MOTO MOUNT KITS FOR HANDGUARDS

- Aluminum moto roost deflector mounting kit fits most modern dirt bikes that have many buttons, switches, etc., on the handlebars, not leaving you much room for mounting anything extra on the handlebars
- Mount kit is designed for open-ended moto Roost Deflector and Roost Deflector 2 handguards and mounts to the perch of the clutch and brake levers by replacing the mounting caps
- Provides valuable space on the handlebars for controls like kill switches, e-start buttons, holeshot buttons, map switches, light switches and more
- Composite deflector arm now has a pocket milled into it allowing the composite arm to have a controlled flex
- Newly designed composite arm paired with our new aluminum mount makes this the strongest open-ended deflector on the market
- No floppy feeling with these moto roost deflectors

NOTE: Use Contour 2 Roost Deflectors with these mount kits; sold separately.

PISTON KITS

- In-house designed and manufactured; all forgings are produced in Wössner's company-owned forging operation
- 4-stroke pistons are made using a double-bridged forging design
- Lightweight pistons with the tightest piston-wall clearances in the industry give you a quieter running engine
- Standard and oversize pistons for most models, with high compression ratios available for 4-stroke applications
- All piston kits include piston, ring, wrist pin and pin locks
- Wössner piston kits are used by leading Supercross, Arenacross and MX GP teams

PISTON KITS

- All pistons are heat-treated with a T-5 hardening and tempering cycle
- All piston skirts are coated with a high-tech molybdenum disulphite coating for faster break-in time and increased piston life
- Cast piston kits are gravity-cast aluminum alloy (not forged) with 18% silicone content, which produces an extremely light but very strong piston
- Forged pistons are forged from 2618 aluminum for superior strength and durability
- Forged high compression pistons improve power and torque across entire rpm range
- Big bore pistons increase engine's displacement, torque, and peak horsepower
- Forged replica pistons are forged OEM replacements
- Replica pistons and all rings are OEM replacements
- Kits include piston, rings, wrist pin and circlips
- Top end piston kits include piston, rings, wrist pin, circlips and top end gaskets
