[Hu'man-o-gy]

Lo studio e l'interpretazione di come l'uomo
e la tecnologia possono combinarsi.
Questa è la filosofia sulla quale si basa il
team R&D Premier per lo sviluppo dei nuovi
progetti.

*The study and interpretation of how Man
and Technology can be combined.
This is the philosophy on which the R&D
Team at Premier bases the development of
new projects.*

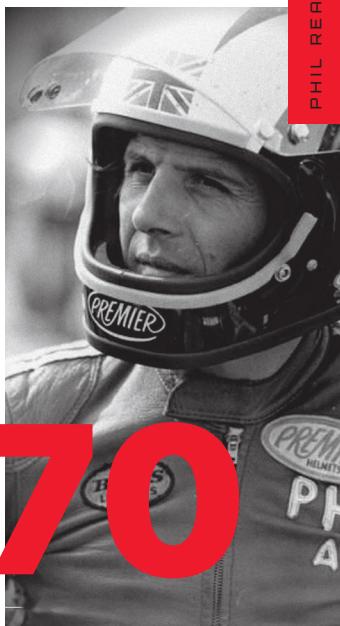

PASSIONATE ABOUT HELMETS SINCE 1956

L'avventura inizia nel 1956, quando Premier nasce come brand per la produzione di caschi e tavole da skateboard. La passione per il motorsport spinge quindi il marchio ad entrare nel settore dei caschi per competizioni automobilistiche con ottimi risultati in tutti gli Stati Uniti.

The adventure begins in 1956, Premier is born as a brand for producing helmets and skateboards. The passion for motorsports pushes Premier to enter the field of high-performance automotive helmets with excellent results all over the United States.

1970

PHIL READ

1956

DEBBIE LAWLER

Premier Pacific co. è la prima azienda a presentare una linea completa di caschi per motociclismo. Il successo è enorme, grazie a qualità e sicurezza dei prodotti. La prima stunt donna, Debbie Lawler detta "l'angelo volante", utilizza caschi Premier, come diversi campioni tra i quali il leggendario Phil Read. Il brand diventa un riferimento per il settore.

Premier Pacific co is the first company to provide a complete line of motorcycle helmets. They are hugely successful thanks to the quality and safety of the products. The first stuntwoman, Debbie Lawler also called "The Flying Angel" used Premier helmets, like many champions, including the legendary Phil Read. The brand becomes a point of reference for the industry.

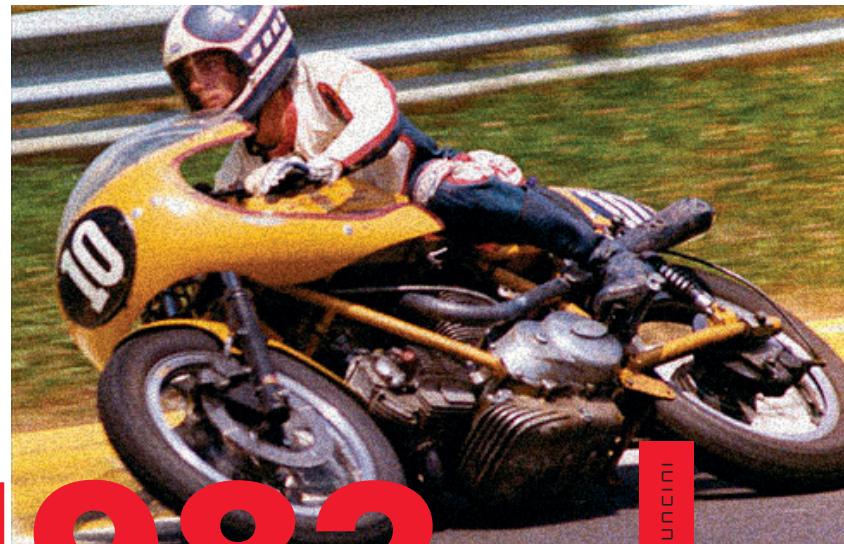

PAOLO PILERI

CHARLES
MORTIMER

Premier si sposta in Europa con due stabilimenti: il primo, situato in Olanda, si occupa della produzione di abbigliamento per motociclisti; il secondo, situato in Italia, si occupa della produzione di caschi per moto. L'azienda mantiene il suo DNA originario e continua ad avere uno spirito sportivo; molti sono i piloti di primissimo piano che scelgono Premier per le competizioni motocistiche internazionali.

Premier moves to two factories in Europe, the first is located in the Netherlands, producing clothing for motorcyclists, and the second is in Italy and produces helmets for motorcycles. Premier maintains its original DNA and continues with the sporting spirit. Many top riders choose Premier for international motorcycle competitions.

WILL HARTOG

1987

DAVE STRIJBOS

PIERFRANCESCO CHILI

A partire dal 1987 l'intera attività produttiva e la proprietà del marchio Premier si spostano in Italia.

Avendo acquisito la piena autonomia decisionale, l'azienda si lancia in una nuova sfida che ha l'obiettivo di accrescere e consolidare la notorietà del marchio Premier in tutti i mercati del vecchio e del nuovo continente.

In 1987 all production facilities, as well as the ownership, move to Italy to become one hundred percent Italian.

Having gained full autonomy in decision making the company launches a new challenge to increase and consolidate the reputation of the Premier brand on both the new and old continent.

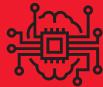

PREMIER TODAY: THE DAWN OF A NEW ERA

Premier sceglie di investire con decisione nell'R&D e di sviluppare una nuova gamma dal contenuto tecnologico d'avanguardia, in cui sicurezza, innovazione, cura del dettaglio e qualità diventano i parametri per definire le nuove soluzioni tecnologiche. E la tecnologia è davvero al servizio della persona e della sua protezione.

Premier chooses to invest strongly in R&D and to develop a new range with cutting-edge technological content where safety, innovation, attention to detail, and quality become the parameters for defining new technological solutions. And technology really is at the service of humankind, safeguarding it.

PREMIER
HUMANOGY
PROJECT

01 SAFETY

Ogni casco è innanzitutto uno strumento che deve proteggere la vita. Per questo consacriamo ogni nostra energia a realizzare prodotti che siano prima di ogni altra cosa sicuri.

Every helmet is firstly a tool that must protect life. For this reason, we dedicate all our energy to creating products that are first of all safe.

02 INNOVATION

Guardiamo sempre più in là, non ci accontentiamo mai. Cerchiamo costantemente un modo per migliorare quello che facciamo, come lo facciamo e superare i nostri limiti.

We look deeper and deeper; we are never satisfied. We are constantly looking for ways to improve what we do, how we do it, and overcome our limitations.

03 DETAILS

Da 60 anni dedichiamo un'attenzione minuziosa alla cura di ogni particolare, dal design all'ergonomia, dai materiali alle grafiche. La perfezione è fatta di dettagli.

For 60 years, we have dedicated meticulous care of every detail. From design to ergonomics, from material to graphics. Perfection is made of details.

05 HUMANS

La ragione ultima di tutto. Vogliamo garantire sempre la massima protezione senza dover mai rinunciare ad esaltanti esperienze di guida ed altissimo comfort.

The ultimate reason for everything. We always want to guarantee maximum protection without ever having to give up on exciting driving experiences and extremely high comfort.

04 QUALITY

Garantire la qualità assoluta del prodotto. Lavoriamo con metodo e attenzione affinché ogni materiale, lavorazione, costruzione e processo aziendale sia orientato all'eccellenza.

Guaranteeing the absolute quality of the product. We work methodically and carefully to ensure that every material, manufacturing, construction, and business process is oriented towards excellence.

LOVE YOURSELF, PROTECT NATURE

Il Futuro del pianeta è il Futuro dell'uomo e la salvaguardia della vita passa anche attraverso la tutela dell'ambiente che ci circonda.

La nostra Azienda ha Fatto della sostenibilità uno degli obiettivi del Progetto Premier Humanogy e si sta muovendo verso scelte sempre più green e responsabili, con l'obiettivo di ridurre sempre più l'impatto ambientale del proprio ciclo produttivo.

Numerose sono le azioni intraprese in questo senso, partendo dalla ricerca e la selezione di fornitori che adottino cicli produttivi eco-sostenibili e che utilizzano materiali riciclabili o derivati da fonti rinnovabili. Per alcuni dei componenti assemblati nei nostri prodotti, usiamo esclusivamente vernici a base d'acqua ed il nostro R&D Team sta testando e sperimentando nuove tecnologie produttive per allargare sempre più l'utilizzo di questa tipologia di verniciatura nei nostri cicli produttivi. Per la cucitura degli interni vengono preferiti tessuti provenienti da mix di materiali rigenerati e non trattati con prodotti chimici; mentre per lo stampaggio dei componenti aggiuntivi non legati alla sicurezza, come ad esempio rifiniture ed inserti in plastica o gomma, stiamo sperimentando e testando l'uso di plastica derivante da prodotti riciclati. Inoltre, per la stampa dei manuali di istruzione e degli imballi vengono utilizzati preferibilmente carta e cartone riciclati.

All our helmets are covered by a 5-year warranty as confirmation of our commitment to quality and care. The Future of the planet is the Future of humanity and safeguarding human life depends on the protection of the environment.

Our company has made sustainability a goal of the Premier Humanogy Project and is moving towards ever more green and responsible choices, with the aim of reducing the environmental impact of our production cycle.

Numerous measures have been taken in this regard, starting from the research and selection of suppliers that adopt eco-sustainable production cycles and use recyclable materials or derivatives from renewable sources. For some of the components assembled in our products, we only use water-based paints and our R&D team is testing new production technologies to increasingly expand the use of this type of paint in our production cycles. For inside seams, we prefer sewing thread coming from regenerated materials and not treated with chemicals; while for the molding of non-safety-related add-ons, such as plastic or rubber finishes and inserts, we are experimenting with the use of plastic from recycled materials. Furthermore, we prefer recycled paper and cardboard for printing instruction manuals and packaging.

PROJECT

TECHNOLOGY

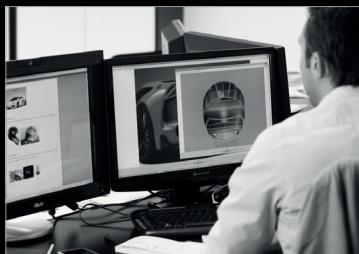

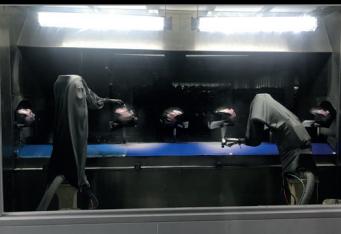

THINGS GET BETTER EVERY DAY

01 SMART DESIGN

Punto di partenza le esigenze dei riders, la morfologia umana, lo studio dell'aerodinamica e dell'ergonomia, che, grazie a software d'avanguardia, vengono tradotti prima in accurati modelli 3D e poi in prototipi. Seguono meticolosi test in galleria del vento, per verificare le loro performance nelle diverse condizioni.

The starting point is the needs of those who drive the motorcycle, the human morphology, the study of aerodynamics and ergonomics, which, thanks to cutting-edge software, are translated firstly into accurate 3D models and then into prototypes. Meticulous wind tunnel tests follow, to verify their performance in different conditions.

02 CONSTRUCTION

Dalla tecnologia all'artigianalità. Ancora oggi circa il 79% delle lavorazioni necessarie alla realizzazione di un casco vengono compiute manualmente. Stampaggio, verniciatura, cucitura e assemblaggio si susseguono, mantenendo inalterata la minuziosa cura per i dettagli.

From technology to craftsmanship. Even today, around 79% of the processes required for the construction of a helmet are carried out manually. Molding, painting, sewing, and assembly follow one another, maintaining meticulous care for details.

03 TESTING

Una lunga fase di test per accertare che ogni casco sia sicuro, resistente, confortevole e performante. Se ne verifica, inoltre, la conformità rispetto alle normative nazionali ed internazionali, per garantire sempre la massima sicurezza possibile. In questo passaggio, è fondamentale la collaborazione con i nostri top rider e tester professionisti.

A long test phase ensures that every helmet is safe, resistant, comfortable, and performing. Furthermore, compliance with national and international regulations is verified, to always guarantee the maximum possible safety. In this step, collaboration with our top riders and professional testers is essential.

04 QUALITY CHECK

Ogni fase del processo di realizzazione viene meticolosamente controllata, fino ad arrivare ad un ulteriore quality check finale. Qui si verifica che ogni componente sia impeccabile dal punto di vista costruttivo ed estetico, procedendo allo scarto in caso anche di minima imperfezione.

Each phase of the realization process is meticulously controlled, up to a further final quality check. Here it is verified that every component is impeccable from the constructive and aesthetic point of view, proceeding to the rejection in the case of even the slightest imperfection.

TECHNOLOGY

PROTECTING WHAT'S IMPORTANT

01 INCREASED PROTECTION

Il multi-composito Dyneema-Carbonio-Fibra Aramidica, garantisce il 36% in più di resistenza alle sollecitazioni rispetto alle tecnologie Premier precedenti.

The multi-composite Dyneema-Carbon-Aramid Fiber guarantees 36% more resistance to stress than the previous Premier technologies.

02 HI-VIS

Inserti Reflex per l'alta visibilità notturna.

Reflective inserts for high visibility at night.

03 E.R.S. - EMERGENCY RELEASE SYSTEM

Sistema di sgancio delle guance che facilita l'estrazione del casco in caso di emergenza.

Cheeks release system for easy extraction of the helmet in case of emergency.

In quanto dispositivo di sicurezza, ogni casco deve garantire i più alti standard di protezione. Per questo ogni prodotto Premier è il risultato di un'accurata fase di progettazione e design, di lunghe ricerche di R&D, di tecnologie innovative, di scrupolosi test e di una dedizione assoluta per i dettagli. Questo ha consentito, negli anni, di mettere a punto soluzioni sempre d'avanguardia, che assicurano ad ogni casco elevatissimi standard protettivi.

As a safety device, each helmet must guarantee the highest standards of protection. Therefore, every Premier product is the result of a careful planning and design phase, long R&D research, innovative technologies, scrupulous tests, and absolute dedication to detail. This has allowed, over the years, to develop solutions that are always cutting-edge, which ensure each helmet is of the highest protective standards.

EXTERNAL SHELL

Calotta esterna in D.C.A. 3.0, un innovativo multicocomposito studiato in origine dai tecnici Premier e che nel 2023 è stato ripreso secondo le aggiornate Filosofie del Premier R&D Lab Technology. Questo innovativo multicocomposito combina Dyneema Carbon e Fibra aramidica in proporzioni variabili. Grazie a questa tecnologia i nostri prodotti possono vantare una protezione massima ed un peso contenuto.

External shell in D.C.A. 3.0, an innovative multi-composite originally designed by Premier technicians and which in 2023 has been revisited according to the updated concepts of the Premier R&D Technology Lab. This innovative multi-composite combines Dyneema Carbon and Aramid Fiber in variable proportions. By virtue of this technology, our products are able to guarantee maximum protection but minimum weight.

04

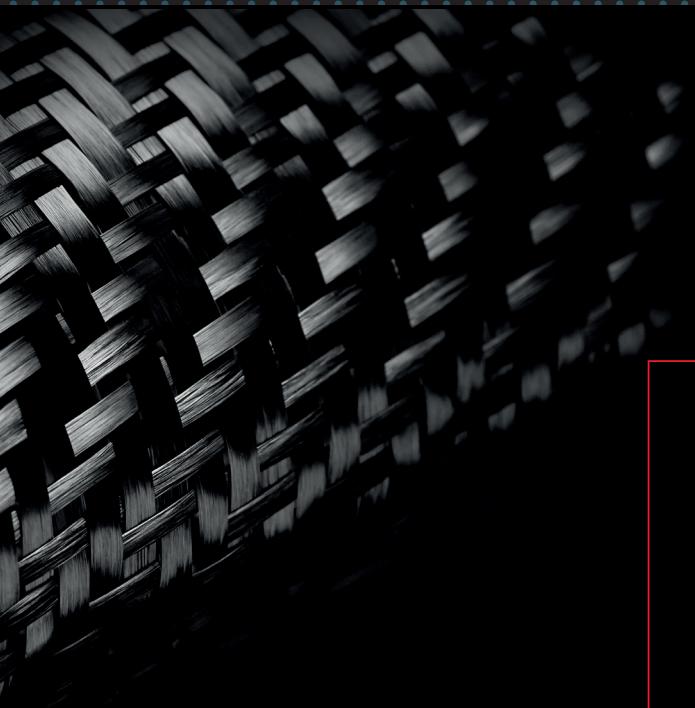

05 VISOR-BLOCK SYSTEM

MATERIAL MATTERS

01

CARBON FIBER TECHNOLOGY

Premier è specializzata nei caschi in Fibra di carbonio. Know-how e ricerca tecnologica in questo tipo di produzione sono fondamentali:

Premier ha sviluppato numerosi studi e test nel corso di 60 anni di esperienza, collaborando con i più importanti laboratori europei. Un'esperienza che ha portato oggi alla realizzazione di una gamma formata principalmente da prodotti in Fibre di carbonio e Fibre composite.

Premier is specialized in carbon fibers helmets. Knowhow and research in the production of carbon fiber are fundamental to Premier. Premier has developed many studies and tests over 60 years of experience, collaborating with many important laboratories in Europe. Today, the experience has led to the creation of a range of helmets consisting mainly of composites and carbon fibers.

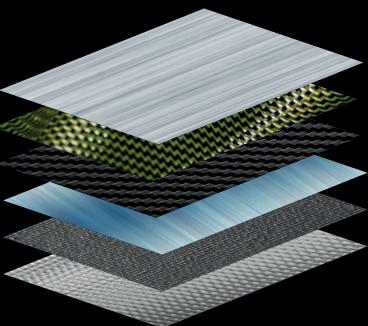

02 MULTICOMPOSITE EVOLUTION: DYNEEMA-CARBON-ARAMIDIC

Le caratteristiche specifiche dei materiali compositi sono estremamente importanti. Il multi-composito Dyneema-Carbonio-Fibra Aramidica di Premier è frutto di un lungo percorso di ricerca sui materiali. Il risultato è un materiale multi-strato eccezionale, che garantisce il 36% in più di resistenza alle sollecitazioni rispetto alle tecnologie Premier precedenti e fornisce al motociclista una protezione elevatissima.

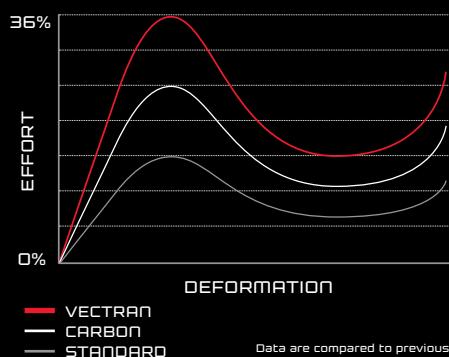

The specific characteristics of composite materials are extremely important. Premier multi-composite Dyneema-Carbon-Aramid Fiber is the result of a long process of research on materials. The result is an exceptional multi-layer material, which guarantees 36% more resistance to stress than previous Premier technologies and provides the rider with a very high level of protection.

POWER UNDER CONTROL

AERODYNAMICS

Il design di ogni calotta viene progettato attentamente al fine di ottimizzarne l'aerodinamica ed aumentarne la resistenza agli urti. In quest'ottica, i caschi Full Face Hyper e Devil sono dotati di innovativi accorgimenti di design, che consentono un miglioramento del CX aerodinamico inferiore e superiore rispettivamente del 7% e del 13% rispetto ai modelli precedenti. Inoltre, l'inserimento dello spoiler posteriore assicura una sostanziale riduzione delle turbolenze e delle vibrazioni legate alle alte velocità. Con i nostri caschi puntiamo a garantire il controllo totale in ogni condizione di utilizzo.

The design of each shell is carefully designed to optimize aerodynamics and increase its impact resistance. In this perspective, the Full-face helmets Hyper and Devil are equipped with innovative design features, which allow an improvement of the lower and upper aerodynamic CX respectively of 7% and 13% compared to previous models. Furthermore, the insertion of the rear spoiler ensures a substantial reduction of turbulences and vibrations linked to high speeds. With our helmets we aim at guaranteeing total control under all conditions of use.

I campi di visibilità rappresentano un aspetto primario per quanto riguarda la sicurezza, per questo il design di Premier indirizza il proprio lavoro verso una sempre maggiore apertura del campo visivo. I caschi Full Face Hyper e Devil, non solo ampliano il campo verticale e laterale rispettivamente del 15% e dell'11% (rispetto ai modelli precedenti), ma offrono anche il sistema Pinlock per prevenire l'appannamento della visiera e il Quick Release System per rimuoverla con facilità.

The Fields of visibility represent a primary aspect as far as safety is concerned, which is why the design of Premier directs its work towards an ever-greater opening of the visual field. The Full Face Hyper and Devil helmets not only extend the vertical and lateral Fields by 15% and 11% respectively (compared to previous models), but they also offer the Pinlock system to prevent visor fogging and the Quick Release System to remove it easily.

Migliora la visione periferica e la sensazione di spazio all'interno del casco.

Improved peripheral vision and the feeling of space inside the helmet.

VENTILATION SYSTEM

I caschi Premier sono dotati di sistemi di areazione composti da prese d'aria ed estrattori, che insieme alle canalizzazioni ricavate all'interno delle componenti di protezione in polistirolo assicurano all'utilizzatore il mantenimento di temperatura ottimale all'interno del casco. Il flusso d'aria entra dalla parte frontale e dal mento, per poi defluire nella calotta in EPS interna e fuoriesce quindi dagli estrattori posteriori, ottenendo così un comfort ottimale anche per lunghi tragitti.

Premier helmets are equipped with air ventilations and extractors which together with the air-channeling system inside the polystyrene protection ensure that the user maintains optimal temperature inside the helmet. The air enters the front then flows into the inner EPS shell and comes out at rear extractors, thus obtaining optimal comfort even for long journeys.

COMFORT IN MOTION

01 ERGONOMIC INNER LINING

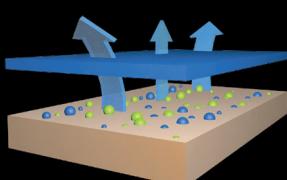

Imbottitura a densità differenziata per assicurare la stabilità del casco anche in condizioni estreme.

Differentiated-density inner lining to ensure the helmet remains stable even in extreme conditions.

02 COMFORT

Massimo comfort garantito da imbottiture e materiali ultra traspiranti, completamente rimovibili e lavabili.

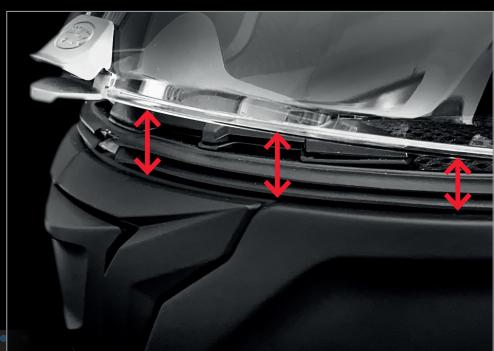

Maximum comfort is guaranteed by an ultra-breathable lining and materials that are fully removable and washable.

03 VISOR-BLOCK SYSTEM

Il nuovo sistema permette di tenere la visiera al primo scatto, migliorando il disappannamento della visiera a bassa velocità o in caso di sosta, e di tenerla bloccata tramite un meccanismo di chiusura che ne evita l'apertura accidentale.

The new system makes it possible to keep the visor on the first notch, improving visor demisting at low speed or when stopped, and keeping it in place by means of a closing mechanism that stops it from opening accidentally.

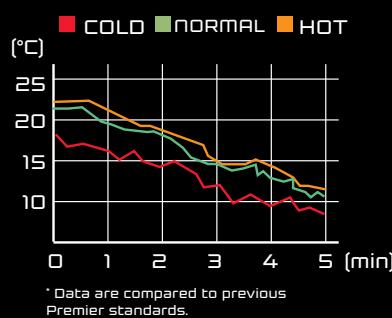

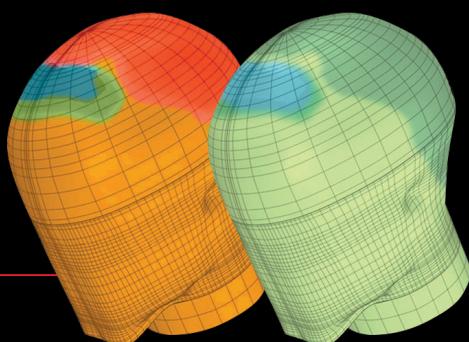

04 A.F.S. - AIR FLUX SYSTEM

Uno speciale sistema di canali di ventilazione che massimizza la circolazione dell'aria dentro il casco.

A special system of ventilation channels to maximize air circulation inside the helmet.

TEMPERATURE/TIME CHART

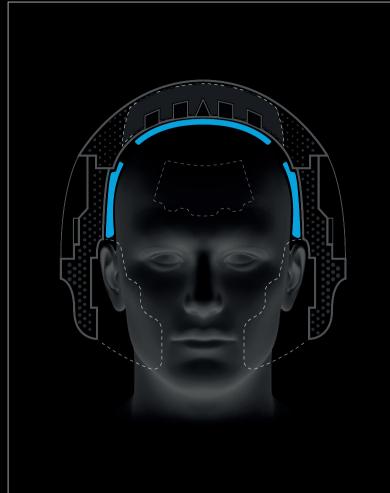

I test di laboratorio hanno evidenziato che il sistema A.F.S. garantisce il mantenimento di un'ottimale temperatura all'interno del casco anche in caso di usi estremi.

Laboratory tests have shown that the A.F.S. system ensures an optimum temperature is maintained inside the helmet even during extreme use.

05 ADVANCED PADDING SYSTEM

Calzata resa confortevole grazie a speciali guanciali realizzati con spugne a differenti densità, microforate al laser e termoformate in specifici stampi. Ulteriormente personalizzabili tramite il kit di perfezionamento della vestibilità per garantire ad ognuno totale comfort nella guida.

Comfortable to wear thanks to special cheek pads made of different density foams, micro-perforated by laser, and thermoformed in special molds. Further customization options are available from the kit for perfecting wearability so that all riders can be guaranteed total comfort.

Due differenti calotte esterne ultra leggere per assicurare un maggior comfort nella calzata, realizzate attraverso un'innovativa Shell Moulding Technology e sviluppate all'interno della galleria del vento per una perfetta aerodinamicità.

Two different ultralight external shells ensure maximum comfort for the wearer. These are made using an innovative Shell Moulding Technology and developed inside a wind tunnel for perfect aerodynamics.

06

A close-up, low-angle shot of a Premier R60 full-face motorcycle helmet. The helmet features a black and red carbon fiber pattern on the top half, with red accents on the chin guard and side vents. The brand name 'PREMIER' and 'HELMETS' is printed in white on the side. A small oval badge on the side also displays 'PREMIER' and 'HELMETS'. The chin guard has a silver-colored metal plate with the 'PREMIER' logo. The background is a dark, textured surface.
