SIDE CASE AND TOP CASE MOUNTING KITS FOR HARLEY-DAVIDSON PAN AMERICA 1250

- Kenai Mount kits are made from 20 mm (3/4") tubing which is currently the largest tube diameter in the market
- This size tubing provides a strong mounting base to attach the Kenai side cases
- All mounts are powdercoated to provide a corrosion-resistant mounting surface
- Mount kits use a rear crossbar design to provide maximum rigidity and help resist damage in the case of the bike falling over on the trail
- A 36-liter case must be mounted on the exhaust side to keep the bike evenly balanced
- All mounting kits are designed specifically with brackets and mounting points to assure correct fitment to motorcycle

3521-0162

- All kits come with complete hardware and instructions for assembly
- See pages 104-105 of the 2022 Parts Europe Offroad Catalog for the full line of Moose Racing Kenai Series Adventure Luggage

ZEPPELIN TIRES

- Available in Enduro and Trail compound
- Engineered for mullet e-bikes; tread and casing provide grip and support at lower inflation pressure
- Knob spacing allows for even pressure and better wear making it the perfect blend of performance and longevity required on modern e-bikes
- Large volume e*spec design for e-bikes
- Heavy duty casing options
- High efficiency compound for a better wear rate and battery life
- Trail compound has single ply nylon casing, 72 TPI, tubeless insert, and nylon breaker under tread
- Enduro compound has dual ply nylon casing, 120 TPI, Apex EN, and nylon breaker under tread

GRAPPLER TIRES

- Designed to tame the most technical trails
- Generously spaced center tread digs into the chunder as well as distribute knob pressure evenly across the tire patch for ultimate grip on even the steepest slabs
- Intermediate knob generates a smooth transition into the hard biting side knobs
- Accordion sides allow for the side knobs to find their home in uneven, rough terrain
- For control through aggressive terrain, dry or wet
- Get high efficiency with the Endurance compound
- Enduro compound has dual ply nylon casing, 120 TPI, Apex EN and nylon breaker under tread

ICON**ECE 22.06****AIRFLITE™ MIPS OMNICRUX™**

- MIPS is now available in a Street helmet
- MIPS Brain Protection System can reduce harmful forces transmitted to the brain in certain types of impacts by allowing a slight uncoupled movement of the shell and liner during a crash
- Injection-molded polycarbonate shell for strength
- Multiple oversized intake and exhaust ports are strategically placed to keep you cool and comfortable, including four intake vents, MX-inspired chinbar vent and two exhaust ports that channel air between the comfort liner and the protective, energy-absorbing EPS foam liner
- Quick-change, fog-free outer FliteShield™ keeps debris away, while the internal, interchangeable DropShield™ keeps the sun in check with a flip of a switch
- Removable molded breath deflector and chin curtain
- Moisture-wicking Hydradry™ interior is fully removable and washable
- Both wind drag and weight are decreased by sculpting the traditional neckline of the Airflite™ to avoid jacket or suit interference

SM-5 HELMETS

- Constructed from a special lightweight and impact resistant thermo-injected polymer results in a significantly lighter helmet with increased structural strength and outer shell uniformity in two outer shell sizes
- Inner shell includes multi-density advanced EPS construction for optimal impact absorption performance in three sizes
- Features two concepts for impact energy management including a resin-coated inner shell surface that noticeably improves impact resistance and reduces linear acceleration values and an elastic joint to connect the helmet's inner shell and comfort liner to move independently in a crash scenario with an oblique impact, thereby spreading the energy forces from an impact, reducing rotational acceleration
- Uses Alpinestars Emergency Release System (ERS) consisting of removable cheek pads for safe, quick, easy and safe removal of the helmet by trained medical professionals/emergency responders in the event of a crash
- The ERS features easy to locate pull-tabs for rapid release of the cheek pads, thus minimizing risk of additional injury
- Includes a multi-angle, quick-release visor system that is flush over the helmet's shell to diminish the visor protrusion from the helmet thereby enhancing safety, doesn't use screws used in the visor for increased levels of safety and convenience to be easily adjusted and allows for ease of detachment from and reconnection to the helmet in order to facilitate helmet cleaning and maintenance
- Designed to offer exceptional ventilation to prevent overheating on warm track/ trail days, with the inner air network channeling combining with the outer-shell's multi-air inlets and exhaust ports for effective ventilation and high levels of heat transfer exchange
- Hydration tube compatible channels are intelligently integrated into the helmet's cheek pads for convenience and performance
- ECE 22.05 certified
