BRAKE PADS

- Sintered metal brake pads are the OEM-type replacement pads for most bikes from the late 1970s to the present
- Sintered metal brake pads are second-to-none in their stopping abilities and wear characteristics while still providing excellent reduction in noise and dust
- Organic aramid fiber pads are OEM-type replacement brake pads for 1970s and earlier models
- Organic aramid fiber pads are the perfect choice for polished or chromed rotors and billet steel rotors
- All compounds of Drag Specialties brake pads are asbestos, nickel and lead free

NOTE: If you are using aftermarket billet steel rotors, it is recommended you use our organic aramid fiber brake pads to avoid damage to them. Sintered pads are not recommended for billet steel rotors as the pad material is too aggressive for those rotors.

REAR BRAKE PADS

DOUBLE-H SINTERED METAL PADS

- Feature the HH friction rating, the highest in the industry
- Provide maximum brake effect and last twice as long as organic pads

EXTREME PERFORMANCE SINTERED METAL

- The newest sintered metal brake pad fusion technology
- Has the highest friction rating available in a pad - 0,6 - for strong, fade-free stopping power
- No lead, iron or steel additives; no more rotor outline etching or rotor stiction
- Super-fast bed-in; full friction after 10 to 15 race stop uses
- Great heat cycle ability; pads cool after extreme use and perform just as strong the next day

QUICK CONNECT BRAIDED UPPER CLUTCH CABLES

- Quick Connect braided upper clutch cables economically replace the OE upper cable section on select models
- Easily and quickly connects to the existing lower cable section
- Significantly reduces installation time, plus there's no need to drain transmission fluid
- Unique design reuses OE cover and housing parts
- Stainless steel, black/chrome or black/black handlebar fittings
- Low-effort, high-efficiency cable design meets or exceeds OE specifications for fitment, construction and endurance
- Upper cables are made with anti-friction inner liners and are factory lubricated for smooth, consistent, long lasting operation
