

EVOLUTION LINE COMPLETE EXHAUST SYSTEM

FOR YAMAHA YZ450F 23

- Tailor-made design fits within the limited space on the motorcycle and is the largest that the space will permit
- This allows increased sound silencing to mitigate the impact on the natural environment while also facilitating improved flow for the exhaust gases to make their way from the combustion chamber with as few restrictions as possible
- Constructed completely from lightweight, high-grade titanium alloys
- Different thicknesses in the sections ensure perfect protection and reduce overall weight, allowing the added strength created by the design to provide enhanced resilience in the most demanding conditions
- Increased response through the entire rev range
- A new profiled surface, which influences the deep, full sound, and an integrated resonance chamber for optimum performance and befitting the sound of an Akrapovic exhaust, are all designed to ensure this system meets FIM noise limits for competition
- A special technique was used for imprinting the logo on the surface for greater durability
- Simple plug-and-play installation with no remapping needed

NOTE: For closed course competition use only. Not intended for street use.
