## TRIPLE COMPOSITE GRIP - EXTRA SLIM NO WAFFLE

### 788 GRIPS

Size - Ø mm 22 - 25 Long mm 115

**The 788 grip features:**

The inner part of the grip is harder to fix the grip to the handlebar and the two other compound, one medium and one soft, are able to minimize all the vibration that the bike can transmit.

Firm on the inside,  
Gel Density towards the  
palm of your hand  
and medium density on  
the ends.

Riders are always looking for SOFT GRIPS that don't slip on the bar. The rule in grip design is that the softer the material the more the grip will slip against the bar. Plastiche Cassano is the company that first offered duo density grips to the Motorcycle world and we try to bring new technical solutions to the market as the need arises. So we decided to design an even stronger inner sleeve to help minimize grip movement, while providing both a soft gel material and a harder material where needed.

Thus, the first Triple Density Grip was born.

**HARDNESS**  
HARD SH 58 INSIDE  
SOFT SH 20 - 15 OUTSIDE

# DOUBLE DENSITY MX GRIP

## 791 GRIPS

Size - Ø mm 22 - 25 Long mm 115

**The 791 grip features:**

Hard material in the inner part of the grip to fix better on the bar without any problem of slipping and soft material on the outer part for the reduction of all vibrations that the motorcycle can transmit.

### The 838 grip features:

New technology for double density compound fused in a unique grip. The inner part is harder to better fit on the handlebar and avoid the problem of slipping. The outside part is in special Progrip compound that reduces vibrations and keep your hands firm on grips.

## 727 GRIP

Size - Ø mm 22 - 22 Long mm 125

**PG727BK**  
BLACK

### The 727 grip features:

New technology for double density compound fused in a unique grip. The inner part is harder to better fit on the handlebar and avoid the problem of slipping. The outside part is in special Progrip compound that reduces vibrations and keep your hands firm on grips.

# SOFT TOUCH RALLY GRIP

**HARDNESS**  
MEDIUM SH 35 TOTAL

## 786 GRIP

Size - Ø mm 22 - 25 Long mm 125

**0630-1927**  
**BLACK FOAM**

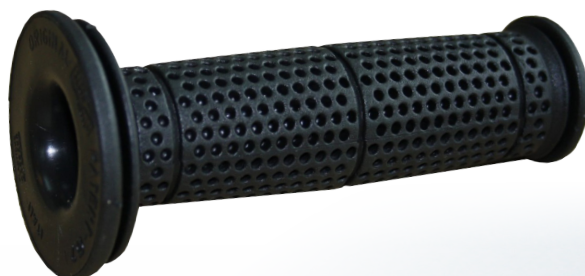

### The 786 grip features:

For the lovers of foam, our foam grips are the best for comfort, less vibration and lighness. Used on most of Dakar bikes and other rally races bikes. On the desert races are still the greatest grips.

## 714 GRIP

Size - Ø mm 22 - 25 Long mm 125

**PG714B**  
**BLACK SINGLE DENSITY**

### The 714 grip features:

Timesless grips for rallyes. On the desert races are still the greatest grips. Their thickness is studied to cancel most of vibrations that you can find in rally races.

# Light sensitive

Photochromatic Xelox L is a solar filter with a high speed of reaction: Activation time about 4 seconds, fading time about 4 seconds. This product is in a compliance with specifications EN 166, EN 174 and EN 1836. According to EN 1836 such filters comply to point 4.1.3.1, which fixes the category for

photochromatic filters based on luminous transmittance at faded state  $\pi_0$  and luminous transmittance at darkened state  $\pi_1$ . For photochromatic filters the ratio between  $\pi_0$  and  $\pi_1$  must be  $\geq 1,25$ .
