FUELPAK FP3

- The Fuelpak FP3 has revolutionized fuel management for all new Harley-Davidson models using the HD LAN system
- Connecting wirelessly by Bluetooth® to any iPhone or Android smartphone, Fuelpak FP3 uses Flash technology to recalibrate engine parameters and mapping for exhaust systems and other performance upgrades downloaded from the expansive library of calibrations developed by Vance & Hines
- Also standard for the Fuelpak FP3 is an Autotune feature, making use of all factory sensors to add another layer of precision tuning for specific requirements, whether tuning for unique components or different grades of fuel

- With the Fuelpak FP3 module plugged in, Live Sensor Data can be viewed through the smartphone to display speed, rpm, cylinder head temperature, voltage, gear selection and other vital information
- Features smartphone app user interface
- Displays live sensor data; PART #1020-2538 excludes fuel economy, average fuel economy, gear and odometer

FUELPAK FP4

- Made of polycarbonate plastic/Bluetooth® low energy, FP4 hardware smaller and thinner than the previous generation electronics product
- Unit's LEDs have been simplified so the rider knows exactly what is happening between the FP4 and the rider's motorcycle
- Built from the ground up, Android and iPhone apps feature a new rider interface and are easier to navigate and use than ever before
- Live Data in the FP4 app has been upgraded with the whole new look and an additional gauge to track more crucial data while riding
- All-new Performance Data feature allows rider to record their ride, look at all available sensors in the created chart
- All necessary hardware and instructions included
