## IN SOME RESPECTS, MOTOCROSS WAS BORN IN THE NETHERLANDS.

 It was here, in 1947, that the Dutch national motorcycle federation hosted an international "scramble" for teams from Great Britain, Belgium and the Netherlands, and called it a "moto-cross." While the sport's popularity grew steadily over the next 25 years, one thing that remained constant was the frustration of off-road biking in the Netherlands. The lowland dunes and fields offered the perfect terrain for riding, but the stock paper air filters of the day were no match for the sandy, gritty soil. There was a paper filter with a single layer of foam, but even that didn't cut it for protection; after 30 minutes it was shot. In 1972, the motocross world was given a historic boost by a revolutionary product: a laminated, dual-foam air filter that, when soaked in a special oil, allowed free airflow into the carburetor while keeping dirt, grime, sand and water out of it. It was effective, durable, washable and reusable. It took off, and the little start-up company that invented it, called Twin Air, hasn't stopped ever since.

Evolving continually with motorcycle design and technology, Twin Air filters and accessories have stayed ahead of the competition for half a century. Today they are available for all Motocross and ATV vehicles, and distributed worldwide. Twin Air filters are OEM-specified for 20+ motorcycle companies, and the official air filter of American Honda and Suzuki, Kawasaki Racing Team, Suzuki Geboers, Honda Martin and Honda CAS, KTM Red Bull, and many other teams. It remains the choice of more World & National Champions than all other filters combined.

 **In gewisser Weise hat Motocross seinen Ursprung in den Niederlanden.** Dort veranstaltete die niederländische National Motorcycle Federation im Jahr 1947 ein internationales „Scramble“ für Teams aus Großbritannien, Belgien und den Niederlanden und nannte dieses Rennen „Motocross“. Während dieser Sport über die nächsten 25 Jahre immer populärer wurde, blieb in den Niederlanden jedoch ein Wermutstropfen beim Motocross. Die niedrigen Dünen und flachen Felder waren perfekt zum Fahren, aber die normalen Papierfilter von damals waren nicht wirklich für den sandigen und kiesigen Boden geeignet. Es gab sogar einen Papierfilter mit einer einzelnen Schaumstoffschicht, aber selbst das reichte nicht aus; nach 30 Minuten war er hinüber.

Im Jahr 1972 sorgte ein revolutionäres Produkt dann für einen entscheidenden Einschnitt in der Motocrosswelt: ein laminiertes, zweischichtiges Schaumstofffilter, der mit speziellem Öl getränkt werden konnte und so eine ungehinderte Luftzufuhr in den Vergaser ermöglichte und gleichzeitig Schmutz, Staub, Sand und Wasser herausfilterte. Effektiv, langlebig, waschbar und wiederverwendbar. Dieser Filter wurde zum Erfolg und das kleine Start-Up-Unternehmen namens Twin Air hat ihn seitdem immer weiterentwickelt.

Durch die ständige Weiterentwicklung im Hinblick auf Motorrad-Design und -Technologie gehören die Twin Air Luftfilter und Zubehörteile jetzt schon ein halbes Jahrhundert lang zu den Marktführern.

Heute sind sie für alle Motocross-Motorräder und ATVs erhältlich und werden weltweit vertrieben.

Twin Air Luftfilter gibt es OEM-spezifisch für mehr als 20 Motorradmarken und sie sind standardmäßig an den Motorrädern der Teams American Honda, Suzuki, Kawasaki Racing Team, Suzuki Geboers, Honda Martin und Honda CAS, KTM Red Bull, und vielen weiteren verbaut. Diese Filter sind immer noch die beliebtesten der meisten Weltmeister und Nationalchampions.

 **Dans certains aspects, le motocross est né aux Pays-Bas.** C'est en 1947 que la fédération nationale néerlandaise a organisé une course de moto internationale pour des équipes en provenance de Grande-Bretagne, Belgique et Pays-Bas et l'ont baptisée « motocross ». Pendant les 25 dernières années, sa popularité n'a cessé de croître mais un point de frustration persiste toujours : la pratique du off-road aux Pays-Bas. Les champs et les dunes forment un terrain parfait mais les filtres à air d'origine en papier ne convenaient pas aux sols sableux et poussiéreux. Il y avait un filtre en papier qui disposait d'une couche de mousse mais même celui-là ne tenait pas plus de 30 minutes.

En 1972, le monde du motocross a été chamboulé par un produit révolutionnaire : un filtre à air laminé avec deux épaisseurs de mousse qui, lorsque trempé dans une huile spéciale, permettait un flux d'air libre dans le carburateur tout en empêchant à la boue, saleté, sable et eau d'entrer. C'était efficace, résistant, lavable et réutilisable. Sa popularité s'est rapidement répandue et l'entreprise qui en est à la base, Twin Air, n'a plus arrêté depuis.

Toujours en accord avec l'évolution des motos et des technologies, les filtres Twin Air et leurs accessoires sont devant leurs concurrents depuis un demi-siècle.

De nos jours, ils sont disponibles pour tous les véhicules de motocross et les quads, et ce, dans le monde entier. Les filtres à air Twin Air sont OEM chez plus de 20 producteurs de motos et sont le filtre à air officiel pour American Honda et American Suzuki, Kawasaki Racing Team, Suzuki Geboers, Honda Martin et Honda CAS, KTM Red Bull et bien d'autres encore. Avec plus de filtres que toutes les autres marques combinées, ça reste le filtre le plus utilisé lors des championnats nationaux et internationaux.

 **En cierto modo el motocross nació en los Países Bajos.** Fue aquí en 1947 donde la Federación Nacional Neerlandesa de Motociclismo albergó una concentración internacional para equipos de Reino Unido, Bélgica y Países Bajos y lo llamaron *motocross*. A pesar de la popularidad de la que disfrutaría este deporte de motor durante los próximos 25 años, había un problema que seguía siendo fuente de frustración para la práctica del offroad en los Países Bajos. Pese a que los campos y dunas suaves de este país ofrecían un escenario ideal para pilotar por ellos, los filtros de aire de papel de serie de entonces no podían hacer frente a su barro áspero y arenoso. Llegó a producirse un filtro de papel con una única capa de espuma, pero incluso este filtro no lograba hacerle frente: tras 30 minutos fin de la partida.

Sin embargo, en 1972 el mundo del motocross recibió un impulso histórico gracias a un producto

revolucionario: un filtro de aire con doble capa de espuma laminada que empapada en un aceite especial permitía una entrada limpia de aire al carburador a la vez que evitaba la entrada de suciedad, barro, arena y agua. Era efectivo, duradero, lavable e incluso reutilizable. Recibió una gran acogida y la pequeña empresa emergente que lo inventó, llamada Twin Air, no ha echado el freno desde entonces.

Evolucionando y adaptándose a las nuevas tecnologías y diseños de los nuevos modelos, los filtros y accesorios Twin Air han logrado permanecer un paso por delante en el mundo de la competición durante casi medio siglo.

Hoy día están disponibles para todos los modelos de motocross y quads/ATV, además de ser distribuidos por todo el mundo. Los filtros Twin Air cuentan con las especificaciones de serie (OEM) para más de 20 marcas de moto y es el filtro de aire oficial de Honda y Suzuki americanas, Kawasaki Racing Team, Suzuki Geboers, Honda Martin y Honda CAS, KTM Red Bull, y otros tantos equipos. Y sobre todo sigue siendo la opción predilecta para más campeones nacionales y mundiales que todas las demás marcas de filtros juntas.

 **Per alcuni aspetti, il motocross è nato nei Paesi Bassi.** Proprio qui, nel 1947, la federazione motociclistica olandese ospitò una gara a livello internazionale chiamata "motocross", a cui parteciparono Gran Bretagna, Belgio e Paesi Bassi. Nonostante la popolarità di questo sport crebbe costantemente nei 25 anni successivi, un sentimento di frustrazione si fece sempre più spazio in coloro che lo praticavano nei Paesi Bassi. Questo perché, anche se le dune basse e i campi offrivano il terreno perfetto per le gare, i filtri aria di serie in carta non erano adatti al suolo sabbioso e grossolano. In commercio vi era un filtro in carta con un singolo strato di spugna, ma non era in grado di fornire protezione sufficiente, rendendosi inutilizzabile dopo soli 30 minuti.

Nel 1972, il mondo del motocross andò incontro a un cambiamento storico grazie a un prodotto rivoluzionario: un filtro aria laminato e a doppio strato che, se immerso in un olio speciale, consentiva il passaggio dell'aria verso il carburatore e allo stesso tempo catturava sporco, detriti, sabbia e acqua. Era efficace, a lunga durata, lavabile e riutilizzabile. La produzione di questa nuova tipologia di filtri decollò e la piccola start-up che li aveva sviluppati ancora oggi continua ad avere successo.

Evolvendo continuamente e in parallelo al design e alla tecnologia del mondo motociclistico, i filtri e gli accessori Twin Air sono un passo avanti rispetto alla concorrenza da ormai mezzo secolo. Oggi, questi prodotti vengono distribuiti a livello mondiale e sono disponibili per tutti i veicoli motocross e quad/ATV. I filtri Twin Air hanno le stesse specifiche di quelli OEM prodotti da più di venti case motociclistiche e sono i filtri aria ufficiali di American Honda, Suzuki, Kawasaki Racing Team, Suzuki Geboers, Honda Martin, Honda CAS, KTM Red Bull e molti altri team. Campioni mondiali e nazionali scelgono i filtri Twin Air più spesso di quanto non facciano con tutte le altre marche di filtri aria messe assieme.
