2019
HELMET BRAND

With over 20 years of experience, Z1R is dedicated to creating products that fuel riders like you.
We share your passion for adventure. Whether it's riding off-road trails, blasting berms on a motocross track or just hitting the open road.

Z1R focuses on design, safety, performance, and value for each and every product we offer.
Our mission is to provide you with high-quality products at affordable pricing.

Focus on what fuels you, let us handle the rest.

HOW MIPS WORKS

In a helmet with MIPS Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with MIPS Brain Protection System is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. MIPS BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.
