your head and the helmet. When a helmet with MIPS BPS is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both may affect the brain and increase the risk for minor and severe brain injuries. MIPS BPS has been scientifically proven to reduce rotational motion in certain impacts when implemented in a helmet by absorbing and redirecting rotational energies and forces that otherwise may be transferred to the brain.

S-M10 SUPERTECH

- Lightweight outer shell is constructed from technologically advanced composite materials in four sizes to ensure a superior fit
- Fitted with E-2, the latest generation of MIPS®, an integrated low-friction layer designed to reduce rotational motion transferred to the brain from angled impacts to the head
- Multiple-density inner helmet liner
- Visor is attached to helmet shell with patented system that allows easy release in case of an impact
- Two visors supplied with helmet
- Alpinestars patented A-Head adjustable-height top interior helmet pad height
- Superior ventilation system utilizes 19 intake and 5 exhaust ports
- Helmet side shell shape combined with soft EPP foam prevents damage to collarbone in event of crash
- Emergency release and removable cheek pads
- 3D contoured foam
- Removable comfort liner uses anti-moisture and antibacterial fabrics
- Hydration system prepared
- E-Ject prepared
- ECE 22.05 certified

SECTOR SPLIT

- The MIPS® Brain Protection System can reduce harmful forces transmitted to the brain for certain impacts
- Dual-density EPS liner features extensive venting
- Injection-molded polycarbonate/ABS shell
- Fully adjustable visor is vented to reduce lift
- Removable/washable moisture-wicking liner
- Flexible rubber nose guard helps deflect roost
- Hi-flow mouth vent with filter for air intake
- Rear shell shape easily repositions the goggle strap
- DOT and ECE 22.05 certified

F.I. FLANK

- Injection-molded polycarbonate shell
- Equipped with MIPS® Brain Protection System which can reduce harmful forces transmitted to the brain for certain impacts
- Multi-density EPS liner provides impact absorption
- Friction hinge visor adjusts and secures easily
- Nine intake and three exhaust vents provide ventilation
- Removable moisture-wicking liner and cheek pads
- Extra-large eyeport for excellent field of vision
- Removable nose guard provides coverage from roost
- DOT and ECE 22.05 certified

F.I. SESSION

- Helmet is equipped with MIPS® technology
- Multi-density EPS liner for impact absorption
- Injection-molded polycarbonate shell is lightweight, compact and strong
- Nine intake and three exhaust vents feed into the internal air visor is easily adjusted and secure
- Extra-large eye port for excellent field of vision
- Fully removable moisture-wicking liner and cheek pads
- Nose guard provides excellent coverage from roost and is removable
- Two shell sizes and two EPS sizes engineered for optimum fit
- DOT and ECE 22.05 certified

SUMMIT

- Injection-molded polycarbonate shell
- Built-in MIPS® brain protection system, which can reduce harmful forces transmitted to the brain for certain impacts
- Dual forehead, chin and rear exhaust vents increase airflow
- Removable moisture-wicking polyester liner and cheek pads
- Open flow mouth guard with aluminum mesh
- Breathbox, chin curtain and vent plug kit included
- DOT and ECE 22.05 certified
