MX Gloves

Control on a motorcycle is a complex routine, but it all starts with the hands. No matter what your glove preference is - minimalist and flexible, to maximum coverage and padding, we've got you covered.

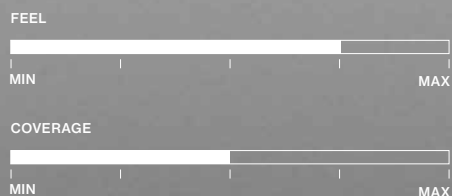

Agile

The Agile sets the standard for minimalist gloves. With a flexible chassis design, lightweight neoprene cuff, and single-layer perforated palm, the Agile gloves provide unobstructed comfort and precise feedback while riding.

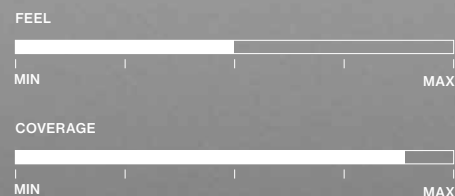

Draft

The Draft glove maintains the minimalist feel, but features a more substantial chassis. A silicone print on the backhand improves the structure of the Draft glove, while the four-way stretch mesh enables flexibility and ventilation.

Rebound

Control meets coverage with the Rebound glove. The chassis incorporates a four-way stretch Airprene backhand, along with an integrated D3O® layer for the perfect balance of mobility and coverage.

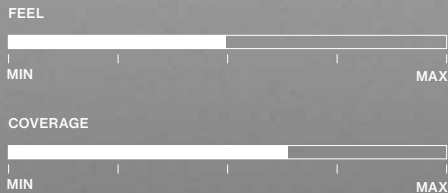

D3O[®]

Spectrum

The Spectrum is the perfect do-it-all glove for wherever your ride takes you. Strategically placed TPR's and molded foam inserts are designed for optimal backhand coverage and the mesh back hand and perforated palm delivers premium air flow for cool, dry hands all moto long.

Spectrum Cold Weather

The Spectrum Cold Weather glove is the go to glove for those chilly days on the track. A fleece-lined polyester backhand for insulation and warmth combined with a lightly padded palm provides warmth and comfort when the weather isn't exactly perfect.

Sector

The Sector glove is designed to provide all-day comfort and functionality. These lightweight gloves have unmatched flex and ventilation at an incredible price.

CHOOSING THE CORRECT HELMET SIZE: Helmet fit is critical to helmet protective performance. The correct helmet size can only be checked and confirmed by physically fitting the helmet to the user. Always try the helmet on in a store, before purchasing it, to be sure you are purchasing the correct sized helmet for you.

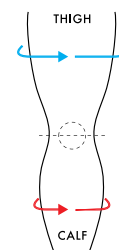

HELMET SIZING INFORMATION: To achieve proper helmet fitment, begin by finding your head circumference size using the method described. Remember that the helmet size you choose should fit around the crown of your head comfortably with no pressure points. The cheekpads should fit firmly around your face. Once your chin strap is fastened, grab the chin bar of the helmet and move it side to side. Your cheeks should move with the helmet, which should not slide across your face. Different thickness cheekpads can be purchased to obtain the best fit. Ask your dealer or visit: www.thormx.com for more information.

WARNING IMPROPERLY FITTING PRODUCTS COULD CONTRIBUTE TO SERIOUS INJURY OR DEATH.
