

T-6 4-STROKE EXHAUST SYSTEM FOR HONDA CRF250R 22

- T-6 stainless steel exhaust system offers the same benefits as Ti-6 titanium exhaust system, but the T-6 is constructed of stainless steel and aluminum for increased strength and durability while giving riders a more affordable alternative to titanium; comes with a removable spark arrestor making it easy to alternate between off-road and closed course riding
- All T-6 Euro exhaust systems pass AMA/FIM sound regulations
- Machined aluminum muffler brackets for increased strength and durability
- Asymmetrical muffler configuration for increased packing volume
- Most systems equipped with a RC-4 Resonance Chamber for reduced sound output
- Machined mid pipe to headpipe joint for a better, leak-free fit
- TIG precision welding

WAVE SEAT COVERS

- Hand-sewn PVC cover has a gradual grip
- Front area has medium grip and rear area has padded reinforcements (wave) for a superior non-slip action
- For riders preferring a dynamic riding experience and more freedom of movement
- Enables rider to change position without rising from the saddle
- Highly recommended for Enduro riders

SUPER GRIP RACING SEATS COVERS

- Hand-sewn PVC cover has a uniform grip over the entire contact surface
- For riders preferring to fit snugly to the saddle
- Ideal for aggressive riding situations when the saddle gets slick with mud
- Same saddle used by the 2014 MXGP World Champion Antonio Cairoli

STAINLESS STEEL CONVERSION VALVE AND SPRING KITS

- Stainless steel conversion kits include only what's needed to convert your head to the long-life stainless steel Black Diamond™ or White Diamond® intake valves
- Extends the life of the valvetrain and intake components by as much as 4x over the OEM titanium parts
- Includes forged one-piece stainless steel intake valves, wound chrome-silicon heat-treated wire valve springs, ultra-light titanium retainers and hardened steel bases
- Components are created using Finite Element Analysis (F.E.A.) software, as well as proprietary camshaft analysis and spring design software
- Specifically designed and engineered for each application

VALVES, VALVE GUIDES AND SPRINGS

- Tensilite® Titanium valves feature one-piece US-milled titanium alloy construction with a hard chromium nitride (CRN) shell; CRN offers excellent resistance to impact, abrasion and corrosion (Tensilite® valves are noted in the chart)
- Black Diamond™ valves feature one-piece stainless steel construction with stellite tips and special impregnation to improve wear properties and reduce friction; all valves are Black Diamond™ unless otherwise noted in the chart
- White Diamond® valves feature one-piece construction and hard chrome stems; White Diamond® valves are noted in the chart
- All valves are compatible with OEM and KPMI® valve guides and spring kits
- Valve guides are made of Ampco-45, a high-performance compound with 80% copper content to provide great heat conductivity and 5% nickel content for wear resistance (unless noted in chart)
- Spring sets contain springs and titanium upper collars; lower collars included as required; spring kits are engineered for use with standard and oversized valves
- Keepers are not included
- Valves and guides are sold each; spring kits come complete for one motor

RADIUSX CLUTCH KITS

- With RadiusX a high-performance auto clutch is just a clutch pack swap away
- RadiusX combines TorqDrive friction disk technology with Rekluse's innovative EXP (auto clutch) disk
- TorqDrive provides more clutch disks in less space, delivering high performance auto function within the framework of the stock clutch
- The RadiusX clutch prevents engine stalls so you can focus on the ride and let the auto clutch do the rest
- RadiusX delivers increased power transfer over OEM and longer clutch life with less adjustment over time
- Standard clutch lever function is retained and full override
- Some configurations include Rekluse basket sleeves to prolong basket life

RADIUSCX CLUTCH KITS

- RadiusCX is a top-of-the-line auto clutch product that brings together all of Rekluse's latest technology into one package
- TorqDrive friction disk technology coupled with EXP and Core technology results in significant advancement in auto performance with exceptional hook-up, lever feel and durability
- Better starts, carry more speed, focus on the line and not on the clutch
- Perfect power delivery every time
- Maintain momentum; use the torque of your motor without worrying about stalling
- Increased power transfer over OEM
- Fully tunable to suit rider and/or terrain
- Optimized pressure plate design provides our best lever feel; consistent control and behavior
- Core components deliver improved oil flow and stability over wide temperature ranges
- TorqDrive friction disks provide longer clutch life with less adjustment over time
- Rekluse sleeves eliminate basket wear and notching

TORQDRIVE® CLUTCH PACKS

- A high-performance manual clutch is now more accessible than ever with the TorqDrive Clutch Pack
- It's as easy as changing your clutch plates into your OEM components
- Proven at the highest levels of racing, TorqDrive thin friction disk technology allows more disks to fit in your OEM clutch's footprint, decreasing slip and unlocking the full power of your engine
- TorqDrive Technology also provides increased clutch life and decreased clutch fade
- The additional friction disks provide an average of a 25% gain in torque capacity over stock, while reducing lever pull by an average of 10% (figures vary by model)
- TorqDrive delivers stronger drive throughout the powerband, unlocking the bike's power without any expensive motor mods
- Rekluse basket sleeves eliminate basket wear and notching

NOTE: Not a replacement clutch pack for RadiusX, RadiusCX, or Core Manual TorqDrive.

CORE MANUAL TORQDRIVE® CLUTCH KITS

- The Core Manual TorqDrive clutch delivers unprecedented performance, tuning and durability
- TorqDrive provides more disks in less space, allowing up to four additional friction disks over stock
- More frictions = more torque capacity, thus unlocking the full power of your engine without the need to add stiffer pressure plate springs
- Provides more consistent clutch lever feel and behavior
- Can be set up to maintain a stock, or lighter than stock, lever pull depending on engine tuning
- Rekluse sleeves eliminate basket wear and notching
- Proven in racing at the highest levels

SM-5 HELMETS

- Constructed from a special lightweight and impact resistant thermo-injected polymer results in a significantly lighter helmet with increased structural strength and outer shell uniformity in two outer shell sizes
- Inner shell includes multi-density advanced EPS construction for optimal impact absorption performance in three sizes
- Features two concepts for impact energy management including a resin-coated inner shell surface that noticeably improves impact resistance and reduces linear acceleration values and an elastic joint to connect the helmet's inner shell and comfort liner to move independently in a crash scenario with an oblique impact, thereby spreading the energy forces from an impact, reducing rotational acceleration
- Uses Alpinestars Emergency Release System (ERS) consisting of removable cheek pads for safe, quick, easy and safe removal of the helmet by trained medical professionals/ emergency responders in the event of a crash
- The ERS features easy to locate pull-tabs for rapid release of the cheek pads, thus minimizing risk of additional injury
- Includes a multi-angle, quick-release visor system that is flush over the helmet's shell to diminish the visor protrusion from the helmet thereby enhancing safety, doesn't use screws used in the visor for increased levels of safety and convenience to be easily adjusted and allows for ease of detachment from and reconnection to the helmet in order to facilitate helmet cleaning and maintenance
- Designed to offer exceptional ventilation to prevent overheating on warm track/trail days, with the inner air network channeling combining with the outer-shell's multi-air inlets and exhaust ports for effective ventilation and high levels of heat transfer exchange
- Hydration tube compatible channels are intelligently integrated into the helmet's cheek pads for convenience and performance
- Available in sizes listed; see Alpinestars helmet size chart on page 23 before ordering
- ECE 22.05 certified
