

VANCE HINES

PRO PIPE 2-INTO-1 EXHAUST SYSTEMS

- Includes tuned length stepped headers with a highly efficient merge collector that feeds into the stepped 4 1/2" megaphone design
- Complete with header and collector heat shields, as well as a shield over the first step of the megaphone muffler body
- CNC-machined chrome-plated billet end cap
- Flat plane mounting panel for 12 mm O₂ sensors; mounting panel positions sensor deeper into exhaust stream, providing enhanced data feedback to the ECM
- Available in chrome or matte black finish

NOTE: Not for Softail models with Heritage-style saddlebags.

HOGTUNES

Hogtunes audio products are designed first and foremost for motorcyclists! All of their products are designed to deliver the ultimate listening experience when on the bike. From a long-distance cruise to cranking out the tunes at a local bike night, Hogtunes products has the audio setup that is right for you and your bike. And every product is manufactured to the highest quality standards so it will perform for years down the road.

WHOLE HOG 900 WATT AMP/SPEAKER KIT

- Complete 900 watt/6 speaker kit
- Designed to work with factory charging system – no upgrade required
- Includes fairing speakers, rear speakers, and 6,5" speakers with adapters for the fairing lower glove boxes
- Speaker adapters for fairing lower glove boxes give simple access to factory coolant tank
- Main portion of lower speaker adapter is gloss black to match factory inner fairing
- Includes Wild Boar Audio amp with special mounting plate (see note)
- All amps fit inside fairing, are bolt-in and 100% plug-and-play
- Amplifiers feature R.E.M.I.T Technology for excellent FM reception from a Class D amp
- Kit comes complete with all wiring and hardware to complete the installation

Note: A radio reflash may be required for best performance.

Note: Requires removal of CB module, if equipped.

PART #
4405-0534

DESCRIPTION
For 14-19 FLHTK/FLHTCUTG models

LOWER SPEAKER AMP KIT

- Features a plug-and-play, 300-watt 2-channel amplifier
- Wild Boar Audio 6,5" 4-ohm speakers
- R.E.M.I.T. technology for excellent FM reception from a Class D amp
- Includes side plate to mount amp inside fairing
- Includes adapters to properly mount speakers in lowers
- Easily added to bikes with Wild Boar Ultra Kit (PART #4405-0499) already installed

NOTE: A radio reflash may be required.

NOTE: Requires removal of CB module on FLH models (if equipped).

EXFIL-48 BACKPACK

- Designed by riders, for riders and packed with moto-centric features
- Bottom outside pouch folds out to reveal two rugged zipper compartments and wrench pockets
- Vertical compression straps keep things from bouncing around, secure the bag to luggage racks and can be used to add a bedroll or jacket to the outside of the bag
- Two large internal pockets that can be rolled up when not in use to increase interior volume
- Main interior compartment has a padded laptop sleeve with elastic retainers
- Top outer pouch has a fleece-lined pocket for delicate objects like glasses or a phone
- Center compression straps cinch to reduce bulk and shifting while riding
- Holds up to 48 355ml (12 US fluid ounce) cans
- Features ventilated mesh material over molded Bio-Foam inserts to allow for airflow
- Bottom portion of the bag is PVC-coated for water-resistance and easier clean up
- Constructed from 1600-denier/PVC outer shell with high-viz orange interior lining
- Dimensions: 29 cm W x 25,5 cm D x 45,5 cm T (11 1/2" x 10" x 18")

AIRHAWK™
COMFORT SEATING SYSTEM

AIRHAWK BIGSEAT™ BACKREST SOLO SEAT

- This is the next generation of the renowned Danny Gray Big Seat
- Seat has two inflatable air cells in the driver's portion
- The Airhawk's Comfort Seating System is now integrated into the seat
- The results are the custom design and production capabilities of Danny Gray with Airhawk's clinician-approved Dry Floatation® technology
- Airhawk's patented system eliminates painful pressure points and is fully customizable to each rider's contour
- Now, riders can enjoy the same benefits they've always known of Airhawk but have them built into a revolutionary seat
- With this patent-pending design, riders can also appreciate continuous airflow through the seat, reducing heat build-up and keeping them cool and dry; no hot seat
- An integrated pump and relief valve make it possible to adjust the air pressure while seated
- Optional pillion pad and backrests (sold separately, see 2019 Parts Europe FatBook) provide additional comfort for any length ride
- Small backrests measure 23 cm W x 12,5 cm T (9" x 5"); large backrests measure 25,5 cm W x 20,5 cm T (10" x 8")

For 70-99 custom Big Twin chassis, with alternator-style primary

CLARITY CAM COVERS

- Allows for viewing of the internal moving engine components
 - CNC-machined from billet aluminum
 - Hardware included
 - Available with chrome, Contrast Cut™ and Black Ops™ finishes
- The RSD Clarity Cam Covers contain two pre-installed Lexan® polycarbonate windows. These windows are very resistant to almost everything a motorcycle will be exposed to. However, extra care and preparation must be taken when installing the cam cover near the exhaust system. The Lexan® polycarbonate windows must be at least 5/16" away from the exhaust pipe to insure the temperature does not exceed the capabilities of the Lexan®. Additional clearance is recommended to preserve the optical clarity of the Lexan® window as well as reducing the amount of heat introduced to the engine from the exhaust. Take measurements when installing the exhaust system and make sure that the exhaust NEVER contacts the Lexan® windows, bolts or the aluminum cam cover. Lexan® is very durable but it must be treated just like any plastic and cannot come into contact with the exhaust pipes. The Lexan® windows, just like any plastic, will melt if in direct contact with the exhaust pipe. If the Lexan® windows have less than adequate clearance premature discoloration, cracking or melting may occur causing severe failure and/or possible injury to the rider. RSD recommends the use of "high pipes" or exhaust that runs above the cam cover, which eliminates any potential exhaust contact.

0940-1729

0940-1730

0940-1731

TECHNICAL GUIDELINES FOR CLARITY CAM COVER:

1. There must be at least 5/16" between the exhaust and the Lexan® windows, bolts and cover.
2. Absolutely no contact between the Lexan® windows, bolts or aluminum cam cover.
3. Do not use brake cleaner, acetone or any harsh chemicals during installation.
4. Use Plexus cleaner for cleaning. If any other cleaners are used, read the label to verify compatibility with Lexan®.

12-POINT CASE BOLT KIT

- Quality 12-point hardened stainless steel bolts with a "SHOW" corrosion-resistant finish
- Feature precision-rolled threads for optimum engagement, to prevent galling and promote more consistent torque loading
- Wide underhead flange design provides even load distribution for optimum sealing of surfaces – preventing leaks
- Top engine builders demand quality fasteners! Secure your engine with complete confidence
- Eliminates thread problems associated with chromed hardware
- Tensile strength rated @ 170,000 psi; superior and stronger than OEM and stronger than grade 8 fasteners
- Manufactured by ARP® to Feuling's® exact specifications
- Includes 14 case bolts and moly assembly lubricant for installation

PART #	DESCRIPTION
2401-1055	For 18-19 Softail

STATIC SEQUENTIAL SIGNAL MODULES

- Allows three separate LED lights installed on the rear of the bike to flash sequentially
- LEDs will also perform brake and running light functions
- Includes color-coded replacement rear fender harness and installation instructions
- Built-in load-equalizer prevents rapid flashing
- Static sequential flashing: When the turn signal button is pressed, the first LED will light up followed by the second and third before all three shut off and the sequence starts again

2050-0304
