KLOCK WERKS

The patented Flare™ windshield continues to be the industry standard for style and effective wind management for your V-Twin motorcycle. Popular for Baggers, Klock Werks is working hard to offer fitments of the Flare™ windshield for many additional V-Twin bikes including the increasingly popular early FXRP models.

FLARE™ WINDSHIELD

FLARE™ BILLBOARD DARK SMOKE WINDSHIELDS

- Modeled after the original Flare™ windshield for Baggers; now almost every rider can get all of the same performance and style with bolt-on ease
- Patented Klock Werks "hips" on each side create downforce for added stability and the "flip" at the top kicks air up and over the rider for a smoother, less turbulent ride
- Wind tunnel tested and designed to create the same downforce as the original Flare™ windshield
- Computer simulations and real-world testing have resulted in multiple windshield heights to ensure a windshield size that will work for almost any rider
- Windshield heights listed are measured from the top of the headlight opening to the top of the windshield
- Pre-drilled for easy mounting using stock windshield mounting kits
- For the following applications "Detachable" refers to the old-style H-D grommet/hinge style mechanism

NOTE: All measurements given are approximate.

The Klock Werks Flare™ Windshields are protected under United States Patents: D632235S, D586274S, D586275S, D633017S, D626046S, D633018S and also under International Patents: 324093, 324094, 325192.

OIL FILTER ADAPTER

- Installs between the oil filter landing and the oil filter for easy oil supply access for installing an oil cooler (not included)
- Machined from anodized billet aluminum
- Flows oil through oil cooler full-time, with no oil bypass
- Sweeping internal flow passages produce optimal flow characteristics
- ProLine swivel fittings for easy oil plumbing
- HyperFlow technology balances performance and flow
- NPT port and plug for optional installation of sending unit or switch

PART #	DESCRIPTION
0713-0253	For 92-99 Evolution Big Twin (carb), L84-21 XL models w/ front-mount spin-on oil filters

VISCOSITY REGULATED FLOW ACTUATOR KIT

- Replaces thermostatic actuator element in offset oil filter adapter PART #0713-0031 with new Viscosity Regulated Flow (VRF) actuator
- After filtration, the oil may either travel to the oil cooler or bypass the oil cooler, according to the built-in Viscosity Regulated Flow (VRF) plug function - cold, viscous oil will bypass the oil cooler, speeding warmup to standard operating temperature; as the engine reaches operating temperature and oil reaches optimal viscosity range, the VRF plug will keep the adapter's bypass hole closed, sending hot, filtered oil to oil cooler, and delivering cool, clean oil to engine
- Includes viscosity regulated flow plug, spring, button head with O-ring and gaskets

PART #	DESCRIPTION
0713-0254	For 95-17 Big Twin models (except 14-17 Dressers)
