## Ti-6 AND T-6 4-STROKE EXHAUST SYSTEMS FOR HONDA CRF450R 21

- If you are competing in a AMA Supercross or AMA Motocross series, the Ti-6 Pro titanium exhaust system is perfect for you; created as a full race system, the Ti-6 Pro is designed to increase performance and help professional racers pass AMA/FIM sound regulations
- Ti-6 titanium exhaust system is designed to improve performance and power; constructed of titanium throughout the headpipe, mid pipe and canister; this is the ideal exhaust for any offroad or closed course racer looking for improved performance, durability and a professional look; comes with a removable spark arrestor making it easy to alternate between off-road and closed course riding
- T-6 stainless steel exhaust system offers the same benefits as Ti-6 titanium exhaust system, but the T-6 is constructed of stainless steel and aluminum for increased strength and durability while giving riders a more affordable alternative to titanium; comes with a removable spark arrestor making it easy to alternate between off-road and closed course riding
- All T-6 Euro exhaust systems pass AMA/FIM sound regulations
- Machined aluminum muffler brackets for increased strength and durability
- Asymmetrical muffler configuration for increased packing volume
- Most systems equipped with a RC-4 Resonance Chamber for reduced sound output
- Machined mid pipe to headpipe joint for a better, leak-free fit
- TIG precision welding

- The ultimate in the evolution of spark plug technology and performance from the industry leader
- The iridium electrode is 25% smaller than a platinum electrode, and it's just  $\frac{1}{4}$  the size of a conventional nickel electrode
- Ultra-small-diameter center electrode reduces voltage requirement and extends ignition system life
- Metal shell plating has enhanced anticorrosion qualities

## STANDARD AND BACKFIRE FILTERS

- Twin Air dual-stage filters are the choice of top factory teams and riders worldwide
- Dual-bonded foam design filters out even the smallest dirt particles, while allowing more airflow than two separate layer filters (flow bench proven)
- Flat foam sealing ring provides a secure seat against the airbox, even in the worst riding conditions
- Twin Air filters are slightly smaller than stock, making them easier to change while increasing dead air space around the filter for better performance
- Backfire triple-stage filters include a laminated layer of backfire-retardant foam

## FACTORY PRE-OILED AIR FILTERS

- The same factory treatment that race teams and OEMs receive is now available for all Twin Air users
- Pre-oiled with Twin Air Bio-Foam Filter Oil using state-of-the-art filter oiling machines to provide the ultimate consistency in pore coverage
- Same industry-leading Twin Air Filter, now pre-oiled for your convenience
- Comes in a resealable bag
- PowerFlow replacement filters include Backfire Filter

## POWERFLOW KIT

- Replaces the air-restricting stock backfire screen with a screen that has a special backfire-resistant layer of foam laminated to the inside
- Increases the volume of air intake
- Includes a rigid, lightweight billet aluminum cage

## AIRBOX COVER

- Remove the air filter and pressure wash the inside of the airbox by covering the carb inlet with a watertight cap
- Made of PVC with a rubber sealing ring
- Top screw included
